                                    m na
                                                त ta
                                                                   द da
                                                                           ध dha
    प pa फ pha
                    व ba भ bha
                                    \mathbf{H} ma
                                                 य ५०
                                                        ₹ ra
                                                                  <del>ल</del> la
                                                                           व ca or wa
    श्र ईव
              u sha
                         स इय
                                    7 ha
                                                ड ra
                                                        ढ rha
                                                                  \mathbf{z} la
                                                                          ऋह् lha
```

Visarga (:) is represented by h, thus क्रमण: kramaśah. Anuswāra (') is represented by m, thus सिंह simh, वंग vamś. In Bengali and some other languages it is pronounced ng, and is then written ng; thus राज bangśa. Anunāsika or Chandra-bindu is represented by the sign over the letter nasalized, thus में mē.

B.—For the Arabic alphabet, as adapted to Hindostani—

```
a, etc.
                               d

                                           z ز
               ķ
p
              \underline{kh}
                                              <u> 21ı</u>
                                                                          when representing anunāsika
                                                                            in Dēva-nāgarī, by over
                                                                            nasalized vowel.
                                                                           w or v
                                                                           h
                                                                          y, etc.
```

Tanwīn is represented by n, thus i, fauran. Alif-e maqsūra is represented by \bar{a} ;—thus \dot{a} $\dot{$

In the Arabic character, a final silent h is not transliterated,—thus banda. When pronounced, it is written,—thus banda.

Vowels when not pronounced at the end of a word, are not written in transliteration. Thus बन ban, not bana. When not pronounced in the middle of a word or only slightly pronounced in the middle or at the end of a word, they are written in small characters above the line. Thus (Hindī) देखता dēkhatā, pronounced dēkhtā; (Kāshmīrī) च्ह क्ष्रिक क्षेत्र, कार्क क्षिक क्ष्रिक क्

VOL. VIII, PART II.

C.—Special letters peculiar to special languages will be dealt with under the head in languages of important instances he languages concerned. In the meantime the following more important instances v be noted:—

(a) The ts sound found in Marāṭhī (च), Paṣḥtō (ूं), Kāshmīrī (ू, च), Tibetan (\bar{z}), and elsewhere, is represented by \underline{ts} . So, the aspirate of that sound is represented by tsh.

(小) The dz sound found in Marāthī (南), Pashtō (南), and Tibetan (南) is repre-

sented by \underline{dz} , and its aspirate by $\underline{dz}h$.

(c) Kāshmīrī ্ (অ) is represented by ñ.

(d) Sindhī ع, Western Panjābī (and elsewhere on the N.-W. Frontier) بن, and Pashto i or are represented by n.

(e) The following are letters peculiar to Pashto: -

t : t : t or dz, according to pronunciation; d: r: t or g, according to pronunciation; in sh or kh, according to pronunciation; i or in.

(/) The following are letters peculiar to Sindhi:-

1).- Certain sounds, which are not provided for above, occur in transcribing rguages which have no alphabet, or in writing phonetically (as distinct from translicating) languages (such as Bengali) whose spelling does not represent the spoken sounds. a principal of these are the following:-

ii, represents the sound of the a in all.

a in hat.

e in met. 1',

o in hot. 23

é in the French était. ,, e. "

o in the first o in promote. 0. ö in the German schön.

Ö mühe.

ü in the ii, th in think.

11. ,, th in this. ,, dh,

The semi-consonants peculiar to the Munda languages are indicated by an apos-

rophe. Thus k', t', p', and so on. E.- When it is necessary to mark an accented syllable, the acute accent is used. Thus in (Khōwār) desistai, he was, the acute accent shows that the accent falls on the irst, and not, as might be expected, on the second syllable.

INTRODUCTORY NOTE.

I am personally responsible for the preparation of both parts of this volume. It has been built up by degrees, some of it having been prepared and put in type several years ago, while other portions have been completed quite lately. Hence, perhaps, the work will here and there appear to be unequally proportioned. I have done my best to avoid this, and, so far as the Dardic languages in this part are concerned, the disproportion is mainly due to the fact that we know so little about many of them. Some of the languages under this head are here dealt with for the first time, and what is written regarding them was collected with no little difficulty. The most striking example of this is Wası-veri, a language spoken in the heart of Kaııristan. The materials are entirely based upon the speech of one illiterate Presun shepherd who was found after long search, and who knew no language but his own.

The volume concludes with a brief account of the Burushaski language of Hunza-Nagar. This is in no way related to the Dardic languages, or, in fact, to any other form of speech dealt with in this Survey. Its inclusion here is due to geographical considerations, and also to the fact that the ancestors of its speakers appear to have once occupied the whole tract of country in which Dardic languages are now spoken.

THE DARDIC OR PISACHA LANGUAGES.

INTRODUCTION.

The word 'Dard' has a long history, and the people bearing the name are a very ancient tribe. They are mentioned by Herodotus, though Name of Sub-family. not by name, and are the Daradrai of Ptolemy, the Derdai of Strabo, the Dardæ of Pliny and Nonnus, and the Dardanoi of Dionysios Periêgêtês. In Sanskrit literature they are spoken of as 'Darada' or 'Darada,' which name is of frequent occurrence not only in geographical works, but also in the epic poems and in the Purānas. Kalhana, in his History of Kashmīr entitled the Rāja-taranginī, often refers to them under the name of 'Daradas' or 'Darads,' and mentions them as inhabiting the country where we now find the Shins who at the present day are still called Dards. To the Greek and Roman writers, the word had a wider signification and included not only the predecessors of the Shins, but also the people whose seat was in the country that we now call Chitral. In other words, under the name of the Dard country, they included the whole mountainous tract between the Hindukush and the frontiers of India proper. Accordingly, at the present day this tract is known as 'Dardistan,'—a conventional and convenient name, though, as it includes much country not occupied by Dards proper, not strictly accurate.3 Following the example of the extended connotation of the word 'Dardistan,' it is convenient to give the general name 'Dardic' to all the Aryan languages spoken in this tract.

As we shall see in the following pages, this tract was once inhabited by tribes whom. Sanskrit writers grouped together under the title of 'Piśācha.' Clear traces of the language of these tribes are to be found in the modern languages of the locality, and for this reason, in earlier volumes of this Survey, I have called these modern tongues the This name is eminently suitable, and is more accurate than 'Piśācha languages.' 'Dardic,' but some of the speakers of these languages take exception to it on the ground that, in Indian mythology, the word 'Piśācha' was also used to connote a cannibal demon, and it must be admitted that this was the most common acceptation of the word. In such circumstances, it is useless to explain that a tribe speaking a Piśācha language is not necessarily of Piśācha descent. In some cases, indeed, it would be easy to prove But the argument is not accepted, and objections are raised to the use of the reverse. the name 'Piśācha.' I therefore, in this volume, abandon, so far as I can, the use of this word as a name for this sub-family of languages, and employ the name 'Dardic' instead.

¹ iii, 102ff., in the famous description of the gold-digging ants.

² See McCrindle, Ancient India, p. 198.

³ For the name 'Dardistan,' cf. Leitner, Dardistan, Lahore, 1877; Biddulph, Tribes of the Hindoo Koosh, Calcutta, 1880, pp. 155ff.; and Drew, The Jummoo and Kashmir Territories, London, 1875, pp. 393ff.

This Dardic, or Piśācha, sub-family of Aryan languages is spoken almost entirely beyond the boundaries of British India proper, on the North-Western Frontier. It includes the following languages:—

A.—Kāfir Group,—

- (1) Bashgalī.
- (2) Wai-alā.
- (3) Wasi-veri or Veron.
- (4) Ashkund.
- (5) Kalāshā-Pashai Sub-group, viz.:—
 - (a) Kalāshā.
 - (b) Gawar-bati or Narsātī.
 - (c) Pashai, Laghmānī, or Dēhgānī.
 - (d) Diri.
 - (e) Tīrāhī.

B.—Khō-wār, Chitrālī, or Arniyā.

- C.—Dard Group, i.e. the Dard languages, proper,—
 - (1) Shinā.
 - (2) Kāshmīrī.
 - (3) Köhistänī.

Specimens of most of these will be found below. No specimens could be obtained of Ashkund, a Kāfir language which is said to resemble Bashgalī; of Dīrī, the language of Dīr; or of Tīrāhī, of the former inhabitants of Tīrā in the Afrīdī country, who are now settled in Nigrahār. Nothing whatever is known about Ashkund. Short vocabularies of Dīrī and Tīrāhī have been given by Leech on pp. 783 and 784 of Vol. vii (1838) of the Journal of the Asiatic Society of Bengal. These two languages are provisionally placed in the Kalāshā-Pashai Sub-Group.

The first four languages of the Kāfir Group are all spoken in Kafiristan. Bashgalī and Wai-alā are closely connected, while Wasī-veri shows important points of difference from these two. In some particulars (e.g. the frequent change of d to l) it shows striking points of agreement with East Eranian languages. As for the languages of the Kalāshā-Pashai sub-group, they have certain points of agreement amongst themselves, and with the other known Kāfir languages, but they have all fallen under the influence of their respective neighbours. Pashai is spoken on the north side of the Kabul river, immediately to the south of Kafiristan, and is affected by Paṣḥtō. Kalāshā is spoken in the country between the Bashgal valley and Chitral and is affected by the Khō-wār immediately to its east. Gawar-bati, spoken further south, on the left bank of the Chitral river, is not only affected by Khō-wār, but also by the neighbouring Kōhistānī.

Khō-wār is the language of the Chitral country and of the neighbourhood. While in all respects a most typical Dardic language, it occupies a somewhat independent position in regard to the others,

¹ Dr. Hoernle has suggested to me that we have a relic of the name 'Pisacha,' in the word 'Pashai.' Phonetically, this is quite possible.

although it has some points in common with the Kāfir Group. From the Dard languages it is separated by great mountain barriers, and has little directly in common with them. Of all the Dardic languages, it is the one most nearly related to the Eranian Ghalchah languages spoken north of the Hindu Kush.

The Dard group includes the languages of Dardistān proper, in its narrowest sense;—that is to say, of the Shiṇā-speaking parts of Gilgit, Gurez, Chilas and the Indus and Swat Kohistan. It does not include the Hunza-Nagar country to the north of Gilgit or the Chitral territory to its west. With the exception of Kāshmīrī, the languages belonging to the Dard Group, proper, are at the present day almost entirely confined to this tract.

Shiṇā is the truest example of the Dard languages proper. Its standard form may be assumed to be that spoken round Gilgit, but it has several dialects, including those of Astor, Gurez, and Chilas, and the so-called 'Brōkpā' of Dras and Dah Hanū. The last named is spoken by an isolated colony of Shins on the Eastern border of Baltistan, and is much mixed with Tibetan.

Kāshmīrī is the language of the Valley of Kashmīr and of the neighbouring valleys. Although it has a Dard basis, it has come to a large extent under the influence of the Indo-Aryan languages spoken to its south. It is the only one of the Dardic languages that has a literature.

Köhistänī is the original language of the Indus and Swat Kohistans, and, though the speakers are Shins, it is being rapidly superseded by Paṣḥtō. In the Swat Kohistan is now spoken only by scattered tribes. It is divided into several dialects, of which Gārwī, Tōrwālī, Chilīs, and Maiyā are described in this Survey. These dialects are all closely connected with Shinā, but, being on the Indian frontier, are much mixed with Paṣḥtō and Indian forms, and are now no longer pure examples of Dard speech.

Except for Shiṇā and Kāshmīrī no information is available as to the number of speakers of the Dardic languages. In the Census of 1911, 21,562 speakers of Shiṇā were recorded, nearly all being inhabitants of the Gilgit country, but no enumeration was made in several tracts in which Shiṇā is the vernacular. Kāshmīrī is estimated on p. 235 below to be spoken by 1,195,902 people.

To readers of Indian literature the Piśāchas are well-known. They are described as a clan of Demons, of terrific appearance and brutal character. The name is said to imply that they were eaters of raw flesh—'Ωμοφάγοι.¹ Various localities are mentioned as their habitat, some Sanskrit writers placing them in the North-West, and others in the Vindhya Hills. A language, which was evidently a real form of speech and not an artificial gibberish, was attributed to them, and named Paiśāchī. It was classed as one of the Prakrits, i.e. as a debased Sanskrit, and to this we owe brief and incomplete accounts of it in the works of ancient Indian Grammarians. A sub-dialect of it was known as Chūlikā-Paiśāchikā, which carried the characteristic peculiarities of Paiśāchī to an extreme.

This Paiśāchī was not really a Prakrit, in the usual sense of the word. It was a very ancient language, a sister, and not a daughter of the form of speech which ultimately

VOL. VIII, PART II.

¹ Many of the modern Dardic legends are based upon reminiscences of cannibalism. See an article by the present writer on p. 285 of the *Journal* of the Royal Asiatic Society for 1905.

developed as literary Sanskrit. As compared with Sanskrit, its principal peculiarity is the hardening of soft letters. Where Sanskrit has $D\bar{a}m\bar{o}dara$, Paiśāchi has $T\bar{a}m\bar{o}tara$ thus closely following the Welsh pronunciation of English in the days of Shakespeare. Sir Hugh Evans says 'putter' for 'butter' just as in Chūlikā-Paiśāchikā 'a boy' is $p\bar{a}laka$, not $b\bar{a}laka$.

Professor Pischel, in his Prakrit Grammar, has maintained that this Paiśāchī was the language of the country between the Hindu Kush and the present Indian frontier, in which the Kāfir speeches, Khō-wār, and Dard are now the vernaculars. The researches of the present writer have shown that this is almost certainly the case, and that therefore this tract was the home of the ancient Piśāchas, a wild tribe, owing no allegiance to, and having but a distant connexion with the Aryan conquerors of India. These Piśāchas were not confined to the transfrontier highlands. They sent colonies down the Indus, and Sanskrit writers mention their existence in Kēkaya, or the western Panjab, and in Vrāchada, or Sindh. It has been seen, when dealing with the languages of these countries (Lahndā and Sindhī), that evident traces of this Paiśāchī influence exist at the present day. From thence they spread into what is now the Bhīl country, and also, perhaps, down the coast as far as Goa.¹

The ethnic relationship of the inhabitants of these transfrontier highlands, whom who were the Dards? we now call Dards, has been frequently discussed.

The first to attack the question was Trumpp.² He says, 'we find that the races of Dardistān are of Aryan origin, and speak dialects which, on nearer investigation, will be found to have gone through the same process of development (or decomposition, as it might be called), as their sister-tongues in the plains of Upper India.' In other words, Trumpp claimed that the Dard tongues (meaning the Dardic tongues generally, and not the true Dard languages), as a whole, belong to the Sanskritic family of Aryan languages. Whether Trumpp's conclusion is correct or not, many of his arguments are based on wrong premises, for he continually cited, as proofs of the Indian origin of Dard words, closely corresponding words in Paṣḥtō, which he considered to be a Sanskritic language like Pañjābī or Sindhī. As a matter of fact it is now known that Paṣḥtō is not a Sanskritic language, but is a member of the Eastern branch of the Eranian family.

Shaw, in his articles on the Pāmīr Ghalchah languages, points out the close resemblances which exist between them and the Dard speeches. At the time that he wrote, it had not yet been established that the Ghalchah languages belonged to the East Eranian stock. He says, 'it seems probable that the separation of the Dards from the Ghalchahs took place at a time when there still existed a spoken tongue neither distinctly Indian nor distinctly Persian, but containing the germs of both. If the Dardu immigration from the north had been a late one, (say at the time of the Yuechi or of the Musalmān invasion), at a time when the language spoken in the plains of Bactria had become almost as strongly differentiated from that of India as at the present day, it is not easy to see how the speech of the Dards could have taken its development on Indian lines, as it has done,

¹ It must be explained that this view as to the home of the Piśāchas has been combated by Professor Sten Konow, who maintains that it was in Central India. See the articles quoted in the List of Authorities. I confess that he has failed to convince me.

² Calcutta Review, Vol. liv, 1872, pp. 223 and ff.

³ Journal of the Asiatic Society of Bengal, Vol. xlv, 1876, pp. 139ff.

and vice versá. The fact of the tongues under notice still retaining so much mutual resemblance, together with a local connexion, would imply that they were descended directly from one and the same mother; while the fact of their belonging to the opposite families shows that we must not seek their common parentage either in the Indian or in the Persian tongue, but in an early Indo-Eranian mother-dialect, which alone would be capable of giving birth to two such children from the same womb. To put the matter in other words, it would seem that the Ghalchah and Dard nations must have lived each a life of its own, distinct from that of any other branches of the Arvan race and changing less fast than they, ever since they emerged from the oneness of the Indo-Eranian stem. They are true sisters, and yet they belong to rival families, hence they must be of that generation in which the split occurred. In any lower generation they would either not be sisters, or, if they were, they would belong to the same branch of the family.' It will be seen that Shaw also considers that the Dards belong to the Indian family of Aryan languages, and not to the Eranian. Further on he suggests that the Dard languages, though belonging to the Indian branch, are not Sanskritic. There is a linguistic gap between them and their true Sanskritic neighbours, the languages spoken in the outer Himalayas, which, he says, may be supposed to represent a reflex wave of migration sent up from the plains of India. The gap would in that case represent 'the whole progress in language made between the time when the Indo-Aryans were still a mere Central Asian tribe with incipient peculiarities of speech, and that, when their great migration accomplished, they were in possession of their Sanskrit form of language.' It will be seen that Shaw has, in many respects, anticipated the conclusions of the present writer.

Biddulph¹ would divide the tribes of the Hindu Kush into three groups. The first consists of those speaking the Ghalchah languages, the second of the Khō of Chitral and the Kāfir tribes, and in the third group he would class the 'Shins, the Gaurō, Chilīs, and other broken tribes of the Indus Valley, the Bashgharik (i.e. Gārwī) and Tōrwālāk of the Swat and Panjkora Valleys, and the broken tribes of the Kunar Valley between Chitral and Kunar. One point which is worthy of note in regard to the languages of these three groups is, that while those spoken by the Ghalchah tribes, that is, those belonging to the first group, appear to be sprung from ancient Persian (Zend), those of the third group show greater affinity with the Sanskrit. * * * * * * The Khō-wār language shows affinities with those of both groups, and will be found, I believe, to constitute an intermediate link between the two.'

Tomaschek² devotes a few pages to discussing the characteristics of the Dard languages, and concludes, 'In spite of several coincidences in vocabulary, we should be careful not to count the Dard languages among those belonging to the Hindu Kush. The verbal flexion rests on principles similar to those which we meet in Pañjābī, Sindhī, and Kāshmīrī; and in its complicated formations, especially in the distinction between the masculine and feminine genders, offers a distinct contrast to the very sterile conjugation of the western dialects. The Shins and Dards have

1 Tribes of the Hindoo Koosh, p. 158.

² Sitzungsberichte der philosophisch-historischen Classe der Kaiserlichen Akademie der Wissenschaften, Vol. xcvi (1880), pp. 735 and ff. But on one point he is wrong. It is now known that some of the Ghalchah languages do distinguish gender.

evidently come to their present northern abode from the south, and through Kashmir, and have never lost their connexion with Gandhāra or the Indians of the Panjāh.

With reference to the above remarks, it should be remembered that Trumpp, Shaw, and Tomaschek, alike, were limited as regards their information to what they could gather from Leitner's *Dardistan*, a book which at the time it was published was of great value, but which has since been superseded by the much fuller work of Biddulph. The present Survey places further, if still incomplete, materials in the hands of experts; and it is now possible to enunciate a new theory based on more secure foundations.

All the above discussions necessarily depend on merely philological arguments. In questions of ethnology such considerations can form only a weak support, but in the present case no other materials are available. Philology, however, may be taken with more confidence as a guide (though not with entire trust) in the case of tribes whose languages are morient. When we find small tribes clinging to a dying form of speech, surrounded by dominant languages which have superseded the neighbouring tongues, and which are beginning to supersede this form of speech also, we are fairly entitled to assume that the dying language is the original tribal one, and that it gives a clue to the racial affinities of the tribes who speak it.³

This is the case with the Dardic languages. They are all being gradually super-seded by Paṣḥtō and by Indo-Aryan forms of speech. That they have been preserved at all through so many centuries can only be due to the inhospitable nature of their home, and to the hostile character of their speakers. Nevertheless, in stating the result of my own researches, I merely put it forward as a hypothesis which is consistent with the state of affairs presented by philology, and not as one that is necessarily true.

The country in which the Dardic languages are vernacular has Eranian languages (especially Pashtō and Ghalchah) to its north-west, west and south-west, Indo-Aryan (i.e. Sanskritic) languages to its south and south-east, various forms of Tibetan to its east, and to its north-east the isolated unclassed non-Aryan Burushaskī of Hunza-Nagar. Of these, Tibetan has affected only Shina, the most eastern of the Dard languages, and that. apparently only in modern times, by adding words and idioms as an overlayer. With Burushaski the case is the reverse. Over the whole of Dardistan there is an underlayer of Burushaski words, such as those for 'iron,' 'ass,' 'woman's hair,' and so on. These words are found in localities far from the present habitat of Burushaskī, and the inference is that, before the arrival of the Piśachas, the whole of Dardistan was once inhabited by the ancestors of the present owners of Hunza and Nagar. It is not impossible that they were identical with the 'Nagas,' who, 'according to Kashmir Mythology, were the aboriginal inhabitants of the Happy Valley before the arrival of the Piśachas, and after whom every mountain spring in Kashmir is named. Be that as it may, at the bottom of all the Dardic languages, there is a small, and quite unimportant, element of Burushaski.

According to Biddulph, op. laud., pp. 159 and ff., the Shins originally migrated from the north, viā the Chitral valley, and settled in the southern valleys of the Himālaya. They then moved northwards up the Indus valley to their present home, which possibly happened at the time of the Musalmān irruption into India. This agrees with the linguistic phenomena. It should be noted that if the Shins went north along the Indus, they could not have passed through Kashmir. Tomaschek could not have seen Biddulph's work which appeared the same year as his article.

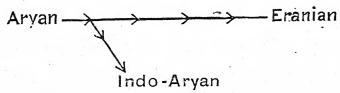

That this is not claiming too much for philology may be allowed from the fact that it was first suggested to mely so distinguished an ethnologist as the late Sir Herbert Risley.

Paṣḥtō, Ghalchah, and the neighbouring Indian languages are all of Aryan stock, the first two belonging to the Eranian and the third to the Indian branch of that family. That the Dardie languages are also of Aryan stock is absolutely certain, the question is whether we are to class them as Eranian, or as Indian, or as forming a separate third branch by themselves. I believe that the last is the only classification which we are at liberty to adopt.

It would be impossible to discuss the question in detail in the present pages. It involves hundreds of minute comparisons of idioms, words, and even letters which would here be out of place. Those who are interested in the arguments must be referred to the present writer's work *The Piśāca Languages of North-Western India.*¹ For our present purposes it must suffice to give a general summary of the results arrived at.

It is well known that there was in prehistoric times a language, known as Aryan, spoken by the common ancestors of the Eranians and of the Indo-Aryans in the oasis of Khiva.² Thence they appear to have followed up the course of the Oxus and Jaxartes into the high-lying country round Khokand and Badakhshan, where a portion of them separated from the others, marching south, over the western passes of the Hindu Kush into the valley of the River Kabul, and thence into the plains of India where they settled, as the ancestors of the present Indo-Aryans. At that time the common Aryan language possessed certain definite characteristics which were brought into India by these invaders, and which have in process of time developed, on Indian lines, into the characteristics of the modern Indo-Aryan Vernaculars.

The Aryans who remained behind on the north of the Hindu Kush and who did not share in the migration to the Kābul Valley spread eastwards and westwards. Those who migrated to the east occupied the Pamirs and now speak Ghalchah. Those who went westwards occupied Merv, Persia, and Balochistan, and their descendants now speak those languages which, together with the Ghalchah languages, are classed as Eranian. At the time of the parting of the ways, when some of their number took the first step in their march towards India, the Aryans, as we have seen, spoke a common language but with the Eranians this language developed on different lines, so that at the present day the languages of the Pamirs and of Persia are very different from those of India. It will be simplest if we take the Eranian languages as the direct descendants in a straight line from the ancient Aryan³ stock, while the Indo-Aryan languages represent a branch which issued from the parent stem at a very early date. We might represent the state of affairs graphically as follows:—

The Dardic languages possess many characteristics which are peculiar to themselves,⁴ while in some other respects they agree with Indo-Aryan,⁵ and in yet other respects with

¹ Published by the Royal Asiatic Society, 1906.

² The original home, whence the Aryans separated from the ancestors of other Inco-European languages, is believed to have been the steppe-country of Southern Russia.

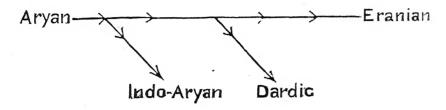

^{3 &#}x27;Eran' is really the same word as 'Aryan.'

⁴ e.g. the change of medial t to r, of tm to t, and the retention of a short vowel before a simplified compound consonant.

^{5 &#}x27;e.g. the preservation of sm, as against the Eranian change to hm.

Eranian languages.¹ They do not possess all the characteristics either of Indo-Aryan or of Eranian. We must assume that at the time when they issued from the Aryan language, the Indo-Aryan language had already branched forth from it, and that the Aryan language had by that time developed further on its own lines in the direction of Eranian; but that that development had not yet progressed so far as to reach all the typical characteristics of Eranian, and still retained some (but not all) the characteristics which it possessed when the Indo-Aryans set out for the Kābul Valley.

This may be represented graphically by the following diagram:—

The Indo-Aryans crossed the Hindu Kush by the western passes, and, when they entered India by the Kabul Valley route, left what is now Chitral and Gilgit (i.e. Dardistân) on their left. Immediately to the north of Chitral over the Hindu Kush, communicating by the Dora and one or two eastern passes, lie the Pamirs, the home of the Ghalchah languages. Now, nearly every Eranian characteristic possessed by the Dardie is shared by the Ghalchah languages, while, at the same time, these very Eranian Ghalchah languages have a few points in which they follow the Dardie languages in agreeing with Indian as against Eranian. We are thus led to the conclusion that the ancestors of the Dardie tribes entered their present habitat by the Dora and neighbouring passes. The fact that the Dard languages proper are more nearly related to those of the Käfir Group than either of these is related to Khō-wār, further suggests that the latter represents the language of a later body of Dardie invaders, akin to the earlier ones. Khō-wār, though undoubtedly Dardie in character, possesses more points in common with Ghalchah than the others, and separates the Kāfirs from the Dards proper by a wedge of language presenting a greater number of distinctively Eranian features.

Once settled in their mountainous habitat the language of the Dardic tribes developed on its own lines and gradually acquired those characteristics which I have said are peculiar to it and are foreign to both Indian and Eranian. No one desired their land, and except for an occasional visit from a conquering army on its way to India, such as those of Alexander the Great (B.C. 327) or Timūr (A.D. 1398) they have been left severely alone. The Sanskrit Grammarians writing at a time when, in India, the Prakrits were in flourishing existence bore record to the astonishing way in which Paiśāchī had retained forms which in Prakrit had long passed into new phonetic births, and the same is the case at the present day. The modern Dardic languages still possess, almost unaltered and in common use, words which in India are hardly found except in Vedic Sanskrit.²

c.g. the preservation down to modern times of sht and st and the change of sht to (s)s. So the change of sp (Indian shp) to shp and sh, not to pph.

² Compare Vedic krikavāku, Kalāshā kakawak, a fowl. Such a survival would be impossible in the modern Indo-Aryan-vernaculars.

Notice may be drawn to the fact that eminent scholars have drawn attention to remarkable coincidences between the Dardic languages and the language of the European Gipsies. We know that the Gipsies did come from India, and there appears to be little doubt that their original Indian language was some form of Dardic.

I have said that the Piśāchas sent out colonies down the Indus as far as Sindh. In the middle of the third century before our Era the Emperor Asōka of Pāṭalīputra spread his famous rock inscriptions over the length and breadth of India. These inscriptions were written in the vernacular of his time, and it need not surprise us that the one at Shāhbāzgaṛhī in the modern Yūsufzai country, close to, if not actually in, Dardic territory contains many linguistic forms which are related to Dardic.²

Except Kāshmīrī, none of the Dardic languages have any written character, or possess any literature. Dr. Leitner has collected many songs in different Dardic languages, and has published them in his Dardistan and other publications.

AUTHORITIES-

The following are the works in which the Dardic languages (under various names) are discussed as a whole:—

Separate Lists of Words and Phrases are given in the proper places for each group and sub-group of the Dardic languages. They are too numerous for all to be combined in one table, and accordingly, for the purpose of easy comparison, I here give a similar list combining a few typical languages of each group, -viz. Bashgalī, Kalāshā, and Veron, for the Kāfir Group; Shiṇā, Kāshmīrī, and Kōhistānī, for the Dard Group; and, lastly, Khō-wār.

THE KAFIR GROUP.

Concerning few languages near India did we know till lately so little as we did regarding the dialects of Kāfiristān. Our knowledge had not advanced owing to the fact that for long it was assumed that there was one Kāfir tongue which was called Kāfirī. In later times it was assumed that because there were two main groups of Kāfirs, viz. the Siāh-pōsh, or Black-clothed, and the Sufēd-pōsh, or White-clothed, there were, therefore, two languages in Kāfiristān corresponding to these two groups. Dr. Leitner, by his Kalāshā Grammar and Vocabulary, and Colonel Biddulph by his Bashgalī Vocabulary, helped forward our knowledge regarding the speech of the tribes of Eastern Kāfiristān, and after that the progress of our information regarding the details of the language or languages of that country was suspended till the publication of Colonel Davidson's Bashgalī Grammar in 1902. Sir George Robertson, in his Káfirs of the Hindu-Kush (London, 1896), gives us, on the other hand, some important information (pp. 74 and ff.) regarding the general language-distribution of the country.

It appears that the Siāh-pōṣh Kāfirs, who, roughly speaking, people the northern half and the East of Kāfiristān, all speak various dialects of one language, of which Baṣhgalī, the speech of the people inhabiting the valley of the Baṣhgal River, may be taken as the type. All the tribes who wear the dark-coloured raiment seem at once to understand each other, and to be able to converse fluently and without hesitation. The Sufēd-pōṣh Kāfirs occupy the centre and the south-east of the country, and consist of three tribes, the Wai, the Prēsun or Veron, and the Aṣhkund. The first two of these speak different languages which are mutually unintelligible, and both of which are unintelligible to the Siāh-pōṣhīs. These tribes cannot converse without the aid of interpreters. Regarding the Aṣhkund, Sir George Robertson says, 'there is another important tribe called the Aṣhkun (sic), of whom, however, it was most difficult to get any information. They are probably allied to the Wai.' The Wai inhabit the south-east of Kāfiristān, south of the junction of the Baṣhgal with the Qāṣhqār River. The Prēsuns inhabit an inaccessible valley in the centre, and the Aṣhkund lie to the south-west of the Prēsun.

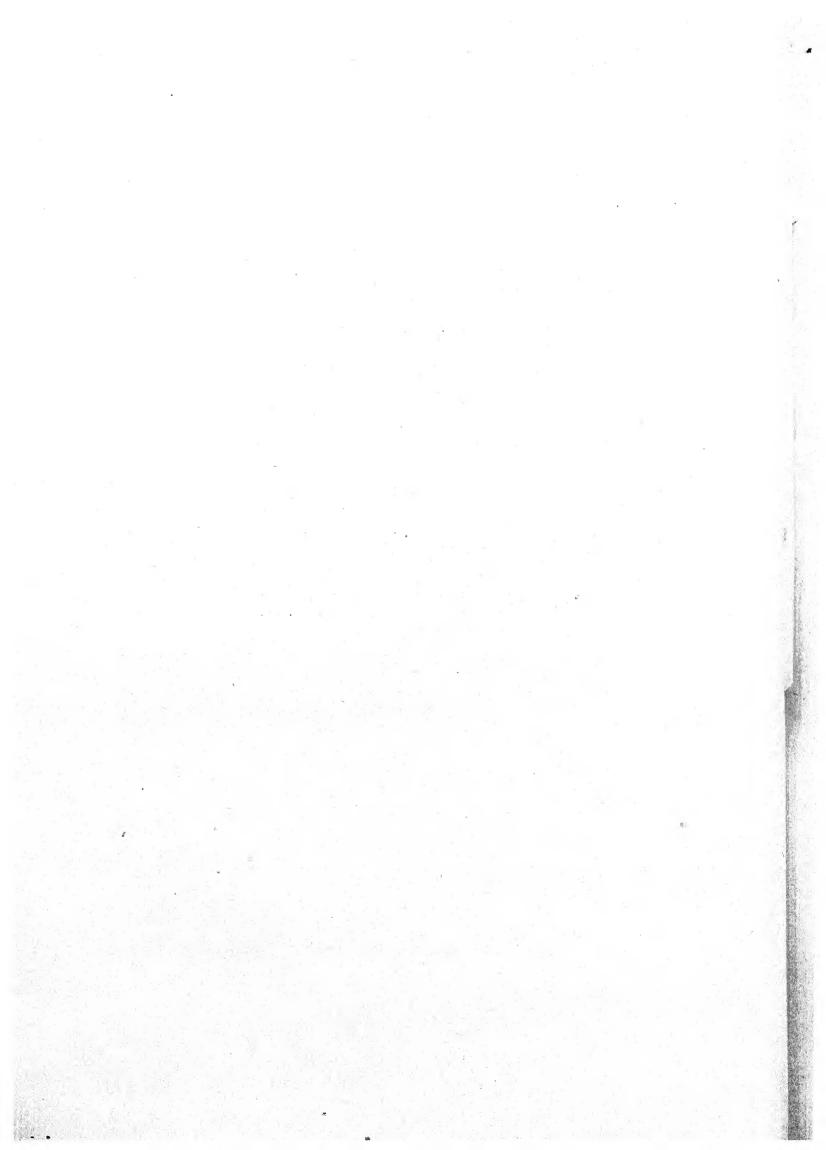

These languages of Kāfiristān I place together under the name of the Kāfir Group, consisting of the following four languages, (1) Bashgalī, (2) Wai-alā, (3) Wasĩ-veri or Prēsun, and (4) Ashkund. They will be considered in the following pages.

To sum up the information contained in the following detailed account of the Kāfir dialects, we had, previously to this survey, a grammar and two vocabularies of Bashgalī, so that we might claim to be supplied with information regarding the language of Siāhpōshīs. Regarding the Sufēd-pōshīs, we only knew for certain that there were two languages, Prēsun and Wai-alā, which were mutually unintelligible, and that perhaps there was a third, Ashkund. Of these three we had one or more vocabularies of Wai-alā, while of the others, we did not know a single word or grammatical form.

In the present state of our knowledge, the classification of these dialects is a matter of some doubt. While some of them show frequent instances of agreement with Eranian languages, there can be no doubt that the general phonetic structure of most of

THE KAFIR GROUP.

Concerning few languages near India did we know till lately so little as we did regarding the dialects of Kāfiristān. Our knowledge had not advanced owing to the fact that for long it was assumed that there was one Kāfir tongue which was called Kāfirī. In later times it was assumed that because there were two main groups of Kāfirs, viz. the Siāh-pōsh, or Black-clothed, and the Sufēd-pōsh, or White-clothed, there were, therefore, two languages in Kāfiristān corresponding to these two groups. Dr. Leitner, by his Kalāshā Grammar and Vocabulary, and Colonel Biddulph by his Bashgalī Vocabulary, helped forward our knowledge regarding the speech of the tribes of Eastern Kāfiristān, and after that the progress of our information regarding the details of the language or languages of that country was suspended till the publication of Colonel Davidson's Bashgalī Grammar in 1902. Sir George Robertson, in his Káfirs of the Hindu-Kush (London, 1896), gives us, on the other hand, some important information (pp. 74 and ff.) regarding the general language-distribution of the country.

It appears that the Siāh-pōsh Kāfirs, who, roughly speaking, people the northern half and the East of Kāfiristān, all speak various dialects of one language, of which Bashgalī, the speech of the people inhabiting the valley of the Bashgal River, may be taken as the type. All the tribes who wear the dark-coloured raiment seem at once to understand each other, and to be able to converse fluently and without hesitation. The Sufēd-pōsh Kāfirs occupy the centre and the south-east of the country, and consist of three tribes, the Wai, the Prēsun or Veron, and the Ashkund. The first two of these speak different languages which are mutually unintelligible, and both of which are unintelligible to the Siāh-pōshīs. These tribes cannot converse without the aid of interpreters. Regarding the Ashkund, Sir George Robertson says, 'there is another important tribe called the Ashkun (sic), of whom, however, it was most difficult to get any information. They are probably allied to the Wai.' The Wai inhabit the south-east of Kāfiristān, south of the junction of the Bashgal with the Qāshqār River. The Prēsuns inhabit an inaccessible valley in the centre, and the Ashkund lie to the south-west of the Prēsun.

These languages of Kāfiristān I place together under the name of the Kāfir Group, consisting of the following four languages, (1) Bashgalī, (2) Wai-alā, (3) Wasĩ-veri or Prēsun, and (4) Ashkund. They will be considered in the following pages.

To sum up the information contained in the following detailed account of the Kāfir dialects, we had, previously to this survey, a grammar and two vocabularies of Bashgalī, so that we might claim to be supplied with information regarding the language of Siāhpōshīs. Regarding the Sufēd-pōshīs, we only knew for certain that there were two languages, Prēsun and Wai-alā, which were mutually unintelligible, and that perhaps there was a third, Ashkund. Of these three we had one or more vocabularies of Wai-alā, while of the others, we did not know a single word or grammatical form.

In the present state of our knowledge, the classification of these dialects is a matter of some doubt. While some of them show frequent instances of agreement with Eranian languages, there can be no doubt that the general phonetic structure of most of

them is often distinctly Indian. On the other hand, their grammatical structure differs so widely from that of any Indian language, that grave difficulties are experienced in grouping them with the Sanskritic Indo-Aryan Vernaculars. They are, thus, true Dardic languages.

Before discussing each dialect separately, I shall give a list of the authorities, so far as I have been able to ascertain them, dealing with the Kāfir country in general, and more especially with the so-called 'Kāfir' language. I have to thank Professor E. Kuhn for several additions to this list. These are marked with the letter K.

AUTHORITIES--

- ELPHINSTONE, Hon. Mountstuart,—An account of the Kingdom of Caubul and its Dependencies in Persia,

 Tartary, and India; comprising a view of the Afghaun Nation, and a History of the Dooraunee

 Monarchy. London, 1815. New and revised edition. London, 1839. Vol. ii, pp. 373 and ff.
- Burnes, Sir Alex.,—On the reputed descendants of Alexander the Great in the Valley of the Oxus. Journal of the Bengal Asiatic Society, Vol. ii, 1833, pp. 305 and ff.
- MOHAN LALL, MUNSHI,—Further information regarding the Siah Posh Tribe, or reputed Descendants of the Macedonians. Journal of the Asiatic Society of Bengal, Vol. iii, 1834, pp. 76 and ff.
- Burnes, Sir Alex.,—On the Siah Posh Kafirs, with specimens of their Language and Costume. Journal of the Bengal Asiatic Society, Vol. vii, 1838, pp. 325 and ff. Contains a 'Kafir' Vocabulary which is most probably Wai-alā.
- Burnes, Sir Alex.,—The same. Reprinted by orders of Government. Reports and papers . . . submitted to Government by A. B. . . . on missions in . . . Affghanistan and adjacent countries. No. 10, Calcutta, 1839.
- Burnes, Sir Alex.,—Travels into Bokhara. Containing the Narrative of a voyage on the Indus from the Sea to Lahore, with presents from the King of Great Britain; and an account of a Journey from India to Cabool, Tartary, and Persia. 2nd edition, London, 1835. Contains a slight notice of the Kāfirs. This portion is severely reviewed in the Edinburgh Review for January 1835.
- Burnes, Sie Alex.,—Cabool, being a personal Narrative of a Journey to, and a Residence in that City in the years 1836, 1837 and 1838. London, 1842, pp. 207 and ff. and 381 and ff. Contains an account of Käfiristän.
- Masson, Charles,—Papers on Afghanistan, containing the Narrative of Journeys performed in that and adjacent countries, between 1827 and 1830. Transactions of the Bombay Geographical Society, Vol. v, 1840. On pp. 56-58 there are remarks on the Language of the Siāh-Pōsh and on Kōhistāni, Laghmānī, Pashai, and 'Perancheh.'
 - The information is repeated in the same Author's Narrative of various Journeys in Balochistan, Afghanistan, and the Punjab: including a Residence in those countries from 1826 to 1838. Vol. i, pp. 219 and ff. London, 1842.
- Vigne, G. T.,—Narrative of a visit to Ghuzni, Kabul and Afghanistan. London, 1840. On pp. 478, 479, there is a short Vocabulary; apparently Wai-alā. (K.)
- Lumsden, Sir Harry Barnett,—The Mission to Kandahar, etc. Full title given below under the head of Wai-alā. Calcutta, 1860. Appendix F contains an account of the country and people, and a Vocabulary.
- RAVERTY, MAJOR H. G.,—Notes on Káfiristán. Journal of the Asiatic Society of Bengal. Vol. xxviii, 1859, pp. 317 and ff.
- RAVERTY, MAJOR H. G.,—On the Language of the Siāh-pōsh Kāfirs, with a short List of Words; to which are added Specimens of the Köhistānī, and other Dialects spoken on the northern border of Afghānistān, etc. Journal, Asiatic Society of Bengal, Vol. xxxiii, 1864, pp. 267 and ff. Contains Vocabularies of Siāh-pōsh, Kōhistānī, Pashai, Bārakai, Beluchkī, and Qāshqārī (Khōwār). Raverty's Siāh-pōsh Vocabulary hardly agrees with Biddulph's Bashgali. In many instances it agrees with the Sufēd-pōsh Wai-alā of Lumsden's Vocabulary.

- TRUMPP, Rev. Dr. Ernest,—On the language of the so-called Kāftrs of the Indian Cancisus. Journal of the Royal Asiatic Society, Vol. xix, 1862, pp. 1 and ff. Contains an imperfect Grammar and Vocabulary. The Grammar partly agrees with my Bashgali Translation of the Parable of the Prodigal Son, and the Vocabulary more closely with Biddulph's Bashgali Vocabulary. Major Raverty in the second article mentioned above maintains that the language dealt with by Trumpp is not Kāfirī but is Kōhistānī. Comparison, however, with the available materials shows that it agrees very fairly with Bashgalī, and that hardly a word agrees with those in Major Raverty's own Kōhistānī Vocabulary.
- TRUMPP, REV. Dr. Ernest, Ueber die Sprache der sogenannten Käfirs im indischen Caucasus (Hindu Kūsch). Zeitschrift der deutschen morgenländischen Gesellschaft, Vol. xx, pp. 377-418. (K.)
- NORRIS, E.,—Some additional Words to those in Trumpp's Vocabulary, appended to Trumpp's article, on pp. 27 and ff. Only a few agree with Biddulph. The list of words was procured from a Kāfir woman residing in Teheran. They appear to be Wai-alā.
- Anon.,—Church Missionary Intelligencer for 1865. Reprinted in same for 1878. See also same for 1874.
- TERENTIEF, M. A.,—Russia and England in Asia, translated by Daukes. Calcutta, 1876. Vol. ii, pp. 298 and ff.

- ROBERTSON, SIR G. S.,—The Kájîrs of the Hindu Kush. London, 1896. On page 74, there is an account of the Kāfir dialects, already referred to.

Burnes' Vocabulary is reprinted in Trumpp's article, but there are many misprints.

Taking the Käfir dialects in order, we have now the following information regarding them:—

BASHGALĪ.

This dialect may, as already stated, be taken as typical of the language of the Siāh-pōsh Kāfirs. Among earlier writers, Colonel Biddulph gave a vocabulary of it, with a list of the pronominal forms. The grammar of the language agrees in many respects with that of Trumpp's Kāfirī. This is principally noticeable in the declension of the pronoun of the first person, and in the conjugation of the verb, but the two grammars are not sufficiently alike to justify us in classing Trumpp's work as a grammar of the Bashgalī language.

Konow, Sten,—Bashgali Dictionary, an Analysis of Col. J. Davidson's Notes on the Bashgali Language.

Journal and Proceedings of the Asiatic Society of Bengal, N. S. ix, (1913), Extra Number.

See also the authorities given above,—under Kāfirī. Amongst these Terentief's Russia and England in Asia deserves more than a passing notice. He gives a version of the Lord's Prayer in the 'Bolor' (i.e. Kāfir) language. An examination of the version shows that it is in the Ama-Xosa Kāfir of South Africa!

Bashgali Kāfir is excellently illustrated by Colonel Davidson's Notes, which include a very full grammar, vocabulary, and collection of sentences together with a valuable bibliography, the last being much more full than that given above. The language of the specimen and list of words which follow differs somewhat from that dealt with by Colonel Davidson. This is probably due partly to difference of dialect, and partly to the personal equation of the recorder, whose ideas of spelling an unwritten language are not always the same as those of Colonel Davidson. The following grammatical sketch is based on Colonel Davidson's work. When the grammar of my specimen deviates from

BASEGALĪ. 33

this standard, I shall draw attention to the fact, and shall throughout employ examples drawn as much as possible from the Specimen.

Article.—There is no article in Bashgalī. Sometimes the numeral ev, eo, or e, one, is employed as an indefinite article. Thus, e manje, a man. Sometimes i is suffixed, as in $pal\bar{e}$, servant; $pal\bar{e}$ -i, a servant.

I.—NOUNS.—Gender.—There are only two genders, masculine and feminine. Many nouns referring to things without life are feminine. Such are ama or amu, a house; $bur\bar{\imath}$, bread. In the case of living beings, natural gender is followed. Thus the following are feminine, $i\underline{shtri}$, a woman; $g\hat{ao}$ or $g\bar{o}h$, a cow. The distinction of gender is very often neglected. Thus we may hear $g\hat{ao}$ $mr\bar{a}$, the cow died, in which $mr\bar{a}$ is masculine, the feminine form being $mr\bar{\imath}$.

Number and Case.—All the following terminations are frequently omitted. Indeed, in conversation, this is generally the case. There is an Agent case used for the subject of the past tense of a transitive verb, as is customary in many Indian languages. In Bashgalī it is the same as the oblique form. Thus, kanishte tot-os-tã gijī kar-as, by the younger-son to his father words were made-to-him, the younger son said to the father. At the same time the use of the Agent case is not always adopted. The direct construction with the Nominative is sometimes found.

With the exception of the Accusative and the Vocative the other cases are made by adding postpositions (which are liable to be omitted) to the Oblique form.

The Oblique form singular is formed by adding i, \bar{e} , $i\bar{e}$, $i\bar{o}$, \bar{a} or \bar{o} , to the nominative. This again is often dropped. Examples are $manch\bar{i}$, a man; obl. $manch\bar{i}\bar{e}$ or $manch\bar{i}$: $u\underline{sh}p$, a horse; obl. $u\underline{sh}p\bar{e}$, $u\underline{sh}p\bar{o}$, or $u\underline{sh}p$: tot, a father; obl. toti, $toti\bar{o}$, $tott\bar{e}$, or tot.

The Accusative is usually the same as the nominative. Sometimes it takes the oblique form.

The Genitive precedes the noun which governs it. It is usually in the oblique form, especially with the termination dropped. Thus, tot, father; gen. toti, totiō, or tot: Mīrak amu, the house of Mīrak.

The suffix st or s is often added. Thus, manchiē-st, or manchī-s, of a man; mehr-st, of the prince; tot-s, of a father.

In the specimens the suffix is often ste, sta, or stai, which Colonel Davidson reserves for the Ablative. Thus, $ushpe-ste\ zin$, the saddle of the horse. It seems to be specially employed to form genitives absolute, like iste, mine; tosta, toste, or tust, thine.

This termination ste or st, etc., appears several times in Bashgalī grammar. It is not only a case termination, but it is also the termination of the infinitive and of the 3rd person plur. pluperfect of verbs. In the cognate Pashai language, under the form $st\bar{a}$ or $s\bar{a}$, it is the regular termination of the oblique form of nouns.

The Ablative is also formed by adding ste, etc. Thus, $pi\underline{sh}trak - stai$, from to-day; $ni\underline{sh}truk - ste$, from the first. $T\widetilde{a}$, etc., are also used for this case.

The postposition $t\tilde{a}$, $t\tilde{a}$, $t\tilde{a}$, or $t\tilde{a}r$, has various meanings, viz.:—by reason of, in, of, on, on account of, together with, to, for, or upon. After a vowel it becomes $d\tilde{a}$, etc.

The postpositions of the *Dative* are $t\tilde{a}$ (as above, tot-os- $t\tilde{a}$, to his father; grom- $t\tilde{a}$, to a village; manje- $t\tilde{a}$, to a man; tot- $t\tilde{a}$, to the father); $k\tilde{e}$ or $k\tilde{a}$ (mostly after

consonants), $g\tilde{e}$ or $g\tilde{a}$ (mostly after vowels), to or for; $dog\tilde{e}$, $dug\tilde{a}$, $tk\tilde{a}$, for, for the sake of $(tot\text{-}dog\tilde{e})$, for the sake of the father).

The *Locative* is formed by the prefix $b\bar{a}$ or $p\bar{a}$, or (before vowels) b or p. Thus, $b\bar{a}$ -zare (almost Paṣḥtō), in his heart; p-ama, in the house.

The Vocative is usually formed by suffixing \bar{a} or \bar{o} or by prefixing eh to the nominative. Thus, $tot\bar{a}$ or eh tot, O father.

According to Colonel Davidson's grammar, the nominative plural is either the same as the nominative singular or else takes the suffix $\tilde{a}n$, $\tilde{e}n$, in or an, and the oblique plural ends (as in Khō-wār) in $\tilde{a}n$, $\tilde{o}n$, or on.

In the list of words, a plural is formed by the addition of kile (obl. $kil\tilde{o}$). This reappears in several cognate languages. Thus in Wai-alā we find kele, in Wasĩ-veri kil or kili, in Gawar-bati gila, and in Pashai kuli.

In the specimens we have various nasalised vowels to form both the nominative and the oblique plural.

The following are the declensions of $t\bar{o}tt$, a father, and of $manch\bar{\imath}$, a man, according to Colonel Davidson:—

	Singu	lar.	Pl	ural.
Nom. Agent. Acc. Dat. Abl. Gen.	Singu A Father. $t\bar{o}tt$. $t\bar{o}tt\bar{e}$ (?). $t\bar{o}tt$. $t\bar{o}tt\bar{e}$ - $t\tilde{a}$. $t\bar{o}tt$ - ste . $t\bar{o}tt$ s, $t\bar{o}tt$ i,	lar. A Man. manchī. manchīē. manchīē. manchīē-tã. manchīē-ste. manchīēst, manchīs.	Fathers. $t\bar{o}tt$. $t\bar{o}tt$ (?). $t\bar{o}tt\bar{a}n$ (?). $t\bar{o}tt\bar{a}n$ - $t\tilde{a}$ (?). $t\bar{o}tt\bar{a}n$ - ste . $t\bar{o}tt\bar{a}n$, $t\bar{o}tt\bar{a}nst$.	Men. manchī, manchīān. manchīōn (?). manchīōn. manchīōn- $t\tilde{a}$. manchīōn-ste.
	tōttiō.		200000000000000000000000000000000000000	manchīōn, man- chīōnst.

The following declensions can be gathered from the specimen and the list of words:-

		Singular.	1		Plural.	
	A father.	A daughter.	A man.	Fathers.	Daughters.	Men.
Nom.	tot.	ju.	manje.	tot-kile.	juĩ.	$manj\widetilde{e}$.
Gen.	tot, tot -ste.	ju.	manje.	tot-kilő.	juĩ.	$manj\widetilde{a}$.
Dat.	tot - $k\widetilde{e}$.	ju - $g\widetilde{e}$.	manje-ge.	$tot ext{-}kil\widetilde{o} ext{-}g\widetilde{e}$.	$ju\widetilde{\imath}$ - $g\widetilde{e}$.	manjã-gẽ.
Abl.	tot-ste, tot-	ju-dã, etc.		$tot ext{-}kil ilde{o} ext{-}d ilde{a}.$	$ju\tilde{\imath}-d\tilde{a}$.	
	$t\tilde{a}$, etc.		etc.		jwo-wa.	$manj\widetilde{o}$ - $d\widetilde{a}$.

The following are other examples of the formation of the plural in the specimen and list:—

Sing.			Plur.
azhe, a bull.			$a\underline{zh}\widetilde{e}$.
gão, a cow.		•	$g\widetilde{\widetilde{o}}$.
kuri, a dog.			kurî.
rakyus, a deer.		٠	$rakyus\widetilde{\tilde{\sigma}}.$

We sometimes find an oblique plural in n or in. Thus:—
latri, property; obl. plur. latrin.
palē, a servant; obl. plur. palēn, dat. plur. palēin-tâ.

BASHGALĪ. 35

Adjectives .-

Some adjectives add a vowel (usually i), to form the feminine. As examples from the list of words is—

ev deger ari, a bad boy. ev degeri juk, a bad girl.

The adjectives which are liable to this change end in l, m, n, or r. Adjectives ending in \bar{a} , change \bar{a} to $\bar{\imath}$ in the feminine. Other adjectives do not change for gender. Thus:—

ev lē manje, a good man. ev lē manje-ste, of (or from) a good man. lē manji, good men. ev lē jugur, a good woman.

An adjective sometimes takes a instead of $\bar{\imath}$ in the feminine. This is apparently due to euphonic rules which are not yet clearly understood. The following example of this is taken from Colonel Davidson's grammar:—

Masculine.

Feminine.

 $\underline{zhil} \ bh\bar{\imath}m$, wet ground.

<u>zh</u>ilī buṛī, wet (uncooked) bread. <u>zh</u>ila yus, wet (green) grass. <u>zh</u>ila dār, wet (green) wood.

To judge from the specimen, when an adjective is employed as a predicate, or stands by itself, it prefers to take the termination ste. Thus, $l\bar{e}$ -ste, good; but $l\bar{e}$ manje, a good man: kon-ste, (I am not) fit.

Comparison is effected in the usual way, with the ablative in ste or $t\tilde{a}$. Thus, aske-ste bros aske-ste susas- $t\tilde{a}$ ūre aze, his brother is taller than his sister.

II.—PRONOUNS.—

First Person.—I, onts or ots; of me, my, ots, ots-sta, ots-sta; Agent, ots (venessi), I (have beaten); ots-sta (yolazm), I would have eaten; obl. sing. ots-sta; we, ots-sta, ots-sta, our, ots-sta, ots-sta,

Second Person.—Thou, tiu, tu, to; of thee, thy, tu (to), to-ste, to-sta, tuse; Agent, to (pt-as), thou (gavest-for-him); before thee, to pamyuk; to thee, tut-ta; ye, sha, sha; of you, your, sha, sha, sha-ste. What is your name, tuse nam kai aze? The genitive absolute is tust, in tust asht, is thine.

Third Person.—He, aske; of him, his, aske (-dōgẽ), aske-ste; to him, aske (na-ptu-s) (did not give); from him, aske-tã; with him, aske mesh; Agent, aske (sangāya) (he heard); they, amgi; that man, aske manje; under that tree, aki karu pagyur; those swine, amgyõ kizhgõ; akye-sta jusht pitr-as, his eldest son-of-him. Many other forms are given by Colonel Davidson.

This, ine, enē; from among these, amno pamiju.

His own share, amu bareste; to his own servants, amo-ste palëin-tã.

The Relative Pronoun appears in ketta pitr, the son (agent case) who (lost all thy property). It is rarely employed, the present participle supplying its place.

Kachi, $k\bar{u}$, or kett is 'who?' 'what?' is ke or kai. Kai also means 'whatever,' as in \hat{i} -ste kai asht, whatever is mine. Ko is 'any-one.'

Pronominal Suffixes are frequent. Among them, I have identified the following:—

First Person,—m (with verbs), as in bis-m, I have become; kolaz-m, I would have had; yolaz-m, I would have eaten; bulaz-m, I would have become; go-m, I have become; pto-m, it was given to me. With a noun we have tot-\(\overline{\tau}\), or \(\overline{\tau}\)-ste tot, my father.

Second Person,— \underline{sh} (with verbs), as in $pt\bar{a}$ - \underline{sh} , it was given to thee. With a noun $ch\bar{\imath}$, as in $t\bar{a}$ - $ch\bar{\imath}$ or tot- $ch\bar{\imath}$, thy father.

Third Person,—s, or as (also spelt os) (with both nouns and verbs), as in bi-s, he or it became; na kar-as, it-was-not-done (contrary to thy order); āzi-s, he has come; kara-s, (words) were made (by him) to him, he said to him; na ptu-s, (by any one) was not given to him, no one gave to him; pta-s, (a feast) was given (by thee) to him, thou gavest him a feast; tot-os-tã, to his father; pitr-as, his son. The termination is sometimes spelt ez, as in tot-ez-e ptastai, the father-his-by it-was-given, his father gave.

The word wanyan occurs twice. In one instance it means 'he was seen (by the father),' and in the second case 'he was seen (by me).' The termination $\bar{a}n$ or n possibly also means 'he.'

Sometimes the full form of the pronoun is also used, as in akye-sta jasht pitr-as, of him the elder son-of-him.

III.—VERBS.—

A.—Auxiliary Verbs and Verbs Substantive.—

	Present, I an	a, etc.	Past, I w	as, etc.
1. 2. 3.	Sing. $azem$, $azum$. esh $\bar{\imath}$. ze , aze .	Plur. azemi <u>sh</u> , azer. a <u>sh</u> t.	Sing. azim, azam. azi <u>sh</u> . azī.	Plur. azemi <u>sh</u> . azīr, azār. azī, azamme.

Colonel Davidson gives many other forms of this verb.

The following parts of the verb 'become' are noted:

Imperative,—bu, become.

Infinitive,—bu-ste, to become.

Present Participle, - būl, becoming.

Past Participle,—bā or bo, been.

Conjunctive Part., -biti, having become.

Present,—bunam, I become; bunde, they become (spare).

Past, $-b\bar{a}$ -m, I became; bo or $b\bar{a}$, he became.

Pluperfect,—bis-m, bissi-um, I had become; bis, bissī, he became; bistai, they became.

Future,—onts balom, I shall become.

Present Conditional,—onts ka balama, I may become.

Past Conditional, -bulazm, I would have been (merry).

Gom, I went, is also used to mean 'I became,' as in the Ghalchah languages.

B.—The Active Verb.—According to Colonel Davidson the Infinitive of the Active verb ends in sth or st (or sth^a or st^a , in which the final a is very slightly pronounced). In the specimen and list the Infinitive is shewn as ending in ste. Under any circumstances the final a or e is elided before a word beginning with a vowel. An example of the infinitive is $ach\bar{u}nasth$, to run.

The Present Participle ends in n or l. It is also a noun of agency, and a relative participle supplying the place of a relative pronoun, like what we find in Indo-Chinese and Dravidian languages. Thus, $\underline{sh}\bar{u}$ $aw\bar{e}l$ $manch\bar{\imath}$ $\bar{a}yo$, the news bringing man (i.e. the man who brought the news) came. It changes for gender, taking $\bar{\imath}$ in the feminine; thus, piltil, fem. $piltil\bar{\imath}$, falling.

The Future Participle ends in lā (fem. lī). Thus, achūnlā, about to run.

The Past Participle ends in \bar{a} , with i as a junction vowel when the root ends in a consonant. Thus, $ach\bar{u}ni\bar{a}$, one who has run; $pt\bar{a}$, given. Its feminine changes the final vowel to \bar{i} . Thus, $mr\bar{a}$, fem. $mr\bar{i}$, dead.

The Conjunctive Participle ends in $t\bar{\imath}$ or $d\bar{\imath}$. Thus, $y\bar{u}-t\bar{\imath}$, having eaten; $a-ch\bar{u}n-d\bar{\imath}$, having run.

The Imperative mood takes \bar{o} in the second person singular. Thus, $ach\bar{u}n\bar{o}$, run. The other persons follow the future.

A Conditional mood is formed by adding $b\hat{a}$ to the indicative. Thus, $ach\bar{u}nam$, I run; $ach\bar{u}namb\hat{a}$, if I run.

The only radical tense is the present. Its terminations are as follows:—

Sing. Plur.

1. m mish

2. nj (& others) r (with nasalization of the preceding vowel).

3. nn nd

Thus, $ach\bar{u}nam$, I run. In the specimen and list, an e is added to some of these terminations. Thus, nje, nde.

The other tenses are formed from the participles. Thus:—

The Imperfect is formed by suffixing the past tense of the auxiliary to the present participle. The final n or l of the participle combines with the az of the auxiliary into zz. Thus, $ach\bar{u}nazzam$, I was running, for $ach\bar{u}nan-azam$.

The third person singular and plural of the Future is the same as the future participle, and agrees with subject in gender.

For the first and second person pronominal suffixes are added. Viz.:-

Sing. Plur. **1.** om mmå

2. $o\underline{sh}$ r (with nasalization of the preceding vowel).

Thus, achūnlā, he will run; achūnlī, she will run; achūnlom, I shall run.

The third person singular and plural of the Past tense (which is also used as a Perfect) is the same as the Past Participle, and agrees with the subject in gender. For the first and second persons pronominal suffixes are added. Viz:—

Sing. Plur.

1. *m mish*

2. <u>sh</u> r (with nasalization of the preceding vowel).

Thus, achūniā, he ran, he has run; achūnī, she ran; achūniām, I ran.

In the case of transitive verbs, this tense, and the pluperfect, are construed passively, but the rule is not uniformly observed.

The Pluperfect is formed by suffixing the past tense of the auxiliary verb to the past participle. With the preceding \bar{a} of the participle, the az of the auxiliary becomes ss. Thus, $ach\bar{u}niss\bar{s}$, he had run, for $ach\bar{u}ni\bar{a}$ - $az\bar{s}$.

The terminations given above for all these tenses are only a few of many variations. For the rest, the reader is referred to Colonel Davidson's Grammar.

We are thus able to conjugate the verb achūnasth, to run, as follows:—

Infinitive, achūnasth, achūnastha, to run.

Present Participle, achūnan, running.

Future Participle, achūnlā, one who will run.

Past Participle, achūniā, one who has run.

Conjunctive Participle, achūndī, having run.

Imperative, 'Run thou,' etc.

	-	,
	Sing.	Plur.
1.	•••	achūlammá.
2.	$ach ar{u}nar{o}$.	$achar{u}nl\widetilde{a}r.$
3.	$achar{u}nlar{a}.$	$achar{u}nl\dot{a}$.
	Present	t, 'I run,' etc.
	Sing.	Plur.
1.	$ach ar{u} nam$.	achūnamish.
2.	achūnanj.	$ach\widetilde{\widetilde{u}}r \ (ext{for } ach\widetilde{\widetilde{u}}nr).$
3.	achūnann.	achūnand.
	Imperfect, ' I	was running,' etc.
	Sing.	Plur.
1.	achūnazzam.	achūnazzamish.
2.	achūnazzish.	$ach \bar{u} nazz \tilde{a}r.$
3.	achūnazzī.	achūnazzī.

Future, 'I shall run,' etc.

	Sing.	1	ות	
1.	achunlom.		Plur.	
0			achūlammá (fo	or achūnlammá).
2.	achūnlo <u>sh</u> ,		achalr (for ach	~ ~ ~ \
3.	achūnla.	1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 -		bunlr).
			$ach\bar{u}nl\bar{a}$.	

Past, 'I ran,' 'I have run,' etc.

	Sing.	
1.	achūniām.	Plur.
	achūniā <u>sh</u> .	achūniāmi <u>sh</u> .
_	achūniā.	achūni $\widetilde{ar{a}}r$,
-		achūnia

Pluperfect, 'I had run,' etc.

Sing. Plur.

1. achūnissam. achūnissamish.
2. achūnissish. achūnissār.
3. achūnissī, achūnistai. achūnissī, achūnistai.

In the Specimen the Pluperfect is over and over used in the sense of the simple Past.

Several verbs make their past participles irregularly. Thus:-

Infinitive. Past Participle. ēsth or gūsth, to go. gawā, gōwā, or gūs. busth, to become. $b\bar{a}$. kusth or korusth, to do. karā. ngusth, to take. ngūtā (pres. part. ngal; fut. part. ngālā). prēsth, to give. $pt\bar{a}$. pshīsth, to grind. $psh\bar{a}$. mṛisth, to die. $mr\bar{a}$. visth, to strike. vinā. otisth, to remain. otiniā. yasth or yusth, to eat. iārā, iyā, iyāsht. awesth, to bring. awērā, arwarā.

The verb lushtisth, to be frost-bitten, makes its future participle $luzh\bar{e}nell\bar{a}$, as past participle $luzheng\bar{a}$ and its 1st sing. pres. $luzh\bar{e}nam$.

The verb aosth, to come, is quite irregular. The following forms are given by Colonel Davidson:—

attī, having come.

ats or prēts, come thou.

ann or awettett, he comes.

attētt, they come.

atsomā (for atsolmā), we are coming or will come.

aiyōsam, I came.

aiyōsh, ōsh, or hāu, thou camest.

aiyō, ozz, ess, adsā, or afziā, he came.

âyū or afziā, they came.

osth or osthai, they came (pluperfect).

Verbs whose infinitives end in $\bar{o}sth$ or $\bar{a}sth$ are either transitive or causals. Thus:—

piltisth*, to fall.

amjisth*, to put on clothes.

amjosth*, to clothe.

amjosth*, to clothe.

 $pa\underline{sh}isth$, to light. $pa\underline{sh}i\bar{o}sth$, to cause to light. visth, to rest. $vi\bar{a}sth$, to cause to rest.

Verbs in $\bar{o}sth$ form their past participles in $\bar{e}\bar{a}$. Thus, $pilt\bar{o}sth$, past participle $pilt\bar{e}\bar{a}$; $ni\underline{z}h\bar{o}sth$, to cause to sit, past participle $ni\underline{s}h\bar{e}\bar{a}$.

The Bashgali forms in the specimen and in the list of words differ somewhat from those given above. They are as follows:—

Infinitive,—vī-ste, to strike.

Present Participle,— $v\bar{\imath}nagan$, striking; yenda, going. The latter appears to mean really 'they go' (Colonel Davidson's end). It is No. 218 in the list of words. Atte, (he saw him) coming; also 'coming (from there he arrived near the house)' is probably a conjunctive participle. Bole, in kujāl bole bistai, they became making merriment, corresponds to Colonel Davidson's $b\bar{\imath}ul$, the present participle of his busth, to become.

Past Participle,—gusya, gone (compare Colonel Davidson's gus).

Conjunctive Participle.—This ends in ti or $t\bar{\imath}$. There are many examples, viz.:— $v\bar{\imath}ti$, having struck; biti, having been; $barekt\bar{\imath}$, having divided; $wazingraet\bar{\imath}$,
having collected; $git\bar{\imath}$, having gone; $e\underline{kh}t\bar{\imath}$, having done; $ps\bar{e}t\bar{\imath}$, having lost; $ng\bar{a}t\bar{\imath}$, having taken; $\bar{\imath}ti$, having eaten; $wut\bar{\imath}t\bar{\imath}$, having arisen; $us\underline{h}tati$, having
arisen; $wanat\bar{\imath}$, having seen; $panuas\underline{h}t\bar{\imath}$, having put round his neck; $avit\bar{\imath}$,
having brought; $wall\bar{\imath}ti$, having called; $bar\bar{\imath}tti$, having come out; $m\bar{\imath}ti$,
having killed. Atte, quoted under the present participle, is probably
incorrect for atti.

Imperatives are $v\bar{\imath}h$, strike; $a\underline{t}\underline{s}$, come; $pre\underline{t}\underline{s}$, go; yuh, eat; $ni\underline{s}\underline{h}eh$, sit; $\bar{u}ti$, stand; mrev, die; preh, give; $ga\underline{t}\underline{s}$, give; $achun\bar{o}$, run; teh, put; $undr\bar{o}$, feed; $nach\bar{o}$, keep; amjau, put on (clothes); lijau, give. Colonel Davidson omits the final h in these forms.

Simple Present.—

	Sing.	Plur.	So also	Sing.	Plur.
1.	vīnum, I strike.	vīmi <u>sh</u> .		yenum, I go.	emmish.
2.	vi nje .	v ī $n\widetilde{e}r$.		yenji.	$en\widetilde{e}r.$
3.	vine.	vī nd ē.		yene.	ende.

Other examples are *mrenam*, I die; *undrane*, he is grazing; *jenase*, he is sitting (on a horse); *nizhene*, he sits, he dwells; *kund*, (what) are they doing?

Imperfect.—The only example is onts vin-azim, I was striking.

Future.

Sing.		Plur.
vilam, I shall strike.		$v\bar{\imath}mma.$
$var{\imath}la\underline{s}h.$	•	$var{\imath}l\widetilde{lpha}r$.
v ī $lar{a}$.		$var{\imath}lar{a}$.

Other examples are— $\bar{e}lam$, I will go; walallm, I will talk; yummā, we shall eat; $m\bar{e}\underline{z}\underline{h}umm\bar{a}$, we shall make ready.

Past.—In Transitive verbs, this tense is conjugated passively. The subject is put in the agent case and the object, which has become the grammatical subject, is often attached to the verb in the form of a pronominal suffix. The following are examples, each is really a Passive Participle. Thus, 'he struck' is literally 'struck by him.'

 $V\bar{\imath}n\bar{a}$, he struck; $gij\bar{\imath}$ wija, (?) he realised; $supch\bar{a}$, he kissed; $gij\bar{\imath}$ kra, he made words, he spoke; $sang\bar{a}ya$, (Kalāshā $sang\bar{a}u$), he heard; kudeya, he asked; wija (compare $gij\bar{\imath}$ wija above), he agreed; $tudipt\bar{a}$, he entreated; $karett\bar{a}$, (service) was done (by-me).

BASHGALĪ. 41

The following are instances of pronominal suffixes: kar-as, he made (words) to him; also, I made it; na ptu-s, did not give to him; $wany\bar{a}-n$ (?), he or I saw him; pto-m, thou gavest (a kid) to me; pta-s, thou gavest (a feast) for him.

In the case of Neuter verbs, the tense is conjugated actively.

	Sing.	Plur.
1.	gom, I went.	gomish, we went
2.	gowash, thou wentest.	$g\widetilde{\tilde{o}}r$, you went.
3.	gwa or goh , he went.	gwa, they went.

Other examples are lozhon-goh, it burnt; paryā, he arrived; ōze, he came.

The Past tense is also used in the sense of the Perfect.

The Pluperfect (often used in the sense of a simple past) is also construed passively in the case of Transitive verbs. Thus, \tilde{i} $v\bar{i}nessi$, I had struck; karisse, he made (a marriage). Similarly ptastai, he gave; baristai, he carried; $ps\bar{e}stai$, he lost; $\bar{o}ziste$, he came.

Examples of Neuter verbs are, maressi, he had died; bisī, he had been; āzis, he had come.

Present Conditional, -- ōnts ka vīlama, I may strike.

Past Conditional,—kolaz-m, I would have made; \tilde{i} -ste yolaz-m, I would have eaten; bulaz-m, I would have become.

The following are examples of the Passive,— \tilde{i} vinagan unguta, I am struck; \tilde{i} vinagan ungutussi, I was (? had been) struck; on<u>ts</u> vinagan ungulam, I shall be struck. Apparently the phrases mean literally, 'by me striking was experienced,' and so on

WAI-ALA.

The Wai Kāfirs call the country in which they live 'Waigal,' and their language 'Wai-alā,' *i.e.* 'Wai-language.' This language is, as will be seen from the following pages, nearly related to Bashgalī. The grammatical constructions of the two forms of speech closely agree, although their vocabularies often differ.

I am indebted to Khan Sahib Abdul Hakim Khan for the two specimens and for the list of words which are here printed. From them I have been able to compile the grammatical notes which follow.

AUTHORITY-

LUMSDEN, SIR HARRY BARNETT,—The Mission to Kandahar, with Appendices. Calcutta: Baptist Mission Press, 1860. Appendix F is A description of Kaffiristan and its inhabitants compiled from the accounts by Mr. Elphinstone and Sir A. Burnes, as well as from information gathered from Kaffir slaves in the service of different Affghan Sirdars. On pp. 124-165 there is A Vocabulary of the Kaffir Language as spoken in Traieguma and Waigul.

The works of Burnes (on the Siah Posh Kaffirs), Vigne, Raverty (on the language of the Siāh-pōsh Kāfirs), and Norris, described under the authorities on the 'Kāfir' language, probably also described Wai-alā.

I. NOUNS.—Gender.—Natural gender is indicated by changes of vowels as in dabala, a boy; dabili, a girl; or by different words, as in $mana\underline{sh}$, a man; $m\tilde{e}\underline{sh}i$, a woman; $tr\tilde{a}$, a bull; $g\bar{a}$, a cow; or by prefix words indicating gender, as $\underline{ts}\tilde{u}$, a dog, generally; $n\tilde{a}resta\ \underline{ts}\tilde{u}$, a male dog; $i\underline{sh}treki\ \underline{ts}\tilde{u}$, a bitch.

The only certain case of a change for gender of a verbal form which I have noted is $go\bar{a}$, he went; $ge\bar{a}$, she went. Possibly $ker\tilde{e}sta$, made, is a feminine form of a masculine $k\tilde{u}rasta$.

Number.—The number of a noun in the nominative plural is rarely expressed, unless required by the context. In such cases it is indicated by a noun of multitude. Thus, manash, a man; manash-kele, men; $tr\tilde{a}$, a bull; $echchu\ tr\tilde{a}$, bulls. The oblique cases of the plural have a special termination, see below.

Note.—In the list of words tata, a father, has $tat\bar{e}$ -kele, not tata-kele, for its nominative plural; similarly, gur, a horse, has its nominative plural gure. These are the only true plurals which I have noted.

Case.—There is an oblique form in the singular, and in the plural, to which postpositions can be added to indicate cases. They are, however, very frequently omitted, as in Bashgali, so that the oblique form can stand practically for any case.

As regards the formation of the oblique form, it is impossible, with our present knowledge, to give any general rules, and it must suffice to record the facts observed in the specimens.

The most common termination of the oblique form sing is the letter o or \bar{o} . Thus, tata, father; obl. $tat\bar{o}$; gur, a horse; $gur\bar{o}-ka$, on a horse; $y\tilde{a}-pat\bar{t}$, the back; $y\tilde{a}-pat\bar{e}$, on the back; $bimke\bar{o}-pa$, from the well; se, that; $seo-b\tilde{e}$, from that; $ateo-b\tilde{e}$, from here; $atko-b\tilde{e}$, from there.

Two nouns in the specimens, both of which end in l, form their oblique forms singular in a; viz. $g\bar{o}l$, a country; $g\bar{o}la$ -ke, to a country; $t\bar{o}l$, a field; $t\bar{o}la$ - $k\tilde{e}$, to a field.

In the list, the word manash, a man, has its oblique singular manasha, but in the specimens we have manash mili, with a man; and even manasha of a man. The last form will be discussed under the head of the genitive. From the word ama, a house, we have the following:—to-ba $tat\bar{o}$ -ba ama, in your father's house; ama-ka $nish\bar{a}s$, he lives in the house; but $am\bar{a}$ tavar, near the house; $am\bar{a}$ attar, inside the house; $am\bar{a}$ $g\tilde{a}r\bar{e}b\bar{\imath}$, having counted houses.

Several nouns have the oblique singular the same as the nominative. Thus from $\tilde{a}g\tilde{u}r$, a finger, we have $\tilde{a}g\tilde{u}r$ -ke, to a finger; $j\bar{u}$, a daughter; $j\bar{u}$ -ka, to a daughter.

The oblique plural ends in \tilde{a} or \tilde{e} . Thus, $merg\bar{a}$, swine; $merg\tilde{a}$ $lasavisht\bar{o}$, the leavings of the swine; $jar\tilde{a}$ mili, with friends; $Waigal\bar{i}$, a man of Waigal; $Waigali\tilde{e}$ - $k\tilde{e}$, from the men of Waigal; $tat\bar{e}$ -kele, fathers; $tat\bar{e}$ - $keli\tilde{a}$ -ba, of fathers. The form rupayan, in $t\bar{e}v$ rupayan $tash\bar{o}$ -ka $v\bar{e}ch$, take those rupees from him, is probably borrowed from Khō-wār.

Besides the oblique form, there is a locative or instrumental singular ending in \tilde{e} . Thus from sudu, distant, we have $sud\tilde{e}$, at a distance; $v\tilde{a}r-v\tilde{a}r\tilde{e}$, turn and turn about; $\underline{shakurik\tilde{e}}$, in Shakurik; $y\tilde{e}$ avot \tilde{e} meryam, I die by (i.e. of) hunger. As is shown by the analogy of Indo-Aryan languages, the postposition $b\tilde{e}$ is the locative of ba, and the postposition $k\tilde{e}$ is the locative of ka.

The frequent locatives in \bar{o} are merely oblique forms used in the sense of the locative. Several examples are given above.

Before the past-tenses of transitive verbs, the subject is usually put in the Agent case. In nouns the agent case is sometimes the same as the nominative, as in se manash se preshyā, that man sent him, literally by that man he was sent. At other times it is the same as the oblique form, as in tatō se vērēto-ā, the father saw him.

Other cases are formed by postpositions, which are usually added to the oblique form. Often, however, the postpositions are dropped, so that, as stated above, the bare noun, in the oblique form, appears as used for any case. Thus (Dative) bahrī mele $k\tilde{u}r\bar{a}$, (he) said to (his) slaves.

The following are the most important case suffixes:--

(1) Ka, sometimes written ke. This generally gives the force of a dative. Thus, $tat\bar{o}-ka$, to a father; $j\bar{u}-ka$, to a daughter; $g\bar{o}la-ka$ or $g\bar{o}la-ke$, to a country; $\tilde{a}g\tilde{u}r-ke$, to (i.e. on) a finger. In $gur\bar{o}-ka$ $y\bar{a}-pate\bar{o}$, on the back of a horse, ka gives the force of a genitive. Possibly it is a kind of dativus commodi (see list, No. 230), but we also have $ta\underline{s}h\bar{o}-ba$ (genitive) $y\bar{a}-pati$, the back of a horse (No. 227). In $l\bar{a}must\bar{o}k$ ama-ka (No. 233), in the small house, we have a distinct locative. So in kiti vas $patk\bar{e}re-ke$, after some days, vas forms what we should call in English a preposition, which is really a noun in the locative. Again this vas is used to form a kind of oblique base for attaching other postpositions. Thus, vas va

(2) $K\tilde{e}$. This is the locative of ka, and generally gives the force of the ablative. Thus, $tat\bar{o}-k\tilde{e}$, from a father; $y\bar{o}\underline{sh}-k\tilde{e}$ $v\bar{e}\underline{sh}an-g\bar{o}t$, they rebelled from (i.e.

WAI-ALĀ. 47

against) the devil. Sometimes it gives the force of a dative, as in $pr\bar{e}\underline{shya}$ tanu $t\bar{o}lo-k\tilde{e}$, he sent (him) to his own fields, or of a locative, as in $kiw\bar{a}s-k\tilde{e}$, at any time; ek $am\tilde{a}-k\tilde{e}$ ek dabala ek dabili $var\bar{i}$, in one house there were one boy and one girl.

- (3) $Ket\bar{\imath}$. This and the following (kane) are connected with ka. $Ket\bar{\imath}$ forms a dative of purpose (like the Bashgalī $dog\tilde{e}$ or $tk\tilde{a}$), as in $\bar{\imath}$ - $ket\bar{\imath}$, for him (thou gavest food); $\bar{a}st\bar{o}$ - $ket\bar{\imath}$, for (i.e. on account of) (his) coming.
- (4) Kane is used as a postposition of the ablative, as in $j\bar{u}$ - $keli\tilde{a}$ -kane, from the daughters. In $t\tilde{e}s$ -kane $may\tilde{o}$, (he divided his property) amongst them, it is used like ka to make an oblique form. The ne seems to be a locative termination, so that kane is really the same as $k\tilde{e}$. Compare myukne, in front.
- (5) Ba. This is the regular postposition of the genitive. Thus, tatō-ba, of the father; tashō-ba sōs, his sister. In the first line of the Parable, we have manashe-be, of a man (there were two sons). Here this is probably merely another method of writing manasha-ba, like ke for ka, but it is just possible that be may be plural to agree with 'sons.' If this is the case, it is the only instance of a genitive changing for gender, for case, or for number which I have met in the specimens or list.
- (6) $B\tilde{e}$. This (the locative of ba) is regularly used to form an ablative. Thus, seo- $b\tilde{e}$, from there; $atko-b\tilde{e}$, from there; $ateo-b\tilde{e}$, from here.
- (7) Mili. This regularly means 'with,' whether as an instrumental or as signifying 'together with.'

Examples will be found above.

(8) $May\tilde{\tilde{o}}$. This means 'among,' 'in.' Examples above.

We may give the following declension of tata, a father, from the list of words:--

	Singular.	Plural.
Nom.	tata.	tatē-kele.
Gen.	tatō-ba.	$tatar{e} ext{-}keliar{ar{a}} ext{-}ba$.
Dat.	tatō-ka.	$tatar{e} ext{-}keli\widetilde{a} ext{-}ka$.
Abl.	$tatar{o}$ - $k\widetilde{ar{e}}$.	$tatar{e}$ - $keli\widetilde{a}$ - $kane$.

Adjectives.—I have not noted any instance of adjectives changing either for number or case. Thus we have:—

bōsta manash. a good man.
bōsta manasha-kē, from a good man.
bōsta manash-kele, good men.
bōsta manash-keliā-kane, from good men.
bōsta mēshi, a good woman.
bōsta mēshi-kele, good women.
abar dabala, a bad boy.
abar dabili, a bad girl.
bōsta-ka (dative), well.

A great many adjectives optionally take the termination sta (compare Bashgali ste). Thus we have $b\bar{o}i$ or $b\bar{o}sta$, good. This termination is very common with past participles when used adjectivally, but not when they are used as tenses of a verb. Thus, $nishin\bar{a}$, sat, he sat. When used adjectivally, nishinasta, seated.

Comparison is formed as usual. The object with which comparison is made is put in the ablative. Thus, $b\bar{o}sta$, good; $echchu\ b\bar{o}sta$, better, literally much good; $at-k\tilde{e}\ di\ b\bar{o}sta$, best, literally good also (di) than all. I presume that at means all, but I have not identified it elsewhere. Another example is $ta\underline{sh}\bar{o}-ba\ br\bar{a}-s\ ta\underline{sh}\bar{o}-ba\ s\bar{o}s-kane\ dregela\ ver$, him-of his-brother him-of the-sister-than tall is, his brother is taller than his sister.

II. PRONOUNS.—The pronouns of the first and second persons are as follows:—

	Singular.		Plural.	
	I.	Thou.	We.	You.
Nom.	$y ar{e}.$	to, tu.	yema, yuma.	$v\bar{\imath}_{ullet}$
Gen.	ima.	to-ba.	yema, yuma.	vima.
Obl.	$\widetilde{\overline{\imath}}$.	to.	yema, yuma.	vī ma .

For the genitive, we have once im instead of ima, viz. in im $jar\tilde{a}$ mili, with my friends. We have \tilde{i} used in the sense of the genitive in \tilde{i} matini \tilde{i} ao, give my share to me.

The oblique form (with or without postpositions) is employed for all other cases. Thus (agent) \tilde{i} $vib\bar{i}$ vrem, I have beaten; to $prat\bar{o}m$, thou gavest-to-me; (dat.) \tilde{i} ao, give to me; $to-k\tilde{e}$ koidam $k\tilde{u}r\bar{u}$, to thee service was done; yema $var\bar{i}$, to us it was (proper); (with other postpositions) \tilde{i} mili, with us; to-ka $patk\tilde{e}r$, behind thee. $Y\bar{e}$ is employed to the dative in to $y\bar{e}$ na $prat\bar{o}m$, thou didst not give to me.

In $t\bar{u}\underline{sh}a$ ver, it is thine, $t\bar{u}\underline{sh}a$ appears to be a dative of possession; compare $kasu\underline{sh}$, for what, why?

The word for 'he,' 'that' is se; obl. sing. $tash\bar{o}$ (gen. $ta\underline{sh}\bar{o}-ba$), or $se\bar{o}$ or seo; Nom. plural $t\bar{e}$, obl. plural $t\tilde{e}s$ or $t\tilde{e}sa$. The agent singular is sometimes se, sometimes $ta\underline{sh}\bar{o}$. $T\bar{e}v$ is an adjective plural. Another plural base is aka, obl. $ak\tilde{a}s$. Examples are:—

se nīgiṭi beā, he became in want.

tashō-ba miul, its price.

tashō preh, give to him.

se maṭyā, he divided.

tashō vinā, he struck.

seo-ba patkēr, after that.

tē gyāst, they go.

tēs-kane mayō, among them.

tēsa Trasken vērētoā, they saw Trasken.

tēv rupayan tashō-ka vēch, take those rupees from him.

aka shātinōt, they became merry.

akā-ba, of them (List).

WAI-ALĀ. 49

The word for 'he,' 'this,' is $\bar{\imath}$, obl. sing. $\bar{\imath}$. The oblique plural is $\alpha m \bar{\imath}$. There is no occurrence of the nominative plural. Examples of the use of this pronoun are:—

ī to-ba piutr, this thy son.

ī rupaya tashō preh, give this rupee to him.

ī-ketī brujao pratā, for him food was given.

ī karave, put on him.

 $\bar{\imath} \ \tilde{\alpha} g \tilde{u} \underline{r}$ -ke, on his finger.

 $am\overline{\iota}$ -ka may $\widetilde{\delta}$, amongst them.

Other pronominal forms are:-

tanu, own: tanu $t\bar{o}la-k\tilde{e}$, to his own fields.

 $k\tilde{a}sta$, by whom: $k\tilde{a}sta$ $m\tilde{a}l$ $pusiy\tilde{a}$, by whom the property was lost.

kē, who i kuma dabala, whose boy i kū-ka, from whom (did you buy) i

kas, what? to-ba nam kas ver, what is your name? kasush, what for, why? kasu-ketī, what for, because.

ki, any: ki $w\bar{a}s$ - $k\tilde{e}$, at any time; ima kasu ver-ba, whatever may be mine; $ku\tilde{i}$ -di to-ba mela arunga na $k\tilde{u}r\tilde{a}$, at any time even I did not disobey thee: $ku\tilde{i}$ -ta i to-ba piutr a- $b\bar{a}$, when this thy son may have come.

iti, so many, so much: iti vel koidam kũrā, so many years I served thee; iti koidam kũrā, so much service I did.

kiti, how many? how much? ī gurō kiti vel beoōsta ver? how many years has this horse existed? kiti sudu ver, how much distance is it?

Pronominal suffixes are freely used, as in Bashgali. They are added to nouns and to verbs, but I have not met any instances of pronouns of the first or second person being added to nouns. When added to nouns they have the force of the genitive case.

When added to verbs, they have the force of the nominative case, *i.e.* refer to the subject, when it is in the first or second person of either number or in the third person plural, and is added to the past participle of an intransitive verb. Pronouns of the third person singular are not so added, the bare participle being always used. When added to the past participle of a transitive verb, they may have the force of an agent or of a dative.

These suffixes are as follows:-

	Sing.	Plur.
1st Person,	m.	mi <u>sh</u> .
2nd Person,	\underline{sh} .	$\widetilde{e}.$
3rd Person,	s, <u>sh</u> a.	t.

Examples are: -

- Nouns, piutr, a son; piutrus, his son.
 brā, a brother; brās, his brother.
 tata, a father (obl. tatō): tatōs, his father.
 jū, a daughter; jūes, his daughter.
 manash, a man; manashsha, his man.
- (2) Verbs, $go\bar{a}$, gone; $g\bar{o}m$, I went; $g\bar{o}\underline{s}\underline{h}$, thou wentest; $g\bar{o}mi\underline{s}\underline{h}$, we went; $g\bar{o}\tilde{e}$, you went; got, they went.

ver, he is; \tilde{i} $v\bar{i}b\bar{i}$ vrem (for verem), (he) beaten is-by-me, I have beaten him.

pratā, given; to yē na pratōm, by thee to me not (was) given-to-me, thou didst not give me.

Case and number suffixes are added to nouns with pronominal suffixes in the usual way. Thus, $tat\bar{o}s$ -ba, of his father; $tat\bar{o}s$ - $keli\tilde{a}$ -ba, of his fathers.

III.—VERBS—

A. Auxiliary Verbs and Verbs substantive.—

The Verb substantive is thus conjugated:—

	Present.			Past.		
	Sing.	Plur.		Sing.	Plur.	
1.	vrem.	$v\widetilde{e}rami\underline{s}\underline{h}.$		variem.	$variar{e}mi\underline{sh}.$	
2.	vresh.	$v\widetilde{e}r\widetilde{e}.$		variesh.	$va_!y\widetilde{\widetilde{u}}.$	
3.	ver.	veret, vret.		vari.	varī.	

The past tense does not apparently change for gender. A subjunctive mood is formed by adding $b\bar{a}$. Thus, $ver-b\bar{a}$, it may be.

There is a negative verb substantive, of which I have noted the following forms:— $n\tilde{u}ryem$, I am not; $n\tilde{u}ri$, it is not.

I have noted the following forms of the root bu, become:—

Infinitive, $b\widetilde{u}sta$, to become.

Present Participle, bāla, being.

Past Participle, beoösta, become.

Conjunctive Participle, $b\bar{\imath}$, having become.

Future, bāriam or bāriem, I shall become; bīkarē, we shall become.

Past, $b\bar{a}m$, I became; $be\bar{a}$ or $b\bar{e}$, he became.

i busta ver, I should be, is literally 'by me to become is (proper).

B. The Active Verb.—

The typical transitive verb is the root vi, strike, and the typical intransitive one is the root $\bar{\imath}$, go. The latter is irregular in the formation of its past participle.

Principal Parts.—

Infinitive, $-viy\widetilde{u}sta$, to strike. The termination of the infinitive is sta (compare Bashgali $v\bar{\imath}ste$, to strike). The infinitive can be treated as a verbal noun with an oblique form in \bar{o} . Thus, $chara\widetilde{u}st\bar{o}-ket\bar{\imath}$, for grazing; $\bar{a}st\bar{o}-ket\bar{\imath}$, on account of his coming; $\bar{u}st\bar{o}-ke$ zo-na-very \bar{a} , he did not wish in his heart to go.

Present Participle,—(?) vila, striking. I have not noted the present participle of the root vi. It, however, ends in la (compare Bashgalī vīl, striking). Other examples are tarala, searching; bāla, being.

Past Participle,—vinasta or vinista, struck. This participle properly ends in ā, so that we should have vinā. (As in Bashgalī, the root vi adds an n in the Past Participle.) But when used as an adjective this participle invariably takes the adjectival termination sta, so that we get the form vinasta or vinista. Other examples are gōsta, gone; beoōsta, become; kerēsta, (? feminine) done? nishinasta or nishinista, seated; mõrasta, dead.

WAI-ALĀ. 51

Conjunctive Participle,— $vib\bar{\imath}$, having struck. The true form of this is merely the root (thus vi) without the suffix $b\bar{\imath}$, which apparently means 'having become,' being itself the conjunctive participle of the root bu. This simpler form (with or without an i added) has been noted in a few instances. Other examples are $y\bar{e}$ (the father having gone outside) or $y\bar{e}b\bar{\imath}$, having gone; $y\bar{e}b\bar{\imath}$, having eaten; $\bar{o}shtib\bar{\imath}$, having arisen; utulbi, having burnt; $sanumb\bar{\imath}$, having run; $av\bar{\imath}b\bar{\imath}$, having brought; $katib\bar{\imath}$, having eaten; $\bar{e}b\bar{\imath}$ or (2nd specimen) $\bar{e}\bar{e}b\bar{\imath}$, having come; $ch\bar{a}kat\bar{\imath}$, having summoned; $w\bar{a}r-\bar{e}b\bar{\imath}$, having come up; $muk\bar{\imath}$, having fled; $g\tilde{a}r\bar{e}b\bar{\imath}$, having counted.

Imperative,—vi, strike thou. This is the bare root to which an o or \bar{u} is sometimes added. Other examples are $ch\bar{u}$ or $\bar{\imath}$, go; $y\bar{u}$, eat; $ni\underline{sh}\bar{u}$, sit; $a\underline{ts}h$, come; $\bar{o}\underline{sh}t$, rise, stand; $mr\tilde{\imath}$, die; preh or ao, give; $san\bar{u}$ (cf. Bashgalī $achun\bar{o}$), run; $v\bar{e}ch$, take; $gr\tilde{u}t$, bind; vai-shao, draw water; $utt\bar{o}$, keep (me as thy servant).

The 2nd person plural ends in $v\tilde{e}$. Thus, $karav\tilde{e}$, put ye on (the saddle, a garment); $datav\tilde{e}$, put ye on (a ring, shoes).

The Present Tense is conjugated as follows:—

I strike.			I go.		
	Sing.	Plur.	Sing.	Plur.	
1.	viam.	$vi\widetilde{a}mi\underline{sh}.$	gyam.	gyãmi <u>sh</u> .	
2.	$via\underline{sh}.$	$vi\widetilde{lpha}s\widetilde{e}$.	gya <u>sh</u> .	$gy\widetilde{a}s\widetilde{e}$.	
3.	viās.	viast.	$gyar{a}s$.	$gyar{a}st.$	

Other examples are meryam, I die; na vēcham, I do not take; nishās, he sits, or he dwells; matrās, he says; chāst, they make (offerings). In the following, the third person plural is used in the sense of the third person singular, charayāst, he is grazing; ēāst, he comes; lasayāst, it becomes spare, remains over and above. It is possible that in these last yast is really an auxiliary verb connected with the Ghalchah yast, he is. The verb substantive ver seems to be really a future of the root which appears in the Ghalchah (Yūdghā) viem, I was.

Definite Present.—There is no special form for this. It is the same as the simple present. In the list of words, the idea of a simple present is expressed by a circumlocution.

Thus, $y\bar{e} \ viy\tilde{u}st\bar{o}-ka \ may\tilde{o} \ v.em$, I am in a beating, something like the old English 'I am a-beating.'

Imperfect.—This, in the list of words, is expressed by a similar circumlocution. Yē viyữstō-ka mayō variem, I was in a beating, I was a-beating. In the specimens there are several forms which can only be treated as imperfects or as habitual pasts. They are based on the corresponding forms of the present tense, and are preyāsa, (no one) used to give (to him); ēyāsa, (his son) was coming (and was seen by him); vēchāsa, (the devil) used to take (tribute); prēāsī, they used to give (a man).

Future.—The typical letter of this tense is r, corresponding to the Bashgali l. vol. VIII, PART II.

Compare the Bashgali vilam, I shall strike. As in that language, the first person plural is irregular, the following is the conjugation of the tense 'I shall strike':—

g:		Plur.
7	$egin{aligned} \mathbf{sing.} \ vi ilde{e}ram. \end{aligned}$	$var{\imath}karar{e}.$
1. 2.		$vi\widetilde{e}\widetilde{r}\widetilde{e}.$
2. 3.	vier.	${\it vieret}.$

Other examples are mela cheram, I will make words; bikare, we will become (happy).

This tense can be used in the sense of a present subjunctive, as in yē kas vieram, I

perhaps may strike.

Past.—In transitive verbs this tense is conjugated passively with the subject in the agent case. I have not found any instances in which the tense is changed to agree with the object in gender or number (see, however, the perfect, below). As in other languages, the tense is the simplest form of the past participle, without the termination sta. In one or two cases it takes the termination \bar{o} , instead of \bar{a} . The past tense of the verb 'strike' is therefore conjugated as follows, the participle itself remaining unchanged throughout:—

	Sing.	Plur.
1.	$\tilde{i} \ vin \bar{a} \ { m or} \ vin \bar{o}.$	$yema\ vinar{a},\ vinar{o}.$
2.	to vinā or vinō.	vīma vinā, vinō.
3.	ta <u>sh</u> ō vinā or vinō.	$t\widetilde{ar{e}}s\ vinar{a},\ vinar{o}.$

Other examples of this tense are, $miul\ pr\bar{e}\ v\bar{e}\ k\tilde{u}r\bar{a}$, did you buy? $maty\bar{a}$, he divided; $v\bar{e}s\bar{e}tey\bar{a}$, he collected; $pusiy\bar{a}$, he lost; $pre\underline{sh}y\bar{a}$, he sent; mela (or mele) $kr\bar{a}$ ($k\tilde{u}r$ or $k\tilde{u}r\bar{a}$), he made words, he said; $kr\bar{a}$, $k\tilde{u}r$ or $k\tilde{u}r\bar{a}$, he (or I) made, he (or I did); $v\tilde{e}r\tilde{e}to\bar{a}$, he saw, I saw; $pel\tilde{a}g\bar{o}$, he embraced; $j\bar{\imath}part\bar{o}$, he kissed; $mela\ kudey\bar{a}$, he enquired; $z\tilde{e}ry\bar{a}$, he entreated; $prat\bar{a}$, thou gavest; $j\tilde{e}r\bar{a}$ (2nd specimen), he killed.

With a pronominal suffix of the dative of the first person we have pratom, thou didst (not) give to me.

The word for 'he said' is *matrei*, which seems to be irregular. Possibly the *ci* is a pronominal suffix meaning 'to him.'

In the case of intransitive verbs, the third person singular is the bare past participle, which agrees with the subject in gender. In the other persons, pronominal suffixes of the nominative are added to the past participle. We thus get the following conjugation of 'I went':—

	Sing.	Plur.
1.	gōm.	gōmi <u>sh</u> .
2.	$g ilde{o}_{\underline{s} \underline{h}}.$	$gar{o}\widetilde{e}$.
3.	$go\bar{a}$ (masc.), $ge\bar{a}$ (fem.).	$q \bar{o} t$.

An example of the 3rd sing. fem. is $ni\underline{sh}tupren\ dabala\ go\bar{a}$, $patk\tilde{e}r\ dabili\ ge\tilde{a}$, first, the boy went, afterwards the girl went.

Other examples of this tense are $samaty\bar{a}$, he started; $chamy\bar{a}$, (a famine) stuck; $be\bar{a}$ or $b\bar{e}$, he became; $ni\underline{sh}in\bar{a}$, he sat, or stayed; $biny\bar{a}$, he understood; $oshirm\bar{a}$ - $g\bar{o}m$, I felt (lit. went) ashamed; \bar{a} , he came; $zo\text{-}ma\text{-}v\tilde{e}ry\bar{a}$, he did not wish in his heart; $\bar{a}t\bar{o}$, (the turn came); $sh\bar{a}tin\bar{o}t$, they became merry; $ni\underline{sh}in\bar{o}t$, they dwelt; $v\bar{e}shan\text{-}g\bar{o}t$, they rebelled.

WAI-ALĀ. 53

In the Parable, when the elder son comes home, the word used is $dayy\tilde{a}$, he arrived. I am unable to explain this form. Possibly it is really the locative of a verbal noun, and means 'on arriving.'

The **Perfect** tense is, in the list, formed from the conjunctive participle. Thus, \tilde{i} $v\bar{i}b\bar{i}$ vrem, by me having struck he is by me, i.e. I have struck him. Elsewhere both in the list and in the specimens, it is formed from the past participle. Thus, $s\bar{o}s$ ishtri $ker\tilde{e}sta$ (? is this feminine) ver, he has made the sister a wife, he has married the sister; $tat\bar{o}$ brujao $prat\bar{a}$ ver, the father has given food.

The **Pluperfect**, in the only example, is made from the past participle, viz. \tilde{i} vinistā varī, I had struck.

As in Bashgalī, a kind of **Conditional** or **Subjunctive** mood is made by suffixing $b\bar{a}$, as in $y\bar{a}rim-b\bar{a}$ $kiu\underline{t}s$ pararem- $b\bar{a}$, if I may eat . . . I may fill (my) belly. Sometimes this $b\bar{a}$ is omitted, and we have other idioms, like those given in the list; $y\bar{e}$ kas $vi\tilde{e}ram$, I may perhaps strike; \tilde{i} $viy\tilde{u}sta$ ver, to me it is (proper) to strike, I should strike.

The **Passive** voice is formed by conjugating the past participle with the verb substantive. Thus:—

yē vinasta vṛem,—I am being struck. yē vinasta vaṛiem,—I was struck. yē vinasta bāṛiam,—I shall be struck.

The **Negative** is throughout na, except in the negative verb substantive (see above). The word for 'no' is nai or nei.

WASI-VERI OR VERON.

This language is spoken by the Prēsun, one of the Sufēd-pōsh tribes of Kāfiristān. According to Sir George Robertson¹ they are also called Viron by their Muhammadan neighbours, and 'are probably a very ancient people. They inhabit the Presungul,' and are entirely different from the Siāh-pōsh tribes on the one hand, and from the Wai and the Ashkun(d) people on the other. They are remarkable for their peaceful disposition, and for their inefficiency as fighting men.......The high valley of the Prēsuns is easy, and the grazing excellent, the flocks and herds good and the people can be plundered without much difficulty: but it is a sort of cockpit for Kāfiristān, and no man can wander there safely except when the passes are closed by snow.'

The language spoken by this people differs extremely from Bashgalī, but a perusal of the grammatical notes which follow will show that both languages evidently belong to the same stock.³

The following specimens of the Veron dialect, or Wasi-veri, have been prepared for me, under circumstances of considerable difficulty, by Khan Sahib Abdul Hakim Khan. As explained above, the Verons are a people not easy to get hold of. At length, after long search, a shepherd of considerable stupidity was found, and with his aid the versions were prepared through the intermediary of a Bashgalī Shaikh, who knew something of his language.

The results are the two following specimens (a version of the Parable of the Prodigal Son, and a Folktale), and the following List of words in the Veron language.

This is the first attempt which has ever, so far as I am aware, been made to record any facts about this interesting language, concerning which nothing has hitherto been known except the name. Considering the want of intelligence shown by the source of our information, we cannot hope that the specimens are in every respect correct, but Khan Sahib Abdul Hakim Khan's skill and experience in preparing these specimens (this is the thirteenth that he has been good enough to procure for me) are a guarantee that every care has been taken to make them as accurate as the circumstances permitted.

From the specimens and the list of words, we are able to put together the following imperfect sketch of the Veron language, which has been checked at Chitral by Khan Sahib Abdul Hakim Khan:—

I.-NOUNS-

Singular.
(1) $y\bar{a}$, a father. $y\bar{a}$, of a father. $y\bar{a}$ -pa or $y\bar{a}$ - $pan\bar{e}$, to a father. $y\bar{a}$ -pa or $y\bar{a}$ -panea, from a father.

Plural.
yā-kil or yā-kili.
yā-kiliõ.
yā-kiliõ-panē.
yā-kiliõ-panea.

I 2

¹ The Kāfirs of the Hindu-kush-pages 78 and ff.

² This is the name given by Sir George Robertson to the river which is formed by the 'Wezgul' drainage. Op. laud. pages 64 and 66. The river does not appear to have any established local name or he would have used it, instead of coining a designation. Khan Sahib Abdul Hakim Khan calls it the 'Wasi-gal,' and the language 'Veron' or 'Wasi-veri,' i.e. speech of Wasi.

³ Compare the first personal pronoun in the two languages. In Bashgali, it is onts and in Veron it is unzū.

VOL. VIII, PART II.

NUMERALS.

osht, nū, dosh, yāsh, pūch, shū, sot Ek, du, trē, shtā, six, seven, eight, nine, ten, five, eleven, three, four, One, two, $\sh\widetilde{\overline{e}}\sh$ trữsh, chadesh, pachesh, satāsh, eshtāsh, ëshī, bāsh, sixteen, seventeen, eighteen, nineteen, twelve, thirteen, fourteen, fifteen, vishī, vishē-dōsh, du-vishī, du-vishē-dōsh, trē-vishē-dōsh, shtā-vishī, sixty, seventy, twenty, thirty, eighty, forty, fifty, shtā-vishē-dōsh, pūch-vishī. ninety, hundred.

Singular.

(2) $lu\underline{sh}tu$, a daughter. $lu\underline{sh}t-kil$ or $lu\underline{sh}t-kili$. $lu\underline{sh}t-kili$ or $lu\underline{sh}t-kili$. $lu\underline{sh}t-kili$ or $lu\underline{sh}t-kili$. $lu\underline{sh}t-kili$ or $lu\underline{sh}t-kili$

The following are further examples of the formation of the plural:—

Plural. Singular. pië or pië-kili. pie, a son. warjemi. warjemi, a man. westeõ. weste, a woman. īriõ. īri, a horse. <u>zh</u>e<u>sh</u>teõ. zhesht, a bull. gūthõ. gūth, a cow. kirő. kirukh, a dog.

There does not appear to be a dual number. We have $l\bar{u}e-y\bar{a}-kil$, two fathers; $l\bar{u}e$ $lu\underline{sh}t-kil$, two daughters; $l\bar{u}e$ $pi\tilde{e}$, two sons; $l\bar{u}e$ warjemi, two men.

Some nouns appear to have an oblique form. At least we find tarage or tarag-ti, in the house, and tarage tibbatiuk, near to the house.

As regards cases, the genitive frequently has the termination $\bar{u}ri$. Thus we have $warjemi-\bar{u}ri$, of a man; $\bar{v}ri-\bar{u}ri$, of the horse; $ki\underline{zh}g\bar{a}-\bar{u}ri$, of the swine. So also in the Pronouns (q.v.). The terminate wak also appears in the list of words. Thus, $y\bar{a}-wak$, of a father.

As regards the Dative, the specimens and the List of words give a form in \underline{sh} . Thus, $y\underline{ash}$, to the father; $pi\underline{esh}$, to the son; $iy\underline{u}$ endesh pologsho, thou to-me saidst. It may be noted here that the specimens show that the postpositions of the cases are very loosely used, and are frequently omitted. It seems to me to be probable that in the first two examples the \underline{sh} is a pronominal suffix meaning 'his,' and that the words mean 'his father' and 'his son,' respectively. Compare the Wai-alā manashsha, his man.

I note one instance of a Dative Plural in an, i.e. from palē, a servant, we have Nominative Plural palē; Dative Plural palēan, (the father said) to the servants. Or, more probably, palēan is a general oblique plural form. Compare the Bashgalī palēin-tã.

A Dative of motion to a place is formed by prefixing tu. Thus, tu-gul, to (or in) a country; tu-munj, to-in, into.

A Locative case is formed by suffixing munj. Thus, itineok-tu-munj, to-in-fields; tulu-munj, in longing. 'On the back' is tu-gich. Thus, iri-tugich, on a horse. Nu also means 'in,' in nu-losuni, in want.

II.—PRONOUNS—

Singular. Plural. Singular. Plural. $as\tilde{e}$. i- $y\tilde{u}$, thou. $mi\tilde{u}$. um, um- $u\tilde{u}ri$, of me, my. as. i, i- $u\tilde{u}ri$, of thee, thy. $as\tilde{e}n$ - $u\tilde{u}ri$. endesh, Dat. and obl. form. $as\tilde{e}$, as. itiesh, Dat. and obl. form. $as\tilde{e}n$.

The oblique forms can, apparently, be used for almost any case. Thus, in the specimens, in different places, $ende\underline{sh}$ means 'of me,' 'to me,' and 'me.' 'My father' is $um\ y\bar{a}:um\ aga$ (second specimen) is 'to me': $as-pan\bar{e}$ is 'to us.'

WASĨ-VERI. 61

In the second person, the sign of the genitive is often dropped. Thus we have \bar{z} nam, thy name; \bar{z} $y\bar{a}$, thy father; \bar{z} timig, before thee; \bar{z} $pi\tilde{e}$, thy son.

Singular. Plural. $s\bar{u}$, he. $m\bar{u}$. $s\bar{u}mi\underline{sh}$, $sumi\underline{sh}$ - $\bar{u}ri$, of him. $mi\underline{sh}in$, $mi\underline{sh}in$ - $\bar{u}ri$. $sumi\underline{sh}$, $mi\underline{sh}$, Obl. form. $mi\underline{sh}in$.

The oblique form may be used for any case. Thus, $mi\underline{sh}$ let $r\bar{\imath}$, his wealth; $mi\underline{sh}$ \underline{sh} $\bar{\delta}$ - $pan\bar{e}$, with his own self; $sumi\underline{sh}$ -pan \bar{e} , to him; $sumi\underline{sh}$ amj $\bar{o}n$, put on him; $sumi\underline{sh}$ eshtak $pi\tilde{e}$, his eldest son; $sumi\underline{sh}$ -dug \tilde{e} (compare Bashgali ene-dug $\bar{a}n$), for his sake; $sumi\underline{sh}$ tu-g $\bar{\imath}chi$, on his back; $sumi\underline{sh}$ -pa, from him. Regarding pronominal suffixes see the remark on the Dative case of nouns, above.

'That' is esle, as in esle warjemi, that man: esle ves, at that time. 'Those rupees' is translated marga tenga. 'This' is $u\bar{u}$, as in $u\bar{u}\ \bar{\imath}ri$, this horse; $u\bar{u}\ pi\tilde{e}$, this son.

The following are miscellaneous pronouns. 'Who' (relative) is kese or kes; 'whose?' is tesh; 'what?' is pseh; 'so many' is kereg; 'how many' is kereg-skal; 'whatever' is pespulok; 'any one' is kesedde; um-ūri psahstro, ī-ūri asto, is 'mine whatever-things are, thine are.'

III.—VERBS—

A. Verbs Substantive.

Infinitive, inik, to be, as in pie inik aipua, fit to be a son. Present Tense, I am, etc.

Singular.		Plural.	
1.	esmo, aso.	esem <u>sh</u> o.	
2.	eso, or es.	eseno.	
3.	eso, so, esela.	asto.	

The following sentences may be compared with the above: -

Aipua nā aso, I am not fit.

Um panē eso, thou art with me.

Nerag tikke eso, how far is it?

Zīn tarag-tî eso, the saddle is in the house.

 $Lit\tilde{e}$ eso, he is taller.

Pseh lol nat so, what singing (and) dancing is there?

I nam pesnemes, what is your name?

 $U\bar{u} \ \bar{\imath}ri \ nerag \ u\underline{ts}u \ esela$, how old is that horse?

Nerag pië ast (possibly borrowed from Ghalchah), how many sons are there? Um-ūri psahstro, ī-ūri asto, mine whatever things are, thine are.

Past Tense, I was, etc.

	Singular.	Plural.
1.	essem.	asem <u>sh</u> o.
2.	esso.	esno.
3.	esso, so, tso.	asto, ese.

Singular.

(2) $lu\underline{sh}tu$, a daughter. $lu\underline{sh}t-kil$ or $lu\underline{sh}t-kili$. $lu\underline{sh}tu$, of a daughter. $lu\underline{sh}tu$ -pa, to a daughter. $lu\underline{sh}t-kili$ or $lu\underline{sh}t-$

The following are further examples of the formation of the plural:-

Plural. Singular. pië or pië-kili. pie, a son. warjemi. warjemi, a man. westeõ. weste, a woman. īriõ. īri, a horse. zheshteõ. zhesht, a bull. gūthõ. $g\bar{u}th$, a cow. kirő. kirukh, a dog.

There does not appear to be a dual number. We have $l\bar{u}e \cdot y\bar{a} \cdot kil$, two fathers; $l\bar{u}e$ $lu\underline{s}ht \cdot kil$, two daughters; $l\bar{u}e$ $pi\tilde{e}$, two sons; $l\bar{u}e$ warjemi, two men.

Some nouns appear to have an oblique form. At least we find tarage or tarag-ti, in the house, and tarage tibbatiuk, near to the house.

As regards cases, the genitive frequently has the termination $\bar{u}ri$. Thus we have $warjemi-\bar{u}ri$, of a man; $\bar{v}ri-\bar{u}ri$, of the horse; $ki\underline{z}hg\bar{a}-\bar{u}ri$, of the swine. So also in the Pronouns (q.v.). The terminate wak also appears in the list of words. Thus, $y\bar{a}-wak$, of a father.

As regards the Dative, the specimens and the List of words give a form in \underline{sh} . Thus, $y\underline{a}\underline{sh}$, to the father; $pi\underline{e}\underline{sh}$, to the son; $iy\underline{u}$ endesh pologsho, thou to-me saidst. It may be noted here that the specimens show that the postpositions of the cases are very loosely used, and are frequently omitted. It seems to me to be probable that in the first two examples the \underline{sh} is a pronominal suffix meaning 'his,' and that the words mean 'his father' and 'his son,' respectively. Compare the Wai-alā manashsha, his man.

I note one instance of a Dative Plural in an, i.e. from palē, a servant, we have Nominative Plural palē; Dative Plural palēan, (the father said) to the servants. Or, more probably, palēan is a general oblique plural form. Compare the Bashgalī palēin-tã.

A Dative of motion to a place is formed by prefixing tu. Thus, tu-gul, to (or in) a country; tu-munj, to-in, into.

A Locative case is formed by suffixing munj. Thus, itineok-tu-munj, to-in-fields; tulu-munj, in longing. On the back is tu-gich. Thus, iri-tugich, on a horse. Nu also means in, in nu-lōsuni, in want.

II.—PRONOUNS—

Singular. Plural. Singular. Plural. $as\tilde{e}$. $i-y\bar{u}$, thou. $mi\bar{u}$. $um, um-\bar{u}ri$, of me, my. as. $\bar{\imath}, \bar{\imath}-\bar{u}ri$, of thee, thy. $as\bar{e}n-\bar{u}ri$. $endes\underline{h}$, Dat. and obl. form. $as\tilde{e}$, as. $ities\underline{h}$, Dat. and obl. form. $as\tilde{e}n$.

The oblique forms can, apparently, be used for almost any case. Thus, in the specimens, in different places, endesh means 'of me,' to me,' and 'me.' 'My father' is um yā: um aga (second specimen) is 'to me': as-panē is 'to us.'

In the second person, the sign of the genitive is often dropped. Thus we have \bar{z} nam, thy name; \bar{z} $y\bar{a}$, thy father; \bar{z} timig, before thee; \bar{z} $pi\tilde{e}$, thy son.

Singular. Plural. $s\bar{u}$, he. $m\bar{u}$. sumish, sumish, sumish, of him. <math>mishin, mishin, mishin, mishin. mishin.

The oblique form may be used for any case. Thus, $mi\underline{sh}$ $letr\overline{\imath}$, his wealth; $mi\underline{sh}$ \underline{sh} $\overline{\delta}$ - $pan\overline{e}$, with his own self; $sumi\underline{sh}$ - $pan\overline{e}$, to him; $sumi\underline{sh}$ $amj\overline{on}$, put on him; $sumi\underline{sh}$ $e\underline{sh}tak$ $pi\widetilde{e}$, his eldest son; $sumi\underline{sh}$ - $dug\widetilde{e}$ (compare Bashgalī ene- $dug\overline{an}$), for his sake; $sumi\underline{sh}$ tu- $g\overline{\iota}chi$, on his back; $sumi\underline{sh}$ -pa, from him. Regarding pronominal suffixes see the remark on the Dative case of nouns, above.

'That' is esle, as in esle warjemi, that man: esle ves, at that time. 'Those rupees' is translated marga tenga. 'This' is $u\bar{u}$, as in $u\bar{u}$ $\bar{\imath}ri$, this horse; $u\bar{u}$ $pi\tilde{e}$, this son.

The following are miscellaneous pronouns. 'Who' (relative) is kese or kes; 'whose?' is tesh; 'what?' is pseh; 'so many' is kereg; 'how many' is kereg-skal; 'whatever' is pespulok; 'any one' is kesedde; um-ūri psahstro, ī-ūri asto, is 'mine whatever-things are, thine are.'

III.—VERBS—

A. Verbs Substantive.

Infinitive, inik, to be, as in pie inik aipua, fit to be a son. Present Tense, I am, etc.

Singular.		Plural.	
1.	esmo, aso.	esem <u>sh</u> o.	
2.	eso, or es.	eseno.	
3.	eso, so, esela.	asto.	

The following sentences may be compared with the above:-

Aipua nā aso, I am not fit.

Um panē eso, thou art with me.

Nerag tikke eso, how far is it?

Zīn tarag-tī eso, the saddle is in the house.

 $Lit\tilde{e}$ eso, he is taller.

Pseh lol nat so, what singing (and) dancing is there?

I nam pesnemes, what is your name?

Uū īri nerag utsu esela, how old is that horse?

Nerag pië ast (possibly borrowed from Ghalchah), how many sons are there? Um-ūri psahstro, ī-ūri asto, mine whatever things are, thine are.

Past Tense, I was, etc.

	Singular.	Plural.
1.	essem.	asem <u>sh</u> o.
2.	esso.	esno.
3	esso en ten	neto ese

Examples of the use of this tense are,-

sū tulu-munj so, he was in longing.

sumish eshtak pië itineok tu-munj so, his eldest son was in the fields.

attege kata warjemi so, there was a wealthy man.

shingranik char tso, merry-making was proper.

lue pie ese, there were two sons.

Future, I shall be; -unzū apōrgosmō.

Present Conditional, I may be ;—unzū apōrgosme.

Past Conditional, I would have become merry; - shingraya saisumish.

Future Conditional, I should be; -inikso.

Several words are translated 'he became' in the specimens. They are as follows:-

ūtu-kal wōkso, there became a famine-year.

nu-lōsuni wōkso, he became in want.

tikhiul wōkso, he became annoyed.

sho-okso, he became alive.

ato-bōkso, he had become lost.

shingra wogusto, they became merry (compare pezekso, he went; pezegusto, they went).

B. Active Verb.

Standard verb,—

pesumtinik, to beat.

Infinitive, pesumtinik, to beat; so inik, to be; wuzānik, to graze; oyinik, food; tibzinik, to go inside; <u>shingrānik</u>, to make merry. We find a Dative of the Infinitive in atsuk-panē abuk aphlēgo, he gave food for (on account of) his coming.

The Past Participle or Conjunctive Participle ends in i or $\bar{\imath}$. Thus, pesumt $\bar{\imath}$, having beaten; so bidi-talwi, having done debauchery; $oy\bar{\imath}$, having eaten; $uisht\bar{\imath}$, having risen; ushozi, having seen; gizi, having brought; $ch\bar{a}li$, having called; $bebz\bar{\imath}$, having gone out; tizh-gui, having collected; $tibz\bar{\imath}$, having gone inside; kosi, having fallen. Ikki-zo, running, seems to belong to this.

Imperative,—pesumtieh, beat; so,—āphleh or ophliu, give; sumotū, keep; al bīzas, look here. Other examples in the list of words are,—pez, go; oyus, eat; bishlus, sit; jots, come; ishteh, stand; omos, die; ikiutsek, run; ilgēseh, take (? take away); ūrias, walk.

Plurals are amjon, put on; sakshon, put.

Present, -- I beat, etc.

pesumtiemo.
 pesumtimasish.

3. pesumtimaso.

Singular.

Plural.
pesumtimsho.

pesumtimasinch.

pesumtimasto.

The same tense of the verb 'to go' is (judging from the list of words) somewhat different. It is as follows:—

1. pezemo.

2. pezmasish.

3. pezemaso.

pazemsho (sic).

pezemasench.

pezemasto.

WAST-VERI. 63

The only example in the specimens is bi-shilmasto, it (they) become(s) spare.

In the List of words we find ayāmeso, he is grazing; *i-tak tsāmaso*, he comes behind you. $M\bar{o}ksum$, in the Parable, which is translated 'I am dying,' is apparently really a Past Tense, and means 'I am dead.'

The following appear to be the terminations of this tense:-

Singular. Plural.

1. emo. $m\underline{sh}o$.

2. $masi\underline{sh}$. masinch, masench.

3. maso, meso. masto.

These may be compared with the Present and Past Tenses of the Verb Substantive and with the Bashgalī Pluperfect.

Imperfect,—pesumtimasēsum.

In the Parable, \bar{a} maso, he was coming, is apparently an example of this tense. It looks, however, more like the third person present.

Future,—I shall beat, etc.

Singular.
Plural.

pesumtemo.
pesemtemsho.
pesemtiogasno.
pesemtiogasno.
pesemtiogaso.
pesemtiogasto.

Other examples are,-

pezemo, I will go; veri-polemo, I will say words; oïmsho, we will eat; shingraīmsho, we will make merriment.

Present Conditional,—I may beat, etc.,—pesumti-wolgosm. Other examples are probably gosaisum, I would make (my belly satisfied); $b\bar{\imath}$ -shilema, if (the husks) would become spare; and (in the second specimen) $n\bar{a}$ mokwasum, I should not die. This is perhaps a future. 'I should beat' is pesumtenikso.

Past Tense.—The subject appears always to be in the Nominative in the case of Transitive Verbs, but the conjugation of Transitive and Neuter Verbs differs in this tense.

~	3			,	
	12/	2	4-	et.	a

	Singular.	Plural.
1.	unzū pesumtiom.	asẽ pesumtiom <u>sh</u> o.
2.	iyū pesumtiok <u>sh</u> o.	miū pesumtegunch.
3.	$sar{u}$ $pesumtiogo.$	$m ilde{u}$ $pesumtiogosto.$

I went, etc.

unzū pezeksam.
 iyū pezegesish.
 sū pezagish, pezagusto,
 or pezekso.

asẽ pezaksamish.
miū pezaksinch.
mū pezegusto.

Other examples of the Past Tense of Transitive Verbs are:-

First Person,—iliemche, I did; uzhogo, I found.

Second Person,—(List of words) plī ilgēgo, you bought; (Specimens) iyū pespulok-shilo, whatever thou saidst; nā uphlēgo, thou didst not give; abuk aphlēgo, thou gavest food.

Third Person,—polōgo, he said; wilisōgo, he lost; tikhēgo, he consumed; esēgo, he sent; lust ultsogo, he embraced; veri-aplogo (? aphlēgo), he ordered; nusiōgo, he heard; agi-deōgo, he enquired; abuk aphlēgo, he gave food; optoōgo, he entreated; psāōgo, he lost; jicheveh uphlēgo, he gave a paper; abuk aphlēgo, they gave food.

Ending in sto are,—butog-lēgusto, he made division; tizh-gousto, he collected; kesedde sumish nā aphlimasto, no one gave him; aptēgusto, they accepted; ipōgusto, he

built; legusto, they did. These are all probably plurals.

The two following end in kso, which judging from analogy would lead us to class them with Neuter Verbs; but the meaning seems to be transitive,— $\bar{a}pich\bar{o}kso$, he kissed; $alug\bar{o}kso$, it struck (? alighted) on his head.

Judging from cases like aphlēgo or uphlēgo, which means thou gavest, he gave, and they gave, it would seem that in the case of Transitive verbs, the Tense has a Passive signification, although the pronouns of the subject are used in the form of the nominative. $Unz\bar{u}$ aphlēgo would be equivalent to the $Urd\bar{u}$ $ma\tilde{i}$ - $n\bar{e}$ $diy\bar{a}$; $iy\bar{u}$ aphlēgo, to $t\bar{u}$ - $n\bar{e}$ $diy\bar{a}$, and so on. The case closely resembles that of Dakhini Hindōstāni which has $ma\tilde{i}$ (not $ma\tilde{i}$ - $n\bar{e}$) $diy\bar{a}$.

Other examples of the Past Tenses of Neuter verbs are,-

First Person,—mōksum, I am dead; emaso, I became.

Third Person,—(List of words), $a\underline{sh}lekso$, he is seated, or $a\underline{sh}ilekso$, he resides; (Specimens) $\underline{sh}il\bar{e}gusto$, he stayed; $w\bar{o}kso$, he became; jurokso, his heart burnt; $m\bar{o}kso$, he was dead; $\underline{sh}\tilde{o}-\bar{o}kso$, he became alive; $b\bar{o}kso$, he became; $wo\underline{sh}ukso$, he wished; $a\underline{ts}ukso$, he came; $a\underline{sh}legso$, he sat.

 $U\underline{zh}\overline{o}go$ is translated 'he became found.' It is probably a Transitive verb, and means 'I have found (him).'

It would appear probable that the termination so in the above instances is the third person singular past of the verb substantive, meaning 'he was.' So also the termination usto of the third person plural. Compare the Bashgali Pluperfect.

Perfect,—I have beaten,—No example. Skal wezig mish pe eshpōmo means I have beaten with many stripes,' but the verbal root is not the standard one. Other examples, all more or less doubtful, are,—ibil liemo, I have done (I did) service; unun nā gāsun n, I have not refused; i wayeh āwukso, thy brother has come (came); unzū ittīn tserva skal tūd pezaksom, I have walked (I walked) a long distance to-day. I am informed that, as a matter of fact, the language has no perfect tense. The Past tense is used in the meaning both of an Indefinite Past and of a Perfect.

Pluperfect,-'I had beaten' is unzū pesumtimasum.

The following examples of Passive Verbs are given in the list of words:—
unzū pesumtiuggan puzokso, unzū pesumtiuggan pezagesh,

I am beaten.

I was beaten.

unzu pesumtiuggan pezmesh,

I shall be beaten.

Finally,—It is probable that the above verb pesum-tinik, to beat, is a compound one. It may be mentioned that the root of the corresponding verb in Kalāshā is ti.

In the above examples the vowels a and u, a and e, e and i seem to be freely used for each other. I have written in each case what I have found.

A<u>SH</u>KUND.

We know nothing whatever about this dialect except that the word Ash-kund means 'bare mountain.' All the efforts of my friends on the North-West Frontier have failed to procure specimens of this language.

THE KALASHA-PASHAI SUB-GROUP.

The languages belonging to this sub-group are spoken to the east and south of Kāfiristān proper. They are closely connected with the true Kāfir languages, but are influenced by the neighbouring forms of speech. They are three in number, niz. (1) Kalāshā, (2) Gawar-bati, (3) Pashai. Of these Kalāshā represents the Kāfir languages merging into Khō-wār, while the other two represent them merging into the languages of the Kohistan described post, pp. 507ff. They are dealt with in the following pages.

A<u>SH</u>KUND.

We know nothing whatever about this dialect except that the word Ash-kund means 'bare mountain.' All the efforts of my friends on the North-West Frontier have failed to procure specimens of this language.

THE KALĀSHĀ-PASHAI SUB-GROUP.

The languages belonging to this sub-group are spoken to the east and south of Kāfiristān proper. They are closely connected with the true Kāfir languages, but are influenced by the neighbouring forms of speech. They are three in number, riz. (1) Kalāshā, (2) Gawar-bati, (3) Pashai. Of these Kalāshā represents the Kāfir languages merging into Khō-wār, while the other two represent them merging into the languages of the Kohistan described post, pp. 507ff. They are dealt with in the following pages.

KALĀSHĀ.

The Kalāshīs or Kalāsh Kāfirs¹ inhabit the small vaileys of Bomboret, Kalāshgūm, and Birir, south-west of the town of Chatrār (Chitral), in the high lands between the Qāshqār (Chatrār) and the Bashgal Rivers. They are Musalmāns, and are subject to Chatrār, but are claimed by the Bashgalī as slaves.

Their language, Kalāshā, is a connecting link between Bashgalī and Khō-wār, the language of Chatrār. The people who use it call it the $kal\bar{a}sh\bar{a}-m\bar{o}n$, or 'speech of the Kalāshās.'

AUTHORITY-

Leitner, Dr. G. W.,—The Languages and Races of Dardistan, Lahore, 1877. Part I of this book contains a Vocabulary, and some brief grammatical notes on (amongst other languages) Kalāshā. There is also a set of dialogues in the language, which is reprinted in the same author's Hunza and Nagyr Hand-book, Calcutta, 1889, pp. 133 and ff.

Leitner, Dr. G. W.,—A sketch of the Bashgali Kafirs and of their language. Lecture in the Journal of the United Service Institute of India, No. 43, Simla, 1880. The language described is Kalāshā, not Bashgalī.

It is to be regretted that the materials for giving a full account of this language are so imperfect. All that I have been able to do has been to combine in the following grammatical sketch the information given by Dr. Leitner, and that which I have gleaned from the two specimens, and from the list of standard words annexed. In quoting Dr. Leitner, I have, perforce, given his spelling, except in the case of obvious misprints.²

Of the two specimens, one is a translation of the Parable of the Prodigal Son, and the other a piece of Folk-lore in the Kalāshā language.

A BRIEF SKETCH OF KALĀSHĀ GRAMMAR (SO FAR AS KNOWN).

I.-NOUNS-

- (a) Gender.—The distinction of gender does not appear to exist in the language. Thus, ek prusht moch, a good man; ek prusht istri-jah, a good woman. There appear, however, to be two declensions of nouns, one of animate, and the other of inanimate, objects.
- (b) Number.—When it is wished to emphasize the plural idea, words like chhik, all, are appended.

¹ BIDDULPH, Tribes of the Hindoo Koosh, pp. 64 and 127.

² Dr. Leitner admits in the Preface to his work that, for want of proper type, discritical marks have not been given in every case, and that those that are used, are not used with uniformity. This is to be regretted, but I have not thought it proper to venture to correct his spelling from my inner consciousness. These proofs have, however, since this was written, been carefully revised on the spot by Khan Sahib Abdul Hakim Khan.

(c) Declension.—The Accusative is the same as the Nominative. Nouns have usually two forms, a direct and an oblique. The oblique form of masculine animate nouns in the singular is formed by adding as or es, and of inanimate nouns by adding ani or an. The oblique form of the plural is generally formed by adding n, an or en. In some cases, the oblique form is the same as the nominative. Postpositions are usually added to the oblique form, but the postposition som or sum, with, is added to the direct form. The Genitive and Dative are simply the oblique form without any postposition.

KALĀSHĀ.

(1) Animate Nouns,—<u>sh</u>ā, a king, obl. <u>sh</u>ā-as; mōch, a man, obl. mōch-as; strījā, a woman, obl. strījā-as; putr, a son, obl. putr-as; <u>Kh</u>udā, God, obl. <u>Kh</u>udā-(y)-as; <u>kh</u>ūk, pig, obl. <u>kh</u>ūk-as. We thus get the following declension:—

Sing. $\underline{sh}\bar{a}$, a king (Nom.). $\underline{sh}\bar{a}$, a king (Acc.). $\underline{sh}\bar{a}$ sum, with a king. $\underline{sh}\bar{a}$ -as, of a king, or to a king. $\underline{sh}\bar{a}$ -as pi, from a king. $\underline{sh}\bar{a}$ -as pi, $\underline{sh}\bar{a}$ -as pi. $\underline{sh}\bar{a}$ -as pi.

Sing. Plur. Sing. Plur. Nom. moch, a man. mōch. dāda, a father. dādai. Gen. moches. möchen. dadā, dādas. dādai. Dat. mōches-hātia. mochen-hātia. dadā-hātia. dādai-hātia. Abl. (from) moches-pi. mochen-pi. dadā-pi. . dādai-pi.

Nom. $chh\bar{u}$, a daughter. $ch\bar{u}lai$. so we have $h\bar{a}\underline{sh}$, horse; $h\bar{a}\underline{sh}en$, horses: Gen. $chh\bar{u}a$, $chh\bar{u}as$. $ch\bar{u}lai$. $d\bar{o}n$, bull; $d\bar{o}ndan$, bulls: Dat. $chh\bar{u}a-h\bar{a}tia$. $chh\bar{u}a-h\bar{a}tia$. $chh\bar{u}a-h\bar{a}tia$. gak, eow; $g\bar{a}gan$, eows: gak gak, gak,

Other examples, taken from the Parable, are dadā-tāda, near the father; <u>Khudāyas</u> rūna, before God; mazdūras-rau, like a servant; dādas-kai, to the father; mōche-sum, with a man; lalian-sum, with prostitutes.

Note.—In the Parable, the nominative sometimes appears to take the oblique form. We have putras, his son (collected, said, was in the field); $d\bar{a}das$, his father (saw, ordered, embraced). Here, however, the termination is a pronominal suffix meaning his. Thus, $d\bar{a}d-as$, his father. In \underline{tsatak} - $l\bar{e}$, the younger son (said), we have possibly an instance of a case of the agent as in Bashgalī, Paṣḥtō, and Paūjābī before a transitive verb in the past tense.

(2) Inanimate Nouns,—hāst, a hand, obl. hāstan; bāt, a stone, obl. bātan. So we have in the second specimen hāndun hātia for (my) house; nōren, of hunger; irregular is dur hāti, to home.

Note also the forms $j\bar{a}no-sum$, with his heart; $\underline{z}h\bar{u}-ena$, from or of food.

There is also locative in ona. Thus, hāstona mucha, (grasped) in a hand; bazaona, in a hand (bazā, a hand). So also we have in the specimens, shatara waktona, at that time; $k\tilde{o}rona$, on his ears; dokona, in the jungle; broeshtona, from the top.

The specimens give two examples of a locative in e, viz. anguryake, on (his) finger; khūre, on (his) feet.

Other forms which are not provided for above are chhēt mochena, and chhēt moch. in the fields; jegauno, in a place.

 $H\bar{a}st\ gr\bar{\imath}$ is 'holding or seizing a hand,' not, as Dr. Leitner says, 'with a hand.'

Thus, prusht moch, a good man; prusht moches. Adjectives remain unaltered. of a good man; prusht moch, good men; prusht mochen pi, from good men; prusht istri-jah, a good woman; and so on.

II.—PRONOUNS—

First Person, $-\bar{a}$, I; mai, me, my, to me; obl. mai; $\bar{a}bi$, we; $h\bar{o}ma$, us, to us; obl. pl. hōmo or hōma.

Second Person,—tū, tu, thou; tai, thee, thy, to thee; obl. tai; ābi, tū aste chhik (chhik means 'all'), you; mīmi, your, to you; ohl. pl. mīmi or mīme.

Third Person, -Dr. Leitner gives the following forms, -āsā, he, him, his, to him (or her); obl. āsā; shēli, eledrūs, they; shāsi (Acc.), they; īsi, of them; āsi, $\underline{sh}\bar{a}si$, to them; obl. pl. $\underline{sh}\bar{a}si$.

This, iya, shiya.

That, ata, tara.

The following forms occur in the specimens:—

se, he, that; that (adj.) to him; sa, she; iya, shiya, this; ata, tara, that; toh, him, it, that; tā, tāse, tā-a, his; tāse, tāse kai, to him; īse, to this person; she-teh, teh, they; she-tase, tase, their; tase pi, for them; tasi mochani or mocheno, among them; his own, tā-same.

Interrogatives,—kīa or kīe, what? kūra, who? kō, why? kilā-espatī, because; kimon, how many? shamun, so much (many).

Indefinite Pronouns,—kūre, anyone; kīe-galē, whatever.

Relative Pronoun, -kūre-galē (?), in kūre-galē tai daulat dumbao, who wasted thy property.

There are several examples of pronominal suffixes; viz. dadā (not dāda), my father; $b\bar{a}yo$, thy brother; dado, thy father; $p\bar{u}tro$, thy son; $p\bar{u}tras$, his son; $d\bar{a}das$, his father. III.—VERBS—

A. Verbs Substantive—

The forms given by Dr. Leitner are wrong. The correct forms are as follows:—

Present-

āsas,

Sing. Plur. āsam, compare Khō-wār asum.

āsik, compare Khō-wār asusi.

āsa, asumi. $\bar{a}s\bar{o}v$, asur. āsan. asuni.

asus.

When the subject is inanimate the third person is as follows:-

3. shiu, compare Khō-wār sher, it is, there is; Plural, shien, compare Khō-wār shëni, they are.

	st-	
	Sing.	Plur.
1.	āsis.	$ar{a}simi.$
2.	$ ilde{a}si.$	āsili.
3.	āsis, asta.	a sini

KALĀSHĀ. 73

nē shiāla is, 'it or they (inanimate subject) did not exist.' So also, in the third person singular, ashis is used with an inanimate subject. With the above compare-Khō-wār asistam, I was; oshói, it was.

Dr. Leitner gives no forms of any verb meaning 'to become.' The following forms occur in the Specimens and List of Words,—hah, be (imperat.); hiu dai, it is becoming: hāwis, I became; hau, there became, he, it, became; hāwen, they became; thī-āsis, he had become; $b\bar{a}m$, I shall be; kie $b\bar{a}$ -am-e, I may be; kik, to be; thi, being.

From the above it would appear that Dr. Leitner's Present Tense him, I am, really belongs to the verb 'become,' and that the proper form for 'I am' is asum, etc.

The verb dai, which also means in Pashtō, he is, is used as an auxiliary. See below: -

B.—The Active Verb—

The Infinitive ends in ik, ik, or k. (In Wakhī it ends in ak, in Ormuri in ek, in Shiṇā in oiki, in Wasī-veri in ik, in Pashai in īk, and in Khō-wār in īk, or ik.) Examples of Infinitives are :-

 $\bar{o}nik$, to bring; $d\bar{e}k$, to give; $\bar{\imath}k$, to come; $par-\bar{\imath}k$, to go; jageik, to see; $p\bar{\imath}k$, to drink; nisīk, to sit; kārīk, to do; sangāik, to hear; chishtik, to stand; zhuk, to eat.

The following instances of the Infinitive occur in the specimens,—tyek, to beat; charaik, to graze (active); $g\tilde{u}ro\ dyak$ (for $d\bar{e}k$), singing; nat $k\bar{a}rik$, dancing; $k\bar{a}rik$, to make; perkeyak, to fell; ik-as, on account of his coming; par-ik-as, of going.

Dr. Leitner gives no examples of any Participles. The following are all taken from the specimens:—

Present Participle,—par-ik weov, going; ek-weov, coming, from ik, to come; timan, beating; ? iman, coming.

Past Participle,—thāulo, abandoned; saprek, found; kere dīta, or ker dīta, cut; luīna, filled up; awõjena,? having said; ishleg-īta, having slipped down.

Conjunctive Participle,— $ph\bar{a}ji$, having divided; $\underline{zh}ui$, having eaten; $\bar{u}\underline{sh}ti$, having risen; ōni, having brought.

Irregular are pai, having gone; kai, having done; thi, having become; a-dhiai, running; yast-kai, having seized (the neck); chhī, having called; thawai, remaining; grī, having taken; nashai, having killed.

The Future is the same as the Present, as in the Ghalchah languages.

Dr. Leitner gives the following forms of the Present-Future. They have been locally corrected:—

		shall bring (I give or sh	all give.
		inanimate obje	cts).	Sing.	Plar.
1.	Sing. $ar{o}nim$.	Plur. <i>Ōnik</i> .		$d\bar{e}m.$	dek.
2.	ōnis.	ōna.	- 1	des.	det.
3.	ōneu.	ŏnen.		dali.	$da ilde{n} i.$
	I come o	r shall come.	1	I go or sha	ll go.
	Sing.	Plur.		Sing.	Plur.
1.	im.	$\bar{\imath}k$.		par-īm.	$par-\bar{i}k.$
2.	īs.	eov.		par-is.	par-a.
3.	iu.	$\bar{\imath}n.$	1 X 1	par-eu.	par-in.
viii,	PART II.				

VOL. Y

1. 2. 3.	I drind sing. pīm. pīs. pīu.	r or shall drink. Plur. pīk. pīa. pīn.	I see or sh sing. jagēm. jagāi. jagal.	all see. Plur. jagëk. jagā. jagan.
	T sit o	r shall sit.	I do or	shall do.
	Sing.	Plur.	Sing.	Plur.
1.	nisīm.	$nisar{\imath}k.$	$k ar{a} rem.$	kārik.
2.	nisis.	niseov.	$kar{a}ris.$	kāra.
2. 3	niseu.	nisen.	$kar{a}reu.$	kāren.

Dr. Leitner gives only the first person singular of this.

	I hear or shall hear.			I stand or shall stand.		
	Sing. Plur.			Sing.	Plur.	
1.	sangāam.	$sang ilde{a}ik.$		$chi\underline{sh}tim.$	chishlik.	
2.	sangāas.	sang $ar{a}$.		chish tis.	chish ta.	
3.	sangāu.	sangāan.		$chi\underline{sh}$ $teu.$	chishtin.	

The following instances of this tense occur in the specimens:-

I eat or shall eat.			I beat or shall beat.		I find or shall find.	
	Sing.	Plur.	Sing.	Plur.	Sing.	Plur.
1.	zhum.	$\underline{zh}uk.$	tem.	tiek.	saprem.	saprek.
2.	$\underline{zh}us.$	$\underline{zh}ar{u}a.$	ties.	tiet.	sapres.	saprā.
3.	$\underline{zh}ar{u}.$	<u>zh</u> ūn.	tiel.	tien.	sapral.	saprani.

Also the following:—dem, I shall give; $\underline{zh}uk$, we shall eat; $k\bar{a}rik$, we shall do; dek, we shall give.

The following examples of the Imperative are given by Dr. Leitner:-

 $\bar{o}ni$, bring thou; $d\bar{e}$, give thou; \bar{i} , come thou; $p\bar{a}r-\bar{i}$, go thou; $jag\bar{a}i$, see thou; $p\bar{i}$, drink thou; $nis\bar{i}$, sit down; $k\bar{a}ri$, do thou; $sang\bar{a}i$, hear thou; $chi\underline{sh}t\bar{i}$, stand thou; $\underline{sh}u$, eat thou.

The following occur in the specimens and list:— $p\bar{a}r$ -i, go; $\underline{zh}uh$, eat; $nis\bar{\imath}h$, sit; $\bar{\imath}h$, come; tyeh, beat; $u\underline{sh}ti$, stand; $n\bar{a}\underline{sh}i$, die; $d\check{e}h$, give; adhiai, run; gri, take; halei, keep me; $jag\bar{a}i$, look; umbuli, prophesy.

In the specimens the following plurals occur:—sambiyei, put on; karai, put on (make); ōna, bring. We have also det, give ye (Leitner, wrongly, dēo).

Dr. Leitner gives no examples of the **Definite Present**, but several occur in the specimens. The tense is formed by adding dai to any form of the Simple Present. Thus, $n\bar{a}\underline{shum}\ dai$, I am dying; $hiu\ dai$, it becomes; $g\bar{a}teu\ dai$, it wants; $g\tilde{u}ro\ den\ dai$, they are singing; $k\bar{a}rin\ dai$, they are doing; $chareik\ dai$, he is grazing; $iu\ dai$, he is coming.

Dr. Leitner gives a form im-dai, which he translates by 'I was coming.' It is evidently an example of this tense. 'I was coming' is iman āsis.

75

The following fuller examples occur in the specimens:—

I am beating.			I am going.		
Sing. Plur.			Sing.	Plur.	
1.	tem dai.	tek dai.	par-im dai.	par-ik dai.	
2.	tes dai.	$tet \ dai.$	par-is dai.	par-a dai.	
3.	tel dai.	ten dai.	par-iu dai.	par-in dai.	

The following example of the Imperfect occurs in the List of Words. The tense is formed by adding the past tense of the verb substantive to what is apparently the present participle. Thus, timan āsis, I was beating.

A full example of this tense is—

I was coming.

	Sing.	Plur.		
1.	īman āsis.	$\tilde{\imath}man$	āsimi	
2.	īman āsi.	īman	$\bar{a}sili.$	
3.	īman āsis.	īman	$\bar{a}sini.$	

The following examples of the Past tense are corrected versions of those given by Dr. Leitner:—

		I brought.	I gave (irregular).		
	Sing.	Plur.	Sing.	Plur.	
1.	õnis.	$\~onimi.$	prah.	$pr\bar{o}mi.$	
2.	$ar{o}ni.$	ōnili.	prah.	$prar{a}li.$	
3.	ōno.	$\bar{o}nan.$	prau.	pron.	

(The Bashgalī for 'he gave' is ptastai. The Wai-alā is pratā, and the Khō-wār is prai.)

ii.)				
		I came.	I wen	it.
	Sing.	Plur.	Sing.	Plar.
1.	ah.	$ar{o}mi.$	par-ah.	par-ōmi.
2.	ah.	$ar{a}$ li.	par-ah.	par-āli.
3.	au.	$\bar{o}n.$	par-au.	par - $\~on$.
]	drank.	'I saw	•
	Sing.	Plur.	Sing.	Plur.
1.	apis.	$apar{\imath}mi.$	jagēs.	$jagreve{e}mi.$
2.	$ap {ar \imath}.$	$a oldsymbol{p} ar{\imath} l i$.	jagai.	jagāl i.
3.	apīau.	$ap ar{\imath} an.$	jagau.	$jagar{a}n.$
	I	sat.	I did.	
	Sing.	Plur.	Sing.	Plur.
1.	$nisar{a}$.	$nisar{o}mi.$	āris.	$\bar{a}rimi.$
2.	n is $ar{a}$.	$nisar{a}li.$	āri.	$ar{a}rili.$
3.	nisau.	nison.	āro.	āran.
	1	heard.	I sto	ood.
	Sing.	Plur.	Sing.	Plur.
1.	sangāyes	$.$ $sang ar{a}imi.$	achi <u>sh</u> tis.	achi <u>sh</u> timi.
2.	sangāye.	$sang ilde{a}ili.$	achi <u>sh</u> ti.	achi <u>sh</u> t i li.
3.	sangyes.	sangāini.	achi <u>sh</u> tau.	achi <u>sh</u> tan.

I ate (irregular).

Sing. Plur.

- 1. $\bar{a}\underline{sh}is$. $\bar{a}\underline{sh}imi$.
- 2. ā<u>sh</u>i. ā<u>sh</u>ili.
- 3. $\bar{a}\underline{shau}$. $\bar{a}\underline{shan}$.

The following instances of this tense occur in the specimens:-

I beat, I gave.		I went.		I found.		
	Sing.	Plur.	Sing.	Plur.	Sing.	Plur.
1.	prah.	promi.	par-ah.	par-ōmi.	sapres.	saprēmi.
2.	prah.	prāli.	par-ah.	par - $ar{a}li$.	saprai.	saprāli.
3.	nrau.	pron.	par-au.	par-on.	saprau.	$sapr \~an.$

First Person Singular,—āris, I did (Khō-wār, arestam).

Second Person Singular,—ne prah, thou didst not give.

Third Person Singular,—prau, he gave; kurau, he collected; par-au, he went; dumbau, he lost; au, he came; mon prau, he said; tripau, it burnt; sawajau, he kissed; bandau, he ordered; umbulau, he prophesied.

In the following the termination is $o,-aw\tilde{o}jo$, he said; $aph\bar{u}cho$, he asked; $\bar{a}ro$, he made, he did (Khō-wār, arer), cf. $\bar{a}ris$, above; $a\underline{s}h\tilde{i}jo$, he entreated; ayisto, it left.

Other forms are,— $\bar{a}we\underline{sh}u$, he saw; $\underline{sh}ur\bar{u}$ -is, it fell.

Third Person Plural,—ōn, they came; par-ōn, they went; awōjen, they said; lasān, they let go; ne abāyeni, they could not; jagan, they saw; khoji-halcon, they summoned; goĕ, they said.

The **Perfect** tense is formed by conjugating the Past Participle with the Auxiliary Present. Thus in the Parable we have $\bar{\imath}ta-\bar{a}s\bar{o}v$, he has come; and $dai-\bar{a}s\bar{o}v$, he has given.

Dr. Leitner gives as an example of the Pluperfect tense, ā onim dai, which, however, means 'I am bringing.'

The following instance of a Habitual Past occurs in the specimens,—diman āsis, (no one) used to give.

The following instances of the Conditional mood occur in the specimens,—

āshispa, I would eat.

āris dyāpā, I would have made.

tsatsēris, (my belly) would be satisfied.

The following instances of the **Passive** occur in the list,— \bar{a} $t\bar{\imath}gari$ thi $\bar{a}sam$, I am beaten; \bar{a} $t\bar{\imath}gari$ thi $\bar{a}sis$, I was or had been beaten; \bar{a} ti-avna him, I shall be beaten.

¹ Both goe and awojen mean 'they said,' and they are commonly used together as here.

GAWAR-BATI OR NARSĀTĪ.

Captain O'Brien, in his Khō-wār Grammar, claims Gawar-bati as a dialect of that language, but a perusal of the following specimens will show that in this he is clearly under a mistake. Gawar-bati is the language of the Gawars, described on pp. 265ff. of Sir G. Robertson's Káfirs of the Hindu Kush, who people the country round the confluence of the Bashgal and Qāshqār (Chitral) Rivers. One of their villages is called Narsāt, and the district in which they dwell is known as Gawarum or Narsāt. Hence the tribe, which calls itself Gawar, is named Narsātī by its neighbours, and their language is known as Gawar-bati or 'Gawar-speech,' by themselves, and as Narsātī by the others. Notwithstanding the similarity of name, the language is only distantly related to the Garwi spoken by the Gaware of the Swat Valley.

Biddulph in his Tribes of the Hindoo Koosh devotes a few lines to this tribe. Regarding their language he says it 'seems to link them with the Bushgalis on the one side, and the tribes at the head of the Swat and Panjkorah Valleys on the other; but further examination may show that they have only borrowed words from their neighbours' languages.'

Hitherto nothing has been known about it except what could be gathered from a short vocabulary given by Biddulph. The following grammatical sketch, imperfect though it is, will therefore be welcome.

AUTHORITY-

BIDDULPH, Col. J.,-Tribes of the Hindoo Koosh. Calcutta, 1880. On p. 64 there is the account of the language already quoted, and Appendix G is a vocabulary of 'Narisati, spoken by the Gubbers in the Chitral Valley.'

I.—NOUNS—

Abl.

zua pere-na.

		$B\bar{a}b$, a fath	er.

zū-gila pere-na.

lauriã.

lauria pere-na.

manushã.

manusho pere-na...

Number.—The plural is formed by adding nouns of multitude, like gila (see above), or nam. With gila, compare the Bashgali kile. The following are examples of the use of nam:—

Sing.

<u>shigāli</u>, a woman.

goṛa, a horse.

goṛi, a mare.

gā, a bull.

<u>etsī</u>, a cow.

<u>sh</u>unā, a dog.

kuṛāki, a bitch.

rāmūsai, a deer.

goṛa-nam.
goṛi-nam.
gā-nam.
e<u>ts</u>ī-nam.
<u>sh</u>unā-nam.
kuṛāki-nam.

Case. - The Nominative calls for no remarks.

The Agent is used before the Past Tenses of Transitive verbs. It usually ends in e, but sometimes in i. Examples of this case are manush-e, the man (gave); pult-e, the son (collected); bāb-s-e, his father (saw); pult-es-e, his son (said); to-no bāb-s-e, thy father (has given) for him; polira-i, the younger (said); dalira-i, the elder (said). Sometimes the Nominative is used instead of the Agent, as in bāb-es (for bāb-s-e) poi-thliaüs, his father entreated. The case is also used as an Instrumental, as in hawat-e mimem, I am dying of hunger; tobak-i thlitem, I fired with a gun.

The Accusative appears to be usually the same as the Nominative. Sometimes it ends in a, as daulat-a, (having-divided) the property; $n\bar{a}si-a$, (it was scratching its) nose (from $n\bar{a}si$, a nose).

The termination of the Genitive is a-na, as in $manu\underline{sh}$ -a-na, of a man; $b\bar{a}b$ -a-na, of the father; sor-a-na, of swine; $\underline{kh}ud\bar{a}y$ -a-na, of God; pultes-a-na, of his son. The same termination occurs in the northern dialects of Lahndā. The na becomes ni before a feminine noun, and is not liable to change before an oblique case. Examples are to-ni $m\bar{a}l$ -a-na, of thy property; as-a-ni bati, his word; mo-na $bob\bar{a}$ -na $pult\ tas$ -a-ni $sase\ ga\ddot{i}tus$, the son of my uncle is married to his sister. Sometimes the Genitive of the pronoun of the second person ends in no, as in to-no $b\bar{a}bo$ -na $\bar{a}m\bar{a}$, your father's house. In this the final o of $b\bar{a}bo$ is a pronominal suffix meaning 'thy.' The a of na appears to have been changed to o to agree with it.

The Dative ends in \tilde{a} to which the suffix ke may be added. Thus, bab-s- \tilde{a} , to his father; durae watan- \tilde{a} -ke, to a distant country; fikr- \tilde{a} , to (his) senses; blyēdi- \tilde{a} -ke, to the cousins.

The *Locative* seems to be the same as the Agent, as in $n\tilde{a}se$, (it passed) through the nose.

The **Oblique form** usually ends in a, but is sometimes the same as the Nominative. It is to this that the various postpositions are suffixed, as in the case of the na of the Genitive. Sometimes it is used without any postposition, as in bekili-a, in the fields. Examples of the use of postpositions are: na, from (so also in the Indus Kōhistānī), in $m\bar{a}l$ -a-na, from the property; durae-na, from a distance: $m\tilde{a}ze$, with, in $manu\underline{sh}$ -a $m\tilde{a}ze$, with a man; phuka- $m\tilde{a}ze$, with himself. The postpositions, pere, near, and pere-na, from, sometimes appear to govern an oblique case in o, as in $b\bar{a}b$ -o pere, near (the)

father; $b\bar{a}b$ -o pere-na, from the father. Often, however, it is attached to the ordinary oblique case, as in zu-a pere-na, from the daughter; $b\bar{a}b$ -s-a pere, near his father.

A pronominal suffix, es meaning 'his' or 'to him,' is frequently added to a noun. In declension, the e of the es is often elided. Examples are—

Nominative, --pult-es, his son (was in the field); bāb-es, his father (entreated).

Agent,— $b\bar{a}b$ -es-e (for $b\bar{a}b$ -es-e), his father (saw); pult-es-e, his son said; $b\bar{a}b$ -s-e, (thy) father (has given) for him.

Genitive,—pult-es-a-na, (on) his son's (neck).

Dative,—bāb-s-ã, (said) to his father.

Oblique form, - bāb-s-a pere, near his father.

Similarly the suffix o refers to the second person singular, as in to-no $b\bar{a}bo$ -na $\bar{a}m\bar{a}$, your father's house.

Gender.—The feminine termination is i. We have already seen this in the case of the Genitive postposition. Other examples are—

Masc.
lafila, good.
ţekura, a boy.
gora, a horse.
rāmūsai, a male deer.

Fem.
lafili.
tekuri, a girl.
gori, a mare.
rāmūsi, a female deer.

Some nouns form their feminines quite irregularly, as-

Masc.

bāp or bāb, father.

bliaia, brother.

lauri, a man.

pult, a son.

lawand, a male slave.

gā, a bull.

shunā, a dog.

lausha, a he-goat.

Fem.

jai, mother.

sase, sister.

shigāli, a woman.

zū, a daughter.

lewindi, a female slave.

etsī, a cow.

kuṛāki, a bitch.

heni, a nanny-goat.

Adjectives do not change before nouns in an oblique case. Thus, polira (not polira-i) pult-e, the younger son (collected).

II.—PRONOUNS—

2.	bos.	bōmi.	$bar{e}$.	bāt.
. 3.	boi.	boni.	béyi.	bēn.

The 3rd Singular Past in Shinā is bū.

The Imperative is $b\bar{o}$, be thou. Compare Shinā $b\bar{o}$. The Future is \bar{a} bima, I shall be.

The Verbal noun is $b\bar{\imath}k$, being, with a genitive $b\bar{\imath}ka$ -na, of being. Compare Khō-wār bik, Shiṇā boiki, to become. The Infinitive is $bi\bar{a}wa$, to be.

The Conjunctive participle is bī, having become. Compare Shinā bé.

Ki thana-bo means 'whatever there may be.' It is a Present Conditional. Compare fedimān-bo, later on.

B.—Active Verb,—thliawo, to strike, to give.

Infinite,—thliawo, to heat. Compare hara-thlyawa, singing, and nat-kerawa, dancing. Verbal Noun, thlik, beating. Other examples are—(?) Locative, vol. viii, part ii.

kerike broet, they commenced to do; Genitive, $b\bar{\imath}ka$ -na, of being; Dative, $s\bar{a}tik\tilde{\alpha}$, for grazing; $d\bar{\imath}k\tilde{\alpha}$, for going; $marik\tilde{\alpha}$, for killing. Obl., $j\bar{\imath}ka$ shats i, for the sake of coming.

Participles,—Present,—thlimān, beating. Other examples are, fedimān, arriving; chorimān, remaining over and above; kutsamān, scratching. These are all used in forming the Imperfect tense. Instances of a Present Participle standing by itself are jimeni, coming, and dimeni, going.

Past,—The only examples are $m\bar{\imath}(-sant)$, dead, and phuzdi(-sant), lost.

Conjunctive,—<u>th</u>lī, having beaten; dī, having gone. Other examples are benṭi, having divided; jī, having come; <u>zh</u>ui, having eaten; u<u>sh</u>ṭi, having arisen; keri, having made; <u>th</u>lapi, having run; tilai, having placed; ani, having brought; batē (sic), having called; <u>th</u>lī, having given; fedi, having arrived.

Imperative,— $\underline{th}la$, beat, give; $d\bar{\imath}$, go. Other examples are $s\bar{a}ta$, keep; $an\underline{tsau}$ (plur.), put on; $b\bar{a}la$, look; hila, teach; $\underline{zh}\bar{o}$, eat; $ni\underline{sh}$, sit; ja, come; $m\bar{\imath}$, die; $\underline{th}lap$, run; $\underline{th}owo$, put; gah, take; kharo, draw (water). The number of some of the above is uncertain.

Present,-

_		
1	beat,	eta
-	oca,	C CC

I go, etc.

			_

1.	$\underline{th}limem.$	$\underline{th}limek.$	dimem.	dimek.
2.	$\underline{th} limes.$	<u>th</u> limāneo.	dimes.	dimāneo.
3.	<u>th</u> limān.	$\underline{th} limet.$	dimān.	dimet.

Other examples are *mimem*, I am dying; *dutamis*, thou art lying; *marimis*, thou art killing; *sātimān*, he is grazing; *jimān*, he comes; *broet*, they commence. The third person singular has the same form as the present participle. We should expect than a to be added.

Present Conditional,—fedimān-bo, (that which) may arrive; compare thana-bo, it may be. It is apparently bo added to the third person Present Indicative.

Imperfect,—<u>th</u>limān boem, I was beating; <u>th</u>limān boet, they were giving; <u>chori-</u> mān-bua, it was becoming spare; <u>kutsamān bua</u>, it was scratching.

Future,—

I shall beat, I shall give, etc.

	•	
	Sing.	· Plur.
1.	<u>th</u> lēmo.	${\it thlik} ar{a}.$
2.	${\underline{th}}{lesar{a}}.$	${thliw} ar{a}.$
3.	$\underline{th}libar{a}$.	$\overline{\it th} let ar{a}.$

Other examples are,—

1st Person, porema, I would fill (my belly); bati kerema, I will make words, I will say; bamim, I will be able. The terminations here differ from that given above. Possibly those in a are in the Subjunctive mood. Plur., zhuikā, we shall eat; kerikā, we shall make.

2nd Person, na bāsa, you will not be able.

Past,-Transitive Verb,-

I beat, I gave, etc.,-

	Sing.	Plur.
1.	mui tllitem.	amai <u>tu</u> lita.
2.	tuî thliteo.	mē <u>th</u> litau.
3.	ten thlites.	tasuĩ <u>th</u> litan.

Other examples are,-

lst Person, kerum, I did (object feminine, viz. khizmat); taüm, I saw (a markhor); tilitum, I beat (his son); compare thlitus, below.

2nd Person, muli guteo, thou boughtest.

3rd Person, jaüs, he said; to polaüs, he collected; phusaüs, he lost; nemataüs, he consumed; shaüs, he sent; bati-kerus, he talked; bandaüs, he ordered; thlitus, he gave (obj. (?) fem., a feast); poi-thliaüs, he entreated; parataüs, it threw him down; gaïtus, she married.

When the object of a Transitive Verb in the Past Tense is a pronoun, it is in the accusative case, not the nominative, as in tasa shaws, he sent him. In the case of nouns I have not discovered any general distinction in form between the nominative and the accusative.

Intransitive Verb,-

I went, etc.,-

	Sing.	Plur.
1.	ā gaïm.	ama gaïk.
2.	tu gaïs.	me gaü.
3.	se ga.	teme gaït.

Other examples are tanaim, I walked; loshai, (his heart) burnt; lewan-ga, he has been found; sha-marua, he became ready: nesui (? fem.), (the gun) went off.

Perfect,—The only instance of a word translated as a Perfect, which is not clearly a past, is jitena, (thy brother) has come.

Pluperfect,—The standard list of words gives mui <u>tl</u> lī dārum, I had beaten; phusāüs-bo, translated he did lose, is probably a true pluperfect: so probably is aya-bo, (when thy son) came.

The following appear to be instances of the Subjunctive Mood. \bar{A} ki <u>th</u>lēma, I may beat; porema, I would fill (my belly) (see Future); keritima, I would have made merriment (<u>khush</u>ālī).

There are no certain examples of the Passive Voice available.

¹ Here, and elsewhere in this section, two dots over a vowel form a mark of diæresis. They are not to be taken as indicating that \ddot{a} or \ddot{a} is to be pronounced as in German.

PASHAI, LAGHMANĪ, OR DĒHGĀNĪ.

All that has hitherto been known about this language is contained in a short list of words on page 353 of Burnes' Cabool, and in two short vocabularies of Laghmānī and Pashai by Leech, on page 731 and page 780 of Vol. vii, 1838, of the Journal of the Asiatic Society of Bengal. Regarding the latter, Leech says:—

The language is spoken by the people called Pashais who inhabit the districts of Mandal, Chitelà Pa erch, Khadi. Seca and Kilman.

and regarding the former :-

Leech considered the two as distinct languages; it will be seen, however, from what follows that the two names really connote one and the same form of speech. Ptolemy calls the inhabitants of Laghman 'Lambagai.' The word Pashai is probably a corruption of the word 'Piśācha.'

Marco Polo (Yule, I, 172 and ff., cf. p. 100) refers to the Pashai country in the following terms, which well illustrate the Piśācha origin of its inhabitants:—

You must know that ten days' journey to the south of Badashan there is a Province called Pashai, the people of which have a peculiar language, and are Idolaters, of a brown complexion. They are great adepts in serceries and the diabolic arts. The men wear earrings and brooches of gold and silver set with stones and pearls. They are a pestilent people and a crafty; and they live upon flesh and rice. Their country is very hot.

I am indebted to the late Mr. J. G. Lorimer, I.C.S., Political Officer of the Khaibar, for the specimens given below, and for the following account of the language and of the people who speak it:—

The following are examples of the Pashai language, which is also called Laghmānī because it is spoken in the tract known as Laghmān, and Dēhgānī because most of the persons who speak it belong to the Dēhgān tribe. Pashai in fact appears to be the proper name of the language spoken by the Dēhgāns of Laghmān and the country to the east of it. The boundaries of this language are said to be, roughly, on the west the Laghmān river, on the north the boundary of the Kāfirs, on the east the Kunar river, and on the south the Kābul river, but the riverain villages on the left bank of the Kābul river speak Paṣḥtō, not Pashai. A certain number of Paṣḥtō-speaking communities are also found interspersed at other places within these bounds. The principal places and neighbourhoods in which Pashai is spoken are Barkōt, Sutan. Waigal (on the side next the Kāfirs), Janjapūr, Amlā, Sūr³ch. Badiālī, Islāmpūr, Bādshāh K³lē, Balatak. Kunada, Dēogal. Nurgal, Chaman, Najīl, Sāū. Kulmān. Tagāo. Siāū and Kulab. Some of these are considerable tracts. The number of people speaking Pashai has been estimated at 100,000, and with regard to the size of the Pashai region and its probable character this estimate does not appear unduly large or unduly small.

There appear to be different dialects of Pashai, but the variations are said to be not great. The distinction drawn by the people themselves is between the "harsh tongues" of the hills, and the softer tongue of the flatter country. By way of exemplifying two varieties a double version has been given in all the specimens. The first version is that of an illiterate zamindar, age 30 (Bahadur Shāh, son of Mastān Shāh, Malikzai, of Banda near Kalatak in the Kunar valley). The second version is that of an educated Mullā, age 26 ('Abdur-Raḥīm, son of Muhammad Akbar, Dēhgān of Chārbāgh which is situated in the valley of the Laghmān river). The first may be taken as a specimen of uneducated Eastern Pashai and the second as a specimen of educated Western Pashai.

The following imperfect account of Pashai grammar is based upon the specimens and lists of words. Forms belonging to the Eastern dialect are distinguished from those belonging to the Western. When no distinction is made, it should be assumed that the form quoted is common to both.

It will be seen that Pashai is closely connected with Gawar-bati and with Kalāshā, and also shows interesting points of relationship with both Bashgalī and Wasī-veri.

¹ One of these is called Kulmani from being spoken in Kulman: see above.

² Pashai cannot be ranked as a written language, though no doubt attempts are sometimes made to express it in Arabic characters.

The following imperfect account of Pashai grammar is based upon the specimens and lists of words. Forms belonging to the Eastern dialect are distinguished from those belonging to the Western. When no distinction is made, it should be assumed that the form quoted is common to both.

It will be seen that Pashai is closely connected with Gawar-bati and with Kalāshā, and also shows interesting points of relationship with both Bashgalī and Wasī-veri.

¹ One of these is called Kulmānī from being spoken in Kulmān: see above.

² Pashai cannot be ranked as a written language, though no doubt attempts are sometimes made to express it in Arabic

I.—PRONUNCIATION.

The pronunciation of the vowels is very indefinite. For instance the letters u, \bar{u} , and \bar{o} are frequently interchanged. Thus, the sign of the ablative is sometimes written udai, sometimes $\bar{u}dai$, sometimes $ud\bar{a}i$, sometimes $\bar{u}dai$, sometimes $ud\bar{a}i$, sometimes $\bar{u}dai$, sometimes $\bar{u}dai$.

The vowel " (which is the well-known very short " of Paṣḥtō) is frequently interchanged with i, as in kiṭ"lā or kiṭilā, a boy. A final " in the Eastern dialect is usually represented by ē in the Western one. Thus, (Eastern) puṭ-ht, (Western) puṭ-ht, a son. The letter n in the Eastern dialect usually becomes nd in the Western. Thus, (Eastern) kanā, (Western) kanḍā, a field. So an Eastern sh becomes a Western kh, c.g. (Eastern) shūring, (Western) khōring, a dog.

There are no aspirated consonants (kh, gh, etc.) in Pashai. On the other hand, h is frequently compounded with l into hl, e.g. $hl\tilde{e}$, three; $puthl\tilde{e}$ ($put-hl\tilde{e}$, not $puth-l\tilde{e}$), a son. In order to prevent mistakes, I shall throughout insert a hyphen in the latter and similar words, thus, $put-hl\tilde{e}$.

The letter \ddot{a} represents the sound of ai in 'fair,' 'hair,' as pronounced in the north of England and in Scotland. It is practically equivalent to the German \ddot{a} .

II .-- NOUNS.

Forms are commonly horrowed from both Pashto and Persian, so that it is not always easy to identify a true Pashai form.

The following declensions appear in the lists of standard words and sentences:-

EASTERN DIALECT.

WESTERN DIALECT.

Tātī, a father.

	Sing.	Plur.	Sing.	flar.
Nom.	tātī.	tātī-lān.	tātī.	tăti-lân.
Gen.	tātīs.	tāt-kuliy nā.	tātīs.	tati-lasan.
Dat.	tātī āntē.	tāt-kulī antē.	tātī āntē.	tāti-lāya antē.
Abl.	tātī udai.	tāt-kuliyēnā udai.	tatī udai.	tati-läya udai,

With the above Eastern plural compare the Wasi-veri plural termination kili.

$Ad^{a}m\bar{\imath}$, a man.

Nom.	$\tilde{a}d$ " $m\tilde{\imath}$.	$\bar{a}d^am\bar{\imath}.$	* · · · · · · · · · · · · · · · · · · ·	$\tilde{a}d^{\prime}m\tilde{\imath}.$	äd'män.
Gen.	$\tilde{a}d$ " m $\tilde{i}s$.	ādmēyanā.		$\tilde{a}d'm\tilde{\imath}s.$	ād mān nā.
Dat.	ād"mī āntē.	ādmēyan āntē.	1	ād mī āntē.	ād man ante.
Abl.	$\bar{a}d^am\bar{\imath}\;udai.$	ādmēy"n udai.		ād'mī udai.	ād mān udai.

Probably the plural termination $\tilde{a}n$ in the above is due to the influence of Persian.

Weya, a daughter.

Nom.	wēya.	wēyila.	wėya.	weyila.
Gen.	wēy"s.	wēlaiy"nā.	wayēs.	ernyã.
Dat.	wēyē āntē.	wēlaiy" āntē.	wayê antê.	weyanas".
Abl.	wēyē udai.	wēlaiy" udai.	wayê udai.	weyanasê udai.

In the list of words, for 'two daughters' we have $d\bar{o}$ $w\bar{e}y\bar{e}$ and $d\bar{o}$ $way\bar{e}$, respectively. The final \bar{e} is probably due to the influence of Pashto.

PASHAI. 9I

The postposition udai, also written $\bar{u}dai$, $ud\bar{e}$, $\bar{o}dai$ and even $\bar{o}da$, means 'from,' but is properly the equivalent of the Hindostānī $p\bar{a}s$, as in $\bar{u}dai\ ziy\bar{a}t\ bigh\bar{a}$, with (them) much is; $t\bar{a}t^ast\bar{a}\ \bar{o}da\ \bar{a}\bar{\imath}k$, he came near the father.

The above paradigms in no way exhaust all the forms which nouns assume in declension.

The following are other instances of the formation of plurals:—

EASTERN.

WESTERN.

Sing.	Plur.	Sing.	Plur.
$g\bar{o}r\bar{a}$, a horse.	$g ar{o} r ar{e} l ar{a}$.	$g \bar{o} \dot{r} \bar{a}$, a horse.	$g ar{o}$ ŗ- $ar{e} l ar{a}$.
$m\bar{a}d\bar{\imath}n$, a mare.	$mar{a}dar{\imath}nar{e}lar{a}.$	<i>mādiyān</i> , a mare.	$mar{a}diyar{a}n$ - $ar{e}lar{a}$.
$put-hl^a$, a son.	put - $hlar{e}lar{a}.$	put-hle, a son.	$pu {t \hspace{-0.1em} ext{-}\hspace{-0.1em} h} l ar{e} ext{-} l ar{a}$.
gōlāng, a bull.	$bar{o}$ $gar{o}lar{a}ng.$	$gar{o}lar{a}ng$, a bull.	$gar{o}lar{a}ng$ - $ar{e}lar{a}$.
$g\bar{a}$, a cow.	$bar{o}~gar{a}.$	$g\bar{a}$, a cow.	$gar{a}$ - $ar{e}lar{a}$.
$\underline{sh}\bar{u}\underline{r}ing$, a dog.	bō <u>sh</u> ūṛing.	<u>kh</u> ōring, a dog.	\underline{kh} ō $ring$ - $ar{e}lar{a}$.
$p\bar{a}j^ar\bar{a}$, a he-goat.	$bar{o}~paj^arar{a}.$	<u>sh</u> ōṭā, a he-goat.	\underline{sh} ō t - $ar{e}lar{a}$.
$kataw\bar{a}$, a male deer.	$bar{o}$ $katawar{a}$.	$\underline{sh}\bar{o}t^ak$, a she-goat.	\underline{sh} ō t^ak - $ar{e}lar{a}$.
		$\bar{a}w\bar{u}$, a male deer.	$ar{a}war{u}$ - $lar{a}$.
1		dand, a tooth.	d and $-ar{e}l$ $ar{a}$.

Examples of Persian plurals are (Eastern) nōkarān, servants; obl. nōkarāna, (Western) nōkāranī, his servants. Oblique Western forms are tānik nōkarānisē kuchā, amongst thine own servants; tānik dōstāna pila, with my own friends.

There is also a plural in an or an which may be a corruption of the above, or may be an independent form. Examples are (Eastern) <u>sh</u>ōṛingan-ē, (he ordered) to his dogs; (Western) <u>kh</u>ōṛingan-ī, his dogs (arrived); <u>kh</u>ōṛinganā (obl., agent case), the dogs (made her in pieces); <u>kh</u>ōṛinganā āntē, to the dogs.

Other examples of the plural will be found below.

As regards Cases the following should be noted:

There is a very common oblique form which ends in $st\bar{a}$ in the Eastern, and in $s\bar{a}$ in the Western dialect. It is frequently used, without any postposition, to represent various oblique cases, especially the case of the agent. Examples are the following:—

Eastern.—Oblique form,— $t\bar{a}n^ak$ $t\bar{a}tista$ -m $ud\bar{e}$, to my own father; $t\bar{a}n^ak$ $d\bar{o}st\bar{a}nista$ -m miltin, with my own friends; $t\bar{a}n^ak$ $n\bar{o}kar\bar{a}nist$ - \bar{e} $kuch\bar{a}$, amongst thine own servants; $t\bar{a}t^ast\bar{a}$ $\bar{o}da$, (he came) near the father; $t\bar{a}t^ast\bar{a}$ $\bar{a}nt\bar{e}$ or $t\bar{a}tist\bar{a}$ $\bar{a}nt\bar{e}$, (he said) to the father. Compare $\underline{sh}aristaika$, (she ascended) to the top of it.

Genitive, - tātista-m, (tidings) of my father; tātistā shāhrī, to his father's city.

Agent,— $t\bar{a}t^ast\bar{a}$, the father (saw, said); put- $hl^ast\bar{a}$, the son (said); $t\bar{a}tist\bar{a}$, the father (found); $s\bar{a}yast\bar{a}$, the sister ($s\bar{a}\bar{i}$) (saw, said); $l\bar{a}y^ast\bar{a}$, the brother ($l\bar{a}\bar{i}$) (said, fetched).

Western.—Oblique,— $t\bar{a}nik$ $n\bar{o}kar\bar{a}nis-\bar{e}$ kuchā, amongst thine own servants; $\bar{a}y^as\bar{a}$ $p^a\underline{s}hkin$, after the brother $(l\bar{a}\bar{i})$.

Accusative,— $l\bar{a}y^as\bar{a}$ $\bar{e}g\bar{e}$ - $ha\bar{i}k$, she was about to eat the brother.

Genitive,—mambisa-m, of my uncle; sāisā hāsai, from the hand of the sister $(s\bar{a}\bar{\imath})$; $t\bar{a}tis\bar{a}$ $\underline{sh}\bar{a}hr\bar{a}$, to his father's city; $\bar{e}kis\bar{a}$ $band\bar{o}bast\bar{\imath}$, arrangement for (of) eating.

I.—PRONUNCIATION.

The pronunciation of the vowels is very indefinite. For instance the letters u, \tilde{u} , and \tilde{o} are frequently interchanged. Thus, the sign of the ablative is sometimes written udai, sometimes $\tilde{u}dai$, sometimes $ud\tilde{e}$, sometimes $\tilde{o}dai$, and sometimes $\tilde{o}dai$.

There are no aspirated consonants (kh, gh, etc.) in Pashai. On the other hand, h is frequently compounded with l into hl, e.g. $hl\bar{e}$, three; $puthl\bar{e}$ $(put-hle, \text{not } puth-l\bar{e})$, a son. In order to prevent mistakes, I shall throughout insert a hyphen in the latter and similar words, thus, $put-hl\bar{e}$.

The letter \ddot{a} represents the sound of ai in 'fair,' 'hair,' as pronounced in the north of England and in Scotland. It is practically equivalent to the German \ddot{a} .

II.-NOUNS.

Forms are commonly borrowed from both Pashto and Persian, so that it is not always easy to identify a true Pashai form.

The following declensions appear in the lists of standard words and sentences:-

EASTERN DIALECT.

WESTERN DIALECT.

Tati, a father.

	Sing.	Plur.	Sing.	f'lar,
Nom.	tātī.	tālī-lān.	tātī.	täti-län.
Gen.	tātīs.	tāt-kuliy'nā.	tātīs.	tāti-lasan.
Dat.	tātī āntē.	tāt-kulī āntē.	tātī āntē.	täti-läya änté.
Abl.	tātī udai.	tāt-kuliyēnā udai.	tatī udai.	tati-lâya udai.

With the above Eastern plural compare the Wasi-veri plural termination kili.

Ad'mī, a man.

Nom.	$\bar{a}d$ " $m\bar{\imath}$.	$\bar{a}d$ " $m\bar{\imath}$.	$\tilde{a}d$ " $m\tilde{\imath}.$	ād mān.
Gen.	$\tilde{a}d^{u}m$ $is.$	$\bar{a}dm\bar{e}y^an\bar{a}$.	ād'mīs.	ād mān nā.
Dat.	ād mī āntē.	ādmēy"n āntē.	ād mī āntē.	ād'mān āntē.
Abl.	ād ^a mī udai.	ādmēy'n udai.	ād'mī udai.	ād'mān udai.

Probably the plural termination $\bar{a}n$ in the above is due to the influence of Persian.

Wêya, a daughter.

Nom.	wēya.	wēyila.	wêya.	wéyila.
Gen.	wëy"s.	wēlaiy"nā.	wayēs.	wayã.
Dat.	wēyē āntē.	wēlaiy" āntē.	wayē āntē.	wēyanas.
Abl.	wēyē udai.	wēlaiy" udai.	wayê udai.	wēyanasē udai.

In the list of words, for 'two daughters' we have $d\tilde{o}$ $w\tilde{e}y\tilde{e}$ and $d\tilde{o}$ $way\tilde{e}$, respectively. The final \tilde{e} is probably due to the influence of Pashto.

PASHAI. 91

The postposition udai, also written $\bar{u}dai$, $ud\bar{e}$, $\bar{o}dai$ and even $\bar{o}da$, means 'from,' but is properly the equivalent of the Hindōstānī $p\bar{a}s$, as in $\bar{u}dai$ $ziy\bar{a}t$ $bigh\bar{a}$, with (them) much is; $t\bar{a}t^ast\bar{a}$ $\bar{o}da$ $\bar{a}\bar{\imath}k$, he came near the father.

The above paradigms in no way exhaust all the forms which nouns assume in declension.

The following are other instances of the formation of plurals:—

EASTERN.

WESTERN.

Sing.	Plur.	Sing.	Plur.
$g\bar{o}_{!}^{*}\bar{a}$, a horse.	$gar{o}rar{e}lar{a}$.	$gar{o}rar{a}$, a horse.	g ō r - $ar{e}lar{a}.$
$m\bar{a}d\bar{\imath}n$, a mare.	$mar{a}dar{\imath}nar{e}lar{a}$.	<i>mādiyān</i> , a mare.	$mar{a}diyar{a}n$ - $ar{e}lar{a}$.
$put-hl^a$, a son.	$pu t$ - $h l ar{e} l ar{a}$.	put - $hlar{e}$, a son.	$pu {t \hspace{-0.1em} ext{-}\hspace{-0.1em} ext{-}\hspace{-0.1em} ext{l}} ar{a}.$
gōlāng, a bull.	$b\bar{o}~g\bar{o}l\bar{a}ng.$	$g\bar{o}l\bar{a}ng$, a bull.	$gar{o}lar{a}ng$ - $ar{e}lar{a}$.
$g\bar{a}$, a cow.	$bar{o}~gar{a}.$	$g\bar{a}$, a cow.	$gar{a}$ - $ar{e}lar{a}$.
shūring, a dog.	bō <u>sh</u> ūṛing.	\underline{kh} \bar{o} ring, a dog.	\underline{kh} ör ing - $ar{e}lar{a}$.
$p\bar{a}j^a$ ŗ \bar{a} , a he-goat.	$bar{o}\ paj^arar{a}.$	$\underline{sh}\bar{o}t\bar{a}$, a he-goat.	<u>sh</u> ōṭ-ēlā.
katawā, a male deer.	bō kaṭawā.	$\underline{sh}\bar{o}t^ak$, a she-goat.	\underline{sh} ō t^ak - $ar{e}lar{a}$.
		$\bar{a}war{u}$, a male deer.	$ar{a}war{u}$ - $lar{a}$.
1		dand, a tooth.	$dand ext{-}ar{e}lar{a}$.

Examples of Persian plurals are (Eastern) $n\bar{o}kar\bar{a}n$, servants; obl. $n\bar{o}kar\bar{a}na$, (Western) $n\bar{o}k\bar{a}ran\bar{i}$, his servants. Oblique Western forms are $t\bar{a}nik$ $n\bar{o}kar\bar{a}nis\bar{e}$ $kuch\bar{a}$, amongst thine own servants; $t\bar{a}nik$ $d\bar{o}st\bar{a}na$ pila, with my own friends.

There is also a plural in an or an which may be a corruption of the above, or may be an independent form. Examples are (Eastern) <u>sh</u>ōringan-ē, (he ordered) to his dogs; (Western) <u>kh</u>ōringan-ī, his dogs (arrived); <u>kh</u>ōringan-ā (obl., agent case), the dogs (made her in pieces); <u>kh</u>ōringanā āntē, to the dogs.

Other examples of the plural will be found below.

As regards Cases the following should be noted:-

There is a very common oblique form which ends in $st\bar{a}$ in the Eastern, and in $s\bar{a}$ in the Western dialect. It is frequently used, without any postposition, to represent various oblique cases, especially the case of the agent. Examples are the following:—

Eastern.—Oblique form,— $t\bar{a}n^ak$ $t\bar{a}tista$ -m $ud\bar{e}$, to my own father; $t\bar{a}n^ak$ $d\bar{o}st\bar{a}nista$ -m miltin, with my own friends; $t\bar{a}n^ak$ $n\bar{o}kar\bar{a}nist$ - \bar{e} $kuch\bar{a}$, amongst thine own servants; $t\bar{a}t^ast\bar{a}$ $\bar{o}da$, (he came) near the father; $t\bar{a}t^ast\bar{a}$ $\bar{a}nt\bar{e}$ or $t\bar{a}tist\bar{a}$ $\bar{a}nt\bar{e}$, (he said) to the father. Compare sharistaika, (she ascended) to the top of it.

Genitive, — tātista-m, (tidings) of my father; tātistā shāhrī, to his father's city.

Agent,— $t\bar{a}t^ast\bar{a}$, the father (saw, said); $put-hl^ast\bar{a}$, the son (said); $t\bar{a}tist\bar{a}$, the father (found); $s\bar{a}yast\bar{a}$, the sister ($s\bar{a}i$) (saw, said); $l\bar{a}y^ast\bar{a}$, the brother ($l\bar{a}i$) (said, fetched).

Western.—Oblique,— $t\bar{a}nik$ $n\bar{o}kar\bar{a}nis-\bar{e}$ kuchā, amongst thine own servants; $\bar{a}y^as\bar{a}$ p^ashkin , after the brother $(l\bar{a}\bar{i})$.

Accusative,— $l\bar{a}y^as\bar{a}$ $\bar{e}g\bar{e}$ - $ha\bar{i}k$, she was about to eat the brother.

Genitive,—mambisa-m, of my uncle; sāisā hāsai, from the hand of the sister $(s\bar{a}\bar{\imath})$; $t\bar{a}tis\bar{a}$ $\underline{sh}\bar{a}hr\bar{a}$, to his father's city; $\bar{e}kis\bar{a}$ $band\bar{o}bast\bar{\imath}$, arrangement for (of) eating.

Agent,—pul-hlisā, the son (said); pul-hl'sā, the son (collected); totisā, the father (saw, said); sāisā, the sister (made arrangement, ate; tāy'sā, the brother (said, dropped).

It will be seen from the above examples that this termination is sometimes ista (isā) and sometimes "stā ("sā). This is evidently a mere variation of spelling. The termination is clearly the same as the Bashgalī Kātir ste or stai.

Another oblique form ends in \bar{e} , \bar{i} , ai, a, or \bar{a} . It is not always easy to distinguish it from a noun ending in a pronominal suffix. It is possibly due to the influence of Paṣḥtō. Examples are—(Eastern)— $\bar{o}t\bar{i}s$ $s\bar{a}\bar{e}$ $d\bar{e}$, than his sister $s\bar{a}\bar{e}$; klama $kuch\bar{a}$, in doings; husha $kuch\bar{a}$, in his senses; $n\bar{o}kar\bar{a}ua$ $ant\bar{e}$, to the servants; kuna $kuch\bar{a}$, in the field; $g\bar{o}sh\bar{i}g\bar{e}$ $nazd\bar{e}k$, near the (? his) house; dare sh^*ra , on the mountain $(d\bar{a}r)$. (Western)— $d\bar{a}r\bar{e}$ $mund\bar{a}$, on the top of the mountain (dar); $us\bar{e}s\bar{e}u\bar{a}$ $d\bar{e}$, than his sister $(s\bar{a}\bar{e})$; $\underline{kh}tlama$ $kuch\bar{a}$, in doings; $kanda\bar{e}$ $kuch\bar{a}$, in the field; $t\bar{a}u\bar{e}k$ dostana $pil\bar{a}$, with my own friends; kanjara $sh^*r\bar{a}$, with harlots; $tat\bar{e}s\bar{a}$ shuhra, to the father's city; $\underline{kh}\bar{o}ring^an\bar{a}$ $\bar{a}ut\bar{e}$, to the dogs.

The same form can also apparently be used instead of any case. Thus-

Agent,—(Western)—khōringanā, the dogs (made her in pieces).

Dative,—(Eastern)—musafirē, (he went) to a journey; (Western) watane and watana, to a country.

Ablative,—(Western)—hāsai, from the hand (of the sister).

Genitive,—(Eastern)—mēnā mambē puţ-hlē, the son of my uncle; watane und watane, of a country.

Locative,—(Eastern)—ōlī chaṇa; (Western) ōlī chaṇḍa, on his back; (Eastern) watana, in a country; (Western) hāsai, on the (? his) hand; pāya, on the (? his) foot.

Other case forms.—Agent.—As shown above, the oblique form is usually employed for this case. Sometimes, however, the nominative form is used. Thus in the Western version of the Parable of the Prodigal Son we have both put-hlisā mārēkin, and put-hlē mērēkin, the son said. So in the Eastern version of the second story we find both $s\bar{a}yast\bar{a}\ lash\bar{e}kin$, the sister saw him, and $m\bar{i}\ s\bar{a}y\bar{a}\ g\bar{o}r\bar{a}\ ekin$, this sister-of-him $(s\bar{a}\bar{i}+\bar{a})$ ate a horse.

The *Instrumental* case is formed by the postposition $d\tilde{e}$ (Western, also d^*). Thus (Eastern) $\tilde{e}k\tilde{e}$ $d\tilde{e}$, (Western) $\tilde{e}k\tilde{i}$ $d\tilde{e}$, by eating; (Eastern) watatiyārī $d\tilde{e}$, (Western) hawatagiyārī d^* , by hunger.

The Dative, as shown above, is formed by adding ante. Other examples are (Eastern) nokarāna āntē, (Western) nokarān āntē, to the servants; khoring na antē, to the dogs.

The Ablative, as pointed out above, is formed by adding udai, adv. odai, or oda, which means both 'near' and 'from near.' Another form is (Eastern) mindi to, from the river.

The Genilive usually ends in s. Besides the forms given in the paradigms we have (Eastern) $\bar{a}d^am\bar{\imath}s$, of a man, and $l\bar{o}n\bar{\imath}s$, of salt. In the Western dialect, the genitive of Khudā, God, is Khudēs, while, in the Eastern one, it takes the peculiar form Khudez. Sometimes the termination is dropped, as in (Western) $\bar{\imath}$ ad'mi do put-hlete haink, of one man there were two sons-of-him.

The usual sign of the Locative is kuchā, in. Adamī pilā is 'with a man.' Dare sharā is 'on a mountain.' Kanā sharā is 'in (literally, on) the field.' So kanjara sharā is 'with (lit., on) harlots.'

93

Gender .-- Adjectives do not, so far as I can gather from the specimens, appear to change for gender. The only exception which I have noted is mīnī sāy-am (Eastern), my sister-of-me. The masculine of $m\bar{\imath}n\bar{\imath}$ is $m\bar{e}n\bar{a}$.

The following are examples of the way in which substantives form their feminines:-

WESTERN.

wēya, a daughter.

Masc. Fem. Fem. Masc. pājarā, a goat. $p\bar{a}i^ar^ak$. $sh\bar{o}t^ak$. shōtā, a goat. katawā, a deer. kat^aw^ak . kitalak, kitalik, or kitāliki. kitala, a child. kiţalā, a child. kitalak. gōṛā, a horse. mādiyān. gōrā, a horse. mādīn. gōlāng, a bull. $g\bar{a}$, a cow. gōlāng, a bull. $g\bar{a}$, a cow. $t\bar{a}t\bar{\imath}$, a father. $\bar{a}\bar{\imath}$, a mother. $t\bar{a}t\bar{\imath}$, a father. $\bar{a}\bar{\imath}$, a mother. $l\bar{a}\bar{\imath}$, a brother. sāī, a sister. $l\bar{a}\bar{\imath}$, a brother. $s\bar{a}\bar{\imath}$, a sister. puț-hlē, a son.

 $put-hl^a$, a son. wēya, a daughter. $\bar{a}d^am\bar{i}$, a man. māshī or mādā. $\bar{a}d^am\bar{\imath}$, a man. $m\bar{a}d\bar{a}$. khōring, a dog. mādīn khōring. mādī shūring. shūring, a dog. āwū, a deer. mādī āwū.

The following are instances of the Comparison of adjectives:—

EASTERN.

Ūs mī dē bái shē, this is better than that. Har kō shai dē yō bai shī, this is best of all. (Eastern) chikā dē khub kālā, (Western) chinasāya dē bakār kālā, the best garment of all.

III.—PRONOUNS.

The first person is nearly the same in both dialects. It is as follows:—

	Sing.	Plur.
Nom.	\bar{a} (Western also a).	$ham ar{a}$.
Gen.	$mar{e}nar{a}$.	hamā.
Agent.	mam.	$ham ar{a}$.

'To me' is in both mam and mēnā āntē. In one case there is a feminine form of the genitive singular, viz. mīnī sāyam, my sister-of-me.

The genitive does not seem to change before nouns in the oblique cases.

The second person is also nearly the same in both dialects.

	Sing.	Plur.
Nom.	(Eastern) t^a ; (Western) $t\bar{o}$.	$har{e}mar{a}.$
Gen.	tēnā.	$har{e}mar{a}$.
Agent.	$tar{o}$.	$har{e}mar{a}$.

'I will eat thee' is (Eastern) tō ēēkam or (Western) tō ēgēkam.

As in the first person, the genitive does not change before nouns in the oblique Thus, tēnā mālē kuchā, in thy property.

Westers

EASTERN.		44 E-7 L I	M.A.	
		Plur.	Sing.	l'lar.
Nom.	Si n g	$ar{u}t^a$.	ūsē, ūsī.	ūtē.
Gen.		$ar{u}tar{e}nar{a}.$	ūsė, ūsi.	ütenü.

The accusative is usa, I sed as an adjective we have is " " shag, in that small house. The meme is 'I will say to him.' Tis i het-hla hazk, of him there was one (and) one son. Illa watana is " country."

24

For \tilde{u} , \tilde{o} is frequently substituted. Off is also used for the genitive; thus, $\tilde{o}ti$ chanda, on his back. Other examples are $\tilde{u}s\bar{i}$ udai, from him; usi dea, give to him. T' sh Ta is 'the divided' upon them.'

Tor 'this,' we have in both dialects, yo, gen. mis. obl. form and agent mi. We also (Eastern) &L', this; hame eki rupaii, and (Western) hame i rupai, this one

The relative pronoun in the Eastern dialect is s', which (needle became a mountainth is probably borrowed from the Pashto ts'. No instance occurs in the Who? is (Eastern) kë (gen. kis); Western kia (gen. kis); ki odai alects), from whom. What? is ko (both dialects). The Pashto chi is also used.

haster, How much?, kau; how many (sons)?, kû; how many (servants)?, kûû; servants)?, kûû; whatever (my share may be); harkô, all, whatever (is mine); tan'k,

Western,-How much?, kau; how many (sons)?, kā; how many (servants)?, kāō;

Pronominal suffixes are very freely employed, both with nouns and verbs, used with nouns, the full pronoun is usually employed at the same time. The

A .- With Nouns.

EASTERN.

WISTERN.

Pirst Person.—mēnā tāti-m, my share; tān-k-mēnā want z-m, my share; tān-k-menā my own father; mēnā my son = tān-k dōstānista-m with my own friends; mīnī sister; zātīsta-m, (tidings) of

First Person.—měna táti·m, my father; in měna wantě, my share, there appears to be no suflix, so also in tánik táti uda, near my own father; mėna put-hli·m, my son; in tánik döstána pitā, with my friends, there is no suflix.

EASTERN.

Second Person.— $t\bar{e}n\bar{a}$ $t\bar{a}t$ - \bar{e} , your father; $t\bar{e}n\bar{a}$ $m\bar{a}l$ - \bar{e} $kuch\bar{a}$, in thy property; $t\bar{e}n\bar{a}$ put-hl- \bar{e} , thy son (put-hl^); $t\bar{a}n$ ^ak $n\bar{o}kar\bar{a}nist$ - \bar{e} $kuch\bar{a}$, amongst thine own servants; $t\bar{e}n\bar{a}$ $l\bar{a}$ - \bar{e} , thy brother $(l\bar{a}\bar{\imath})$, also $t\bar{e}n\bar{a}$ $l\bar{a}$ -ai; $t\bar{e}n\bar{a}$ gap- \bar{e} , thy command; dand- \bar{e} , thy teeth.

Third Person.—Nouns in $\bar{\imath}$ seem to take the letter \bar{a} as the suffix. Thus, $\bar{o}t\bar{\imath}s$ $l\bar{a}y$ - \bar{a} , his brother $(l\bar{a}\bar{\imath})$; $t\bar{a}tiy$ - \bar{a} , his father (became compassionate); $\bar{u}t\bar{\imath}s$ $t\bar{a}tiy\bar{a}$, his father (came outside); $t\bar{a}tiy\bar{a}$ $\bar{a}nt\bar{e}$, (he answered) to his father; $m\bar{\imath}$ $s\bar{a}y\bar{a}$ $\bar{e}kin$, this his sister ate. Other nouns take \bar{e} , ai or $\bar{\imath}$. Thus, $\bar{o}t\bar{\imath}s$ kit^alai , his son $(kit^al\bar{a})$; $\bar{o}t\bar{\imath}s$ $s\bar{a}$ - \bar{e} $d\bar{e}$, than his sister $(s\bar{a}\bar{\imath})$, but $m\bar{\imath}$ $s\bar{a}y\bar{a}$ $\bar{e}kin$, this his sister ate; $\bar{o}t\bar{\imath}s$ $k\bar{\imath}mat$ - \bar{e} , its price; udai, from him, with them; $s\bar{h}^arai$, upon him; hastai, on his hand; $t\bar{a}tist\bar{a}$ $s\bar{h}\bar{a}hr$ - $\bar{\imath}$, (?) to his father's city; $s\bar{h}\bar{o}ring$ - $\bar{\imath}$, his dogs (arrived); $s\bar{h}\bar{o}ring$ an- \bar{e} , to his dogs (he gave order).

WESTERN.

Second Person.— $t\bar{e}n\bar{a}\ t\bar{a}t\bar{\imath}$ (no suffix), thy father; $m\bar{a}l$ - \bar{e} , thy property; $t\bar{e}n\bar{a}$ put-hl- \bar{e} , thy son (suffix doubtful); $t\bar{a}nik$ $n\bar{o}kar\bar{a}nis$ - $\bar{e}\ kuch\bar{a}$, amongst thine own servants; $t\bar{e}n\bar{a}\ l\bar{a}y\bar{a}$ - \bar{e} , thy brother ($l\bar{a}\bar{\imath}$); $t\bar{e}n\bar{a}\ hukm$ - \bar{e} , thy order. $Dand\bar{e}l\bar{a}$ - $s\bar{e}$ may mean 'thy teeth.'

Third Person.— $\bar{U}s\bar{\imath}$ $l\bar{a}y-\bar{a}$, his (her) brother; $\bar{u}s\bar{e}$ $t\bar{a}tiy-\bar{a}$, his father (came), but $t\bar{a}t\bar{e}$ $\bar{a}nt\bar{e}$, to his father; $s\bar{a}y-\bar{a}$, his sister.

 $\bar{u}s\bar{e}$ put- $hl\bar{e}$, his son; $\bar{u}s\bar{\imath}$ $k\bar{\imath}mat$ - \bar{e} , its price; $d\bar{o}$ put- $hl\bar{e}l$ - \bar{e} , his two sons; $t\bar{a}t$ - \bar{e} $\bar{a}nt\bar{e}$ (see above), to his father; $t\bar{a}nik$ $m\bar{a}l$ - \bar{e} , his own property; $n\bar{o}kar\bar{a}n$ - $\bar{\imath}$, his servants; $\underline{s}h^arai$, upon him; $h\bar{a}s$ -ai, on his hand; $g\bar{o}\underline{s}hing$ - $\bar{\imath}$, to-his-house; $t\bar{a}nik$ $j\bar{a}n$ - \bar{e} $\underline{s}h^ar\bar{a}$, on his own life; $\underline{k}h\bar{o}ringan$ - $\bar{\imath}$, his dogs.

B.-With Verbs.

First Person.—Di-m, give to me; $w\bar{a}y$ -am, place me; $d\bar{e}ki$ -m, thou gavest me; at-am, eat me.

Second Person.— $Dam-\bar{e}$, I will give to thee.

Third Person.— $l\bar{e}k$ -in, $l\bar{e}kam$ -an, I found him; $d\bar{e}k$ - \bar{e} , thou gavest-to-him.

In the above in or an apparently represents the accusative (or agent) suffix, and \bar{e} , the dative or genitive.

First Person.—Di-m, give to me; $w\bar{a}y$ - am , place me; $d\bar{a}\bar{\imath}ki$ -m, thou gavest me.

Second Person.—No example.

Third Person.—dāyāk-yē, thou gavest to him.

WESTERN. EASTERN. Plur. Plur. Sing. Sing. $\bar{u}t\bar{e}$. ūsē, ūsī. Nom. $\bar{u}t^a$. $\bar{u}s^{a}$. ūsē, ūsī. ūtēnā. ūtēnā. Gen. ūtīs, ūtī. $\bar{u}sar{e}.$ $\bar{u}tar{e}.$ Agent. $\bar{u}s^a$, $\bar{u}t\bar{\imath}$.

For \bar{u} , u and \bar{o} are frequently substituted; thus, $ut\bar{\imath}s$, $\bar{o}t\bar{\imath}s$. Other examples are $\bar{o}t\bar{\imath}s\bar{a}y\bar{a}$, his sister-of-him; $\bar{o}t\bar{\imath}chana$, on his back; $\bar{o}t\bar{\imath}s$ kit^alai , his son; $\bar{o}t\bar{\imath}$ (or $ut\bar{\imath}$) $\bar{a}nt\bar{e}$, to him; $\bar{o}t\bar{\imath}$ $\bar{o}dai$, from him; $\bar{o}t\bar{\imath}$ hana, beat him. The accusative is $\bar{u}s^a$, him. Used as an adjective we have $\bar{u}s^a$ chanta $g\tilde{o}sh^ag$, in that small house. $T\bar{\imath}$ $\bar{a}nt\bar{e}$ $m\bar{e}m\bar{\imath}$ is 'I will say to him.' $T\bar{\imath}s$ $\bar{\imath}$ $w\bar{a}y^a$ $\bar{\imath}$ put-hla ha $\bar{\imath}k$, of him there was one daughter (and) one son. Hla watana is 'in that country.'

For \bar{u} , \bar{o} is frequently substituted. $\bar{O}t\bar{\imath}$ is also used for the genitive; thus, $\bar{o}t\bar{\imath}$ chanda, on his back. Other examples are $\bar{u}s\bar{\imath}\ udai$, from him; $us\bar{\imath}\ d\bar{e}\bar{a}$, give to him. $T^a\ \underline{sh}^a ra$ is '(he divided) upon them.'

For 'this,' we have in both dialects, $y\bar{o}$, gen. $m\bar{\imath}s$, obl. form and agent $m\bar{\imath}$. We have also (Eastern) $\bar{e}l^a$, this; $ham\bar{e}$ $\bar{e}k\bar{\imath}$ rupai $\bar{\imath}$, and (Western) $ham\bar{\imath}$ $\bar{\imath}$ rupai, this one rupee.

The relative pronoun in the Eastern dialect is s'', which (needle became a mountain), which is probably borrowed from the Paṣḥtō \underline{ts}'' . No instance occurs in the Western dialect. Who? is (Eastern) $k\bar{e}$ (gen. $k\bar{\imath}s$); Western $ki\bar{a}$ (gen. $k\bar{\imath}s$); $k\bar{\imath}$ $\bar{o}dai$ (both dialects), from whom. What? is $k\bar{o}$ (both dialects). The Paṣḥtō chi is also used.

Other pronominal forms are—

Eastern,—How much?, kau; how many (sons)?, $k\bar{a}$; how many (servants)?, $k\bar{a}\bar{o}$; $k\bar{\imath}$, anyone; $kum\bar{e}$, whatever (my share may be); $hark\bar{o}$, all, whatever (is mine); $t\bar{a}n^{2}k$, own.

Western,— How much?, kau; how many (sons)?, $k\bar{a}$; how many (servants)?, $k\bar{a}\bar{o}$; $k\bar{\imath}$, anyone; $hark\bar{o}$, all, whatever (is mine); $t\bar{a}nik$, own.

Pronominal suffixes are very freely employed, both with nouns and verbs. When used with nouns, the full pronoun is usually employed at the same time. The following are examples:—

A.—With Nouns.

EASTERN.

WESTERN.

First Person.—mēnā tāti-m, my father; mēnā wanţi-m, my share; tānak tātista-m udē, near my own father; mēnā puṭ-hli-m, my son; tānak dōstānista-m miltin, with my own friends; mīnā sāya-m, my sister; tātista-m, (tidings) of my father.

First Person.—mēnā tāti-m, my father; in mēnā wanṭē, my share, there appears to be no suffix, so also in tānik tātī uda, near my own father; mēnā puṭ-hli-m, my son; in tānik dōstāna pilā, with my friends, there is no suffix.

EASTERN.

Second Person.— $t\bar{e}n\bar{a}$ $t\bar{a}t$ - \bar{e} , your father; $t\bar{e}n\bar{a}$ $m\bar{a}l$ - \bar{e} $kuch\bar{a}$, in thy property; $t\bar{e}n\bar{a}$ put-hl- \bar{e} , thy son (put-hl^a); $t\bar{a}n^ak$ $n\bar{o}kar\bar{a}nist$ - \bar{e} $kuch\bar{a}$, amongst thine own servants; $t\bar{e}n\bar{a}$ $l\bar{a}$ - \bar{e} , thy brother $(l\bar{a}\bar{i})$, also $t\bar{e}n\bar{a}$ $l\bar{a}$ -ai; $t\bar{e}n\bar{a}$ gap- \bar{e} , thy command; dand- \bar{e} , thy teeth.

Third Person.—Nouns in $\bar{\imath}$ seem to take the letter \bar{a} as the suffix. Thus, $\bar{o}t\bar{\imath}s$ $l\bar{a}y$ - \bar{a} , his brother $(l\bar{a}\bar{\imath})$; $t\bar{a}tiy$ - \bar{a} , his father (became compassionate); $\bar{u}t\bar{\imath}s$ $t\bar{a}tiy\bar{a}$, his father (came outside); $t\bar{a}tiy\bar{a}$ $\bar{a}nt\bar{e}$, (he answered) to his father; $m\bar{\imath}$ $s\bar{a}y\bar{a}$ $\bar{e}kin$, this his sister ate. Other nouns take \bar{e} , ai or $\bar{\imath}$. Thus, $\bar{o}t\bar{\imath}s$ kit^alai , his son $(kit^al\bar{a})$; $\bar{o}t\bar{\imath}s$ $s\bar{a}$ - \bar{e} $d\bar{e}$, than his sister $(s\bar{a}\bar{\imath})$, but $m\bar{\imath}$ $s\bar{a}y\bar{a}$ $\bar{e}kin$, this his sister ate; $\bar{o}t\bar{\imath}s$ $k\bar{\imath}mat$ - \bar{e} , its price; udai, from him, with them; sh^arai , upon him; hastai, on his hand; $t\bar{a}tist\bar{a}$ $sh\bar{a}hr$ - $\bar{\imath}$, (?) to his father's city; $sh\bar{o}ring$ - $\bar{\imath}$, his dogs (arrived); $sh\bar{o}ring$ - \bar{e} , to his dogs (he gave order).

WESTERN.

Second Person.—tēnā tātī (no suffix), thy father; māl-ē, thy property; tēnā puṭ-hl-ē, thy son (suffix doubtful); tānik nōkarānis-ē kuchā, amongst thine own servants; tēnā lāyā-ē, thy brother (lāī); tēnā hukm-ē, thy order. Dandēlā-sē may mean 'thy teeth.'

Third Person.— $\overline{U}s\bar{\imath}$ $l\bar{a}y-\bar{a}$, his (her) brother; $\bar{u}s\bar{e}$ $t\bar{a}tiy-\bar{a}$, his father (came), but $t\bar{a}t\bar{e}$ $\bar{a}nt\bar{e}$, to his father; $s\bar{a}y-\bar{a}$, his sister.

 $\bar{u}s\bar{e}$ $put-hl\bar{e}$, his son; $\bar{u}s\bar{\imath}$ $k\bar{\imath}mat-\bar{e}$, its price; $d\bar{o}$ $put-hl\bar{e}l-\bar{e}$, his two sons; $t\bar{a}t-\bar{e}$ $\bar{a}nt\bar{e}$ (see above), to his father; $t\bar{a}nik$ $m\bar{a}l-\bar{e}$, his own property; $n\bar{o}kar\bar{a}n-\bar{\imath}$, his servants; $\underline{s}h^2rai$, upon him; $h\bar{a}s-ai$, on his hand; $g\bar{o}\underline{s}hing-\bar{\imath}$, to-his-house; $t\bar{a}nik$ $j\bar{a}n-\bar{e}$ $\underline{s}h^2r\bar{a}$, on his own life; $\underline{k}h\bar{o}ringan-\bar{\imath}$, his dogs.

B.-With Verbs.

First Person.—Di-m, give to me; $w\bar{a}y$ -am, place me; $d\bar{e}ki$ -m, thou gavest me; at-am, eat me.

Second Person.— $Dam-\bar{e}$, I will give to thee.

Third Person.—lēk-in, lēkam-an, I found him; dēk-ē, thou gavest-to-him.

In the above in or an apparently represents the accusative (or agent) suffix, and \tilde{e} , the dative or genitive.

First Person.—Di-m, give to me; $w\bar{a}y^{-a}m$, place me; $d\bar{a}\bar{\imath}ki$ -m, thou gavest me.

Second Person.-No example.

Third Person.— $d\bar{a}y\bar{\imath}k$ - $y\bar{e}$, thou gavest to him.

IV.—VERBS.

A.—Auxiliary Verbs and Verbs Substantive.

The Present tense is the same in both dialects, viz. :--

¹ These two forms have been tested and found correct.

Other forms noted in the specimens are-

EASTERN.

bīk (fem. bich), he (she) became. biman, we may become. ba, be (Imperative). bīk, to be. bikālā, being. biwā, having been. tam, I shall be. tamai, I should be.

WESTERN.

 $b\bar{\imath}k$, $bit\bar{\imath}k$, he became.

bi, be.
bīk, to be.
bikālā, being.
biwā, having been.
t^mm, I shall be.
t^awāim, I may be.
t^amai, I should be.

B.—The Active Verb.—

Infinitive.—Hanīk, to strike.

Other examples are, (Eastern) $pa\bar{\imath}k$, (Western) $par\bar{\imath}k$, to go; $\underline{sh}\bar{a}r\bar{\imath}k$, to go; (Eastern) $\bar{e}k$, (Western) aik, to eat; $n\bar{\imath}k$, to sit; $\bar{\imath}k$, to come; $t\bar{o}st\bar{\imath}k$, to stand; $l\bar{\imath}k$, to die; (Eastern) $d\bar{e}k$, (Western) daik, to give; (Eastern) $hambal\bar{\imath}k$, (Western) $d\bar{a}wal\bar{\imath}k$, to run; (Eastern) $n\bar{a}t-kar\bar{\imath}k$, to dance.

(Eastern) $\bar{e}k\bar{e}-d\bar{e}$; (Western) $\bar{e}k\bar{i}-d\bar{e}$, by eating.

With the verb shārīk, to go, compare the Wazīrī Paṣḥtō shōrēdal, to wander.

Present Participles.—Hanikālā, striking (identification doubtful).

Other forms translated as present participles are <u>shārwā</u> (fem. shārwī), going; (Western) parēwā (fem. parēwī), going; (Eastern) hambalwī hāich, she was running.

Past Participle.—The form given in the list of words is haniwā, having struck, which is borne out by the following expressions in the Eastern dialect; bō dawās na hāinch wiṭwī (fem.), many days were not passed; lawā, dead; nawā, found.

The usual form ends in $\bar{\imath}k$ (fem. $\bar{\imath}ch$ or ${}^{a}ch$) like the infinitive. Examples are,— $pat\bar{\imath}k$, fem. $pat^{a}ch$, gone; and the following, all only found in the Western specimens, $b\bar{o}\ dw\bar{a}s\ wit\bar{\imath}k\ na\ h\bar{a}\bar{\imath}k$, many days were not passed; $l\bar{\imath}k$, dead; $naw\bar{\imath}k$, found.

PASHAI. 97

With a pronominal suffix, we perhaps have, in the Eastern dialect, louis dara yat-hl-in bik, a mountain of salt produced-by-it became. The form is however doubtful.

Conjunctive Participle.—The only example noted occurs in the Western dialect, viz. katān, having made (thy teeth sharp).

Imperative.—Hana, strike thou.

Other examples are $p\bar{a}$, go; $sh\bar{a}r$, go; $j\bar{a}$, put; $d\bar{e}\bar{a}$, give; $g\bar{o}r\bar{a}$, (Western also $g\bar{o}ry\bar{a}$, which is perhaps respectful, take a sieve), take; (Eastern) t^*nga , (Western) tinga, bind; (Eastern) kanna, (Western) kana, draw (water); $y\bar{e}$, come; (Eastern) acha, (Western, $ach\bar{e}$, which is possibly respectful, bring water), bring; (Eastern) kiya, make (your teeth sharp); (Eastern) $hangh\bar{a}ka$, (Western) $dangiy\bar{a}$, beat (a drum) (possibly these are respectful forms).

Imperatives plural are (Eastern) achi, (Western) achida, bring ye; (Eastern) manjaliya, (Western) manjalēda, put ye on (clothes); (Eastern) wāya, (Western) wāēda, place ye; (Western) kada, place ye; (Eastern) shārida, (Western) khārida, go ye; (Eastern) ada, (Western) atēda, eat ye (her).

First persons plural are aman, let us eat; kaman, let us do.

Some of the above possibly contain pronominal suffixes. The following certainly do,—di-m, give me; $v\bar{a}ya$ -m, place me; (Eastern) ata-m, eat me.

Present,-I strike or am striking.

Eastern.			Westeen.		
	Sing.	Plur.	Sing.	Plur.	
1	hanīkam	hanīkas	hanīkam	hanīkas	
2	$haniyar{a}$	hanêda	hanīkī	hanīkada	
3	hanī yadī	hanīkan	hanēgī	hanīkan	

A form which is commoner in the specimens is,-

I go, or am going.

EASTERN.				WESTERN.		
Name and the second	Sing.	Plar.		Sing.	Plur.	
1	pāyim	pāēs		pākum	pāk [*] s	
2	$par{a}i$	pāēda	. 2	$par{a}kar{\imath}$	pākida	
3	paghā	$par{a}in$		pagā	$p\bar{a}kin$	

The Kāshmīrī for 'go' is pak, in which the final k is part of the root.

Other examples from the specimens are,-

(Eastern) lēim, (Western) lēgā-kum, I am dying; (Eastern) kāim, (Western) kakam, I am doing (service).

(Eastern) $char\bar{e}gh\bar{a}$, (Western) $char\bar{e}g\bar{a}$, he is grazing (eattle); (Eastern) $h\bar{a}l\bar{e}w\bar{a}s$ (?), (Western) $n\bar{e}l\bar{a}$ (?), he sits; (Eastern) $tagh\bar{a}$, (Western) $tig\bar{a}$, he dwells; (Western) $d\bar{a}rin$, (the servants) have (food).

Imperfect.—(Eastern) hanghāik-amī, (Western) hanēgiāik-im, I was striking; (Western) dārēgāīk, he was keeping (two dogs); (Eastern) hanghāchidī, (Western) hanēgāīk, (the rat) was striking; (Western) dangēgāīk, (the drum) was beating.

Future, I shall strike.

	East	PERN.	Western.		
	Sing.	Plur.	Sing.	Plur.	
1	hany īkam ī	hanyīkas	hanāwāimin	hanāw ā ēsī	
-2	$\hbar aniyar{a}$	hanēda	hanāwāyā	hūnāwāēd a	
.3	hany ēdē	hanyikan	hanāwāidī	hanāwā i ndī	

I am unable to explain these forms. They are not borne out by the specimens, which give the following:—uram, I will arise; (Eastern) pam, (Western) param, I will go; (Eastern) mēm-ī, (Western) marēm-in, I will say-unto-him (probably here we have pronominal suffixes); (Eastern) kam, (Western) karam, I may (FI will) make (merriment); (Eastern) dam-ē, I will give-to-thee; (Eastern) ēēkam, (Western) ēgēkam, I will eat-thee.

In the Western dialect, we have a periphrastic future in $\bar{e}g\bar{e}-h\bar{a}\bar{\imath}k$, she was about to eat.

Other forms related to the future are,

EASTERN. WESTERN. hanyīkam, I may strike. hanāwāimin. chandet, (that) it may (not) fall (on the chandat. ground). kaman, (that) we should make (merriment). karisai. biman, (that) we should be (happy). bis. māin or mēin, (that) they should say. marin or mareni. hanimi, I should strike. hanimin. charēkin, (that) he should pasture. charēkin. kajadyai, he would make (his belly sated). kajadai.

The Past Tense.—This differs in Transitive verbs and in Intransitive ones.

In the case of Transitive verbs, it is formed by adding pronominal suffixes to the Past Participle in ik. This participle is passive in meaning, and the pronominal suffixes represent the agent case of the subject of the sentence, the participle agreeing in gender with the object. Thus, hanik (fem. hanich) means 'struck.' Hence hanik-am means 'he (was) struck by me,' i.e. 'I struck him,' and hanich-am means 'she was

PASHAI. 99

struck by me, i.e. 'I struck her.' At the same time, it will be noted in a perusal of the specimens that gender is very loosely applied, and that, apparently, the masculine is often used for the feminine.

In all cases, when the subject is expressed, it is put into the Agent case. This tense (in the case of Transitive verbs) is the same in both dialects. The following are its forms:—

I struck.

	Singulae	Sceject.	PLUBAL SUBJECT.		
Masculine Object.		Feminine Object.	Masculine Object.	Feminine Object.	
1	hanīk-am	hanīch-ans	han īk- an	han īch-a n	
2	hanīk-ī	hanīch-ī	hanīk-ō	hanīch-ō	
3	hanīk-in	hanīch-an	hanīk-an	hanīch-an	

The second person singular sometimes ends in \bar{e} instead of \bar{i} , and the third plural in in instead of an. Instead of $\bar{i}k$, we sometimes find $\bar{e}k$.

The following examples occur in the specimens:-

First person,—Masc.,—(Western) kaīkam, I made (a journey); gurēkam, I bought; (Western) chaṭēkam, I did (not) cast down (thy command). Fem.,—(Eastern) wāīcham, I did (not) set down (thy command). An instance of a double pronominal suffix is (Eastern) lēk-am-an, I found him, lit., he (an) was found (lēk) by me (am).

Second person,—gurēkē, thou boughtest. With double suffixes we have (Eastern) $d\bar{e}k$ -i-m, (Western) $d\bar{a}\bar{i}k$ -i-m, thou didst (not) give to me; (Eastern) $d\bar{e}k$ - \bar{e} , (Western) $d\bar{a}\bar{i}k$ -y- \bar{e} , thou gavest to him.

Third person,—(Eastern) mēkin, (Western) mārēkin, he said; kakin or kāīkin, he made; (Western) wantīkin, he divided; shāīkin, he spent; gurēkin (Western also gōrēkin), it seized; garēkin, he sent; dēkin (Western also dāīkin), he gave; (Eastern) lashīkin or lashēkin, (Western) lashīkin or lashēkin, (Western) lashīkin or lāīkin, he said; (Eastern) lēkin, (Western) lāīkin, he was found, he received; harēkin, he heard; (Eastern) hār²wēkin, (Western) hārawēkin, he called; (Eastern) dakēkin, he drove out; (Eastern) ningākachin (fem.), he kept (two (?) female dogs); (Western) wēṭēkin, he passed (time); (Eastern) ēkin, (Western) aikin, she ate (a horse); jēkin, she placed (a drum); (Eastern) achikin, he fetched; (Eastern) nēlawēkin, he set (the rat) down; chatēkin, he dropped (salt); (Eastern, fem.) chatēchan, (but Western) chatēkin, he dropped (a needle). On the other hand, in the Eastern dialect, sōnchik, a needle, is also used as a masculine, s² dar bīk, which (needle) became a mountain. We should expect bich.

Third person plural,—(Eastern) ēyin, (Western) aikin, (the husks which the swine) ate; (Western) kakin, they made (merriment, a feminine word); (Eastern) kacha, (Western) kachan, (the dogs) made her (into pieces).

In the case of Intransitive verbs, the third person singular takes no termination. In the other persons, the pronominal suffixes added to the past participle, represent the subject, which is in the nominative case.

The following is the paradigm according to the list of standard words:-

EASTERN.

WESTERN.

I went.

,	Sing.		Prog.		Sing.		Prus.	
	Masculine.	Feminine.	Masculine.	Feminine.	Masculine.	Feminine.	Masenline.	Feminine.
1	gikyim	?	gichis	P	gikyim	p	$g ar{\imath} k i s$	Р
2	$goldsymbol{i}kyoldsymbol{i}$?	gichu	þ	giky i	?	$giliyar{\imath}$	Р
3	$gar{\imath}l$ s	gich	gīnch	P	$gar{\imath}$ lc	gich	gīnch	P

The form for the third person feminine singular is taken from the specimens. Compare, however, the conjugation of the past tense of the Auxiliary Verb.

The following are other examples:-

Third person,—(Eastern) aikai, $a\bar{\imath}k$, (Western) $aiy\bar{\imath}k$, $a\bar{\imath}k$, he, it, came; (Eastern) $ar\bar{\imath}k$, (Western) $ur\bar{\imath}k$, he arose; (Western) $dau\bar{a}l\bar{\imath}k$, he ran; (Western) $it\bar{\imath}k$, (thy brother) came; (Western) $n\bar{\imath}k$, he came forth; $pul\bar{\imath}k$, he arrived; $wil\bar{\imath}k$, it elapsed; $much\bar{\imath}k$, he fled; (Western) $ba\bar{\imath}k$, he became afraid; $h\bar{a}l\bar{\imath}k$, he ascended.

In (Western) dawālīk, she ran, the musculine form is used for the feminine. In (Eastern) kanīkan there is probably a pronominal suffix, and the word means (the father) came-out-to-him. Possibly, also, the final ai of aikai above is a pronominal suffix.

The following are feminine:

(Eastern) ēch, she came; (Eastern) shārich, (Western) gich, she went; (Eastern) baghāich, she became near; hālich, she ascended; (Eastern) nangich, she descended; pulich, she arrived.

(Eastern) pulinch is 'they (the dogs) arrived.'

The following are examples of other past tenses:-

I have struck, mam hanīkam; I have walked a long way, (Eastern) bō pan hanī-chamai.

I had struck, (Eastern) mam haniyākam, (Western) mam haniyāēkam.

The following are examples of the Passive Voice:

I shall be struck.

EASTERN.

hanin biyim, I am struck.

hanin bīkīm, I was struck.

hanin bim,

Western.
hanin bigākum.
hanin bitakim.
hanin biwāyim.

KHŌ-WĀR, CHITRĀLĪ, OR ARNIYA.

This language passes under various names. It is called Khō-wār¹ by the people who speak it,—the Chitrālīs, or as they call themselves, Khōs. It is usually called Chitrālī and sometimes Qāshqārī by the English. It was called 'Arnyiá' by Leitner, the name being based on the Shin word Arinah, employed to designate a portion of Yāsīn where Khō-wār is spoken.

'Chitrar, or Qashqar as it is called by the Pathans, is bounded on the north by the Hindu Rush range, separating it from Badakhshan and Wakhan; on the south by the Indus, Swat, and Panjkora Kohistans, and the Asmar district: on the east by Kanjut, Gilgit, Punial, and Dir; and on the west by the Hindu Kush and Kafiristan.'2

Khō-wār is the language generally spoken throughout Chitrāl, as far down as Drōsh. It is also spoken by people residing in the <u>Ghizr valley</u> (east of the <u>Shandur Pass</u>) as far as Gupis. In some parts such as Yāsīn, Lutkoh, Madaglasht and Narsāt, the people have dialects of their own, but they all know Khō-wār.

According to tradition the whole Chitral Valley was once occupied by Kāfirs, and some Kāfir tribes, e.g. the Kalāshīs, still inhabit it. This tradition is borne out by the fact that the Kāfir languages are much more nearly related to those of the Dard Group than either of these groups is to Khō-wār. The last, though undoubtedly a Dardic language, differs from the other two in some essential particulars, such, even, as the forms of the personal pronouns, in which it agrees rather with the Ghalchah languages to the north. It looks as if the whole tract comprising the present Kāfiristān, Chitrāl, and Gilgit was once occupied by one homogeneous race, which was subsequently split into two by a wedge of Khō invasion, representing members of a different, but related, tribe coming from the north. In order to exemplify this, I here give a table showing a number of words in Khō-wār with the corresponding words in two Kāfir and two Dard languages.

		Kāfi	R GROUP.	DARD	GROUP.
English.	Khō-wār.	Bashgali.	Kalā <u>sh</u> ā.	Shinā.	Kāshmīrī
Bad	shum	digar	khācha	kāchō	kochu
Behind	achĕ	ptibar	pishţō	$phat\bar{u}$	pata
Black	$\underline{sh}ar{a}$	$zh\bar{\imath}$	krūna	kinō	krĕhun"
Bone	kol	$attar{\imath}$	atī	atī	a d ij ^u
Cow	ไ <u>esh</u> ū	gão	gak	$g\bar{o}$	$g\bar{a}v$
Эеер	kulum	guru	gūt	gutūmō	$g\bar{u}tu\bar{l}^u$
Dog	rēni	kuṛi	<u>sh</u> er	<u>sh</u> ~~~	$h \bar{u} n^u$

¹ The word is 'Khō-wār,' not 'Khō-wār,' as spelt by O'Brien. The people of Chitral pronounce it 'Kō-wār' or 'Khō-wār,' kh being a slightly aspirated k. I am indebted to Major D. L. R. Lorimer, Assistant Political Agent at Chitral, for this information.

² O'Brien. Khowar Grammar, r. i.

Was	ásistai	$az\bar{\imath}$	āsis	asū	$\hat{a}s^u$

It must not be assumed that Khō-wār is so different from the other Piśācha languages as the foregoing table seems to show. It is designedly compiled to display points of difference, not points of agreement.

The following sketch of Khō-wār grammar is based on Captain O'Brien's work and has been revised on the spot by Khan Sahib Abdul Hakim Khan, to whom I am indebted for many improvements and corrections.

I.—PRONUNCIATION.

(a) Vowels. α, ᾱ, i, v̄, u, ū, ē, αi, ō, αu, as in Indian languages. α, as the u in nut; αັ, as in English hat; ē, as in tent or met; ō, as in English hot, o like the first o in promote, or the o in the French word votre, the short sound of o in the English word home. An acute accent marks the accented syllable. Thus, asúm.

(b) Consonants. kh, zh, gh, q, are the Persian and Arabic ζ, ζ, λ, and ζ, respectively. The letter l has a lingual sound, between l and r. The letter ng is pronounced like the English ng in 'sing.' Th is pronounced like the th in thin. Ph is pronounced p-h, not f. The letters ts and dz represent the well-known sounds of Pashtō and Kāshmīrī.

II .- NOUNS.

The Plural is formed by adding a, an, or en. There are two Declensions: (a) Animate, (b) Inanimate.

1st Declens	ion.	2nd Decle	ension.
Sing.	Plur.	Sing.	Plur.
Nom. Daq , a boy. Acc. $Daq \cdot o$, a boy. Gen. $Daq \cdot o$, of a boy. Dat. $Daq \cdot o \cdot t\bar{c}$, to a boy. Abl. $\begin{cases} Daq \cdot o \cdot s\bar{c}, & \text{to a boy.} \\ Daq \cdot o \cdot sar, & \text{from or by a boy.} \\ Daq \cdot o \cdot s\bar{c} ra, & \text{on a boy.} \end{cases}$	Daq. Daq-ān. Daq-ān. Daq-ān-tě. Daq-ān-sar. Daq-ān-sum. Daq-ān-sūra.	An, a mountain. An-o, a mountain. An-o, of a mountain. An-o-te, to a mountain. An-ar, from or by a mountain. An-o-sum, with a mountain. An-o-teka, on a mountain.	An. Ann-ā'n. Ann-ā'n. Ann-ā'n-tĕ. An-ī'n-sum. Ann-ā'n-ṭĕka.

In the First Declension, the word for 'from' is sar, and for 'on' is $s\bar{s}ra$, both added to the Genitive. In the Second Declension the word for 'from' is $\bar{a}r$, added to the Nominative, and for 'on' is $t\bar{e}ka$, added to the Genitive. The word for 'with' is sum_* added to the Genitive in both declensions. The interrogative is formed by adding a, or lengthening a final a to \bar{a} . Thus, kimēri-a, is it a woman?

Adjectives precede the noun they govern, and remain unchanged for gender or number.

III.—PRONOUNS: (a) Personal—

I.		Thou.		He, she, it; This, That.					
					Sing	gular.		Plural	•
Sing.	Plur.	Sing.	Plur.	Pre	sent.	Absent.	Prese	nt.	Absent.
30.30				Near.	Remote.	More Remote.	Near.	Remote.	More Remote.
Nom. áwa. Acc. ma.	ispá. ispá.	tu. ta.	písa. písa.	haiya. hamu.	hës. horo.	hása. húto <u>gh</u> o or to <u>gh</u> o.	hamit. hamitan.	hĕt. hetan.	hálět. hútětan.

These are all declined quite regularly like nouns. In the Ablative case of the pronouns of the third person, the appropriate postpositions must be used, according as the pronoun represents an animate or an inanimate object.

When he's is a pronominal adjective, then he may be used for the Nominative or Accusative Singular only. Thus, he mosh prai, that man gave or beat. Similarly, when has is used as an adjective, its Accusative Singular only may be hate. Thus, hate mosho prani, they gave to that man; hate mosho prani, they beat that man.

(b) Interrogative Pronouns-

bik, to be able; Past, obé stam, etc.
 bīk, to go; Imperfect base, boghá; Pluperfect base, boghái; Past, Sg., bághestam, baghaú, baghaí; Pl., bághestam, bághastami, bághani; Subjunctive, boghesám, etc.; Imperative, bógheh, etc.
 gīk, to come; Past Part., giti; Past, Sg., há'stam, hai or girū; Pl., há'stam, há'stami, hāni or girū; Imperative, gièh, gyār, etc.
 an-gik, to bring; Past Part., an-giti; Past, Sg., al-é'stam, al-au, al-ai or an-giru; Pl., al-é'stam, al-é'stami, alani or angiru.
 korik, to do; Pluperfect base, kārdú; Past, Sg., áréstam, arū, arër; Pl., áréstam, arë'stami, arë'ni.
 dik, to give; Past Part., díti; Past, Sg., phré'stam, prā or prau, prai; Pl., phré'stam, phrè'stami, prāni; Imperative, Sg., dět, děyā'r; Pl., déyā'ni.

The language of the two following Specimens, for which I am indebted to Colonel B. E. M. Gurdon, C.I.E., D.S.O., Assistant British Agent, Chitral, closely agrees with that given in the preceding grammatical sketch, but, Khō-wār being an unwritten language, there are some minor differences which may be noted. The following are the principal.

There is a tendency to shorten the o of the oblique case singular so that it is sometimes reduced to u, as in pulungusht-u (acc. sg.), a ring.

In the pronouns we have haya for haiya, this.

In the verbs there is a tendency to contraction. Thus, astai for ásistai, he was, astani for ásistani, they were, and for hóstām, I became, hōtam.

In the Present, Future and Present Definite, we have kosi for korosi, we shall do.

In the Past Tense, the s of the typical st is sometimes dropped. Thus, bo<u>sh</u>itai for bo<u>sh</u>istai, he divided; khulētai for khulēstai, he consumed; both rěstai and rětai, he said; po<u>sh</u>tai for po<u>sh</u>istai, he saw; chokitai for chokistai, he fell upon.

In the Imperative mood, note dyōr, give ye.

DARDIC SUB-FAMILY.

FREE TRANSLATION OF THE FOREGOING.

Once upon a time the army of Yārkand having made the people of Chitrāl prisoners carried them away to Yārkand. On the day of the 'Id festival the king (i.e. of Yārkand) gave an order that the door of the prison should be opened and kept open up till mid-day, and that as many prisoners as came out (during that time) should be allowed to go free. Among the prisoners there were two men from the same village. These men disputed among themselves. One said we will go home by the Thamūnyak road, while the other said we will go by the Kashālagah road. Thamūnyak and Kashālagah were two hamlets near different roads leading to their village. They continued to dispute in this manner, while all the rest of the people became free and went away. The prison door was closed again (and the two disputants remained inside).

DARD GROUP.

The Dard Group includes the following languages,—Shinā, Kāshmīrī, and Kōhistānī. Of these, Shinā is the purest example of the group. Kāshmīrī, with its literary tradition, has imbibed too much civilization and vocabulary from India to make it a typical Dard language. Kōhistānī, on the other hand, is a group of uncultivated dialects near the Indian frontier, all of which have been influenced not only by Indian languages but also by Paṣḥtō.

Final vowels, es

GILGITI.

The following account of the grammar of the Gilgit dialect of Shiṇā is mainly based on the Specimen and List of words which are here given. I am indebted for both to the kindness of Captain J. R. Roberts, who prepared them himself in Gilgit. I have also utilised other specimens of the dialect which I have received from various quarters, but which are not here printed, and Colonel Biddulph's and Dr. Leitner's works mentioned in the List of Authorities.

The quantity of the vowels was not regularly marked in the Specimens as originally received. I have supplied the deficiency, so far as was possible, from Colonel Biddulph's and Dr. Leitner's vocabularies.

I. PRONUNCIATION.—Besides the usual pairs of short vowels, a (as in 'America,' or the u in 'nut') and \bar{a} , e and \bar{e} , i and \bar{i} , o and \bar{o} , u and \bar{u} , there are two very common sharpened vowels represented by \acute{a} and \acute{e} (here the 'does not represent the accent). These are pronounced like the a in 'have,' and the e in 'shell,' respectively.

There is one diphthong, represented in the List and Specimen by ei. Colonel Biddulph represents it by eyi. Other writers represent it by ai. The transliterations ai and ei probably represent local differences of pronunciation. The former is evidently the original.

The letters \bar{u} and \bar{o} are continually interchanged. Thus, $d\bar{e}g\bar{o}$ or $d\bar{e}g\bar{u}$, he gave; $b\bar{u}n$ or $b\bar{o}n$, we shall become. In $m\bar{a}lus$ for $m\bar{a}l\bar{o}s\acute{e}$, \bar{o} has been changed to u. The Gilgit specimens give the Agent case of $r\bar{o}$, he, as $r\bar{o}s\acute{e}$. I presume that this \bar{o} is to be pronounced as in German.

Final vowels, especially é, are over and over again elided. Thus, másé or más, by me; malosé or malus, by a father; dījété or dījét, to a daughter; gōtérō, gōtérū or gōtér, in a house; mishtō or misht, good.

When a final long vowel is elided, it often affects the vowel of the preceding syllable by epenthesis. Thus we have béin for béyānī, she is becoming; tēgun for tēgānō, he has made; pinēgun for pinēgānū, he is seated; wátun for wátānū, he has come.

As regards consonants, the most prominent peculiarity is the frequency with which letters which in India proper are aspirated here lose their aspiration. Examples are muk, a face, Hindōstānī mukh; koiki, to eat, H. khānā; kojoiki, to ask, H. khōjnā, to seek; $b\bar{a}g\bar{o}$, a share, H. $bh\bar{a}g$; $maj\bar{a}$, among, H. $m\tilde{a}jh$; $s\bar{a}ti$, with, H. $s\bar{a}th$. Indeed the only certain aspirate occurring in the List and Specimen is in the word $phat\bar{u}$, after, in which it is distinctly reported, as something peculiar, that the h is clearly heard. Less certain is the word dhog, joined. The original writer may intend to represent by dh, the sound of th in 'this.'

On the other hand, the spirant letters f (as in 'fan'), \underline{kh} (as the ch in 'loch') and \underline{th} (as the th in 'thin') are not uncommon. Thus, faroiki, to turn (compare Hindi $phirn\bar{a}$); toiki or $\underline{th}oiki$, to do, to make (Sanskrit root $dh\bar{a}$, place); tei or $\underline{th}ei$, thy; $\underline{kh}uk$, a pig.

The existence of cerebral letters in Shinā is doubtful. Neither Colonel Biddulph nor Dr. Leitner recognises them, but some writers of specimens of Shinā which have been collected in the Chitral country from visitors from Gilgit write the word for 'house,' $g\bar{o}t$, and the Dative postposition as $t\dot{e}$, not $t\dot{e}$. The Shinā word for 'great' takes two different forms in the Specimen. We have $bar\bar{o}$ kohner, a great famine; $bod\bar{o}$ $d\bar{u}r$, very far; $bar\bar{o}$ puch, the elder son; and $bod\dot{e}$ $bar\dot{e}-ji$, for many years.

The letter \underline{zh} , pronounced as the s in 'pleasure,' is interchangeable with jr. Thus, $\underline{manu\underline{zh}}\bar{o}$ or $\underline{manujr}\bar{o}$, a man; $\underline{zh}\bar{a}$ or $\underline{jr}\bar{a}$, a brother. Similarly ch is interchangeable with tr, as in $ch\acute{e}$ or $tr\acute{e}$, three; chakoiki or trakoiki, to see.

II.—NOUNS.—Gender.—There are two genders, masculine and feminine. Examples of feminine nouns are $m\bar{a}l\bar{\imath}$ or $m\tilde{a}$, a mother; $tik\bar{\imath}$, bread; $d\bar{u}r$, distance; $d\bar{e}r$, belly. Nouns in \bar{o} form their feminines in $\bar{\imath}$. Thus, $m\bar{a}l\bar{o}$, father; $m\bar{a}l\bar{\imath}$, mother. Some nouns indicate gender by prefixing $b\bar{\imath}r\bar{o}$, male, and $sonch\bar{\imath}$, female. Thus, $b\bar{\imath}r\bar{o}$ $h\acute{a}ren$, a male deer; $sonch\bar{\imath}$ $h\acute{a}ren$, a female deer.

Number.—The nominative plural almost always ends in é. Examples are—

Singular. Plural. mālō, a father. mālé. manuzhō, a man. manuzhé. $a\underline{sh}p\bar{o}$, a horse. a<u>sh</u>pé. dōnō, a bull. dôné. bām, a mare. bāmé. $g\bar{o}$, $g\bar{a}o$, a cow. gāvé. mūgar, a goat. mūgaré. háren, a deer. hárené. chai, a woman. chaivé. rupai, a rupee. rupaié. bandish, a command. bandishé.

¹ Since the above was put into type, Mr. Grahame Bailey has informed me that cerebral letters certainly do occur in Shinā,—in the name itself of the language there is a cerebral n,—but that they are not commonly marked in writing or recognized by Indian scribes. He says that the word for 'house' is certainly 'gōt,' not 'gōt.'

Other plurals are $d\bar{a}r\acute{e}$, sons; $p\bar{e}z\bar{a}r\acute{e}$, shoes. Of these there are no examples of the singular.

The following seem to form their plurals irregularly:

Singular.	Plural.	
di, a daughter.	$dijar{a}rcute{e}.$	
$\underline{sh}\widetilde{u}$, a dog.	$\underline{sh}ar{u}ar{\imath}.$	
$d\bar{e}s$, a day.	$dar{e}sar{\imath}.$	
$\underline{kh}uk$, a pig.	khukī, swine.	

With regard to $\underline{sh}\overline{u}\overline{\imath}$, $d\overline{e}s\overline{\imath}$ and $\underline{kh}uk\overline{\imath}$, it may be noted that Colonel Biddulph makes all nouns, except those ending in \overline{o} , form their plurals in $\overline{\imath}$.

Case.—All nouns appear to be declined in the same way. We commence by giving the declension of manuzhō, a man, and of puch, a son.

Manuzhō, a man.

	Singular.		Plural.	
$\mathbf{Nom}.$	$manu\underline{zh}\bar{o}$, a man.	q	<i>nanu<u>zh</u>é</i> , men.	
Acc.	manu <u>zh</u> ō, a man.		manu <u>zh</u> é, men-	
$\mathbf{Ag}.$	manu <u>zh</u> ō-sé, by a man.	4	manu <u>zk</u> é-sé, by 1	men.
Inst.	manu <u>zh</u> ō-sāti, with a man.	. 1	nanu <u>zh</u> é-sāti, wi	ith men.
Dat.	manuzhé-té, to a man.	1	manu <u>zh</u> ō-té, to m	ien.
Abl.	manu <u>zh</u> é-jō, from a man.		m <i>anu<u>zh</u>é-jō</i> , fron	n men.
Gen.	manuzhei, of a man.		<i>manu<u>zh</u>ō</i> , of mer	1.
Loc.	manu <u>zh</u> é-rō, in a man.		manu <u>zh</u> ō-rō, in r	nen.

Puch, a son.

Singular.	Plural.
Nom. puch, a son.	puché, sons.
Acc. puch, a son.	puché, sons.
Ag. puch-sé, by a son.	puché-sé, by sons.
Inst. puch-sāti, with a son.	puché-sāti, with sons.
Dat. puché-té, to a son.	puchō-té, to sons.
Abl. puché-jō, from a son.	puché-jō, from sons.
Gen. puchei, of a son.	puchō, of sons.
Loc. puché-rō, in a son.	$puch\bar{o}$ - $r\bar{o}$, in sons.

Note that in the above a final vowel is very frequently elided, so that we have words like $manu\underline{zh}\bar{o}s$, for $manu\underline{zh}\bar{o}-s\acute{e}$; $manu\underline{zh}\acute{e}+t\acute{e}$; and $manu\underline{zh}\acute{e}+t\acute{e}$; and $manu\underline{zh}\acute{e}+t\acute{e}+t\acute{e}$; and $manu\underline{zh}\acute{e}+t\acute{e}+t\acute{e}$; and $manu\underline{zh}\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e}+t\acute{e$

It will be seen from the above that the only real case is the genitive. The other cases are formed by suffixing postpositions either to the nominative or to the genitive, ei, in the latter case, being contracted to \acute{e} . We shall now consider these cases one by one, dealing first with the genitive, and then with the other cases in the order given above.

The genitive singular is shown in the above declension as ending in ei. Thus, puchei, of a son. This ei is often written ai. Colonel Biddulph writes it \acute{e} , and this occurs once or twice in the Specimen, and is the termination here employed before postpositions. Other examples of this case occurring in the List of Words and in the

SHINA.

This is the language spoken in Gilgit and the neighbouring valleys. Properly it is the language of the Shin tribe, who, although numerically inferior, have established their language to the exclusion of others wherever they have penetrated. Amongst the many dialects of Shinā now spoken, that of Gilgit, which was the seat of Shin rule, is still considered the most refined, but it is much mixed with Burushaskī, and of late, with Kāshmīrī, owing to an immigration of Kāshmīrīs which took place about a century and a half ago.¹

In various dialects, Shinā is the language of the Gurēz Valley in Kashmīr, of the Astōr Valley, and of the Gilgit² district as far north as Yāsīn and Hunza. It also extends down the Indus Valley through the Chilās country, as far as Pālus and Kōlī, close to the Indus Kōhistān, on the left bank of that river. Again, to the east, in Baltistān, there are isolated colonies of Dards, still speaking their original language.

Shiṇā has many dialects. The principal are,—

- 1. Gilgitī, the dialect of the Gilgit Valley.
- 2. Astorī, the dialect of the Astor Valley.
- 3. Chilāsī. This is the dialect spoken lower down the Indus, not only in Chilās, on the south side of the river, but also on the north side, in Darēl, Hudar, etc. It continues down both sides of the Indus as far as Tangīr and Sazīn, and it is thence spoken as a second language as far as Kōlī and Pālus. It is also spoken in the valley of Roshan, and, sporadically, to the north and west of the true Shiṇā area, owing to one branch of the original Chilāsīs, the Machūchīs, having become widely scattered. The other branch of the original Chilāsīs is known as 'Bhōṭ.' Chilāsī closely resembles Astōrī.
- 4. Gurēzī. This is the dialect of the Gurēz (Gurais) Valley. It resembles Chilāsī, the sister dialect spoken in Chilās, and the Brōkpā of Drās. It is also spoken by a colony of Gurēzīs who have settled in the village of Niāt, which lies to the west of the Gurēz Valley, in the Chilās country, northeast of the Babusar Pass.
- 5 & 6. Brökpā of Drās and of Pāh-Hanū. The Shins of Baltistān are called Brökpā, or Highlanders, by the Baltī, and are scattered over various parts of the country. The Brökpā of Skārdū and the vicinity speak Astörī, and those of Drās and the neighbouring country, a peculiar dialect of their own. Higher up the Indus, on the frontier between Baltistān and Ladākh, in the country round Pāh, and in the Hanū Valley, they speak another dialect of Shinā. This differs so much from those spoken by the other Brökpā, that they are obliged to use the Baltī language when conversing with them.
 - 7. A North-Western dialect, without a name, spoken to the north-west of Gilgit.

¹ Biddulph, Tribes of the Hindoo Koosh, p. 36. Writing in 1880, he says 'about a hundred years ago.' Mr. Grahame Bailey informs me that the correct name of the language is 'Shinā,' with the accent on the last syllable, not 'Shīnā.'

² According to Drew, Jummoo and Kashmir, p. 406, the people themselves call this word Gilyit, but all people of other races who have had occasion to use the name, Kāshmīrīs, Sikhs, Dōgrās, and Europeans, have caught the sound as Gilgit. Vigue says that the real name is Gilid, and Dr. Leitner speaks of Ghilghit or Gilīt.

GILGITI.

The following account of the grammar of the Gilgit dialect of Shinā is mainly based on the Specimen and List of words which are here given. I am indebted for both to the kindness of Captain J. R. Roberts, who prepared them himself in Gilgit. I have also utilised other specimens of the dialect which I have received from various quarters, but which are not here printed, and Colonel Biddulph's and Dr. Leitner's works mentioned in the List of Authorities.

The quantity of the vowels was not regularly marked in the Specimens as originally received. I have supplied the deficiency, so far as was possible, from Colonel Biddulph's and Dr. Leitner's vocabularies.

I. PRONUNCIATION.—Besides the usual pairs of short vowels, a (as in 'America,' or the u in 'nut') and \bar{a} , e and \bar{e} , i and \bar{e} , o and \bar{o} , u and \bar{u} , there are two very common sharpened vowels represented by \hat{a} and \hat{e} (here the 'does not represent the accent). These are pronounced like the a in 'have,' and the e in 'shell,' respectively.

There is one diphthong, represented in the List and Specimen by ei. Colonel Biddulph represents it by eyi. Other writers represent it by ai. The transliterations ai and ei probably represent local differences of pronunciation. The former is evidently the original.

The letters \bar{u} and \bar{o} are continually interchanged. Thus, $d\bar{e}g\bar{o}$ or $d\bar{e}g\bar{u}$, he gave; $b\bar{u}n$ or $b\bar{o}n$, we shall become. In $m\bar{a}lus$ for $m\bar{a}l\bar{o}s\acute{e}$, \bar{o} has been changed to u. The Gilgit specimens give the Agent case of $r\bar{o}$, he, as $r\bar{o}s\acute{e}$. I presume that this \ddot{o} is to be pronounced as in German.

Final vowels, especially é, are over and over again elided. Thus, másé or más, by me; malosé or malus, by a father; dījété or dījét, to a daughter; gōtérō, gōtérū or gōtér, in a house; mishtō or misht, good.

When a final long vowel is elided, it often affects the vowel of the preceding syllable by epenthesis. Thus we have béin for béyānī, she is becoming; tēgun for tēgānō, he has

made; pinēgun for pinēgānū, he is seated; wátun for wátānū, he has come.

As regards consonants, the most prominent peculiarity is the frequency with which letters which in India proper are aspirated here lose their aspiration. Examples are muk, a face, Hindőstánī mukh; koiki, to eat, H. khānā; kojoiki, to ask, H. khōjnā, to seek; $b\bar{a}g\bar{o}$, a share, H. $bh\bar{a}g$; $maj\bar{a}$, among, H. $m\tilde{a}jh$; $s\bar{a}ti$, with, H. $s\bar{a}th$. Indeed the only certain aspirate occurring in the List and Specimen is in the word $phat\bar{u}$, after, in which it is distinctly reported, as something peculiar, that the h is clearly heard. Less certain is the word dhog, joined. The original writer may intend to represent by dh, the sound of th in 'this.'

On the other hand, the spirant letters f (as in 'fan'), \underline{kh} (as the ch in 'loch') and \underline{th} (as the th in 'thin') are not uncommon. Thus, faroiki, to turn (compare Hindi $phirn\bar{a}$); toiki or $\underline{th}oiki$, to do, to make (Sanskrit root $dh\bar{a}$, place); tei or $\underline{th}ei$, thy; $\underline{kh}uk$, a pig.

The existence of cerebral letters in Shinā is doubtful. Neither Colonel Biddulph nor Dr. Leitner recognises them, but some writers of specimens of Shinā which have been collected in the Chitral country from visitors from Gilgit write the word for 'house,' $g\bar{o}t$, and the Dative postposition as $t\dot{e}$, not $t\dot{e}$. The Shinā word for 'great' takes two different forms in the Specimen. We have $bar\bar{o}$ kohner, a great famine; $bod\bar{o}$ $d\bar{u}r$, very far; $bar\bar{o}$ puch, the elder son; and $bod\dot{e}$ $bar\dot{e}$ -ji, for many years.

The letter \underline{zh} , pronounced as the s in 'pleasure,' is interchangeable with jr. Thus, $manu\underline{zh}\bar{o}$ or $manujr\bar{o}$, a man; $\underline{zh}\bar{a}$ or $jr\bar{a}$, a brother. Similarly ch is interchangeable with tr, as in $ch\dot{e}$ or $tr\dot{e}$, three; chakoiki or trakoiki, to see.

II.—NOUNS.—Gender.—There are two genders, masculine and feminine. Examples of feminine nouns are $m\bar{a}l\bar{\imath}$ or $m\tilde{a}$, a mother; $tik\bar{\imath}$, bread; $d\bar{u}r$, distance; $d\bar{e}r$, belly. Nouns in \bar{o} form their feminines in $\bar{\imath}$. Thus, $m\bar{a}l\bar{o}$, father; $m\bar{a}l\bar{\imath}$, mother. Some nouns indicate gender by prefixing $b\bar{\imath}r\bar{o}$, male, and $sonch\bar{\imath}$, female. Thus, $b\bar{\imath}r\bar{o}$ háren, a male deer; $sonch\bar{\imath}$ háren, a female deer.

Number.—The nominative plural almost always ends in é. Examples are—

Singular. Plural. mālō, a father. mālé. manuzhō, a man. manuzhé. ashpō, a horse. ashpé. dōnō, a bull. dōné. $b\bar{a}m$, a mare. bāmé. $g\bar{o}$, $g\bar{a}o$, a cow. gāvé. mūgar, a goat. mūgaré. háren, a deer. hárené. chai, a woman. chaiyé. rupai, a rupee. rupaié. bandish, a command.

¹ Since the above was put into type, Mr. Grahame Bailey has informed me that cerebral letters certainly do occur in Shinā,—in the name itself of the language there is a cerebral n,—but that they are not commonly marked in writing or recognized by Indian scribes. He says that the word for 'house' is certainly 'gōt,' not 'gōt.'

Other plurals are $d\bar{a}r\dot{e}$, sons; $p\bar{e}z\bar{a}r\dot{e}$, shoes. Of these there are no examples of the singular.

The following seem to form their plurals irregularly:-

Singular.	Plural.
di, a daughter.	$dar{\imath}jar{a}r\acute{e}.$
$\underline{\underline{sh}}\widetilde{u}$, a dog.	<u>sh</u> ūī.
$d\tilde{e}s$, a day.	$dar{e}sar{\imath}.$
$\underline{kh}uk$, a pig.	khukī, swine.

With regard to $\underline{sh}\overline{u}\overline{\imath}$, $d\overline{e}s\overline{\imath}$ and $\underline{kh}uk\overline{\imath}$, it may be noted that Colonel Biddulph makes all nouns, except those ending in \overline{o} , form their plurals in $\overline{\imath}$.

Case.—All nouns appear to be declined in the same way. We commence by giving the declension of $manuzh\bar{o}$, a man, and of puch, a son.

Manuzhō, a man.

	Singular.	Plural.
Nom.	manu <u>zh</u> ō, a man.	manuzhé, men.
Acc.	manu <u>zh</u> ō, a man.	manuzhé, men-
Ag.	$manu\underline{zh}\bar{o}$ -sé, by a man.	manuzhé-sé, by men.
Inst.	manu <u>zh</u> ō-sāti, with a man.	manu <u>zh</u> é-sāti, with men.
Dat.	manuzhé-té, to a man.	manuzhō-té, to men.
Abl.	manu <u>zh</u> é-jō, from a man.	mann <u>zh</u> é-jō, from men.
Gen.	manuzhei, of a man.	manu <u>zh</u> ō, of men.
Loc.	manu <u>zh</u> é-rō, in a man.	manu <u>zh</u> ō-rō, in men.
	· ·	

Puch, a son.

Singular.	Plural.
Nom. puch, a son.	puché, sons.
Acc. puch, a son.	puché, sons.
Ag. puch-sé, by a son.	puché-sé, by sons.
Inst. puch-sāti, with a son.	puché-sāti, with sons.
Dat. puché-té, to a son.	puchō-té, to sons.
Abl. $puché-j\bar{o}$, from a son.	puché-jō, from sons.
Gen. puchei, of a son.	$puch\bar{o}$, of sons.
Loc. puché-rō, in a son.	puchō-rō, in sons.

Note that in the above a final vowel is very frequently elided, so that we have words like $manu\underline{zh}\bar{o}s$, for $manu\underline{zh}\bar{o}-s\acute{e}$; $manu\underline{zh}\acute{e}t$, for $manu\underline{zh}\acute{e}-t\acute{e}$; and $manu\underline{zh}\acute{e}r$, for $manu\underline{zh}\acute{e}-r\ddot{o}$.

It will be seen from the above that the only real case is the genitive. The other cases are formed by suffixing postpositions either to the nominative or to the genitive, ei, in the latter case, being contracted to \acute{e} . We shall now consider these cases one by one, dealing first with the genitive, and then with the other cases in the order given above.

The genitive singular is shown in the above declension as ending in ei. Thus, puchei, of a son. This ei is often written ai. Colonel Biddulph writes it é, and this occurs once or twice in the Specimen, and is the termination here employed before postpositions. Other examples of this case occurring in the List of Words and in the

specimen are $m\bar{a}lei$, of a father; $d\bar{\imath}jei$, of a daughter; $a\underline{sh}pei\,til\acute{e}n$, the saddle of the horse; $chinch\acute{e}\,ch\bar{e}r\bar{u}$ - $j\acute{e}$, on the top of a hill (compare Colonel Biddulph's spelling above); $k\bar{u}iei\,d\bar{u}k\bar{a}nd\bar{a}r\acute{e}$ - $j\bar{o}$, from a shopkeeper of the village; $j\bar{a}bei\,b\bar{a}g\bar{o}$, the share of the property; guiei, (a man) of the country; $\bar{u}nai$, of hunger; $kromei\,matlab$, the meaning of the work (matlab being feminine).

The genitive plural always ends in \tilde{o} . Thus, $m\tilde{a}l\tilde{o}$, of the fathers; $d\tilde{i}j\tilde{a}r\tilde{o}$, of the

daughters.

The Accusative is always the same as the nominative. Thus, agui-rō barōnō vich, neh pēzāré rései pā, put a ring on his finger and shoes on his feet.

The $\Delta gent$ case plays a more important part in Shinā than in Indo-Aryan languages. In them the subject of a transitive verb is put into the agent case only when the verb is in one of the tenses derived from the past participle. In Shinā, on the contrary, the subject of a transitive verb is put into the agent case, in whatever tense (even the present or the future) the verb may be. Thus, not only have we $m\acute{a}s\acute{e}$ (Agent case of $m\acute{a}$, I) $\underline{shid\bar{e}gas}$, I struck, but also $m\acute{a}s\acute{e}$ $\underline{shidamus}$, I am striking, and $m\acute{a}s\acute{e}$ \underline{shidam} , I shall strike.

This case is formed by adding $s\acute{e}$ to the nominative. The final \acute{e} is often dropped, so that we find only s. Examples of its employment occurring in the Specimen are $chun\bar{o}$ - $s\acute{e}$ $r\bar{e}g\bar{o}$, the younger one said; $chun\bar{o}$ puch- $s\acute{e}$ $asb\bar{a}b$ $jam\bar{a}$ - $t\bar{e}g\bar{o}$, the younger son collected the property; $j\acute{e}ki$ $\underline{kh}uk$ - $s\acute{e}$ $k\bar{a}s\bar{o}$, (husks) which the swine were eating; $k\bar{o}$ - $g\acute{a}$ $manujr\bar{o}k$ - $s\acute{e}$ ne $d\bar{e}g\bar{o}$, no man gave; $m\bar{a}lus$ (with elision of final \acute{e} , and change of \bar{o} to u) $r\bar{o}$ $pach\bar{e}g\bar{o}$, the father saw him; tei $m\bar{a}l\bar{o}$ - $s\acute{e}$ onus $t\bar{e}gun$, thy father has made a feast; and many others.

The Instrumental is formed by suffixing sāti, with. This word is used to mean both 'by means of' and also 'together with.' In the Specimens it is usually, but not always, suffixed to the nominative. Sometimes it is suffixed to the genitive. Examples of the use of this postposition are sáié- (genitive of sáh) -sāti, (married) with the sister; bāli-sāti gané, bind with ropes; guiārnéké-sāti dhog bū, he became joined with a citizen; dilé-sāti puroiki, to fill with husks; tomō sōmé sāti shuriār tham, I may make rejoicing with my friends.

The Dative is formed by suffixing $t\acute{e}$, often reduced to t, to the genitive. Thus, $m\bar{a}l\acute{e}-t\acute{e}$ or $m\bar{a}l\acute{e}t$, to a father; $d\bar{i}j\acute{e}t\acute{e}$ or $d\bar{i}j\acute{e}t$, to a daughter; $d\bar{u}r$ gui\'ek\'et\'e, to a far country; $chun\bar{o}-s\acute{e}$ $tom\bar{o}$ $b\bar{a}b\acute{e}t\acute{e}$ $r\bar{e}g\bar{o}$, the younger said to his father. Sometimes the postposition is suffixed to the nominative, as in $ek\bar{o}t\acute{e}$ $h\bar{o}-th\bar{e}g\bar{o}$, he called to one (of his servants); $jaw\bar{a}b\bar{o}-maj\bar{a}$ $m\bar{a}l\bar{o}t\acute{e}$ $r\bar{e}g\bar{o}$, in answer he said to his father. In two instances the postposition appears to have been dropped. These are, $m\acute{a}s$ aisei $puch\acute{e}$ $boht\bar{o}$ $mustek\bar{a}h$ $d\bar{e}g\bar{a}nus$, I have given a great beating to his son; $manujr\bar{o}ke$, to a man (there were two sons). Examples of the dative plural are $m\bar{a}l\bar{o}-t\acute{e}$ or $m\bar{a}l\bar{o}t$, to the fathers; $d\bar{i}j\bar{a}r\bar{o}-t\acute{e}$ or $d\bar{i}j\bar{a}r\bar{o}t$, to the daughters; $kach\bar{a}k$ $naukar\bar{o}-t\acute{e}$ $tik\bar{i}$ $b\acute{e}in$, to how many servants is there bread; $b\bar{a}b\bar{o}-s\acute{e}$ $tom\bar{o}$ $shadar\bar{o}-t\acute{e}$ $r\bar{e}g\bar{o}$, the father said to his servants; $kanchani\bar{o}-t\acute{e}$, to harlots.

The postposition of the Ablative is $j\bar{o}$, which in the singular is added to the genitive. In the plural it is added to the nominative. Examples are, $m\bar{a}l\acute{e}-j\bar{o}$, from the father or from the fathers; $d\bar{i}j\acute{e}-j\bar{o}$, from a daughter; $d\bar{i}j\bar{a}r\acute{e}-j\bar{o}$, from daughters; $s\acute{a}i\acute{e}-j\bar{o}$ $zhig\bar{u}$, taller than the sister; $kulh\acute{e}-j\bar{o}$ $w\bar{o}\bar{i}$ $nik\bar{a}l\acute{e}$, draw water from the well; $d\bar{u}k\bar{a}nd\bar{a}r\acute{e}-j\bar{o}$, from

a shopkeeper; $d\bar{e}s\bar{i}-j\bar{o}$ $phat\bar{u}$, after (a few) days; $boht\acute{e}-j\bar{o}$ $mi\underline{sh}t\acute{e}$ $ch\bar{\imath}l\acute{e}$, clothes better than all, the best clothes; $naukar\acute{e}-j\bar{o}$ $ek\bar{o}t\acute{e}$ $h\bar{o}-\underline{th}\bar{e}g\bar{o}$, he called to one from (a nong) his servants.

The Locative is formed by adding $r\bar{o}$ (often written $r\bar{u}$)¹ to the genitive. The final vowel is often dropped. Thus, $g\bar{o}t\acute{e}r$ (List No. 223) or $g\bar{o}t\acute{e}-r\bar{o}$ (226), in the house; $\acute{e}h$ $gui\acute{e}-r\bar{o}$ ek kohner $w\acute{a}t\bar{o}$, in that country a famine came; $chech\acute{e}-r\bar{o}$, in the field; $agui-r\bar{o}$ (for $agui\acute{e}-r\bar{o}$), on (his) finger.

Other postpositions.—Several other suffixes or postpositions occur in the Specimens, of which the following may be noted.

K added to a noun gives the force of an indefinite article. It is a contraction of ek, one. Thus, $manu\underline{zh}\bar{o}$ - $k\acute{e}$, of $(or\ to)$ a man (there were two sons); $gui\bar{a}rn\acute{e}$ - $k\acute{e}$ - $s\bar{a}ti$, with a countryman; $k\bar{o}$ - $g\acute{a}$ $manu\underline{zh}\bar{o}$ -k- $s\acute{e}$ ne $d\bar{e}g\bar{o}$, no man gave.

Ajé or 'jé means 'on.' Thus (Biddulph) gōté-ajé, on the house; aisei deiki-'jé tilén dé, put the saddle on his back; chinché chērū-'jé, on the top of a hill; ashpé-'jé pinēgun, he is seated on a horse; rō charchi-'jé wátō, he came on thought, he came to himself; chakei-'jé (nom. sing. chak) ditō, he fell on (his) neck.

 $K\bar{a}re\bar{o}$, for. Thus, $\underline{kh}uk\bar{\imath}$ cheroiki- $k\bar{a}re\bar{o}$, for feeding swine. When added to pronouns these are put in the agent case; for examples see below.

 $Maj\bar{a}$, among, in. Thus, $\underline{shadar-maj\bar{a}}$, among (thy) servants; $r\ddot{o}s\acute{e}\ jaw\bar{a}b\bar{o}-maj\bar{a}$ $m\bar{a}l\bar{o}-t\acute{e}\ r\bar{e}g\bar{o}$, he in answer said to his father.

Kirih, under, as in oh tomā-kirih, under that tree.

 $Phat\bar{u}$, behind, after. Thus, $kaisei\ sh\bar{u}\bar{o}\ t\bar{u}$ - $j\bar{o}\ phat\bar{u}\ woyei$, whose boy comes behind you?

 $\bar{A}p\acute{e}\ d\bar{e}s\bar{\imath}-j\~{o}\ phat\~{u}$, after a few days. It will be noted that in both cases it governs the ablative.

Kach, near. Thus, $tom\bar{o}$ $b\bar{a}b\acute{e}$ -kach bojam, I will go near (i.e. to) my father; $kar\bar{e}$ - $g\acute{a}$ $r\bar{o}$. . . $g\bar{o}t\acute{e}$ kach $b\bar{u}$, when he . . . became near the house. Note that in both cases it governs the shortened form of the genitive.

Adjectives.—Adjectives ending in \bar{o} (and nearly all do so) form their feminine singular in $\bar{\imath}$, their plurals (both masculine and feminine) in \acute{e} . They agree with their nouns in gender and number, but do not, so far as the Specimens show, change for case. In some Shiṇā papers which I have seen the nominative plural masculine ends in $\bar{\imath}$, the feminine and the other masculine cases of the plural ending in \acute{e} . This is like Colonel Biddulph's nominative plural of nouns ending in a consonant, which also ends in $\bar{\imath}$, but it is not borne out by the Specimens, in which \acute{e} is always used throughout the plural. Perhaps the use of $\bar{\imath}$ is a dialectic difference. It is certainly the rule in the Gurēzī dialect (vide post).

It appears that adjectives ending in \bar{o} are (as in the case of nouns) liable to drop the termination. We shall first take the adjective $misht\bar{o}$, good, in its various forms, and then some other adjectives which occur in the List and Specimens.

mishtō manuzhō, a good man. mishtō manuzhei, of a good man. mishté manuzhé, good men.

¹ Compare $r\bar{e}$, $r\bar{a}$, the sign of the Dative in Dras and elsewhere. Also the Persian $r\bar{a}$.

mishté manuzhō, of good men.

mishtī chei, a good woman.

mishté cheiyé, good women.

mishté chīlé, good clothes.

oh mishté shidé, beat him well.

ané misht asī, this was good (i.e. proper) (that we should rejoice).

kāchō shūō, a bad boy.

kāchī mōteiek, a bad girl.

kāch yáoiké-beoiké-sāti karach-tēgō, he expended in bad walking and sitting (i.e. behaviour).

sheiō ashpei tilén, the saddle of the white horse.

bohtō mustekāh dēgānus, I have given a great beating.

mei mālō oh chunō goté-rō béi hanō, my father lives in that small house.

chunō puch-sé bohtī asbāb jamā-tēgō, the younger son collected all the property. tomō mālé-kach wátō, he went to his own father.

tomī dēr puroiki, to fill his own belly.

pūrī tikī laik béin, enough bread is found.

barō puch cheché-rō asū, the elder son was in the field.

ané bodé baré-ji, for these many years.

sonchī shū, a female dog.

sonché shūī, female dogs.

Adjectives are compared in the usual way, by placing the noun with which comparison is made in the ablative. Thus:—

sáié-jō zhigū hanō, he is taller than the sister.

bohté-jō mishtō, better than all, best.

bohté-jō othalō, highest.

bohté-jō mishté chīlé, the best clothes.

III.—PRONOUNS.—The pronouns of the first and second persons are :—

	I.	Thou.	We.	You.
Nom.	má	$tar{u}$	béh	tsoh.
Agent	másé, más	$tar{u}scute{e}$, $tar{u}s$	bésé, bés	tsosé, tsos.
Gen.	mei	tei, <u>th</u> ei	asei	<u>ts</u> ei.
Obl.	má	$tar{u}$	asō	tsö.

For the second person, the genitive singular is often written \underline{thei} . In the case of the agent, the final \dot{e} is often dropped. Examples of the employment of these pronouns are:—

má bojam, I will go.

må ash gānus-paiyūk, I walked to-day.

másé gunā tēgānus, I have done sin.

más tei khidmat tēgas, I did thy service.

mei chunomalei puché-té, to the son of my uncle.

mei mālō ch chunō gōté-rō béi hanō, my father lives in that small house.

mei mālei kachāk naukarō-té, to how many servants of my father.

mei ano puch mū asū, this my son was dead.

má mōchōt tihré, walk before me.

bāgō má-té dé, give the share to me.

ek chalé-gá mát ne dēgānō, thou didst not give to me even one kid.

béh bojōn, we shall go.

bēsé shuriār tonas, we are making rejoicing.

tū bojé, thou wilt go.

tūsė ek chalé-gá ne dēgānō, thou didst not give even a kid.

tei zhā wátun, neh tei mālō-sé onus tēgun, thy brother has come, and thy father has given a feast.

kéh waqat tei puch wátū, when thy son came.

kaisei shūō tū-jō phatū woyei, whose boy comes behind you?

Khudā warī gunā tēgānus tū mōchō, I have done sin against God (and) before thee.

It may be noted that some specimens purporting to represent the <u>Shinā</u> of Gilgit give a feminine plural of the pronoun of the second person, viz. <u>tsā</u>, you, agent <u>tsā</u>-sé. This form is not borne out by the present Specimen or List, nor is it mentioned by Colonel Biddulph. A similar feminine form does occur in Gurēzī.

There are at least three demonstrative pronouns, each of which can be used for the pronoun of the third person. These are \bar{o} or $r\bar{o}$, both used when the object referred to is remote, and $an\bar{o}$ used when the object referred to is near. \bar{O} and $r\bar{o}$ may therefore be translated 'he, she, it' or 'that,' and $an\bar{o}$, 'he, she, it' or 'this.' All three have distinct forms for the feminine in the singular. In the plural there is no distinction of gender.

The following forms of \bar{o} occur:—

		Sing	•		PLUE.	- 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1
	Masc.	*	Fem.		Com. Gen.	
Nom.	\bar{o} , oh		(?) éh	1	ai	
Agent	ōsé		P	2 1	(?) aisé	
Gen.	aisei		P		ainei	
Obl.	aisé		eh -	- 18	aine, air	2 0

The following examples occur:--

rösé oh cheché-rō chanegō, he sent him into his fields.

aisei deiki-'jé tilén dé, put the saddle on his back.

mas aisei puché bohto mustekāh dēgānus, I have given a great beating to his son.

aisei <u>zh</u>ā tomī sáié-jō <u>zh</u>igū hanō, his brother is taller than his own sister. aisei gōch, the price of that.

anéh rupai aisé-té dé, give this rupee to him.

ō mushai sáié sāti, with the sister of that man.

oh chuno goté-ro béi hano, he lives in that small house.

éh guié-rō, in that country.

ai rupaié ghiné, take those rupees.
ainé-jō chunō-sé rēgō, from (among) them, the younger said.
asbāb ainō-majā bāgēgō, he divided the goods among them.
ai shadar-majā sāti té, put me among those servants.

The pronoun $r\tilde{o}$ is thus declined—

Sing	Sing.	
Masc.	Fem.	Com. Gen.
Nom. rō	réh	réh
Agent rösé	résé	résé
Gen. rései	rései	réne i
Obl. résé	résé	(?) réné, (?) rénō

It will be noted that the agent case singular is $r\ddot{o}s\acute{e}$, not $r\ddot{o}s\acute{e}$. In the original manuscript of the Specimen the two dots over the o are carefully marked wherever the word occurs. All other specimens of the Gilgit dialect which I have seen give $r\ddot{o}s\acute{e}$, and so also does Colonel Biddulph. The \ddot{o} is meant, I presume, to sound as in German.

The following examples occur of this pronoun:

 $r\bar{o}$ hun- $b\bar{u}$, he arose.

rō bodō dūr asū, he was very far off.

rösé tomé asbāb ainō-majā bāgēgō, he divided his own property among them.

rései agui-rō barōnō vich, put a ring on his finger.

rösé résé-té rēgō, he said to him.

rését baneré, put on to him.

rösé kāreō ōnus dēga, for him thou gavest a feast.

The pronoun ano is thus declined—

Si	ing.	PLUR.
Мавс.	Fem.	Com. Gen.
Nom. and	anéh, ané	anéh
Agent anisé	anésé	(?) anésé
Gen. anei	anei	(?) anei
Obl. ané	ané	ané

Examples are :-

mei anō puch mū asū, this my son was dead.

kaisé-jō anéh (fem.) gōch ginēgānō, from whom have you bought this?

ané (fem.) misht asī, this (thing) was right.

anéh rupai aisé-té dé, give this rupee to him.

anō ashpei umer, the age of this horse.

anisé kāreō rései mālō dárū wátū, for this reason his father came outside.

ané kromei jék matlab hanī, what is the meaning of this thing?

ané bodé báré-ji, during these many years.

ano Kashīré-té kachāk dūr hanī, how far is it from here to Kashmir?

The Reflexive Pronoun is tomō, own, referring to any person, like the Hindōstānī apnā. It is treated like an adjective. Thus:—

aisei zhā tomī sáié-jō zhigū hanō, his brother is taller than his own sister.

chunō-sē tomō bābé-té rēgō, the younger said to his own father.

rösé tomé asbāb bāgēgō, he divided his own goods.

tomī dēr puroiki khiāl-tēgō, he wished to fill his own belly.

tomō bābé kach bojam, I will go to my own father.

má tomé shadar majā sāti té, put me among thine own servants.

tomō sōmé sāti, with my own friends.

Other pronouns are: -

Kō, who, both relative and interrogative; Agent sing. kō-sé; Gen. sing. kaisei; Obl. sing. kaisé. As an adjective, the oblique form is kéh. Examples,—kō-sé tei jāb fanā-tēgun, by whom thy property was wasted; kaisei shūō tū-jō phatū woyei, whose boy comes behind you? Kaisé-jō anéh gōch ginēgānō, from whom did you buy that? Kéh waqat tei puch wátū, at what time (i.e. when) thy son came.

jék, what, both relative and interrogative; plural jékī. Examples,—tei nōm jék hanō, what is thy name? jékī khuk-sé kāsō, (husks) which the swine were eating; jék má kach hanō, tei hanō, what is mine is thine.

kachāk, how much, how many, both relative and interrogative. Examples,—
anō ashpei kachāk umer hanī, how much age is there of that horse, i.e.
how old is it? kachāk dūr hanī, how far is it? dāré gōtér kachāk hané,
how many sons are there in the house? jābei bāgō má-té dé, kachāk mát
wán, give to me the share of the property, as many (things) as come to me.

 $k\bar{o}$ - $g\acute{a}$, anyone, $k\bar{o}$ - $g\acute{a}$ manu<u>sh</u> $\bar{o}k$ - $s\acute{e}$ ne $d\bar{e}g\bar{o}$, no man gave.

 $k\bar{o}$ -ek, a certain, $k\bar{o}$ -ek $manu\underline{zh}\bar{o}k\acute{e}$ $d\bar{u}$ $d\bar{a}r\acute{e}$ $asil\acute{e}$, a certain man had two sons. kai- $kh\acute{e}n$, $kar\bar{e}$ - $g\acute{a}$, when ; $k\acute{e}h$, why?

IV.—VERBS.—A.—Auxiliary Verbs and Verbs Substantive.—The Present Tense of the Verb Substantive has, in the singular, separate forms for the Masculine and for the Feminine. In the plural it is of common gender. It is conjugated as follows:—

I am, etc.

Sin	PLUR.		
Masc.	Fem.	Com. Gen.	- 7
1. hanus	hanis	hanas	
2. ħanō	hané	hanat	
3. hanō, hanū	han ī	hané	

When used as an auxiliary verb, these forms are, as will be seen, generally shortened by the omission of the initial h.

The following examples (amongst others) of this tense occur in the List and in the Specimens:—

tū harkhén má sāti hanō, thou art ever with me.

jék má kach hanō, tei hanō, what is mine is thine.

tei nom jék hano, what is your name?

ano ashpei kachāk umer hanī, of his horse how much age is there, i.e. how old is it? (umer is feminine).

ané kromei jék matlab hanī, what is the meaning of this thing?

The Past Tense has two forms, a longer with l in the termination, and a shorter without l. Like the present, it has two genders in the singular only.

I was, etc.

Sing	. *	PLUR.
Al asc.	Feni.	Com. Gen.
l. asulus, asus	. nsilis, asis	asilas, asas
2. asulō, asō	asilé, asé	asilat, asat
3. $asul\bar{u}$, $as\bar{u}$	$asilar{\imath},asar{\imath}$	asilé, asé

The form without l is the only one that is used as an auxiliary verb.

This tense is spelt by some authorities (including Dr. Leitner) with a double s. Thus, assus, which shows that the accent is on the first syllable.

There are several examples of the third person singular of the shorter form of this tense in the Specimen. We may quote two, one in the masculine and the other in the feminine gender.

ammáh rō kaikhén dārum bodō dūr asū, but when he was now a great way off. ané misht asī, this (thing, fem.) was good.

An infinitive hanoiki, to be, also occurs.

Other tenses of the verb substantive are supplied from the verb boiki, to become. Thus, $b\acute{e}$, having been; $b\~{o}$, be; $b\~{o}m$ or $b\~{u}m$, I shall be, I am; $b\~{o}n$ or $b\~{u}n$, we shall be, we are; $b\acute{e}y\~{a}n\~{u}$. he is becoming; $b\acute{e}y\~{a}n\~{v}$ or $b\acute{e}in$, she is becoming; $b\~{o}nas$, we are becoming; $b\~{u}$, he became. Examples are:—

hun $b\bar{o}m$, I will become arisen. $ya\underline{sh}ki \ n^{\rho} \ b\bar{u}^{\eta}$, I am not fit. $dhog \ b\bar{u}$, he became joined.

With another infinitive, this verb takes the meaning of 'to begin' as in $r\bar{o}$ garāb boiki $b\bar{u}$, he began to be poor. The same is the case in the Kāfir dialects.

The word $b\bar{u}n$, given in the above example as a form of the first person singular present-future, is really a first person plural, $b\bar{u}n$ or $b\bar{o}n$, we are, used in the sense of the singular.

B.—The Active Verb.

There is only one real tense of the Active verb, viz. the present-future, which, as its name implies, has the sense of the present and of the future. The usual sense is that of the future, the definite present being generally employed for the simple present. It may be observed that exactly the same condition of affairs exists in Kāshmīrī.

As for the other tenses, the past is formed by taking the past participle, to which, in the first and second persons, pronominal suffixes are added. In the case of transitive verbs, the past participle is formed by adding $\bar{e}g\bar{o}$ or $\bar{e}g\bar{u}$ to the root. In the case of intransitive verbs it is formed by adding \bar{o} or \bar{u} to the root. Sometimes intransitive verbs take the transitive form of the past participle, and *vice versâ*.

The remaining tenses are formed by suffixing auxiliary verbs to the present-future and past tenses.

A conditional mood is formed by suffixing $aj\acute{e}$, perhaps, to any form of the indicative mood.

Shiṇā is peculiar in its treatment of transitive verbs. In Indo-Aryan dialects, the subject is placed in the agent case when a transitive verb is in a past tense, and the latter is construed either passively, agreeing in gender with the object, or else impersonally. Thus, $us-n\bar{e}$ $b\bar{a}t$ $kah\bar{i}$, he said a word, literally, by him a word (feminine) was said; $us-n\bar{e}$ $str\bar{i}-k\bar{o}$ $m\bar{a}r\bar{a}$, he struck the woman, literally, by him with reference to the woman a striking was done.

In the case, however, of tenses not formed from the past participle, the sentence is construed actively, and the subject is put into the nominative case, with which (and not with the object) the verb agrees in gender, number and person. Thus, woh bāt kahtā-hai, he says a word; woh us-kō mārtī-hai, she strikes him.

In <u>Shinā</u>, on the contrary, when the verb is a transitive one, in whatever tense it may be, the subject is put into the case of the agent. Thus, we have not only $r\ddot{o}s\acute{e}$ (agent case of $r\ddot{o}$) <u>shidēg</u> \ddot{o} , he struck, but also $r\ddot{o}s\acute{e}$ <u>shidei</u>, he strikes or will strike. With this subject (although it is in the agent case) the verb agrees in number and person, and, so far as I can ascertain (though I am doubtful on the point), also in gender.

It is probable that this passive or impersonal construction of all the tenses of a transitive verb is borrowed from the Tibetan dialects spoken to the east of the Shiṇā country.

I now proceed to give the conjugation of the transitive verb <u>shidoiki</u>, to strike. Principal Parts.

Infinitive,—<u>sh</u>idoiki, to strike.

Present Participle,—(?) shidétō, fem. -tī, striking.

Past Participle,— $\underline{shid\bar{e}g\bar{o}}$, $\underline{shid\bar{e}g\bar{u}}$, fem. $\underline{-g\bar{\imath}}$, struck.

Conjunctive Participle,—shidé, having struck.

Gerund,—shidojé, on striking.

Noun of Agency,—<u>shidoikik</u>, one who strikes.

Notes.—The infinitive ends in oiki. It is also a verbal noun, and then means 'the act of striking.' It is frequently governed by postpositions, and in that case the specimen usually, but not always, makes it end in ke. Other instances of the use of the infinitive are purciki khiāl-tēgō, he wished to fill; koiki dé, give to eat; bachoiki-gá natedoiki pārudū, he heard singing and dancing; árū bojoiki khush ne bū, he was not willing to go inside; kāch yáoiké-beoiké sāti, with bad walking and sitting (i.e. behaviour); cheroiki kāreō chanēgō, he sent (him) to graze; tei puch reoiké-té yashki, fit for calling thy son.

I cannot find any authoritative example of the present participle. The form which I have given is based on a stray word found in Dr. Leitner's Dardistan.

Past Participle.—The form $\underline{shid\bar{e}g\bar{o}}$, etc., is only used in the formation of the past tense. When used as a true participle, the form is probably $\underline{shid\bar{o}}$ or $\underline{shid\bar{u}}$, and this form is sometimes employed for the past tense even in the case of participle, the form is probably $\underline{shid\bar{o}}$ or $\underline{shid\bar{u}}$, and this form is sometimes employed for the past tense even in the case of transitive verbs, while it is the rule in the case of intransitive ones (see below). An example of a transitive verb is $p\bar{a}rud\bar{u}$, he heard (singing and dancing), the past tense of $p\bar{a}r\acute{e}joiki$, to hear.

It will be observed that this last mentioned past participle is irregular in other respects. There are doubtless many irregular past participles as in other cognate languages. Colonel Biddulph mentions only one, $g\bar{o}$, gone. I have collected the

following small list in the course of my limited reading:-

Infinitive.	Past Participle.
béioki, to sit. boiki, to become.	béitō. bū.
bojoiki, to go. dijoiki, to fall. miroiki, to die.	gō, gaō. ditō. mū, (mūé, they died).
naiyoiki, to lose. pāréjoiki, to hear. woyoiki, to come.	nát. pārudū. ālō or wátó (Imperative wá, é; wám, I shall come).

Besides these, $j\bar{\imath}n\bar{o}$, alive; laik, found; and dhog, joined, are probably past participles of verbs the infinitives of which are unknown to me. In the above list I have included both transitive and intransitive verbs for the sake of completeness.

The Gerund is the shortest form of the past participle, governed by the postposition ajé, on.

The Noun of Agency is formed by adding k to the infinitive. In talab ginoiki shadar, a servant who receives wages,

The Conjunctive participle is formed by adding ℓ to the root. When a root ends in a vowel contractions occur. The following are further examples of this participle:— $b\ell$, having become; $ar\ell$, having brought; $k\ell$, having come; $pach\ell$, having seen; pi, having drunk; $r\ell$, having spoken; $gy\ell$, having gone; $b\ell i$, having sat; $k\ell$, having eaten. Most of these are given on the authority of Dr. Leitner. There is not a single instance of this participle in the specimen, and it does not play anything like the important $r\ell l\ell$ that it does in India proper.

Imperative. <u>shidé</u>, strike thou; <u>shidy</u>á, strike ye. Other examples are bō, go; ká, eat; bé, sit; wá, é, come; miri, die; dé, give; tihré, walk; thé, do. The following imperatives in the father's order to his servants in the specimen are all plurals, but they are singular in form:—

walé, bring; baneré, put on; dé, give; teré, make.

Possibly the termination ré of baneré and teré indicates the plural.

Present-Future.

This tense was originally the present, but is now generally used in a future sense. It does not change for gender either in the singular or in the plural.

I strike, I shall strike, etc.

SING.	Plur.
1. másé shidam	bésé <u>s</u> hidōn, <u>s</u> hidūn
2. tūsé shidé	<u>ts</u> osé <u>s</u> hidyāt
3. rösé (fem. résé) shidei	résé <u>s</u> hidén

The examples of this tense occurring in the Specimen are hun-bom, I will become arisen; bojam, I will go; ram, I will say; būn (plural for singular), I am (not fit); shuriār tham (often written them), I shall (i.e. may) make merry (with my friends); tū-jō phatū woyei, he comes behind you; kachāk mát wán, what things come to me.

The Present Definite is formed by suffixing the present tense of the verb substantive to the Present-Future. As stated above, the initial h of the auxiliary verb is generally

dropped, and when there are concurrent vowels at the junction of the two members of the compound, the vowels are lengthened or contracted into one. Thus, $\underline{shid\acute{e}}$ -han \bar{o} becomes first, $\underline{shid\acute{e}}$ -an \bar{o} , and then $\underline{shid\acute{e}}$ n \bar{o} . Again $\underline{shid\acute{e}}$ -han \bar{u} becomes $\underline{shid\acute{e}}$ ian \bar{u} . Moreover, in this tense, the first person singular is irregular, the n of the auxiliary being changed to m. We thus find that this tense is conjugated as follows:—

I am striking, etc.

Sing.		Plue.
Masc.	Fem.	Com. Gen.
1. másé shidamus	másé shidémis	bésé <u>s</u> hidōnas
2. tūsé <u>s</u> hidēnō	tūsé <u>s</u> hidéné	<u>ts</u> osé <u>s</u> hidéyānat
3. rösé <u>sh</u> ideiānū	résé <u>s</u> hideiānī	résé <u>sl</u> idénén

The following examples of this tense occur in the Specimen:— $t\bar{o}nas$, we are making; $b\bar{o}nas$, we are becoming. In $b\acute{e}i$ -han \bar{o} (List, 233), he is sitting, he dwells, the initial h of the auxiliary has not been dropped. In $buskiy\bar{a}n$, it (fem.) is to spare, the final $\bar{\imath}$ has been dropped.

The *Imperfect* is formed by suffixing the shorter form of the past tense of the auxiliary verb to the present-future. The following is its conjugation:—

I was striking, etc.

Sing.		PLUE.
Masc.	Fem.	Com. Gen.
1. másé shidamasus	másé <u>s</u> hidam	bésé <u>s</u> hidōnasus
2. tūsé shidéasō	tūsé <u>s</u> hidéasé	<u>ts</u> osé <u>s</u> hidéyasat
3. rösé shideiasū, -asō	résé <u>s</u> hideiasī	résé <u>s</u> hidénasé

The only example of this tense in the Specimen is the somewhat irregular $k\bar{a}s\bar{o}$ for $keias\bar{o}$, he was eating (the husks which the swine were eating).

The third person of the past tense is the past participle itself, changed for gender or number. The first and second persons take pronominal suffixes. The following is therefore an example of its conjugation:—

I struck, etc.

S	Ing.	Phur.
Masc.	Fem.	Com. Gen.
1. másé <u>sh</u> idē g as	másé <u>s</u> hidēgis	bésé shidēgés
2. tūsé shidēga	tūsé <u>s</u> hidēgé	tsosé shidēgét
3. rösé <u>s</u> hidēgā, -gō	résé <u>sh</u> idēgī	résé shidēge

The following examples of the past tense of transitive verbs occur in the List and Specimens:—

tēgas, I did (thy commands) (toiki); farēgas, I turned away (my face) (faroiki).

dēga, thou gavest (a feast) (doiki).

rēgō, he said (reoiki); bāgēgō, he divided (bāgoiki); jamā-tēgō, he collected (toiki); ehtiār-tēgō, he took (his journey); karach-tēgō, he spent; chanēgō, he sent (chanoiki); khiāl-tēgō, he wished; dēgō, he gave (doiki); pachēgō, he saw (pachoiki); tēgō, he did (toiki); hō-thēgō, he called (toiki); kojēgō, he asked (kojoiki).

tēgé, they made (rejoicing) (toiki).

Irregular is $p\bar{a}rud\bar{u}$, he heard $(p\bar{a}r\acute{e}joiki)$, which is treated like an intransitive verb. Note that the verb toiki, to do, is sometimes spelt $\underline{th}oiki$.

The *Perfect* tense is formed by suffixing the present tense of the verb substantive to the past participle. Thus:—

I have struck, etc.

· ·	Sing.		Plur.
	Masc.	Fem.	Com. Gen.
	1. másé shidēgānus	másé <u>s</u> hidēginis	bésé <u>s</u> hidēgenas
	2. tūsé shidēgānō	tūsé shidēginé	<u>ts</u> osé <u>s</u> hidēgenat
	3. rösé <u>sh</u> idēgānō, -nū	résé <u>s</u> hidēginī	résé <u>s</u> hidēgené

The third person singular frequently appears in a contracted form. Thus, <u>shidēgun</u>, for <u>shidēgānā</u>. Examples of this tense of transitive verbs occurring in the List and Specimen are:— $d\bar{e}g\bar{a}nus$, I have given (doiki) (List No. 228); $t\bar{e}g\bar{a}nus$, I have done; $d\bar{e}g\bar{a}n\bar{o}$, thou hast given (not a kid); $t\bar{e}gun$, (thy father) has made (a feast) (toiki); $fan\bar{a}-t\bar{e}gun$, he has wasted.

The *Pluperfect* is formed by suffixing the past tense of the verb substantive to the past participle. Thus:—

I had struck, etc.

	PLUR.	
Masc.	Fem.	Com. Gen.
1. másé shidēgāsus	másé <u>s</u> hidēgisis	bésé <u>s</u> hidēgesas
2. tūsé shidēgāsõ	tūsé <u>s</u> hidēgisé	<u>ts</u> osé s <u>h</u> idegesat
3. rösé shidégāsō, -sū	résé <u>s</u> hidēgisī	résé <u>s</u> hidēgesé

No example of this tense occurs in the Specimen.

After allowing for the different formation of the past participle, the conjugation of an intransitive verb does not differ from that of a transitive one. It must, however, be remembered that the subject is put in the nominative, and not in the Agent case. It

will suffice to give briefly the conjugation of the irregular verb bojoiki, to go. This tense is irregular in the formation of its past participle. In other respects it presents nothing abnormal.

Infinitive,—bojoiki, to go. Other examples will be found under the transitive verb.

Present Participle,—(?) $boj\acute{e}t\bar{o}$, fem. $-t\bar{\imath}$, going. See remarks under the transitive verb.

Past Participle,— $g\bar{o}$, $ga\bar{o}$, gone. See remarks under transitive verbs. Other examples are $b\acute{e}it\bar{o}$, seated; $b\bar{u}$, become; $dit\bar{o}$, fallen; $m\bar{u}$, dead; $w\acute{a}t\bar{o}$ or $w\acute{a}t\bar{u}$, come.

Conjunctive Participle,—(?) bojé, having gone.

Gerund,—(?) $bojoj\acute{e}$, on going.

Noun of agency, -bojoikik, one who goes.

Present-Future. I go, I shall go.

Sing.	PLUE.	
1. má bojam	béh bojōn	
2. tū bojé	<u>ts</u> oh bojyāt	
3. rō (fem. réh) bojei	réh bojén	

So $w\acute{a}m$, I come or shall come; woyei, he comes or will come; $w\acute{a}n$, they come or will come.

Present Definite,-ma bojamus, I am going, and so on.

Imperfect,-ma bojamasus, I was going, and so on.

Past.

I went, etc.

Sin	g.	PLUE.
Masc.	Fem.	Com. Gen.
1. má gās	má gis	béh gés
2. tū gā	$tar u$ $gcute{e}$	tsoh gét
3. rō gaō, gō	réh gĩ	réh gé

The following examples of this tense occur in the Specimens:— $w\acute{a}t\bar{o}$ or $w\acute{a}t\bar{u}$, he came; $ga\bar{o}$, he went; $dit\bar{o}$, he fell.

Perfect,—má gānus, I have gone, and so on. Other examples:—
pinēgun, he is seated (on a horse) (List No. 230); wátuz, (thy brother) has come.

Pluperfect,-má gāsus, I had gone.

Passive Voice-Causal Voice.

By adding \acute{ar} to the root, we make it either Causal or Passive. Thus, $\underline{shidoiki}$, to strike; $\underline{shid\acute{a}roiki}$, to cause to strike, or to be struck. In the present definite and imperfect, $\bar{i}j$ is substituted for \acute{ar} , but not, apparently, in the present-future. According to Colonel Biddulph, the past participle is formed with $g\bar{o}$, so that the verb is apparently conjugated transitively. I have no means of checking this statement. It is possible that when the root has a causal meaning it is conjugated transitively, and when it has a passive meaning, intransitively.

The following are the principal tenses, as given by Colonel Biddulph. He does not give the personal pronouns, so that I cannot say whether the subject is put into the agent case or not:—

Present-Future,—shidáram, I am being struck, or will be struck.

Present Definite,—<u>sh</u>idījamus, I am being struck.

Imperfect,—shidijamasus, I was being struck.

Past,—shidárēgas, I was struck.

Perfect, - shidárēgānus, I have been struck.

Pluperfect,—shidárēgāsus, I had been struck.

V.—INDECLINABLES.

The negative is ne, not, as in ne $d\bar{e}g\bar{o}$, he did not give. $Ni\tilde{a}$ is 'no.' The copulative conjunction is either neh, and, or $g\acute{a}$, and, also, even. The latter is an enclitic, as in $bachoiki-g\acute{a}$ natedoiki, singing and dancing.

As an additional specimen of the Gilgit dialect, I give another rendering of the Parable of the Prodigal Son by Khan Sahib Abdul Hakim Khan, which I owe to the kindness of the late Sir Harold Deane, K.C.S.I. This version was not made in Gilgit, but in Chitral where the Khan Sahib was then stationed. The language of Chitral is, of course, Khō-wār, not Shinā, but Gilgit people come there, and no difficulties were found in making the translation.

I give this version in order that it may be used as a check upon the preceding one. It is needless to say that it does not possess the authority of a specimen prepared in Gilgit itself, but it has, nevertheless, a value of its own. Khan Sahib Abdul Hakim Khan has had so much experience in preparing specimens of languages of the country on the north-western frontier of India, and has shown so much skill in doing so, that we may be confident that the specimen which he has now provided accurately represents the words of the man who was the source of his translation. Shinā is an unwritten language, and the version now given was evidently made quite independently of Colonel Biddulph's Grammar and Vocabulary. In spite of numerous divergencies of spellings, such as mushāi for mushei or mushé, dāri for dāré, rēigu for rēgū, and so on, the language is substantially identical with that described by Colonel Biddulph, and is a remarkable testimony to the accuracy of that distinguished officer's work.

I do not propose to alter Khan Sahib Abdul Hakim Khan's spelling so to make it agree with that of the preceding Specimen. The variations of spelling add to the value of what he has written, and allow comparisons to be made, which will enable the student to grasp more accurately the rather fluctuating sounds of this language.

It will suffice to draw attention to a few forms which are not provided for in the preceding grammatical sketch. Towards the end of the Specimen we have $han\bar{o}k$ for $han\bar{o}$, it is. In the phrase nato-su, was lost, the a of $as\bar{u}$, he was, has been dropped.

Note the use of a cerebral t in the dative postposition te and elsewhere.

The suffix k added to form an indefinite article, is common. Thus, $k\bar{u}yeke$ -te, to a country; $watand\bar{u}reke$ - $s\bar{u}ti$, with a native.

The use of the conjunctive participle is as common as it is rare in the preceding Specimen.

Note the frequent occurrence of the locative of the infinitive, used as a kind of gerund. Thus, $way \bar{o}ke - r\bar{u}$, on coming.

Tushomish, I would have become satisfied; dēnas, he would give; and one or two others are forms not provided for in the Grammar.

ASTORT.

No specimens have been received of the Shinā of Astor. According to Drew, the Shinā of Astor is the same as the Brōkpā of Dras, of which a full account is given on pages 186ff. It is described in Dr. Leitner's Dardistan, and closely resembles the Shinā of Gilgit, but in some respects follows Gurēzī. Thus the pronouns of the first person is $m\bar{o}$, not $m\acute{a}$, and that of the third person is $\underline{z}h\bar{o}$, instead of $r\bar{o}$. In the conjugation of verbs the infinitive ends in $n\bar{o}$ instead of ki (compare Gurēzī on and the Dras $n\bar{o}$). The present tense of the verb substantive is contracted, as in Gurēzī and Dras, thus $m\bar{o}$ $h\bar{a}os$, I am. In other respects the conjugation of the verb is practically the same as that of the Shinā of Gilgit, allowance being made for minor variations of spelling and pronunciation.

CHILĀSĪ.

The Shinā of Chilās closely resembles the dialect of Astor, and no separate specimens are necessary. I devote a column to it in the List of Words which will show that the only variations are minor differences of pronunciation, and the preference for the cerebral letters t and d. The latter is hardly a local peculiarity; everywhere in the Shinā area these dotted letters are occasionally met with and are due to the use of the Paṣḥtō-Persian alphabet for recording the sounds. The truth probably is that in Shinā the t and d are pronounced somewhat as in English, neither cerebrals nor dentals but something between both, and are shown as one or other according to the personal equation of the writer. In no other way can I account for these varieties of spelling, and the question is one which can only be settled on the spot by a trained ear. It must therefore remain over for future decision.

GURĒZĪ.

The valley known in English as Gurais and in Persian as Gurēz, is called by its inhabitants Gorāī. It is about five miles long by half a mile broad, and contains some six villages with a total population of perhaps 1,500 or 2,000 souls. The people call themselves Dārds,¹ the principal inhabitants being Lun by tribe.² Their language is a dialect of Shinā, and is said to be most closely connected with those spoken in Chilās, Kanē, and Dras. Although Gorāī is within thirty miles of the Kashmir Valley, with which it communicates by the Rāzdiangan Pass, 11,800 feet above the sea, the dialect is quite different from Kāshmīrī,—so different that an inhabitant of Gorāī and a Kāshmīrī, each speaking only his own mother tongue, would be quite unintelligible to each other.³ It is very much simpler than Kāshmīrī, having far fewer inflections, and is even simpler than Pañjābī or Urdū, which it resembles in structure and syntax, though the vocabulary and inflections are almost entirely different.

The dialect frequently employs the sound of the sibilant in the word 'pleasure,' *i.e.* the French j, which is transcribed \underline{zh} in the system of transliteration adopted for this Survey. We also meet the half-pronounced u and i at the end of a word which are so common in Kāshmīrī, and which are also found in some of the languages of Eastern Hindustan. These are represented by small letters above the line; thus, $\bar{a}l^u$, came; $d\bar{o}n^u$, a bullock; $\bar{a}\underline{ship}^i$, horses.

AUTHORITY-

The only work which gives any account at all of the dialect of Gurēz is Dr. Leitner's Language and Races of Dardistan, Labore, 1877, which contains a few dialogues in Gurēzī (p. 41). These have been reprinted in the same author's Hunza and Nagyr Handbook, Calcutta, 1889.

The information hitherto available regarding this interesting dialect being so scanty, I have the greater pleasure in being able to give here the following notes on the Grammar of the language, for which I am indebted to the kindness of Sir James Wilson, K.C.S.I. I am also indebted to the same gentleman for much of the information contained in the preceding remarks, and for the translation of the Parable of the Prodigal Son, which is annexed. He wishes it to be understood that the notes are rough ones, and do not pretend to be either complete or very accurate.

The following are the principal points in which Gurezī, as exhibited by Sir James Wilson, differs from Gilgit Shinā:—

Pronunciation.—The letters r and j of Gilgit often become \underline{zh} . Thus we have $\underline{zh}o$ instead of $r\bar{o}$, he, and $ma\underline{zh}a$ instead of $maj\bar{a}$, among.

Nouns.—The Nominative plural ends in \bar{e} or i. Puch, a son, makes its plural $p\bar{e}$, and sass, a sister, makes its plural $saz\bar{a}r$ (compare Gilgit $d\bar{i}$, a daughter, plural $d\bar{i}j\bar{a}r\dot{e}$).

Few nouns seem to change for the oblique form. $Mush\bar{a}$, a man, drops the final \bar{a} in the agent and genitive singular, but retains it in the dative, and sass, a sister,

¹ So spelt by Drew. Sir James Wilson spells the word Dărd.

This tribe is not mentioned by Drew. I am indebted to Sir James Wilson for the information.

The relationship between Shinā and Kāshmīrī is dealt with elsewhere. Suffice it to say that there is a stock of vocables which are common to the two languages, and which are not met in any language of India proper.

changes to saz in all cases of the singular. In the plural all nouns take $\bar{o}n$ in the dative case before the final t.

The case suffixes are very loosely employed. The only ones which have any fixity are those of the dative, which is t, or, with a junction vowel, at, it, or ut, and that of the locative, which is $i\underline{z}\underline{h}$ ($a\underline{z}\underline{h}$). The junction vowel is probably the remains of an oblique termination.

For the other cases we have:—

Agent.—se, si, is, s; $e\tilde{i}$; \tilde{o} .

Abl.— \tilde{o} , lo.

Gen.— \tilde{o} .

Loc.— $i\underline{zh}$ (=Gilgit $r\bar{o}$. Compare Gilgit $r\bar{o}$, Gurēzī $\underline{zh}o$, he).

It will be seen from the above that \tilde{o} can be used for the Agent, the Ablative, or the Genitive.

In adjectives, the termination u corresponds to the Gilgit \tilde{o} .

Pronouns.—Comparing the pronouns of the first person we have:—

	SINGUL	AR.	Plue	AL.
	Gilgit.	Gurêzī.	Gilgit.	Gurēzī.
A	Nom. má	mo	béh	be
	Ag. másé	me $\tilde{\imath}$	bésé	asei <u>zh</u>
	Gen. mei	$mi\widetilde{o}$	asei	$as\widetilde{o}$
	Dat. máté	mote	asōté	as on te

With the Gurēzī $mi\tilde{o}$, my, and $as\tilde{o}$, our, we can compare the Kāshmīrī $my\delta n^u$ and $s\delta n^u$.

The pronoun of the second person is built on the same principle. It exhibits the same fluctuation between t and t as in Gilgit. In the plural it has a separate form for the feminine.

The pronoun of the third person \underline{zho} corresponds to the Gilgit $r\bar{o}$.

Verb Substantive.—The present is built on the form $h\tilde{o}s$, instead of hanus, I am. The past closely follows the longer form of the Gilgit dialect. There is a future, $\bar{a}s$, he will be (compare Pashai $h\bar{a}s$, he is), and a negative form, $n\bar{s}sh$, he is not.

Active Verb.—This closely follows the Gilgit conjugation. Transitive verbs do not always take the subject in the agent case. Sometimes the nominative is used. The past participle of transitive verbs does not appear to take $g\bar{o}$. The only doubtful case is the word razhau (Gilgit $r\bar{e}g\bar{o}$), he said, in which the zh may be a corruption of g.

On the whole Gurēzī does not differ in its essence from Gilgit Shiṇā. Most of the variations can be explained as corruptions of Gilgit forms. The change of r to \underline{zh} will be understood when we remember that in Gilgit Shiṇā itself jr and \underline{zh} , and tr and ch, are in each case mutually convertible. Any real changes can be explained by the influence of the neighbouring Kāshmīrī.

With these preliminary remarks I here give Sir James Wilson's grammatical sketch and specimen.

PRONUNCIATION.

A final u is sometimes distinctly pronounced, is sometimes hardly audible, and is sometimes not heard at all. So also a final i. Thus, butu, butu, or but, all (masc. sing.); $\bar{a}\underline{shipi}$ or $\bar{a}\underline{ship}$, horses (masc. pl.). In the following pages " and ' are generally written, but all three pronunciations are to be understood as thereby implied.

- \tilde{a} as the a in hat.
- \hat{a} as the a in all.
- \bar{a} as the a in father.
- \check{e} as the e in met, h_{en} .
- as the same sound lengthened, the e in there, as pronounced in the north of England and in Scotland.
- is the ordinary long \bar{e} , pronounced like the a in mate. is the short sound of the foregoing, pronounced something like the é in the French word était.
- is the second o in promote.
- is the short sound of the preceding. It is the first o in promote, and is the o in the French word votre, as distinguished from votre.
- is the o in hot.
- as in German.

The ligatured letters, \underline{sh} , \underline{sh} , \underline{sh} , \underline{sh} , and \underline{gh} , represent $\hat{\omega}$, \hat{j} , \hat{c} , and \hat{c} respectively. When not ligatured, kh and gh represent the well-known Deva-nagari letters. mark ~ over a vowel nasalizes it.

ARTICLE.

The definite article "the" is not expressed, but the indefinite article "a" is generally expressed by adding ek, ik, or ak to the noun, e.g., $g\bar{a}v\cdot ik$, a cow.

	Masc. No	UNS.

VERBS.

Auxiliary Verb.

· Present—I am.

		Si	ng.		T)	
1. 2.	mo tu	$egin{array}{c} M. \ h \widetilde{o}s \end{array}$	F. has	be	Plur. M. h ã s	F. häs.
3.	<u>zh</u> o	hõ	hai hĩ	<u>ts</u> õ <u>zñ</u> e	hãnt hã	hant. ha.
		Sin	PAST—I was. g. F.		Plur. M. and F.	
	1. 2. 3.	asulus asulo	asilis asile		asilis.	
	υ,	asul	asil		uail.	

FUTURE-I shall be.

	Sing.	Plur.
1.	$ ilde{a}$ s- im	$ar{a}$ s-on.
2.	$ar{a}s extbf{-}e$	as-at.
3.	$ar{as}$.	$\bar{a}s$ - in .

Negative Verb.

I am not.

	Sing.	Plur.
1.	$n i\underline{sh}$ - is	nī <u>sh</u> -is.
2.	$n\bar{\imath}\underline{sh}$ - e	$n\bar{\imath} \underline{sh} \cdot it.$
3.	$nar{\imath} \underline{sh}$	nīsh.

Active Verb.

IMPERATIVE.

The 2nd singular imperative is the root of the verb; e.g. $b\check{o}h$, go; $tiki\ kha$, eat bread; $v\check{o}i\ p\bar{\imath}h$, drink water. The 2nd person plural is formed by adding \bar{a} to the root; e.g. $v\bar{o}\bar{\imath}$ $p\bar{\imath}a$, drink water; $khali\bar{a}$, get out.

FUTURE—I shall speak.

	Sing.	Plur.
1.	mose rāz-im	bese rāz-ōn.
2.	$tuse \ rar{a}z$ - e	<u>ts</u> õse rāz-at.
3.	$\underline{zh}use\ rar{a}z ext{-}e$	zhese rāz-in.

PAST-I did.

	Sing.	Plur.
1.	$me \widetilde{\imath} \; \underline{th} ar{a}s$	bĕsi <u>th</u> ī-is.
2.	$th\widetilde{o}$ $th\bar{a}$	$\underline{ts}\widetilde{o}si\ \underline{th}\overline{\imath} ext{-}it.$
3.	z h $\check{e}se\widetilde{\imath}\;thar{a}u$	zhenijh thī-e.

Note.—The past tense of a transitive verb may be used either with the nominative or agent case of the subject, and in either case agrees with it in person. The forms given for the pronouns of the 1st and 2nd persons plural, are apparently variants from those given above.

PAST-I came.

	Sing.	Plur.
1.	mo āl-us	be āl-is.
2.	tu āl-o	tsõ āl-it.
3.	$\underline{zho} \ \bar{a} l^u$	<u>zh</u> e āl-e.

PAST-I went.

	Sing.		*	Plur.
- 1.	mo gās			be gē∙us.
2.	$tu g \bar{a}$			tyō gē-it.
3.	zho gau	. '		<u>zi</u> ≀e gē.

PRESENT TENSE.

The present tense is formed by adding the present tense of the auxiliary verb to the future, e.g.—

PRESENT-I am doing.

Sing.	Plur.
1. mose thim hos	bese thōn h $\widetilde{lpha}s$.
2. $tuse \underline{th}\bar{e} \ h\tilde{o}$	$\underline{ts}\widetilde{o}se\ \underline{th}iar{a}t\ har{a}nt.$
3. zhuse <u>th</u> ēī hõ	$\underline{zh}ese$ $\underline{th}ar{e}in$ $m{h}\widetilde{lpha}.$

List of Verbs.

Root.	Meaning.	Infinitive.	Pres. Part.	3rd Sing. Past.	3rd Sing. Fut.
$\underline{th}\check{e}$	do, make.	<u>th</u> iōn	$\underline{th}eih\widetilde{u}$	<u>th</u> āu	$\underline{th}ar{e}ar{\imath}.$
ĕh	come.	$ar{o} \dot{n}$	$eih\widetilde{u}$	$ar{lpha}l^u$	$ar{e}ar{\imath}.$
$b\check{o}h$	go.	$bojhar{o}n$	$bar{o}jh\widetilde{u}$	$g ilde{a} ilde{u}$	bō <u>zh</u> .
khă	eat.	$kh\bar{o}n$	$khar{a}h\widetilde{u}$	$khiar{a}u$	$khar{a}$.
$s\check{o}h$	sleep.	sõņ	$seih\widetilde{u}$	$s_{\ell\ell}tt^u$	$s ilde{e}i.$
bĕih	sit.	b ĕōņ	$b\check{e}h\widetilde{u}$	$b\check{e}ht^u$	bĕe.
$p\bar{\imath}h$	drink.	$par{\imath}ar{o}n$	$par{\imath}h\widetilde{u}$	$piar{a}u$	$p\overline{\imath}e.$
$\overline{\mathit{ivali}}$	fall.	$waliar{o}n$	$waleih\widetilde{u}$	valau	wale i.
chōk bŏh	get up.	$char{o}kbar{o}n$	c hōk $beih\widetilde{u}$	$ch\bar{o}kbil^u$	$ch\"okubei.$
bei	become.	$beihar{o}n$	$beih\widetilde{u}$	$\mathcal{b}il^u$	bei.
$\underline{sh}ilar{a}$	be ill.	<u>sh</u> iliōṇ	$\underline{sh}ilar{a}h\widetilde{u}$	$\underline{sh}ilar{a}l$	$\underline{sh}ilar{a}.$
uni (?)	be hungry.	un z āil ō ņ	unzā $ilh\widetilde{\overline{u}}$	$uny\bar{a}il$	
yās	go on.			ŧ	*
hun böh	get up.				
de	give.	$dear{o}n$	$deih\widetilde{u}$	$d ilde{a}u$	$de\bar{\imath}.$

A question is signified by adding $d\bar{a}$ to the verb, e.g.—

tu $\bar{a}n$ $h\tilde{o}$ $d\bar{a}$?Art thou here? $\underline{ts}\tilde{o}$ $\bar{a}n\bar{e}hi$ $h\bar{a}nt$ $d\bar{a}$?Are you just here?

The 1st person plural is not used for the 1st person singular, as in Urdū, nor is the 2nd person plural used for the 2nd person singular as in English.

The present tense of the auxiliary verb has different forms for the masculine and feminine, e.g. $h\tilde{o}$, he is; $h\tilde{i}$, she is.

EXAMPLES.

thố gōsh kôn hố ?			* =	Where is thy house?	ě
thổ nỗm zhōg hố?	. 5			What is thy name?	
miố nỗm Gafār hố		•		My name is Gafār.	
meĩ gão pa <u>sh</u> ãs hữs	•	,		 I have seen the cow.

BROKPA OF DRAS.

According to Drew, the Brökpā of Dras is the same as the Shina of Astor. Specimens of true Astor Shinā have not been received, but I am indebted to the kindness of Mr. R. T. Clarke, I.C.S., for the following Specimens of Dras Brökpā. They were obtained with considerable difficulty, and allowance must be made for this fact in considering the inconsistencies which appear here and there.

Dras and Astor are much nearer to Kashmir than is Gilgit, and hence the Brōkpā is now and then mixed with Kāshmīrī idioms. Curiously enough, in the conjugation of the verb substantive it seems to have been influenced by the Burushaskī of Hunza-Nagar which lie far to the north beyond Gilgit. It looks as if the inhospitable highlands in which Brōkpā is now spoken were once inhabited by speakers of Burushaskī.

We are fortunate in having ready to our hand a short grammar and vocabulary of Dras Brökpā on pp. 40 and following of Shaw's article on Stray Arians in Tibet quoted in the list of authorities on Shinā. The following account of the grammar is based partly on this article and partly on the Specimens and List of Words and Sentences given by Mr. Clarke.

I.—PRONUNCIATION.—As compared with the Shinā of Gilgit, the Brōkpā of Dras shows considerable divergencies of pronunciation. We may note the following points.

As in Gilgit, the vowels \bar{o} and \bar{u} are practically interchangeable. A good example is $bask\bar{o}ch\bar{o}k$ or $bask\bar{o}ch\bar{u}k$, a servant.

Vowels are frequently nasalised for no apparent reason. We may note in this connection that past participles end in \bar{o} or au, and that the au is constantly nasalised. Thus, we have both dau and $da\tilde{u}$, he gave. It is possible that, in this case, the nasalisation is a relic of an old neuter gender.

We have noticed that in Gilgit Shinā \underline{zh} and jr are interchangeable. It is probable that this distinction of spelling indicates a slightly different pronunciation. If that is the case the inconsistencies of spelling observed in the Specimens indicate that the two sounds are liable to be confused. In Dras Brökpā, there is a similar pair of sounds, which I represent by \underline{zh} and $\underline{zh}r$, respectively. Shaw describes the latter sound as follows. It is 'intermediate between an r and a French j or the z in "azure"; that is, the r is not clearly trilled but slurred over; while the tongue is almost in the position for an r a stream of air is passed, without vibration of the tip, between it and the palate. Thus in the word potzhro, grandson, the sound is intermediate between potro and potjo (as in English we may sometimes hear people pronounce the word "trill" almost like "chill").' As in Gilgit Shinā, these two sounds are commonly interchanged in the Specimens and List. Often both spellings of the same word are found almost side by side.

Very similarly, as in Gilgit ch and tr are interchangeable, in Dras Brökpā there is a pair which I transliterate ch and $t\underline{sh}r$, respectively. Again, these two are often confounded, and, moreover, tr often appears in the place of $t\underline{sh}r$.

K often appears instead of g. Thus, $g\bar{a}$, and, also, becomes ka in $d\ddot{u}$ -bio $k\bar{a}$ $d\bar{a}i$, two twenties and ten, fifty, but is preserved in $m\bar{o}r\bar{e}$ - $g\bar{a}$, to me also. So we have $k\bar{u}\bar{\imath}$, a country, as compared with Gilgit gui. Again, we have $\underline{z}h\bar{o}k$ or $\underline{z}h\bar{o}g$ (Gilgit $j\acute{e}k$), what?

Ch is optionally interchanged with \underline{sh} , as in puch or $pu\underline{sh}$, a son; $pa\underline{sh}au$ (Gilgit $pach\bar{e}g\bar{o}$), he saw. In $\underline{ts}hil\bar{e}$ (Gilgit $ch\bar{\imath}l\dot{e}$), clothes, it has become $\underline{ts}h$; similarly Gilgit chai becomes $\underline{ts}ha\bar{\imath}$ or $ch\bar{e}\bar{\imath}$, a woman.

 \underline{Ts} becomes chh in $chh\bar{o}$ or $\underline{ts}\bar{o}$ (Gilgit $\underline{ts}oh$), you...

Gilgit chh becomes $\underline{ts}h$ in $a\underline{ts}h\overline{\imath}$ (G. $achh\overline{\imath}$), an eye.

The letter \underline{zh} is very common. It is not only often used instead of $\underline{zh}r$, but it also represents a Gilgit j in $a\underline{zh}\bar{a}$ (G. $aj\acute{a}h$), up; $\underline{zh}\bar{o}k$ (G. $j\acute{e}k$), what? and $\underline{zh}ab$ (G. $j\bar{a}b$), property. It represents a Gilgit s in $d\bar{e}\underline{zh}\bar{\imath}$ (G. $d\bar{e}s\bar{\imath}$), days. It sometimes represents a Gilgit r, as in $\underline{zh}\bar{o}$, he.

Aspirated consonants are more common than in Gilgit. Thus we have both $kh\bar{a}$ and $k\bar{a}$ (Gilgit $k\dot{a}$), eat. Note the form $uthil\bar{o}$, not $uthil\bar{o}$, he arose. The spelling with a dental th also occurs in the corresponding Kāshmīrī root $w\check{o}th$.

II.—NOUNS.—Gender.—There are several instances of the feminine. We may quote $d\bar{e}r$, the belly; \underline{zhush} , anger; $\underline{sh}\bar{u}r\bar{a}$, rejoicing; $tik\bar{\imath}$, a loaf (2nd Specimen). As pointed out above, the nasalised participles in $a\tilde{u}$ may possibly be remains of an old neuter gender.

Number.—The singular number is emphasised by adding ek, one, to the end of a word. In such cases the e is elided after a vowel, and the remaining k may be taken as the equivalent of the indefinite article. Thus, $bask\bar{o}ch\bar{o}-k$, a servant; $ang\bar{e}lu-k$, a ring; $\bar{e}sh\bar{a}-k$ or $\bar{e}chh\bar{a}-k$, a day, one day.

The plural ends in \bar{e} or $\bar{\imath}$. I have not discovered any rule as to which is to be employed. The following examples of plurals occur in the List and Specimens. We do not know the singular forms in all cases. $D\bar{\imath}\underline{z}h\bar{a}r\bar{e}$ (sing. $d\bar{\imath}$), daughters; $\underline{z}hak\bar{o}r\bar{e}$, men; $d\bar{o}n\bar{e}$ (sing. $d\bar{o}n\bar{o}$), bulls; $g\bar{a}v\bar{e}$ (sing. $g\bar{a}\bar{o}$), cows; $chhur\bar{e}$ (sing. $chhur\bar{e}$), deer; $b\bar{o}\underline{s}h\bar{e}$, kisses; $\underline{t}\underline{s}hil\bar{e}$, clothes; $krum\bar{e}$, works; $\tilde{a}\underline{s}hp\bar{\imath}$ (sing. $\tilde{a}\underline{s}hp$), horses; $\underline{s}h\tilde{u}\bar{\imath}$ (sing. $\underline{s}h\tilde{u}$), dogs; $\underline{s}hun\bar{\imath}$, swine; $bask\bar{o}ch\bar{\imath}$ (sing. $bask\bar{o}ch\bar{o}$), servants; $paiz\bar{a}r\bar{\imath}$, shoes. As regards $\underline{z}hak\bar{o}r\bar{e}$, it looks as if this word (List No. 124) is really a dative plural, which is erroneously shown as a nominative. The List also shows $b\bar{a}b\bar{o}$, a father, as making its nominative plural $b\bar{a}ba\bar{\imath}$ or $b\bar{a}b\bar{e}l\bar{a}$. If these forms are correct, $b\bar{a}ba\bar{\imath}$ is probably another way of spelling $b\bar{a}b\bar{e}$. The other I am unable to explain. It looks like a Pashai, not a Shinā, form.

Case.—The Brökpā of Dras has two forms of the Agent case, one ending in $s\bar{a}$ or $s\bar{e}$, which I call Agent I, and another ending in the singular in various vowels, generally \bar{i} , and in the plural in $\underline{zh}\bar{a}$ or $\underline{zh}\bar{e}$. The latter I call Agent II. Agent I is used for the subject of a transitive verb in all tenses except the past. Agent II is used for the subject of a transitive verb in the past tense. The terminations $s\bar{a}$ and $\underline{zh}\bar{a}$ are those given by Shaw. The Specimens and List have regularly $s\bar{e}$. They have both $\underline{zh}\bar{a}$ and $\underline{zh}\bar{e}$ for the Agent II.

Loc.

The following paradigms of declension are based on those given by Shaw: -

$E_{\underline{sh}}$ or $e_{\underline{zh}}$, a ewe.

	rez_{ii} , a ewe.	
Nom. Agent I. Agent II. Acc. Dat. Abl. Gen. Loc.	Singular. $e\underline{sh}$ or $e\underline{zh}$ $e\underline{sh}$ - $s\bar{a}$ (- $s\bar{e}$) $e\underline{zh}u$ $e\underline{zh}u$ $e\underline{zh}u$ - $r\bar{e}$ $e\underline{zh}u$ - $e\underline{zh}\bar{e}$ $e\underline{zh}u$ - $e\underline{zh}\bar{e}$	Plural. $e\underline{zh}\bar{e}$. $e\underline{zh}\bar{e}$ - $s\bar{a}$ (- $s\bar{e}$). $e\underline{zh}\bar{e}$ - $z\underline{h}\bar{a}$ (- $z\underline{h}\bar{e}$). $e\underline{zh}\bar{o}$. $e\underline{zh}\bar{o}$ - $r\bar{e}$. $e\underline{zh}\bar{e}$ - $z\underline{h}\bar{o}$. $e\underline{zh}\bar{e}$ - $z\underline{h}\bar{o}$. $e\underline{zh}\bar{e}$ - $z\underline{h}\bar{o}$.

The above declensions are not quite identical with those given by Mr. Shaw, as I have made a few alterations on the strength of the language of the Specimens. On the other hand they do not, as will be seen from the following remarks, altogether agree with the Specimens. I shall now discuss each case separately.

Agent I.—With pronouns the termination $s\bar{e}$ is almost the only one used in the Specimens. There is only one occurrence of a noun in this case. Here the termination is $s\bar{u}$, not $s\bar{e}$, and $s\bar{u}$ also occurs once as the termination of the Agent I of a pronoun. The two examples are $m\bar{a}l\bar{o}$ - $s\bar{u}$ grun $di\hat{u}$, the father is giving a feast, and $m\bar{u}$ - $s\bar{u}$ $kh\bar{u}$ $sh\bar{z}$ thiam-bil \bar{z} . I might have made rejoicing. In the latter example, thiam is in the present-future.

Agent II.—Wherever a singular substantive occurs in this case it ends in \bar{z} . Thus, $m\bar{a}l\bar{i}$ $da\tilde{u}$, the father gave; $b\bar{a}l\bar{i}$ $ra\underline{z}hau$, the son said. For the plural we have $ren\bar{o}-\underline{z}h\bar{a}$ $kuti\bar{e}$, they struck; $sen\bar{o}-\underline{z}h\bar{a}$ $\underline{s}h\bar{u}r\bar{a}$ $thi\bar{e}$, they made merry. In the second Specimen, we have $Baghd\bar{u}r\bar{o}-j\bar{e}$ $kh\bar{i}l\bar{i}$, $Baghd\bar{u}r$ ate. Here $j\bar{e}$ is simply another way of spelling $\underline{z}h\bar{e}$ (see the locative, below), and the noun is put in the plural, apparently as an honorific form.

Accusative.—According to Shaw the accusative of $e\underline{z}\underline{h}$ is $e\underline{z}\underline{h}u$, while in the case of the other two nouns it is the same as the nominative or as the dative. In every case in which the accusative of a noun substantive occurs in the Specimens, it is the same as the nominative.

Instrumental.—Shaw gives no form for this case. Two instances of the instrumental occur in the Specimens, $viz.:-\underline{sh}\bar{u}ra-\bar{\imath}-t\bar{a}$, with joy (he would have filled his belly), and $gh\bar{a}s-r\bar{e}$, (he would have filled his belly) with grass. In the first instance, $t\bar{a}$ has been added to the agent. The second instance is the same in form as the dative.

Dative.—This is usually formed by adding $r\bar{e}$ (compare Persian $r\bar{a}$, and Gilgit $t\dot{e}$), before which a noun ending in \bar{o} drops its final letter. Thus, $b\bar{a}b\bar{o}$, a father, dative $b\bar{a}b-r\bar{e}$; $m\bar{a}l\bar{o}$, a father, dative $m\bar{a}l-r\bar{e}$; $manu\underline{s}\underline{h}\bar{o}$, a man, dative $manu\underline{s}\underline{h}-r\bar{e}$. Other instances of this case are $d\bar{z}\underline{z}\underline{h}\bar{a}$ - $r\bar{e}$, to a daughter; $bask\bar{o}ch\bar{o}k$ - $r\bar{e}$, to a servant (in which the final \bar{o} of $bask\bar{o}ch\bar{o}$ is protected by the k suffixed). In the plural we have $b\bar{a}b\bar{o}$ -r \bar{e} , to fathers; $d\bar{z}\underline{z}h\bar{a}r\bar{o}$ - $r\bar{e}$, to daughters. Sometimes (compare Gilgit $k\dot{e}$) we have a kainserted before the $r\bar{e}$. Thus, $mu\underline{s}h\bar{a}-ka-r\bar{e}$, to a man (there were two sons); $k\bar{u}\bar{i}-ka-r\bar{e}$, (he went) to a (far) country; $ra\underline{z}h\bar{a}-ka-r\bar{e}$, to (thy) order (I did not do disobedience). This ka, like the k in $bask\bar{o}ch\bar{o}k$ -rē, is the suffix of the indefinite article. In one case $r\bar{e}$ is weakened to $r\bar{\imath}$, viz.:—in $t\bar{\imath}$ - $r\bar{\imath}$, (I have sinned) to (i.e. before) thee. The Gilgit suffix $t\acute{e}$ appears in khudāī-tē, (I have sinned) to (i.e. before) God. In mālē-lī bōzhum, I will go to (my) father, unless $m\bar{a}l\bar{e}-l\bar{\imath}$ is a copyist's slip for $m\bar{a}l\bar{e}t\bar{e}$, $r\bar{e}$ or $r\bar{\imath}$ has become $l\bar{\imath}$. After verbs of saying, the dative of the person addressed sometimes takes wari, near. Thus, mālī razhau baskocho-warī, the father said to the servants (plural); razhau mālēwarī, or razhau māl-rē, he said to the father. In mālē-warī, mālē is for mālai, the Gilgit genitive.

Locative.—It will be convenient to consider the locative before the ablative. Shaw makes it end in $r\bar{e}$, like the dative, but in the List and Specimens it always ends in $\underline{zh}\bar{e}$ or $\underline{zh}\bar{a}$ (also spelt $j\bar{e}$ or $j\bar{a}$). It will be noticed that, in the plural, the Agent II takes the same termination. Examples of the locative are $g\bar{o}\underline{sh}\underline{-zh}\bar{e}$, in the house; $\underline{zh}\underline{a}\tilde{u}\underline{-zh}\bar{a}$, in a country; $k\bar{u}\bar{\imath}\underline{-zh}\bar{a}$, (he sent him) into a field; $t\underline{sh}r\bar{e}\underline{sh}\underline{-zh}\bar{a}$, (the elder son was) in the field. With this termination we may compare the Gilgit $aj\acute{e}$ or $\acute{j}\acute{e}$, or, perhaps, the Gilgit $r\bar{o}$, with change of r to \underline{zh} .

Ablative.—The typical letter of the ablative is \bar{o} . The most common suffix is $\underline{zh}\bar{o}$ or $j\bar{o}$, which is connected with the $\underline{zh}\bar{e}$ of the locative. Thus, $b\bar{a}b\bar{e}-\underline{zh}\bar{o}$, from the father; $kup\bar{e}-\underline{zh}\bar{o}$, from the well; $vany\bar{o}-j\bar{o}$, from a shopkeeper; $a\underline{sh}e-\underline{zh}\bar{o}$, from him. In the plural, we have $b\bar{a}b\bar{e}-\underline{zh}\bar{o}$, from fathers. $Kach\bar{o}$, from near, also occurs, as in $d\bar{\imath}\underline{zh}\bar{a}-kach\bar{o}$, from the daughter; $manu\underline{zh}\bar{e}-kach\bar{o}$, from a man; $d\bar{\imath}\underline{zh}\bar{a}r\bar{e}-kach\bar{o}$, from daughters; $b\bar{a}br\bar{e}-kach\bar{o}$, from fathers. $T\bar{o}$ is also used, as in $t\bar{a}-t\bar{o}$, thereafter, then; $s\bar{a}d\bar{o}-t\bar{o}$, afterwards; $b\bar{a}br\bar{e}-\underline{zh}\bar{a}-t\bar{o}$, from in the fathers (an ablative of a locative); $\underline{zh}ak\bar{o}-\underline{zh}\bar{a}-t\bar{o}$, from

among the men; $sen\tilde{e}-\underline{zh}\tilde{a}-t\tilde{o}$, from among them; $t\underline{sh}r\tilde{e}\underline{sh}\tilde{i}-\underline{zh}\tilde{a}-t\tilde{o}$, from in the fields. It will be noticed that, as in Gilgit, the ablative suffix is, in the singular, added in the oblique form, and, in the plural, to the nominative. The same is true of the locative and of the Agent II plural.

Genitive.—Shaw makes the genitive, both singular and plural, end in \bar{o} , and this has been reproduced in the above paradigm. We have examples of this in (List No. 223) $th\bar{o}$ $b\bar{a}b\bar{o}$ $g\bar{o}\underline{z}hr-\underline{z}h\bar{e}$, in your father's house; $Ka\underline{s}hir\bar{o}$ $\underline{s}h\bar{i}sh$, a Kāshmīrī's head (Specimen II); $\bar{e}chh\bar{a}k\bar{o}$ safar, a journey of one day; $umr\bar{o}$ safar, a journey of a lifetime. Several different forms of the genitive are given in the grammatical portion of the List. Thus, we have the Gilgit termination ai in $b\bar{a}bai$, of a father; $d\bar{i}zhai$ (also $d\bar{i}zh\bar{o}$), of a daughter; $b\bar{a}b\bar{e}lai$, of fathers. In No. 116, 'of daughters' is translated $d\bar{i}zh\bar{a}r\bar{o}-r\bar{e}$, which is evidently a dative of possession. In No. 125, 'of men' is $zhak\bar{a}l\bar{i}$ (cf. the form $m\bar{a}l\bar{e}l\bar{i}$ of the dative). No. 120 gives $manuzh\bar{o}$ $g\bar{o}sh$ for 'of a man,' which seems to mean really 'the man's house.'

Other postpositions. Kāryō is 'for,' as in sēsēi kāryō, for that, therefore.

To give the sense of 'with' we have $-s\bar{\imath}$ $n\bar{a}l\bar{a}$. Thus, $bask\bar{o}ch\bar{o}-s\bar{\imath}$ $n\bar{a}l\bar{a}$, with servants; $par\bar{u}l\bar{o}-s\bar{\imath}$ $n\bar{a}l\bar{a}$, with friends; $dar\bar{\imath}ch\bar{e}-s\bar{\imath}$ $n\bar{a}l\bar{a}$, with harlots. Compare Pañjābī $n\bar{a}l$.

 $Kach\bar{o}$, from near, has already been mentioned. $Wary\bar{o}$, connected with $war\bar{\imath}$, the sign of the dative, has the same meaning.

Adjectives.—Shaw states that adjectives do not seem to change for gender. There are, however, several instances in the List and Specimens in which we see adjectives changing when in agreement with a feminine noun. On the other hand they do not seem to change usually for number or case. We may quote the following examples:—siō manuzhō, a good man; sī chēī, a good woman; siō zhakōrē, good men; sī chē, good women; kachī mulai, a bad girl; siō manuzhē kachō, from a good man; miō māl-rē, to my father. In thānē baskōchō-sī nālā, with thy servants, the adjective thānō has changed for number. Other examples will be found under the head of participles. Comparison is made as in Gilgit.

III. PRONOUNS.—Shaw gives the following forms for the pronoun of the first person. I have added a few forms occurring in the Specimens:—

Mã T

	Sing.	llur.
Nom.	m o	bē
Agent I.	$m\widetilde{\widetilde{o}}$ -s \overline{a} (-s \widetilde{e}), $m\overline{u}$ -s \overline{u}	bē-sā (-sē)
Agent II.	$m\overline{\imath}$	assō- <u>zh</u> ā (- <u>zh</u> ē)
Acc.	$m\widetilde{\widetilde{o}}$	assō
Dat.	$m\widetilde{\sigma}$ - $rar{e}$	assō-rē
Abl.	$m\widetilde{o}\cdot \underline{zh} \overline{o}$	assõ- $\underline{z}h$ õ
Gen.	miõ	assō
Loc.	$m\widetilde{o}$ - <u>zh</u> \widetilde{a} (- <u>zh</u> \widetilde{e})	assō- <u>zh</u> ā (- <u>zh</u> ē)

There is also a possessive pronoun, $mi\bar{a}n\bar{o}$ or $mi\tilde{a}n\bar{o}$, my, mine, and $ass\bar{a}n\bar{o}$, our. In the Specimen we have $m\bar{o}\bar{\imath}$, used as a feminine possessive pronoun in $\underline{z}h\bar{o}g$ $m\bar{o}\bar{\imath}$ $h\tilde{a}k$, what is mine. $B\bar{e}$, we, corresponds to the Gilgit $b\acute{e}h$, while $mi\bar{a}n\bar{o}$ and $ass\bar{a}n\bar{o}$ must be compared with the Kāshmīrī $my\delta n^u$ and $s\delta n^u$. $M\bar{u}$ - $s\bar{u}$ occurs in the Parable in $m\bar{u}s\bar{u}$ thiambil $\bar{\imath}$, I might have made.

The declension of the pronoun of the second person is as follows:-

 $T\bar{u}$, thou.

	Sing.	Plur.
Nom.	tū.	* <u>ts</u> ō, (fem.) <u>ts</u> ī
Agent I.	$tar{u}$ -s $ar{a}$ (-s $ar{e}$)	$\underline{ts}\bar{o} ext{-}sar{s}$ (- $sar{e}$)
Agent II.	$tar{o}, tar{h}ar{o}$	<u>ts</u> ō- <u>zh</u> ā (- <u>zh</u> ē)
Acc.	$tar{u}, tar{h}ar{o}$	<u>ts</u> ō
Dat.	$tar{u}$ - $rar{e},tar{u}$ - $rar{\imath}$	<u>ts</u> ō-r <i>ē</i>
Abl.	$tar{u}$ - $z h ar{o}$	<u>is</u> ō- <u>zħ</u> ō
Gen.	$tar{o}, tar{h}ar{o}, tar{u}ar{i}$. <u>ts</u> ō, <u>ts</u> ō ī
Loc.	$tar{u}$ - $z\underline{h}ar{a}$ (- $z\underline{h}ar{e}$)	<u>ts</u> ō- <u>zh</u> ā (- <u>zh</u> ē)

There is a possessive pronoun, $\underline{th}\bar{a}n\bar{o}$ or $t\bar{a}n\check{o}$, thy, thine, and $\underline{ts}\bar{a}n\bar{o}$, your. In the Specimens the singular forms are generally $\underline{th}\bar{o}$, $\underline{th}\bar{a}n\bar{o}$, etc., while Shaw always gives $t\bar{o}$, $t\bar{a}n\bar{o}$, etc. Forms beginning with \underline{ts} are often spelt with \underline{chh} . Thus, $\underline{chh}\bar{o}$, $\underline{chh}\bar{a}$, $\underline{chh}\bar{a}n\bar{o}$, etc. In the Specimens we have two forms of the genitive in agreement with feminine nouns. They occur in the phrases $\underline{th}a\bar{i}$ $\underline{kh}idmat$ $th\bar{a}s$, I did thy service; $\underline{th}a\bar{i}$ $\underline{razh}\bar{a}$ -ka- $r\bar{e}$, to thy command; $\underline{zh}\bar{o}g$ $m\bar{o}i$ $h\tilde{a}k$, $\underline{th}\bar{e}i$ bil, what is mine, is thine. $T\bar{u}$ - $r\bar{i}$, as a dative, has been discussed under the head of the dative of substantives. With $\underline{ts}\bar{o}$ and $\underline{chh}\bar{a}n\bar{o}$ compare the Kāshmīrī \underline{ts}^ah , thou, $\underline{chy}\bar{o}n^a$, thy. The plural $\underline{ts}\bar{o}$ has a feminine $\underline{ts}\bar{a}$. I have only met this form in the nominative. It probably occurs in all cases as in Gurēzī Shiṇā.

The pronoun of the third person is identical with the Demonstrative pronouns. There are several of these. The Proximate Demonstrative pronoun is $n\bar{o}$ or $an\bar{o}$, this, he, she, it. $N\bar{o}$ is thus declined:—

	$N\bar{o}$, this, he, she, it.	
	Sing,	Plur,
Nom.	$n\bar{o}, n\bar{u}$; fem. $n\bar{\imath}$	$n\bar{\imath}$
Agent I.	$n\bar{o}$ - $s\bar{a}$ (- $s\bar{e}$), $n\bar{u}$ - $s\bar{a}$ (- $s\bar{e}$),	$n\bar{\imath}$ - $sar{a}$ $(-sar{e})$
	fem. $n\bar{\imath}$ - $s\bar{a}$ (- $s\bar{e}$)	
Agent II.	nisī	$nin\bar{o}$ - $\underline{z}\underline{h}\bar{a}$ $(-\underline{z}\underline{h}\bar{e})$
Acc.	nisē	ninō
Dat.	nisē-rē	ninō-rē
Abl.	nisē- <u>zh</u> ō	ninō- <u>zl</u> iō
Gen.	nisī, nisēi	nine
Loc.	$nis\bar{e}$ - $\underline{zh}\bar{a}$ $(-\underline{zh}\bar{e})$	$nin\bar{o}$ - $\underline{zh}\bar{a}$ (- $\underline{zh}\bar{e}$)

Ano is declined in exactly the same way. Thus, ano $\tilde{a} \underline{shp} - r\bar{e}$, to this horse; ano $r\bar{o}pai$, this rupee; ano $krum\bar{e}$, these works. Compare $any\tilde{o}$, from here.

There are several forms of the remote demonstrative pronoun, that, he, she, it. They no doubt have different meanings, as in Gilgit Shinā, but no materials are available for distinguishing the various shades. The simplest form is the pronoun $s\bar{o}$, of which the following instances appear in the Specimens:—

Sing. Nom. $s\bar{o}$, as in $s\bar{o}$ $t\underline{sh}r\bar{e}\underline{sh}\bar{a}$ - $t\bar{o}$ $\bar{a}l\bar{o}$, he came from in the fields.

Agent II. sēsī, as in sēsī chhakrē, he wasted.

Dat. $s\bar{e}s\bar{a}-r\bar{e}$, as in $s\bar{e}s\bar{a}-r\bar{e}$ $\underline{zh}\bar{e}-g\bar{a}-n\bar{a}$ $n\bar{e}$ mut \bar{o} , to him nothing remained. $S\bar{e}s\bar{a}$ is here evidently another form of $s\bar{e}s\bar{e}$. Compare $\underline{zh}\bar{a}$ and $\underline{zh}\bar{e}$.

Gen. sēsō, as in sēsō bārō bāl, his eldest son; sēsēi, as in sēsēi mālō drō khātō, his father came outside.

Plur. Agent II. senō-<u>zh</u>ā, they (made merry).

Abl. senē-zhā-tō, from among them (the younger said to the father).

As an adjective, we have $s\bar{e} \, \underline{zh} a\tilde{u} - \underline{zh} \tilde{a}$, in that country; $s\bar{o} \, wa\underline{kh} s\tilde{a}$, at that time; $s\bar{e} \, b\tilde{u}r\bar{o} - r\bar{e}$, to them all.

Very similar are the forms of a pronoun \bar{o} , au, or $\bar{a}\bar{o}$. Thus:—

Sing. Nom. \tilde{o} , au, $\tilde{a}\tilde{o}$; fem. \tilde{a} . Thus, \tilde{o} bai-h $\tilde{a}\tilde{\tilde{o}}$, he is sitting; au k $\tilde{e}s\tilde{e}-\underline{zh}\tilde{o}$ muligay \tilde{a} , from whom did you buy that?

Acc. The same as the nominative when used as an adjective, as in $\bar{a} \ r\bar{o}pai \ ar\bar{e}$, take that rupee. Otherwise we have $as\bar{e}$, as in $as\bar{e} \ si\bar{o}$ -thē $kut\bar{e}t\bar{a}t\bar{o}$, after having beaten him well.

Dat. $as\bar{e} - r\bar{e}$, as in $an\bar{\imath}$ $r\bar{o}pai$ $as\bar{e} - r\bar{e}$ $d\bar{e}$, give this rupee to him.

Abl. $as\bar{e} - \underline{zh}\bar{o}$, as in \bar{a} $r\bar{o}pai$ $as\bar{e} - \underline{zh}\bar{o}$ $ar\bar{e}$, take that rupee from him.

Gen. asō phiā-jē, on his back; asō bāl, (I have beaten) his son.

Plur. Gen. $\bar{a}n\bar{o}$, of them (List).

The Gilgit ro, he, she, it, that, is also used. It has a feminine throughout, and is thus declined:—

	Sing		PLUE.		
	Masc.	Fem.	Masc.	Fem.	
Nom.	rō	rē	rē	$oldsymbol{r}ar{a}$	
Agent I.	<i>า</i> ō-sā, (-sē)	$rar{e}$ - $sar{a}$, $(-sar{e})$	rē-sā, (-sē)	$rar{a}$ - $sar{a}$, (- $sar{e}$)	
Agent II.	(?) rōsī	rēsī	$renar{o}$ - $\underline{z}\underline{h}ar{a}$, $(-\underline{z}\underline{h}ar{e})$	$ranar{o}$ - zh $ar{a}$, $(-zh$ $ar{e})$	
Acc.	(?) rōsē	rĕsē	renō	ranō	
Dat.	(?) rösē-rē	rēsē-rē	renō-rē	ranō-rē	
Abl.	(?) rōsē- <u>zh</u> ō	rēsē- <u>zh</u> ō	renō-zhō	ranō- <u>zh</u> ō	
Gen.	(?) rōsō	rēsō	renō	ranō	
Loc.	(?) $r\bar{o}s\check{e}-\underline{z}h\bar{a}, (-\underline{z}h\bar{e})$	$rar{e}sar{e}-z\underline{h}ar{a},\;(-z\underline{h}ar{e})$	$renar{o}$ - $zhar{a}$, $(-zhar{e})$	$ranar{o}$ - $zhar{a}$, $(-zhar{e})$	

Shaw gives no forms for the Acc., Dat., Abl., Gen. and Loc., Sing. Masc. $Res\bar{a}n\bar{o}$ occurs as a Gen. Sing. Masc. in the List of words (Nos. 27 and 28). It is really a possessive pronoun like $mi\bar{a}n\bar{o}$, mine, etc. No other form of this pronoun occurs in the List or Specimens, but there is a pronoun $\underline{z}h\bar{o}$, he, which is probably a dialectic form of it. It is not given by Shaw, but the following instances occur in the first Specimen:—

Sing. Nom. <u>zhō rutō bōī iphālō</u>, he arrived safe and sound.

Dat. $\underline{\underline{shes}}$ - \underline{re} banyā, put ye on him. Gen. $\underline{\underline{shes}}$ ānō aluk, his portion.

zhēsānī dēr (fem.), his belly.

Finally, there is a pronoun, $per\bar{o}$ or perau, he, she, it, that. Shaw shows it as a plural, viz.:— $per\bar{o}$, they, gen. plur. $per\bar{a}n\bar{o}$, their, which is also used as a base for the oblique cases. The following forms occur in the List:—

Sing. Nom. perau or perō (No. 26).

Agent I. perau-se, as in perau-se tiras chare \tilde{q} , he is grazing cattle,

Agent II. perāsī, as in perāsī kutau, he struck.

Gen. $per\bar{a}s\bar{o}$, as in $per\bar{a}s\bar{o}$ $j\bar{a}$ $s\bar{a}$ - $j\bar{o}$ $\underline{s}h\bar{o}ra\tilde{u}$ $ha\tilde{u}$, his brother is taller than his sister.

Plur. Nom. $per\bar{a}$ (No. 29). Possibly this is feminine, or it may be another spelling for $per\bar{e}$, as $\underline{zh}\bar{a}$ is for $\underline{zh}\bar{e}$.

Agent II. perānō-zhē, as in perānō-zhē kutiē, they struck.

The genitive, perānō, their, given by Shaw, is evidently one of the set of possessive pronouns. To recapitulate, these possessive pronouns are as follows:—

 $mi\bar{a}n\bar{o}$, $mi\tilde{a}n\bar{o}$,mine. $ass\bar{a}n\bar{o}$,ours. $\underline{th}\bar{a}n\bar{o}$, $t\bar{a}n\bar{o}$,thine. $\underline{ts}\bar{a}n\bar{o}$, $chh\bar{a}n\bar{o}$,yours. $res\bar{a}n\bar{o}$, $\underline{ah}\bar{e}s\bar{a}n\bar{o}$,his. $ren\bar{a}n\bar{o}$, $per\bar{a}n\bar{o}$,theirs.

There is no instance of a Reflexive pronoun in the List or Specimens. Shaw gives the Gilgit $tom\bar{o}$.

The Relative pronoun is $k\bar{e}$, who, and the Interrogative is $k\bar{o}\tilde{i}$, who? In the remaining cases of the singular they are identical in form. Thus:—

Nom. $k\bar{e}$, who; $k\bar{o}\tilde{i}$, who?

Agent I. $k\bar{e}$ - $s\bar{a}$ (- $s\bar{e}$)

Agent II. $k\bar{e}s\bar{i}$ Acc. $k\bar{e}s\bar{e}$

Acc. $k\bar{e}s\bar{e}$ Dat. $k\bar{e}s\bar{e}-r\bar{e}$

Abl. $k\bar{e}s\bar{e}-\underline{z}h\bar{o}$

Gen. kēsō

Loc. $k\bar{e}s\bar{e}-\underline{z}h\bar{a}, (-\underline{z}h\bar{e})$

No instances of the plural occur in the List or Specimens, nor is that number given by Shaw.

The neuter Interrogative pronoun is $\underline{zh}\bar{o}k$ or $\underline{zh}\bar{o}g$, what? Shaw does not mention it. The following forms appear in the Specimens:—

anī zhōg krumē haũ, what works is (i.e. are) these?

zhōbaī bilī, what became. Here zhōbaī appears to be a feminine, but I confess that I do not understand it.

'Why?' is zhōk-rē thēɔ̃tō, literally, 'making for what?'

Other pronominal forms are $kach\bar{a}$ or $kach\bar{a}k$, how much? how many? $\underline{zh}\bar{e}$ - $g\bar{a}$ or $\underline{zh}\bar{e}$ - $g\bar{a}$, anything.

IV.-VERBS.-

A. Auxiliary Verbs and Verbs Substantive.—The present and past tenses of the Verb Substantive closely follow the Shinā of Gilgit. In the present tense the letter n is liable to be weakened to a mere nasalisation of the succeeding vowel. The present is conjugated as follows:—

PLUE. SING. Fem. Masc. Fem. Masc. mõ hānōs or hãs bē hānis or hãs mõ hānis, haîs bē haĩs 2 tsō hānet, hāt tū hānō, hā b tū hānī, haĩ tsā haĩt 3 rō hānō, hāō, haũk $r\bar{e}$ $h\tilde{a}$, $h\tilde{a}k$ rā haniē (? hāniē) rē hānī, ha?

'I am,' etc.

Another word for 'is' is $th\bar{e}n\bar{a}$, apparently a plural for a singular, and probably meaning literally 'they make.' It occurs in $th\bar{a}n\bar{o}$ $n\bar{o}m$ $zh\bar{o}k$ $th\bar{e}n\bar{a}$, what is your name? (List No. 220). Compare the Gawarbati $th\bar{a}na$.

The Past tense is conjugated as follows:—

'I was,' etc.

	s	ING.	* * * * * * * * * * * * * * * * * * * *	PLUE.	
	Masc.	Fem.	Masc.	Fem.	
1	mõ āsilus, āsilōs	mõ āsiliis (or -līs)	bē āsiles	bē āsilies	
2	tū āsilō	tū āsiliē (or -lī)	<u>ts</u> ō āsilet	<u>ts</u> ā āsiliet	
3	rō āsilō	rē āsiliē (or -lī)	rē āsilē	rā āsiliē	

I have not come across any forms corresponding to the Gilgit asus, etc.

The verb 'to become' is irregular in some of its forms. I give the following conjugation, which is founded on that of Shaw, with additions from the List and Specimens. When no feminine form is shown it is the same as the masculine.

Present-Future, 'I become,' 'I shall become.'

BRÖKPĀ OF DRAS.

	Sing.		PLUR.	
	Masc.	Fem.	Masc.	Fem.
1	born	*****	bon	
2	bē <u>s</u> ħ	'	$bar{a}t$	bātē

2	bē, bē <u>sh</u>	••••	$bar{a}t$	
3	benō	ben ī	benā	(?) benā

Imperfect, 'I was becoming,' etc.

	Sin	G.		PLUE.	
	Masc.	Fem.	Masc.	Fem.	
1	bomālōs	bomāliis (or -līs)	$bonar{a}les$	bonālies	
2	$biar{a}lar{o}$	biāliē (or -lī)	$biar{a}let$	$biar{a}liet$	
3	$biar{\imath}lar{o}$	$biar{a}liar{e}$ (or $-lar{\epsilon}$)	benālē	benāliē (or -lī)	

Past, 'I became,' etc.

	SING.		P	LUR.
V	Masc.	Fem.	Masc.	Feta.
1	$bilar{o}s$	biliis (or -līs)	biles	bilies
2	bilo	biliē, bilī	bilet	biliet
3	bilō, bil	biliē, bilī	bilen, bilē	bilien, biliē, bilī

Pluperfect, 'I had become,' etc.

	Sing.		PLUB.	
	Masc.	Fem.	Masc.	Fem.
1 2	bilālōs bilālō	bilāliis (or -līs) bilāliē (or -lī)	bilāles bilālet	bilālies bilāliet
3	$bilar{a}lar{c}$	bilāliē (or -lī)	$bilar{a}lar{e}$	bilāliē (or -lī)

Infinitive: $b\bar{o}n\bar{o}$ or $b\bar{e}\bar{o}n\bar{o}$, to become. Also, as a future participle, to be become.

Conjunctive Participle : $b\bar{o}\bar{\iota}$, $b\bar{e}$, having become.

Gerund : $b\bar{e}$ - $t\bar{o}$, on having become. Imperative : $b\bar{e}$, become thou.

The form of the past tense of this verb looks as if it had been affected by the influence of the Burushaski of Hunza-Nagar. Compare the Burushaski bilah, it is. Similarly, as will be seen in the following examples, bil, literally 'he became,' is used to mean 'he is.'

The following examples of this verb occur in the List and Specimens:—

Tū kachō-gā bilōs gunāhgār, before thee also I became a sinner.

 $\underline{Zh}\bar{o}g\ m\bar{o}\bar{\imath}\ h\tilde{a}k$, $\underline{th}\bar{e}\bar{\imath}\ bil$, what is mine is (lit. became) thine.

Kachā barsh bil, how many years is (i.e. are) there, how old is (this horse)?

Mudā bilō, he became needy.

 $\bar{E}\underline{sh}\bar{a}k$ $\underline{zh}\bar{o}ba\bar{i}$ $bil\bar{i}$, one day what happened \hat{i} $kh\bar{u}\underline{sh}\bar{i}$ thiam-bil \bar{i} , rejoicing might have been made by me.

 $\underline{Sh}\bar{u}r\bar{a}$ $b\bar{e}\bar{o}n\bar{\imath}$ $\underline{sh}\bar{a}$ asil $\bar{\imath}$, joy to be become was proper, it was proper to rejoice.

Hun bōī ras bilō, having become erect, he started; i.e. he stood up and started.

 $D\bar{e}\underline{z}h\bar{\imath} \underline{t}\underline{s}h\bar{e}k \ bil\bar{a}$ - $b\bar{e}t\bar{o}$, on a few days having become, *i.e.* having passed.

B. Active Verb.—The conjugation of the finite verb follows Gilgit Shinā in its main principles. As already pointed out, there are two forms of the Agent case, one employed before all tenses of a transitive verb except the past tense and those formed from it, and the other used before the past tense of a transitive verb and those tenses which are formed from it. Neuter verbs, of course, have the subject in the nominative.

The following is the conjugation of the transitive verb kutino, to strike:—

Infinitive: kutinō, or kutyōnō, to strike. Present Participle: kutiēstō, striking.

Past Participle: kutō or kutau.

Future Participle: kutyōnō, to be struck, fit to be struck.

Conjunctive Participle: kutē, having struck.

Gerund: kutē-tō, kutē-tā, kutē-tā-tō, on having struck.

The Infinitive almost always ends in $\bar{o}n\bar{o}$, not in oiki as in Gilgit. $\bar{O}n\bar{o}$ is evidently connected with the Kāshmīrī form ending in unt. Other examples are $chary\bar{o}n\bar{o}$, (he sent him) to feed (swine); $th\bar{e}\bar{o}n\bar{o}$, (fit) to make (me thy son). A dative occurs in the same meaning in the form $th\bar{e}\bar{o}n\bar{a}$ - $r\bar{e}$, (fit) for making (me thy son). Two examples of an infinitive with k are, however, found in the Specimens, as verbal nouns. They are $talm\bar{o}k$, dancing, and $sinm\bar{o}k$, singing.

No example of the Present Participle occurs in the Specimens. The form given in the List is taken from Shaw. With the termination $st\bar{o}$, we may compare the common termination $st\bar{e}$, stai, $st\bar{a}$, of the Kāfir languages.

The Past Participle ends in \bar{o} or au. The latter is sometimes nasalised. Thus, $kuta\tilde{u}$. Examples will be found under the past tense, the third person singular of which is identical with the past participle.

The Future Participle is the same in form as the Infinitive, but is an adjective. It has the force of the Latin Gerundive, and means 'what is to be struck,' etc. Like the infinitive it is evidently connected with Kāshmīrī. Two examples occur in $\underline{sh}\bar{u}r\bar{u}$ theone $\underline{sh}\bar{u}r\bar{u}$ theone $\underline{sh}\bar{u}r\bar{u}$ theone, is feminine, and theone $\underline{sh}\bar{u}r\bar{u}$ are adjectives agreeing with it, the sentence, translated literally, being 'rejoicing to be made, rejoicing to be become, was proper.'

The following additional examples of the Conjunctive Participle occur in the Specimens:—baghē, having divided; kharchī thē, having made expenditure.

Most of the examples of the Gerund which are found in the Specimen are gerunds of neuter verbs. I give them here for the sake of convenience. The following examples occur: $-g\bar{e}-t\bar{a}-t\bar{o}$, on going; $b\bar{e}-t\bar{o}$, on having become; $iph\tilde{o}-t\bar{o}$, on having reached; $th\bar{e}\bar{o}-t\bar{o}$, on having made, *i.e.* on having said (twice in this sense).

Imperative: kutē, strike thou; kutyā, kutiā, strike ye.

Other examples (both transitive and intransitive verbs) are $b\bar{o}$ or $b\bar{o}\underline{z}h\bar{e}$, go thou; $kh\bar{e}$ or $k\bar{e}$, eat thou; bai, sit thou; \bar{e} , come thou; $b\bar{e}$, become; $mir\bar{\imath}\underline{s}h$ or $mir\bar{\imath}\underline{s}h$, die; $d\bar{e}$, give; $th\bar{e}$, do; $ar\bar{e}$, take (List No. 235); $chhur\bar{e}$, keep.

 $b\bar{o}\underline{zh}\bar{a}$, go ye; $di\bar{a}$, give ye (No. 227); $bany\bar{a}$, put ye on (clothes); $\underline{sh}i\bar{a}$, put ye; $kh\bar{a}$, eat ye; $pi\bar{a}$, drink ye; $thi\bar{a}$, make ye.

	Sing.		PLUR.	
	Masc.	Fem.	Masc.	Fem.
1	mõ-sē kutem		bē-sē kutōn	
2	tū-sē kutē, kutē <u>s</u> h	•••••	<u>ts</u> ō-sē kutiāt	<u>ts</u> ā-sē kutiāt
3	rō-sē kutēī	rē-sē kutīī	rē-sē kuten	rā-sē kuten

Present-Future, 'I strike,' 'I shall strike,' etc.

In the first person singular, the vowel of the last syllable varies, and I have not noted any rule on the subject. Examples are $b\bar{o}\underline{z}hum$, I will go; razam, I will say.

Present Definite, 'I am striking,' etc.

	Sing,		PLUE.	
	Masc.	Fem.	Masc.	Fem.
1	mõ-sē kutēmus, kutmus	mõ-sē kulēmis, kulmis	bē-se kutōnas	
2	tū-sē kutāō, kuta ũ	(?) tū-sē kutaĩ	<u>ts</u> ō-sē kutiāt	<u>ts</u> ā-sē kut i āt
3	rō-sē kutēnō, k u tēũ	rē-sē kutēnī	rē-sē kutēnā, kutyōnā	rā-sē kutēnī

Other examples of this tense are $mir\bar{\imath}\underline{zh}\bar{\imath}mus$, I am dying; $bea\tilde{\imath}u$, he sits, he lives (List No. 233); $a\tilde{\imath}u$, he comes (No. 239); $di\tilde{\imath}u$, he is giving (a feast). Most of these are neuter verbs, but are here given for the sake of convenience. In $char\bar{e}y\tilde{a}u$, he is grazing (List No. 229), we have a slightly varying form of the third person singular. Compare the Gilgit $charei\bar{a}n\bar{u}$.

Imperfect, 'I was striking,' etc.

	Sing.		PLUR.	
	Masc.	Fem.	Masc.	Fem.
1	mõ-sē kutemālos	mõ-sē kutemālīs	bē-sē kutōnāles	bē-sē kutōnālies
2	$tar{u}$ -s $ar{e}$ $kutar{a}lar{o}$	tū-sē kutāliē (or -lī)	tsō-sē kutiālet	<u>ts</u> ā-sē kutiāliet
3	rō-sē kutēlō	rē-sē kutēliē (or -lī)	rē-sē kutenālē	rā-sē kutenāliē (or -lī)

No examples of this tense occur in the Specimens.

In the Brōkpā of Dras the tenses formed from the past participle do not take the suffix $\bar{e}g\bar{a}$, as in Gilgit Shinā. The Past tense is formed directly from the past participle, the third person singular being identical with it. The latter ends in \bar{o} , au or $a\tilde{u}$, all of which are merely varieties of spelling, unless $a\tilde{u}$ is, as is possible, a relic of an old neuter gender.

The other forms will be learnt from the following paradigm:—

Past, 'I struck,' etc.

		ing.		Prog.
	Masc.	Fem.	Masc.	Fem.
1	mī kutās	mī kuties, kutīs	assō- <u>zh</u> ā kuties	assō- <u>zh</u> ā kuties
. 2	tō kut ā	tō kutē	<u>ts</u> ō- <u>zh</u> ā kutiet	<u>ts</u> ā- <u>zh</u> ā kutietī
3	sēsī kut $ar{o},$ - $au,$ - $a\widetilde{u}$	rēsī kutī	renō- <u>zh</u> ā kutiē	ranō- <u>zh</u> ā kutiē

According to Shaw, some verbs form the first person masculine singular in $\bar{o}s$ instead of $\bar{a}s$, and also terminate the second person masculine singular with \bar{o} instead of $\bar{a}s$. There are no instances of this occurring in the case of transitive verbs in the List or Specimens, but some intransitive verbs form the first person masculine singular in us, and the second person masculine singular in $\bar{o}s$. See below, under the head of intransitive verbs.

Examples of this tense are $di\bar{a}s$, I gave (List No. 228); $th\bar{a}s$, I did (sin); $mul\bar{i}-gay\bar{a}$, thou houghtest (No. 240); $n\bar{e}\ d\bar{a}$, thou didst not give (a kid); $ra\underline{z}hau$, he said; dau or $da\tilde{u}$, he gave; $chhakra\tilde{u}$, he wasted; $pa\underline{s}hau$, he saw; $nir\bar{a}\ da\underline{s}hta\tilde{u}$, he felt compassion; $b\bar{o}\underline{z}h\bar{e}$ (plur. masc.) dau, he gave kisses; thau or $tha\tilde{u}$, he did (in the

second Specimen, $t\bar{o}lam\ thau$, she made weighment); $par\bar{u}d\bar{o}$, he heard; $khu\underline{z}hau$, he asked; $s\bar{e}s\bar{i}\ \underline{z}hab\ b\bar{u}r\bar{o}\ chhakr\bar{e}$ (apparently for $chhakri\bar{e}$), by him all things were wasted (the grammar of this sentence is obscure); $\underline{s}h\bar{u}r\bar{a}\ thi\bar{e}$, they made rejoicing ($sh\bar{u}r\bar{a}$ is feminine).

In the second Specimen $\underline{sh}\bar{a}t\bar{\imath}s$ is translated both 'he remained' and 'she sat.' Similarly in the same Specimen, we have $d\bar{e}-\underline{sh}\bar{a}t\bar{\imath}s$, he put, and also 'he remained.' I am unable to analyse these forms. They all look like first persons feminine.

The Pluperfect is also used with the meaning of the Perfect. It is thus conjugated:—

	Sine.		· Plur.	
	Masc.	Fem.	Masc.	Fem.
	mī kutālōs	mī kutālīs	assō- <u>zh</u> ā kutiāles	asso- <u>zh</u> ā kutiālies
2	$tar{o}\ kutar{a}lar{o}$	tō kutāliē (or -lī)	tsō- <u>zh</u> ā kutiālet	tsā- <u>zh</u> ā kutiāliet
3	sēsī $kutālar{o}$ (or $-au$ or $-a\widetilde{u}$)	rēsī kutāliē (or -lī)	renō- <u>zh</u> ā kutiālē	ranō- <u>zh</u> ā kutiāliē (or -lī)

Pluperfect, 'I had struck,' 'I have struck.'

This tense is frequently employed in the sense of a simple past, when the action happened some time back. Examples of it are $gay\bar{a}lus$, I bought (No. 241); $sing\bar{a}la\tilde{u}$, he collected; $v\bar{e}\bar{a}l\bar{o}$, he sent; $n\bar{e}\ di\bar{a}l\bar{\imath}$, no (one) gave (him anything, $\underline{z}h\bar{e}g\bar{a}$, anything, being treated as a feminine); $kh\bar{\imath}l\bar{\imath}$, he ate (bread, fem.) (2nd Specimen).

Several of the above examples show that the third person of the Past and Pluperfect tenses of transitive verbs agrees with the object in gender. This is denied by Shaw. In the other tenses the subject is in the Agent I case, which appears to be now but a simple variety of the nominative, and the verb does not agree with the object in gender.

As an example of the conjugation of an intransitive or neuter verb, I give the verb $b\bar{o}\underline{z}h\bar{o}n\bar{o}$, to go. It will be observed that, as usual, this verb is irregular in its past tense.

Infinitive: $b\bar{o}\underline{zh}\bar{o}n\bar{o}$ (for $bo\underline{zh}y\bar{o}n\bar{o}$), to go. Present Participle: $b\bar{o}\underline{zh}\tilde{e}st\bar{o}$, going.

Past Participle: gau, gone.

Future Participle: bōzhōnō, about, or fit, to be gone.

Conjunctive Participle: $b\bar{o}\underline{z}h\bar{e}$, having gone.

Gerund: $b\bar{o}\underline{zh}\bar{e}$ - $t\bar{o}$, $b\bar{o}\underline{zh}\bar{e}$ - $t\bar{a}$, $b\bar{o}\underline{zh}\bar{e}$ - $t\bar{a}$ - $t\bar{o}$, on having gone.

No other examples of the Infinitive or of the Present Participle occur in the List or Specimens. Examples of the Past Participle will be found under the Past Tense. An example of the Future Participle $b\bar{e}\bar{o}n\bar{\epsilon}$ will be found under Transitive Verbs. There are no other examples of the Conjunctive Participle. For the Gerund, we have the examples already given under Transitive Verbs.

Imperative: $b\bar{o}$ or $bo\underline{z}h\bar{e}$, go thou; $bo\underline{z}h\bar{a}$, go ye.

Other examples are given under the head of Transitive Verbs.

DARD GROUP.

Present Definite, 'I am going,' etc.

	Sing.		PLUR.	
	Masc.	Fem.	Masc.	Fem.
1	mõ bō <u>zh</u> umus	mõ bō <u>zh</u> umis	bē bē <u>zh</u> unas or bēnas	,
3	tū hō <u>zh</u> āō, bō <u>zh</u> aũ rō bō <u>zh</u> ĕnō, bō <u>zh</u> ōn, bō <u>zh</u> ēũ, or bō <u>zh</u> aũ	(?) tū bō <u>zh</u> aĩ rē bō <u>zh</u> ēnī	<u>ts</u> ō bō <u>zh</u> āt rē bō <u>zh</u> ēnā	<u>ts</u> ā bō <u>zh</u> āt (f) rā bō <u>zh</u> ēnī

Other examples of this tense will be found under the head of Transitive Verbs. Imperfect, 'I was going,' etc.

	Sing.		PLUR.	
-	Masc.	Fem.	Masc.	Fem.
1	mõ bō <u>zh</u> umālōs	mõ bō <u>zh</u> umālīs	bē bōnāles	bē bōnālies
2	tū bō <u>zh</u> ālō	tū bō <u>zh</u> āliē (or -lī)	<u>ts</u> ō bō <u>zh</u> ālet	tsā bōzhāliet
3	rō bō <u>zh</u> ālō	rē bō <u>zh</u> āliē (or -lī)	rē bō <u>zh</u> ēnālē	rā bō <u>zh</u> ēnāliē (or -lī)

No examples of this tense occur in the Specimens.

Past, 'I went,' etc.

	Sing.		PLUE.	
	Masc.	Fem.	Masc.	Fem.
1	$m \overline{\widetilde{o}}$ g ជន	mõ gyes	bē gyes	bē gyēss
2	tū gā	$tar u\ gyar e, g \widetilde i$	<u>ts</u> ō gyet	<u>ts</u> ā gyetī
3	rō gau	rē gyē, gī	rē gyē	rā gyē

Other examples of this tense are $y\bar{a}tus$, I went; mutus, I remained; $bait\bar{o}$, thou didst sit (i.e. art living) (with me); $bait\bar{o}$, he sat (i.e. dwelt); $\underline{k}\underline{h}\bar{a}t\bar{o}$, he came (outside). It will be observed that, in these, the first person singular ends in us, and that the second and third person masculine of the same number end in \bar{o} , not \bar{a} or au.

Pluperfect, 'I had gone,' 'I have gone,' etc.

	Sing.		FLUE.		
	Masc.	Fem.	Mase.	Fem.	
1	$m\widetilde{\mathfrak{d}}$ gālās	$m\widetilde{\widetilde{o}}\ g\overline{\imath}l\overline{\imath}s$	bē gāles	bē gālies	Name of the last o
2	$tar{u}~gar{\imath}lar{o}$	tū gāliē (or -lī)	<u>ts</u> ō gālet	<u>ts</u> ī gāliet	
3	rō gālō	rē gāliē (or -lī)	rē gālē	rā gāliē (or -lī)	

Other examples are $uthil\bar{o}$, he arose; $m\bar{o}\bar{a}l\bar{o}$, he died; $n\bar{o}t\bar{o}\bar{a}l\bar{o}$, he was lost; $i\underline{p}h\bar{a}l\bar{o}$, he was got, he arrived; $\bar{a}l\bar{o}$, he came; $\bar{a}l\bar{i}$ (his sense, fem.) came.

Conditional tenses for all kinds of verbs are formed by adding the syllable $t\bar{o}$ to the simple present or to the pluperfect. This involves certain changes in these tenses, and we get the following forms for the verb $b\bar{o}\underline{z}\underline{h}\bar{o}n\bar{o}$, to go.

Present Conditional, 'if I go,' etc.

	Sing.	Plur.	*
1	mõ bõ <u>zh</u> ēto	bē bō <u>zh</u> untō	
2	tū bō <u>zh</u> ētō	<u>ts</u> ō bō <u>zh</u> āttō	
3	rō bō <u>zh</u> ēītō	rē b <u>ōzh</u> ētō	

The above forms appear to be of common gender. At least Shaw, from whom the paradigm is taken, gives no feminine forms, and I have not met any in the course of my reading. In Specimen I we have $pur\bar{\imath}-t\bar{o}$, he would have filled.

Past Conditional, 'if I had gone,' etc.

	Sing.		PLUE.	
	Masc.	Fem.	Masc.	Fem.
1 1	$m\widetilde{\widetilde{\sigma}}~gar{a}lar{c}star{c}$	mõ gälästö	bē gālestō	bē gālāsetō
2	$tar{u}~gar{a}lar{o}tar{o}$	$tar u \ gar a lar a tar o$	<u>ts</u> ō gālettō	<u>ts</u> ā gālātetō
3	rō gyiltō	rē gieltō	rē gyiltō	rā gālātō

Transitive verbs form these tenses in exactly the same way. For both, the subject is put into the Agent I case. Thus, $m\tilde{o}$ -sē kutētō, if I strike; $\underline{ts}\bar{o}$ -sē kutiāttō, if you strike; $m\tilde{o}$ -sē kutālōstō, if I had struck; $r\bar{o}$ -sē kutiltō, if he had struck.

We may note with regard to these conjugations that, after the \underline{zh} of $b\bar{o}\underline{zh}\bar{o}n\bar{o}$, an i is always omitted. Exactly the same rule applies in Kāshmīrī. Thus, $kuti\bar{a}t$, you strike, but $b\bar{o}\underline{zh}\bar{a}t$, not $b\bar{o}\underline{zh}i\bar{a}t$, you go.

The only trace of a passive voice in the Specimens is the word $mir\bar{\imath}\underline{zh}\bar{\imath}mus$, I am dying. The List gives the force of the passive by a periphrasis. 'I am struck' becomes 'he is striking me,' and so on.

The Negative Particle is $n\bar{e}$. 'No' is $nu\underline{sh}$.

FREE TRANSLATION.1

The father has Khatījā for his daughter. (Refrain repeated after each verse.)

Baghdur remained in the verandah.

He used a basket for a pillow.

There is water in Sultā (the name of a place).

Baghdūr (the bridegroom) ate a loaf.

The father has to go a journey of but one day.

But Khatījā (the bride) has to go a journey lasting her whole life.

The daughter has to go a journey lasting her whole life.

Khatījā weighed out gold and gave it in presents.

Jan, her father-in-law, took her up behind him on the horse.

She sat upon the snake of $R\bar{o}p\bar{i}$ (the name of the tribe to which her co-wife belongs. The co-wife is the snake).

Mā Husainī's son (i.e. Baghdūr) and the damsel Khatījā are a worthy pair.

¹ No free translation was sent with the original. The song is not free from difficulty, and I may have misinterpreted some passages.

BRŌKPĀ OF DĀH-HANŪ.

Dāh and Hanū are in the east of Baltistan, close to the frontier of the province of Ladākh. The inhabitants are Shins, and their language, though much mixed with Western Tibetan, is still Shinā in its essence. Full accounts of these Brōkpās will be found in Drew's Jummoo and Kashmir, and in Shaw's article on Stray Arians in Tibet quoted in the list of authorities on Shinā.¹ The specimen annexed and the list of words have been provided through the kindness of Mr. R. T. Clarke, I.C.S., Settlement Officer of Baltistan. Every care has been taken to make them correct, but, in recording a new and unwritten form of speech, mistakes and inconsistencies are sure to occur. In editing the specimen, I have altered the spelling here and there to agree with that of Shaw's sketch of the dialect, but in no case has the representation of the essential pronunciation of any word been altered.

The following grammatical sketch is based partly on Shaw's grammatical notes and vocabulary and partly on the Specimens. I believe that I have incorporated all the information given by Shaw:—

I. Vocabulary.—Many words are borrowed from Tiketan. Especially common is the so-called Tibetan article $p\bar{o}$, fem. $m\bar{o}$. $P\bar{o}$ is added to any noun, whether of Tibetan origin or not, and does not appear to affect the sense in any way. Thus, zhap or $zhap-p\bar{o}$, property. Sometimes even Tibetan case-suffixes are used as in (List No. 24) $t\bar{\imath}-ph\bar{\imath}\bar{a}$, of thee; $m\bar{e}r\bar{e}-l\bar{a}$, to compassion.

Adjectives usually follow the nouns they qualify, thus following the Tibetan, and not the Aryan idiom. In such cases, they, and not the nouns they qualify, take the case-suffixes. A good example is $b\bar{u}n\bar{i}$ $d\bar{u}r\bar{i}$ -ku- $r\bar{a}$, to a far country.

The following is a list of words occurring in the Specimen which I have identified as of Tibetan origin:—

kap<u>sh</u>ā, shoe পাব'-প' Borrowed from Prs.

khril, embrace व्ह्रियाय

gullūs, clothes बाँड (१)

grī, neck अधीत

grun, feast মর্নুর

chuk, all ইবা

chhar, waste এই ্ম' to consume.

chhüng, to become agra

thub, is found প্রথ

that-pā, pleased । । ।

 $d\bar{a}$, to $\zeta \zeta'$ (means with in Tib.).

dugs-mī, servant, Purik รูสุพามิ ·

dun, feast इंद्र सें
nispā-chan, sinner हैस'य'ठउ'
phak, swine यवा'
biü, son यु'
zāsh-kun, dearth अर्'ऽगॅदि'
zhāk, day व्या'
yātō, companion प्यार्'
yātō, companion प्यार्'
lā, to या'
lan, answer यद'
lŭlī-mo, harlot, Purik व्यार्थ
shumat, asked व्या' (२)
sak, all, Purik अवा'
ōspā, worthy द्वारा'

¹ Mr. Francke's Ladakhi Songs, mentioned among the authorities on Shinā, contain several specimens of this dialect, which unfortunately reached me too late to be consulted in the preparation of the present sketch.

II. **PRONUNCIATION.**—As in the Brōkpā of Dras, the vowel scale is very indefinite. A final \bar{a} seems to be always interchangeable with \bar{e} . Thus we have $r\bar{a}$ or $r\bar{e}$, to; $\underline{zh}\bar{a}$ or $\underline{zh}\bar{e}$, on, exactly as in Dras. The vowel \bar{a} sometimes even becomes \bar{o} or u, as in $ch\bar{o}rr$, for $ch\bar{a}r$, four; $r\bar{o}$ (as well as $r\bar{a}$, $r\bar{e}$), to; $p\tilde{u}\underline{sh}$, for $p\tilde{a}ch$, five. \bar{O} often becomes \bar{u} , as in $d\bar{u}$, for $d\bar{o}$, two; $n\bar{u}$, for $n\bar{o}$, nine.

The consonantal system is the same as in Dras. The two special consonants $t\underline{sh}r$ and $\underline{sh}r$ occur also here. In addition to the letters already discussed; Shaw mentions a \underline{dh} , pronounced like the th in the English 'this.'

There is a strong tendency to harden soft letters, frequently accompanied by disaspiration. Examples are $kirm\bar{o}$ (Tibetan $girm\bar{o}$), a rupee; $t\bar{e}$ (Sanskrit $dh\bar{a}$), to do (standard Shiṇā $th\bar{e}$); gip (for jib or jibh), a tongue; $g\bar{a}$ or $k\bar{a}$, and, also; \underline{shap} (standard Shiṇā $j\bar{a}b$), property. In $b\bar{u}t$, a devil, we see Eranian influence.

Initial j becomes g in gip, a tongue (see above), and $gy\ddot{u}n$ (Sanskrit $jy\bar{o}tsn\bar{a}$), moon.

Ch and chh often become \underline{sh} , as in $p\widetilde{u}\underline{sh}$, for $p\widetilde{a}ch$, five; $\underline{sh}\overline{a}$, for chha, six. In $t\underline{sh}r\overline{e}\underline{sh}$ (standard \underline{Sh} inā $ch\overline{e}ch$), a field, the initial ch has become $t\underline{sh}r$. On the other hand, in $a\underline{sh}rt$, for $a\underline{sh}t$, eight, \underline{sh} has become $\underline{sh}r$.

In the word $ap\underline{sh}$, a horse, for $a\underline{sh}p$, the two consonants have been interchanged. An initial h is sometimes dropped, as in $h\ddot{u}a$ or $\ddot{u}\ddot{a}$, he was.

Occasional instances occur of epenthesis, by which a vowel is modified by a succeeding one. Thus we have $t\underline{sh}rig\bar{a}$, a woman, but $t\underline{sh}r\ddot{u}g\bar{o}y\bar{u}$, women: $n\bar{o}r\bar{o}$, good; feminine $n\ddot{u}r\bar{\imath}:bi\underline{z}h\bar{a}$, twenty; $d\bar{u}$ (not $d\ddot{u}$) $bu\underline{z}h\bar{u}$ $d\bar{a}\underline{sh}$, fifty: $h\bar{u}$ - $r\bar{a}$, in them; $h\bar{u}$ - $r\bar{u}$ - $n\bar{o}$, from among them: $g\bar{o}l\bar{o}$, a bullock; $g\ddot{o}l\bar{e}$, bullocks: \bar{a} , a she-goat; $\bar{o}y\bar{o}$, she-goats.

III. NOUNS.—The Article.—As in Dras and Gilgit, the numeral $\bar{e}k$, one, is suffixed to nouns to give the force of the indefinite article. It takes various forms. Examples are $b\bar{u}n\bar{\imath}\ d\bar{u}r\bar{\imath}-ku-r\bar{a}$, to a distant country; $pun\ ab\bar{a}\underline{s}\underline{h}-k\bar{u}\bar{\imath}-n\bar{o}$, in a riotous way; $m\bar{u}\underline{s}\underline{h}-\bar{e}k\bar{o}-ch\bar{\imath}-s\bar{u}m\bar{a}$, with a man; $naukar-ku-r\bar{a}$ lan det, he gave a call to a servant. The first two examples show that when an adjective follows a noun, the article is appended to the adjective.

It is possible that the Tibetan suffix $p\bar{o}$ is sometimes employed as a definite article, but this is by no means always the case.

Declension.—The following declensions are based on those given by Shaw:—

Gen.	$gar{o}tas.$	$oldsymbol{g}ar{o}tin$.
Dat .	$gar{o}tar{a}$ - $rar{a}$.	$gar{o}tin$ - $dar{a}$.
Loc .	$gar{o}tar{a} ext{-}rar{a} ext{.}$	$gar{o}tin$ - $dar{a}$.

In all the above, in the Specimens, the suffixes ending in \bar{a} are often written with \bar{e} . Thus, $y\bar{e}$ for $y\bar{a}$, $z\bar{h}\bar{e}$ for $z\bar{h}\bar{a}$, $r\bar{e}$ for $r\bar{a}$. Also instead of $z\bar{h}\bar{e}$, we often have $ch\bar{e}$ or $ch\bar{z}$.

Shaw gives the following additional examples:—

· · · · · · · · · · · · · · · · · · ·	Sing.	F	LUR.	
Nom.	Gen.	Obl.	Nom.	Gen. & Abl.
gō, a cow	gōs	$gar{o}$	$(gar{o}ar{a})$	$(g\bar{o}an)$
gōlō, a bullock	$gar{o}los$	$gar{o}lar{o}$	gölē	$g\ddot{o}len$
biü, a boy	biüs	biü	Ъē	bēn
$t \underline{sh} r i g ar{a}$, a woman	$t \underline{sl} r \ddot{u} g ar{o} y ar{a}$	t <u>sħ</u> rügē	$(t \underline{s} \underline{h} r \ddot{u} g ar{o} y ar{u})$	$(t \underline{sh} r \ddot{u} g ar{o} y a n)$
$b\bar{o}$, a father	$(b\bar{o}s)$	$(b\bar{o})$	$bar{o}dar{a}$	$bar{o}dan$

In the above, words written in parenthesis are not given by Shaw.

Turning now to the List of words and the Specimens, we find that the declensional forms follow those given by Shaw very closely.

Gender is not clearly indicated in the case of nouns. In adjectives we have:—

mū<u>sh</u> nōrō, a good man. t<u>sh</u>rīgā nürī, a good woman. t<u>sh</u>rügōyū nōrā, good women. This seems to show that adjectives ending in \bar{o} form their feminine in \bar{i} , with an epenthetic change of the preceding vowel, while the feminine plural ends in \bar{a} (or \bar{e}), without any epenthetic change. In past participles of verbs, the plural ends in \tilde{e} , whether masculine or feminine, vide post.

Number.—The plural is generally formed by adding a vowel, and its oblique cases (including the genitive) usually end in the same vowel shortened and followed by n. I have not found any rule on which the selection of the vowel depends. The following instances of the plural appear in the List and in the Specimens. In the case of the word $m\bar{u}\underline{s}\underline{h}$, the plural is given as $m\bar{u}\underline{s}\underline{h}$ - $p\bar{o}$, men (List 124). This is very doubtful.

	PLUE.		
SING.	Nom.	Gen. & Obl.	
$b\bar{o}$, father	bōdā	bōdan	
molēi, a daughter	$molar{e}iar{a}$	molēian	
mū <u>sh</u> , a man	(?) $m\bar{u}$ <u>s</u> h - $p\bar{o}$	mū <u>s</u> h-pun	
$t \underline{sh} r i g ar{a}$, a woman	$-ts \underline{h}r\ddot{u}gar{o}yar{u}$	t <u>sl</u> ir ü gōyan	
apsh, a horse	$ap\underline{s}har{\imath},ap\underline{s}har{a}$	(?) apshin, apshan	
raghudmā, a mare	$raghudmiar{o}$	(?) raghudmion	
chughlā, a bull	$chular{a}nar{\imath}$ (sic)	(?) chulānin	
gōlō, a bullock	$g\ddot{o}lar{e}$	gölen	
$g\overline{o}$, a cow	$gar{o}ar{a}$	(?) gōan	
<u>s</u> huā, a dog	<u>s</u> ħüēō	(?) shüan	
$kh\bar{\imath}mar{o}$, a bitch	$khar{\imath}mar{o}ar{a}$. (?) khīmēan	
	*		

Regarding the use of $p\bar{o}$ to form the plural (if it does do so), we may note that \underline{zhap} - $p\bar{o}$, in the Specimen, is translated 'properties.'

Case.—The Agent I ends in $s\bar{a}$ (or $s\bar{e}$), as in Dras. As elsewhere, it is employed for the subject of transitive verbs which are not in the past tense. It has quite lost the force of the agent, and must be translated as a nominative.

The Agent II is employed before the past tense of transitive verbs. Its suffix is $y\bar{a}$ (or $y\bar{e}$). Thus, $bi\ddot{u}-y\bar{a}$ razit, the son said; $m\bar{u}\underline{sh}-p\bar{o}-y\bar{a}$ $b\bar{o}$ charist \bar{a} $t\bar{e}$, the man made (i.e. sent) him to feed (swine). In the Specimen there are one or two irregularities. In $bi\ddot{u}s$ $\underline{zh}ap-p\bar{o}$ lut tet, the son collected the properties, $bi\ddot{u}s$ is in the form of the genitive instead of being $bi\ddot{u}-y\bar{a}$. If this is not a mistake, $bi\ddot{u}s$ may be a contracted form of $bi\ddot{u}-s\bar{a}$, the Agent I. In $b\bar{o}-s\bar{a}$ dun chhūng, we have the Agent I used with the intransitive verb chhūng, become. The sentence is literally 'by the father a feast became,' i.e. the father made a feast.

The Accusative ends in $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$). Thus, $m\bar{\imath}-y\bar{a}$ tes $bi\bar{u}-\underline{zh}\bar{a}$ kutet, I have beaten his son (List No. 228); $ph\bar{o}-\underline{zh}\bar{a}$ kut $\bar{e}-t\bar{o}$, after beating him (No. 236).

The typical letter of the Ablative is \bar{o} , as in Dras. The usual suffix is $n\bar{o}$. Thus, $chh\bar{u}d\bar{o}ur-n\bar{o}$, from the well; $y\bar{a}r\bar{\imath}-n\bar{o}$, from before, hence, before, as in $m\bar{\imath}$ $y\bar{a}r\bar{\imath}-n\bar{o}$ $b\bar{o}$ (List No. 238), walk before me. $Y\bar{a}r\bar{\imath}-n\bar{o}$ by itself is used as suffix of the Ablative as in $m\bar{u}\underline{s}\underline{h}$ $n\bar{o}r\bar{o}-y\bar{a}r\bar{\imath}-n\bar{o}$, from a good man. Similarly we have $put\bar{o}-n\bar{o}$, behind.

Another suffix is $d\bar{e}\bar{o}$ or $d\bar{o}$ (cf. $d\bar{a}$, the suffix of the dative). Thus, $b\bar{o}$ - $de\bar{o}$, from a father; $tes\ mol\bar{e}i$ - $d\bar{o}$, than his sister (List No. 231); $y\bar{e}\ r\bar{a}z\bar{\imath}$ - $d\bar{o}$, from what order?

Connected with the dative suffix $r\bar{a}$, we have $r\bar{o}$, as in khus- $r\bar{o}$, from eating.

Connected with $\underline{zh}\bar{a}$ are $ch\bar{o}$ and $\underline{zh}\bar{a}$ - $n\bar{o}$, as in $h\bar{u}$ - $ch\bar{o}$, from this; hun- $ch\bar{o}$, from here (List No. 222); $b\bar{o}dan$ - $\underline{zh}\bar{a}$ - $n\bar{o}$, from fathers.

Yet another suffix is $y\bar{o}$ - $n\bar{o}$, which I have only met with pronouns.

In pun $ab\bar{a}\underline{s}\underline{h}$ - $k\bar{u}\bar{\imath}$ - $n\bar{o}$, in a riotous way, we have an ablative of manner.

The Genitive singular sometimes ends in \bar{a} (or \bar{e}) and sometimes in s. I have not succeeded in tracing any fixed rule on the subject. The following are examples:— $mol\bar{e}i\bar{a}$, of a daughter; $h\bar{a}$ $bun\bar{e}$ $m\bar{u}\underline{s}h$ - $\bar{e}k\bar{o}$ - $ch\bar{i}$ - $s\bar{u}m\bar{a}$, with a man of that country; $b\bar{o}s$, of a father; $m\bar{u}\underline{s}h$ $n\bar{o}r\bar{o}s$, of a good man; $h\bar{a}$ $ap\underline{s}h$ - $p\bar{o}s$ $l\bar{o}$, the age of this horse; $mi\bar{u}$ $s\bar{o}b\bar{o}s$, of my uncle. The genitive plural is the same as-the plural oblique form, as in $b\bar{o}dan$, of fathers; $mol\bar{e}ian$, of daughters. In No. 125 of the List, 'of good men' is translated by $n\bar{o}r\bar{o}$ $m\bar{u}\underline{s}h$ - $p\bar{o}y\bar{a}$. If this is correct, the termination $p\bar{o}$ is treated as if it were singular.

The usual termination of the Dative is $r\bar{a}^1$ (or $r\bar{e}$). Thus, $b\bar{o}-r\bar{a}$, to a father; $Ka\underline{sh}ir\bar{a}-r\bar{a}$, to Kashmir; $m\bar{u}\underline{sh}-\bar{e}k\bar{o}-r\bar{a}$, to one man; $b\bar{u}n\bar{\imath}$ $d\bar{u}r\bar{\imath}-ku-r\bar{a}$, to a far country (here the base apparently takes $\bar{\imath}$ for the oblique form singular before adding the suffix).

Another termination is $d\bar{a}$ (or $d\bar{e}$), as $b\bar{o}$ - $d\bar{e}$ ut, he came to his father. This is probably borrowed from Tibetan.

Yet another is the Tibetan $l\bar{a}$, as in $m\bar{e}r\bar{e}$ - $l\bar{a}$ tet, he was made to compassion, he became compassionate.

In the plural, $d\bar{a}$ seems to be preferred. Thus, $b\bar{o}dan-d\bar{a}$, to fathers; $moleian-d\bar{a}$, to daughters; $m\bar{u}\underline{s}h-pun-d\bar{a}$, to men; $l\bar{u}l\bar{i}-m\bar{o}yun-d\bar{a}$, to harlots.

The Locative takes the termination $r\bar{a}$ (or $r\bar{e}$) like the dative. Thus, $g\bar{o}t\bar{a}$ - $r\bar{a}$ and $g\bar{o}t\bar{a}$ - $r\bar{e}$, in the house; $b\bar{e}s\bar{a}$ - $r\bar{e}$ $g\bar{o}s$, he went on a journey. In these two, the oblique form is made by adding \bar{a} . In $gulli\bar{o}$ - $r\bar{a}$, on the finger, the oblique form apparently ends in \bar{o} .

Another termination of the locative is $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$), sometimes written $ch\bar{e}$ or $ch\bar{i}$. Thus, $arg\bar{o}$ - $\underline{zh}\bar{a}$, on the back; $t\underline{sh}r\bar{e}\underline{sh}\bar{e}$ - $\underline{zh}\bar{e}$, (he sent him) into the field; $h\bar{u}$ $wa\underline{kh}sp\bar{i}$ - $ch\bar{i}$, at that time; $gr\bar{i}$ - $ch\bar{e}$ khril bet, on the neck there was embracing.

In $t\underline{sh}r\bar{e}\underline{sh}\bar{u}s$ -kari, (the elder son was) in the field, we have some kind of compound locative. In cognate dialects $k\bar{a}ry\bar{o}$ or $k\bar{a}r\bar{i}$ means 'for.'

¹ So also in Persian.

I have said in the above all that I know about the oblique form. For the singular, the rule seems to be that words ending in a vowel have the oblique form the same as in the Nominative, while those ending in a consonant take \bar{z} or \bar{a} .

Adjectives.—The only instance of feminine adjectives with which I am acquainted have been given under the head of genders of noun substantives. Adjectives do not change for case so far as I have seen. Thus, $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$, a good man; $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$ - $r\bar{a}$, to a good man; $n\bar{o}r\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}$, good men.

Adjectives generally follow the nouns they qualify, and case-suffixes are then added to them and not to the noun, as in $m\bar{u}\underline{s}\underline{h}$ $n\bar{o}r\bar{o}$ - $r\bar{a}$, above.

Comparison is made as usual, the noun with which comparison is made being put in the Ablative.

IV. PRONOUNS.

The first two personal pronouns are declined as follows:—

	Sing.		Pri	Pice,	
-	I	Thou	We	You	
Nom.	$m\widetilde{\overline{o}},\ m\overline{\imath}$	tii, tī	$bar{a}$, $beng$	<u>ts</u> ü, <u>ts</u> ī	
Ag. I.	$mar{a}$ - $sar{a}$, $mar{\imath}$ - $sar{a}^{\sharp}$	tü-sā, tī-sã	$bar{a}$ - $sar{a}$, $beng$ - $sar{a}$	<u>ts</u> ü-s ā, <u>ts</u> ī-sā	
Ag. II.	$mar{\imath}$ - $yar{ar{a}}$	$tar{\imath} ext{-}yar{a}$	bā-yā, beng-yā	<u>ts</u> ī-yā	
Acc.	$m\widetilde{o}$ - $z\underline{h}ar{a}$	$t\ddot{u}$ – zh $ar{a}$	assü-rā	<u>ts</u> ü-rā	
∆bl.	mõ-yōnō, mõ-deō	$t\ddot{u}$ – $yar{o}nar{o}$	assü-yōnō, assü-deō	<u>ts</u> ü-yōnō	
den.	$mar{\imath}$, $mi\ddot{u}$	$tar{\imath},tiar{u}$	assü	<u>ts</u> ī, <u>ts</u> ü	
Dat.)		*			
Loc.	$mar{a}$ - $rar{a}$	tī-rā, tü-rā	assü-rā	<u>ts</u> ī-rā, <u>ts</u> ü-rā	

In the Specimen we have a form not provided for above. It is $m\bar{a}$ - $g\bar{u}$, (make) me (thy servant).

Demonstrative Pronouns and pronouns of the third person.

Three bases have been noted,— $s\bar{o}$, $ph\bar{o}$, and $h\bar{a}$. The first two seem to be used indifferently for 'this,' 'that,' or 'he.' $H\bar{a}$, in the Specimens, sometimes means 'that,' but more usually 'this,' or 'he.' It is not mentioned by Shaw, who declines the other two in full.

The Accusative ends in $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$). Thus, $m\bar{\imath}-y\bar{a}$ tes $bi\bar{u}-\underline{zh}\bar{a}$ kutet, I have beaten his son (List No. 228); $ph\bar{o}-\underline{zh}\bar{a}$ kut $\bar{e}-t\bar{o}$, after beating him (No. 236).

The typical letter of the Ablative is \bar{o} , as in Dras. The usual suffix is $n\bar{o}$. Thus, $chh\bar{u}d\bar{o}ur-n\bar{o}$, from the well; $y\bar{a}r\bar{\imath}-n\bar{o}$, from before, hence, before, as in $m\bar{\imath}$ $y\bar{a}r\bar{\imath}-n\bar{o}$ $b\bar{o}$ (List No. 238), walk before me. $Y\bar{a}r\bar{\imath}-n\bar{o}$ by itself is used as suffix of the Ablative as in $m\bar{u}\underline{s}\underline{h}$ $n\bar{o}r\bar{o}-y\bar{a}r\bar{\imath}-n\bar{o}$, from a good man. Similarly we have $put\bar{o}-n\bar{o}$, behind.

Another suffix is $d\bar{e}\bar{o}$ or $d\bar{o}$ (cf. $d\bar{a}$, the suffix of the dative). Thus, $b\bar{o}$ - $de\bar{o}$, from a father; $tes\ mol\bar{e}i$ - $d\bar{o}$, than his sister (List No. 231); $y\bar{e}\ r\bar{a}z\bar{\imath}$ - $d\bar{o}$, from what order?

Connected with the dative suffix $r\bar{a}$, we have $r\bar{o}$, as in khus- $r\bar{o}$, from eating.

Connected with $\underline{zh}\bar{a}$ are $ch\bar{o}$ and $\underline{zh}\bar{a}$ - $n\bar{o}$, as in $h\bar{u}$ - $ch\bar{o}$, from this; hun- $ch\bar{o}$, from here (List No. 222); $b\bar{o}dan$ - $\underline{zh}\bar{a}$ - $n\bar{o}$, from fathers.

Yet another suffix is $y\bar{o}$ - $n\bar{o}$, which I have only met with pronouns.

In pun $ab\bar{a}\underline{s}\underline{h}$ - $k\bar{u}\bar{\imath}$ - $n\bar{o}$, in a riotous way, we have an ablative of manner.

The Genitive singular sometimes ends in \bar{a} (or \bar{e}) and sometimes in s. I have not succeeded in tracing any fixed rule on the subject. The following are examples:— $mol\bar{e}i\bar{a}$, of a daughter; $h\bar{a}$ $bun\bar{e}$ $m\bar{u}\underline{sh}$ - $\bar{e}k\bar{o}$ - $ch\bar{\iota}$ - $s\bar{u}m\bar{a}$, with a man of that country; $b\bar{o}s$, of a father; $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}s$, of a good man; $h\bar{a}$ $ap\underline{sh}$ - $p\bar{o}s$ $l\bar{o}$, the age of this horse; $mi\bar{u}$ $s\bar{o}b\bar{o}s$, of my uncle. The genitive plural is the same as-the plural oblique form, as in $b\bar{o}dan$, of fathers; $mol\bar{e}ian$, of daughters. In No. 125 of the List, 'of good men' is translated by $n\bar{o}r\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}y\bar{a}$. If this is correct, the termination $p\bar{o}$ is treated as if it were singular.

The usual termination of the Dative is $r\bar{a}^1$ (or $r\bar{e}$). Thus, $b\bar{o}$ - $r\bar{a}$, to a father; $Ka\underline{s}\underline{h}ir\bar{a}$ - $r\bar{a}$, to Kashmir; $m\bar{u}\underline{s}\underline{h}$ - $\bar{e}k\bar{o}$ - $r\bar{a}$, to one man; $b\bar{u}n\bar{i}$ $d\bar{u}r\bar{i}$ -ku- $r\bar{a}$, to a far country (here the base apparently takes \bar{i} for the oblique form singular before adding the suffix).

Another termination is $d\bar{a}$ (or $d\bar{e}$), as $b\bar{o}$ - $d\bar{e}$ ut, he came to his father. This is probably borrowed from Tibetan.

Yet another is the Tibetan $l\bar{a}$, as in $m\bar{e}r\bar{e}$ - $l\bar{a}$ tet, he was made to compassion, he became compassionate.

In the plural, $d\bar{a}$ seems to be preferred. Thus, $b\bar{o}dan-d\bar{a}$, to fathers; $m\bar{u}\underline{s}h-pun-d\bar{a}$, to men; $l\bar{u}l\bar{i}-m\bar{o}yun-d\bar{a}$, to harlots.

The Locative takes the termination $r\bar{a}$ (or $r\bar{e}$) like the dative. Thus, $g\bar{o}t\bar{a}-r\bar{a}$ and $g\bar{o}t\bar{a}-r\bar{e}$, in the house; $b\bar{e}s\bar{a}-r\bar{e}$ $g\bar{o}s$, he went on a journey. In these two, the oblique form is made by adding \bar{a} . In $gulli\bar{o}-r\bar{a}$, on the finger, the oblique form apparently ends in \bar{o} .

Another termination of the locative is $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$), sometimes written $ch\bar{e}$ or $ch\bar{i}$. Thus, $arg\bar{o}$ - $\underline{zh}\bar{a}$, on the back; $t\underline{sh}r\bar{e}\underline{sh}\bar{e}$ - $\underline{zh}\bar{e}$, (he sent him) into the field; $h\bar{u}$ $wa\underline{kh}sp\bar{i}$ - $ch\bar{i}$, at that time; $gr\bar{i}$ - $ch\bar{e}$ khril bet, on the neck there was embracing.

In $t\underline{sh}r\bar{e}\underline{sh}\bar{u}s$ -kari, (the elder son was) in the field, we have some kind of compound locative. In cognate dialects $k\bar{a}ry\bar{o}$ or $k\bar{a}ri$ means 'for.'

¹ So also in Persian.

I have said in the above all that I know about the oblique form. For the singular, the rule seems to be that words ending in a vowel have the oblique form the same as in the Nominative, while those ending in a consonant take $\bar{\imath}$ or \bar{a} .

Adjectives.—The only instance of feminine adjectives with which I am acquainted have been given under the head of genders of noun substantives. Adjectives do not change for case so far as I have seen. Thus, $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$, a good man; $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$ - $r\bar{a}$, to a good man; $n\bar{o}r\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}$, good men.

Adjectives generally follow the nouns they qualify, and case-suffixes are then added to them and not to the noun, as in $m\bar{u}sh$ $n\bar{o}r\bar{o}-r\bar{a}$, above.

Comparison is made as usual, the noun with which comparison is made being put in the Ablative.

IV. PRONOUNS.

The first two personal pronouns are declined as follows:—

	Sı	Sing.		Piub,	
	I	Thou	We	You	
om.	$m\widetilde{\widetilde{o}},\ m\widetilde{\imath}$	tü, tī	$bar{a}$, $beng$	<u>ts</u> ü, <u>ts</u> ī

Dat.	-			,	
Loc.	mā-rā	tī-rā, tü-rā	assü-rā	<u>ts</u> ī-rā, <u>ts</u> ü-rā	

In the Specimen we have a form not provided for above. It is $m\bar{a}$ - $g\bar{u}$, (make) me (thy servant).

Demonstrative Pronouns and pronouns of the third person.

Three bases have been noted,— $s\bar{o}$, $ph\bar{o}$, and $h\bar{a}$. The first two seem to be used indifferently for 'this,' 'that,' or 'he.' $H\bar{a}$, in the Specimens, sometimes means 'that,' but more usually 'this,' or 'he.' It is not mentioned by Shaw, who declines the other two in full.

The Accusative ends in $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$). Thus, $m\bar{\imath}$ - $y\bar{a}$ tes $bi\ddot{u}$ - $\underline{zh}\bar{a}$ kutet, I have beaten his son (List No. 228); $ph\bar{o}$ - $\underline{zh}\bar{a}$ kut \bar{e} - $t\bar{o}$, after beating him (No. 236).

The typical letter of the Ablative is \bar{o} , as in Dras. The usual suffix is $n\bar{o}$. Thus, $chh\bar{u}d\bar{o}ur-n\bar{o}$, from the well; $y\bar{a}r\bar{\imath}-n\bar{o}$, from before, hence, before, as in $m\bar{\imath}$ $y\bar{a}r\bar{\imath}-n\bar{o}$ $b\bar{o}$ (List No. 238), walk before me. $Y\bar{a}r\bar{\imath}-n\bar{o}$ by itself is used as suffix of the Ablative as in $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}-y\bar{a}r\bar{\imath}-n\bar{o}$, from a good man. Similarly we have $put\bar{o}-n\bar{o}$, behind.

Another suffix is $d\bar{e}\bar{o}$ or $d\bar{o}$ (cf. $d\bar{a}$, the suffix of the dative). Thus, $b\bar{o}$ - $de\bar{o}$, from a father; $tes\ mol\bar{e}i$ - $d\bar{o}$, than his sister (List No. 231); $y\bar{e}\ r\bar{a}z\bar{\imath}$ - $d\bar{o}$, from what order?

Connected with the dative suffix $r\bar{a}$, we have $r\bar{o}$, as in khus- $r\bar{o}$, from eating.

Connected with $\underline{zh}\bar{a}$ are $ch\bar{o}$ and $\underline{zh}\bar{a}$ - $n\bar{o}$, as in $h\bar{u}$ - $ch\bar{o}$, from this; hun- $ch\bar{o}$, from here (List No. 222); $b\bar{o}dan$ - $\underline{zh}\bar{a}$ - $n\bar{o}$, from fathers.

Yet another suffix is $y\bar{o}$ - $n\bar{o}$, which I have only met with pronouns.

In pun abāsh-kūī-nō, in a riotous way, we have an ablative of manner.

The Genitive singular sometimes ends in \bar{a} (or \bar{e}) and sometimes in s. I have not succeeded in tracing any fixed rule on the subject. The following are examples:— $mol\bar{e}i\bar{a}$, of a daughter; $h\bar{a}$ $bun\bar{e}$ $m\bar{u}\underline{s}h$ - $\bar{e}k\bar{o}$ - $ch\bar{i}$ - $sim\bar{a}$, with a man of that country; $b\bar{o}s$, of a father; $m\bar{u}\underline{s}h$ $n\bar{o}r\bar{o}s$, of a good man; $h\bar{a}$ $ap\underline{s}h$ - $p\bar{o}s$ $l\bar{o}$, the age of this horse; $mi\bar{u}$ $s\bar{o}b\bar{o}s$, of my uncle. The genitive plural is the same as-the plural oblique form, as in $b\bar{o}dan$, of fathers; $mol\bar{e}ian$, of daughters. In No. 125 of the List, 'of good men' is translated by $n\bar{o}r\bar{o}$ $m\bar{u}\underline{s}h$ - $p\bar{o}y\bar{a}$. If this is correct, the termination $p\bar{o}$ is treated as if it were singular.

The usual termination of the Dative is $r\bar{a}^1$ (or $r\bar{e}$). Thus, $b\bar{o}$ - $r\bar{a}$, to a father; $Ka\underline{s}\underline{h}ir\bar{a}$ - $r\bar{a}$, to Kashmir; $m\bar{u}\underline{s}\underline{h}$ - $\bar{e}k\bar{o}$ - $r\bar{a}$, to one man; $b\bar{u}n\bar{\imath}$ $d\bar{u}r\bar{\imath}$ -ku- $r\bar{a}$, to a far country (here the base apparently takes $\bar{\imath}$ for the oblique form singular before adding the suffix).

Another termination is $d\bar{a}$ (or $d\bar{e}$), as $b\bar{o}$ - $d\bar{e}$ ut, he came to his father. This is probably borrowed from Tibetan.

Yet another is the Tibetan $l\bar{a}$, as in $m\bar{e}r\bar{e}$ - $l\bar{a}$ tet, he was made to compassion, he became compassionate.

In the plural, $d\bar{a}$ seems to be preferred. Thus, $b\bar{o}dan-d\bar{a}$, to fathers; $m\bar{u}\underline{s}\underline{h}$ - $pun-d\bar{a}$, to men; $l\bar{u}l\bar{i}-m\bar{o}yun-d\bar{a}$, to harlots.

The Locative takes the termination $r\bar{a}$ (or $r\bar{e}$) like the dative. Thus, $g\bar{o}t\bar{a}-r\bar{a}$ and $g\bar{o}t\bar{a}-r\bar{e}$, in the house; $b\bar{e}s\bar{a}-r\bar{e}$ $g\bar{o}s$, he went on a journey. In these two, the oblique form is made by adding \bar{a} . In $gulli\bar{o}-r\bar{a}$, on the finger, the oblique form apparently ends in \bar{o} .

Another termination of the locative is $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$), sometimes written $ch\bar{e}$ or $ch\bar{i}$. Thus, $arg\bar{o}$ - $\underline{zh}\bar{a}$, on the back; $t\underline{sh}r\bar{e}\underline{sh}\bar{e}$ - $\underline{zh}\bar{e}$, (he sent him) into the field; $h\bar{u}$ $wa\underline{kh}sp\bar{i}$ - $ch\bar{i}$, at that time; $gr\bar{i}$ - $ch\bar{e}$ khril bet, on the neck there was embracing.

In $t\underline{sh}r\bar{e}\underline{sh}\bar{u}s$ -kari, (the elder son was) in the field, we have some kind of compound locative. In cognate dialects $k\bar{a}ry\bar{o}$ or $k\bar{a}ri$ means 'for.'

I have said in the above all that I know about the oblique form. For the singular, the rule seems to be that words ending in a vowel have the oblique form the same as in the Nominative, while those ending in a consonant take $\bar{\imath}$ or \bar{a} .

Adjectives.—The only instance of feminine adjectives with which I am acquainted have been given under the head of genders of noun substantives. Adjectives do not change for case so far as I have seen. Thus, $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$, a good man; $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$ - $r\bar{a}$, to a good man; $n\bar{o}r\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}$, good men.

Adjectives generally follow the nouns they qualify, and case-suffixes are then added to them and not to the noun, as in $m\bar{u}sh$ $n\bar{o}r\bar{o}-r\bar{a}$, above.

Comparison is made as usual, the noun with which comparison is made being put in the Ablative.

IV. PRONOUNS.

The first two personal pronouns are declined as follows:—

	Sing.		PLUB.	
	I	Thou	We	You
Nom.	$m\widetilde{\widetilde{o}},\ m\overline{\imath}$	tii, tī	$bar{a}$, $beng$	<u>ts</u> ü, <u>ts</u> ī
Ag. I.	mā•sā, mī-sā‡	tü-sā, tī-sā	bā-sā, beng-sā	<u>ts</u> ü-sā, <u>ts</u> ī-sā
Ag. II.	$mar{\imath}$ - $yar{a}$	$tar{\imath} ext{-}yar{a}$	bā-yā, beng-yā	$t\underline{s}ar{\imath}-yar{a}$
Acc.	$m\widetilde{o}$ - $z\underline{h}ar{a}$	tü- <u>zh</u> ā	assü-rā	<u>ts</u> ü-rā
Abl.	$m\widetilde{o}$ -yงกอ, $m\widetilde{o}$ -de \overline{o}	tü-yōnō	assü-yōnō, assü-deō	<u>ts</u> ü-yōnō
łen.	mī, miű	$tar{\imath},tiar{u}$	assü	<u>ts</u> ī, <u>ts</u> ü
Pat.				*
Loc.	$mar{a}$ - $rar{a}$	tī-rā, tü-rā	assü-rā	<u>ts</u> ī-rā, <u>ts</u> ü-rā

In the Specimen we have a form not provided for above. It is $m\bar{a}$ - $g\bar{u}$, (make) me (thy servant).

Demonstrative Pronouns and pronouns of the third person.

Three bases have been noted,— $s\bar{o}$, $ph\bar{o}$, and $h\bar{a}$. The first two seem to be used indifferently for 'this,' 'that,' or 'he.' $H\bar{a}$, in the Specimens, sometimes means 'that,' but more usually 'this,' or 'he.' It is not mentioned by Shaw, who declines the other two in full.

The Accusative ends in $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$). Thus, $m\bar{\imath}-y\bar{a}$ tes $bi\ddot{u}-\underline{zh}\bar{a}$ kutet, I have beaten his son (List No. 228); $ph\bar{o}-\underline{zh}\bar{a}$ kut \bar{e} - $t\bar{o}$, after beating him (No. 236).

The typical letter of the Ablative is \bar{o} , as in Dras. The usual suffix is $n\bar{o}$. Thus, $chh\bar{u}d\bar{o}ur-n\bar{o}$, from the well; $y\bar{a}r\bar{\imath}-n\bar{o}$, from before, hence, before, as in $m\bar{\imath}$ $y\bar{a}r\bar{\imath}-n\bar{o}$ $b\bar{o}$ (List No. 238), walk before me. $Y\bar{a}r\bar{\imath}-n\bar{o}$ by itself is used as suffix of the Ablative as in $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}-y\bar{a}r\bar{\imath}-n\bar{o}$, from a good man. Similarly we have $put\bar{o}-n\bar{o}$, behind.

Another suffix is $d\bar{e}\bar{o}$ or $d\bar{o}$ (cf. $d\bar{a}$, the suffix of the dative). Thus, $b\bar{o}$ - $de\bar{o}$, from a father; $tes\ mol\bar{e}i$ - $d\bar{o}$, than his sister (List No. 231); $y\bar{e}\ r\bar{a}z\bar{\imath}$ - $d\bar{o}$, from what order?

Connected with the dative suffix $r\bar{a}$, we have $r\bar{o}$, as in khus- $r\bar{o}$, from eating.

Connected with $\underline{zh}\bar{a}$ are $ch\bar{o}$ and $\underline{zh}\bar{a}$ - $n\bar{o}$, as in $h\bar{u}$ - $ch\bar{o}$, from this; hun- $ch\bar{o}$, from here (List No. 222); $b\bar{o}dan$ - $\underline{zh}\bar{a}$ - $n\bar{o}$, from fathers.

Yet another suffix is $y\bar{o}$ - $n\bar{o}$, which I have only met with pronouns.

In pun $ab\bar{a}\underline{sh}$ - $k\bar{u}\bar{\imath}$ - $n\bar{o}$, in a riotous way, we have an ablative of manner.

The Genitive singular sometimes ends in \bar{a} (or \bar{e}) and sometimes in s. I have not succeeded in tracing any fixed rule on the subject. The following are examples:— $mol\bar{e}i\bar{a}$, of a daughter; $h\bar{a}$ $bun\bar{e}$ $m\bar{u}\underline{s}h$ - $\bar{e}k\bar{o}$ - $ch\bar{i}$ - $s\bar{u}m\bar{a}$, with a man of that country; $b\bar{o}s$, of a father; $m\bar{u}\underline{s}h$ $n\bar{o}r\bar{o}s$, of a good man; $h\bar{a}$ $ap\underline{s}h$ - $p\bar{o}s$ $l\bar{o}$, the age of this horse; $mi\bar{u}$ $s\bar{o}b\bar{o}s$, of my uncle. The genitive plural is the same as-the plural oblique form, as in $b\bar{o}dan$, of fathers; $mol\bar{e}ian$, of daughters. In No. 125 of the List, 'of good men' is translated by $n\bar{o}r\bar{o}$ $m\bar{u}\underline{s}h$ - $p\bar{o}y\bar{a}$. If this is correct, the termination $p\bar{o}$ is treated as if it were singular.

The usual termination of the Dative is $r\bar{a}^1$ (or $r\bar{e}$). Thus, $b\bar{o}$ - $r\bar{a}$, to a father; $Ka\underline{sh}ir\bar{a}$ - $r\bar{a}$, to Kashmir; $m\bar{u}\underline{sh}$ - $\bar{e}k\bar{o}$ - $r\bar{a}$, to one man; $b\bar{u}n\bar{i}$ $d\bar{u}r\bar{i}$ -ku- $r\bar{a}$, to a far country (here the base apparently takes \bar{i} for the oblique form singular before adding the suffix).

Another termination is $d\bar{a}$ (or $d\bar{e}$), as $b\bar{o}$ - $d\bar{e}$ ut, he came to his father. This is probably borrowed from Tibetan.

Yet another is the Tibetan $l\bar{a}$, as in $m\bar{e}r\bar{e}$ - $l\bar{a}$ tet, he was made to compassion, he became compassionate.

In the plural, $d\bar{a}$ seems to be preferred. Thus, $b\bar{o}dan-d\bar{a}$, to fathers; $m\bar{u}\underline{s}h-pun-d\bar{a}$, to men; $l\bar{u}l\bar{\imath}-m\bar{o}yun-d\bar{a}$, to harlots.

The Locative takes the termination $r\bar{a}$ (or $r\bar{e}$) like the dative. Thus, $g\bar{o}t\bar{a}-r\bar{a}$ and $g\bar{o}t\bar{a}-r\bar{e}$, in the house; $b\bar{e}s\bar{a}-r\bar{e}$ $g\bar{o}s$, he went on a journey. In these two, the oblique form is made by adding \bar{a} . In $gulli\bar{o}-r\bar{a}$, on the finger, the oblique form apparently ends in \bar{o} .

Another termination of the locative is $\underline{zh}\bar{a}$ (or $\underline{zh}\bar{e}$), sometimes written $ch\bar{e}$ or $ch\bar{i}$. Thus, $arg\bar{o}$ - $\underline{zh}\bar{a}$, on the back; $t\underline{sh}r\bar{e}\underline{sh}\bar{e}$ - $\underline{zh}\bar{e}$, (he sent him) into the field; $h\bar{u}$ wakh $sp\bar{i}$ - $ch\bar{i}$, at that time; $gr\bar{i}$ - $ch\bar{e}$ khril bet, on the neck there was embracing.

In $t\underline{sh}r\bar{e}\underline{sh}\bar{u}s$ -kari, (the elder son was) in the field, we have some kind of compound locative. In cognate dialects $k\bar{a}ry\bar{o}$ or $k\bar{a}r\bar{i}$ means 'for.'

¹ So also in Persian.

I have said in the above all that I know about the oblique form. For the singular, the rule seems to be that words ending in a vowel have the oblique form the same as in the Nominative, while those ending in a consonant take $\bar{\imath}$ or \bar{a} .

Adjectives.—The only instance of feminine adjectives with which I am acquainted have been given under the head of genders of noun substantives. Adjectives do not change for case so far as I have seen. Thus, $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$, a good man; $m\bar{u}\underline{sh}$ $n\bar{o}r\bar{o}$ - $r\bar{a}$, to a good man; $n\bar{o}r\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}$, good men.

Adjectives generally follow the nouns they qualify, and case-suffixes are then added to them and not to the noun, as in $m\bar{u}sh$ $n\bar{o}r\bar{o}-r\bar{a}$, above.

Comparison is made as usual, the noun with which comparison is made being put in the Ablative.

IV. PRONOUNS.

The first two personal pronouns are declined as follows:—

	s	ing.	Pro	JB.
	I	Thou	We	You
Nom.	$m\widetilde{\widetilde{o}},\ m\widetilde{\imath}$	tü, tī	$bar{a}$, $beng$	<u>ts</u> ü, <u>ts</u> ī
Ag. I.	mā-sā, mī-sā	tü-sā, tī-sā	$bar{a}$ - $sar{a}$, $beng$ - $sar{a}$	<u>ts</u> ü-sā, <u>ts</u> ī-sā
Ag. II.	$mar{\imath} - yar{a}$	$tar{\imath}-yar{a}$	bā-yā, beng-yā	<u>ts</u> ī-yā
Acc.	$m\widetilde{\widetilde{o}}$ - $z\underline{h}ar{a}$	tü- <u>zh</u> ā	assü-rā	<u>ts</u> ü -rā
Abl.	$m\widetilde{o}$ - $yar{o}$ $nar{o}$, $m\widetilde{o}$ - $dear{o}$	tü-yōnō	assü-yōnō, assü-deō	<u>ts</u> ü-yōnō
Gen.	mī, miü	$tar{\imath},tiar{u}$	assü	<u>ts</u> ī, <u>ts</u> ü
Dat.			*	
Loc.	$mar{a}$ - $rar{a}$	tī-rā, tü-rā	assü-rā	<u>ts</u> ī-rā, <u>ts</u> ü-rā

In the Specimen we have a form not provided for above. It is $m\bar{a}$ - $g\bar{u}$, (make) me (thy servant).

Demonstrative Pronouns and pronouns of the third person.

Three bases have been noted,— $s\bar{o}$, $ph\bar{o}$, and $h\bar{a}$. The first two seem to be used indifferently for 'this,' 'that,' or 'he.' $H\bar{a}$, in the Specimens, sometimes means 'that,' but more usually 'this,' or 'he.' It is not mentioned by Shaw, who declines the other two in full.

3	Sing.		PLUR.	
	8 ō	$ph\bar{o}$	80	рһо
Nom.	$sar{o}$, fem. $sar{a}$	<i>phō</i> , (? fem.)	tē	$poldsymbol{h}ar{e}$
Ag. I.	รดิ-รลิ	$par{h}ar{\circ} ext{-}sar{a}$	$tar{e}$ - $sar{a}$	$phar{e} ext{-}sar{a}$
Ag. II.	sō-yā	p h ar o - y ar a	$tar{e}$ - $yar{a}$	$p h ar{e} \cdot y ar{a}$
Acc.	$tar{e}$ - $zar{h}ar{a}$	(?) $ph\bar{o}$ - $zh\bar{a}$	ten- $z h ar a$	phēün- <u>zh</u> ā
Abl.	$tar{e}$ - $yar{o}nar{o}$	(?) $ph\bar{o}\cdot y\bar{o}n\bar{o}$	$ten ext{-}yar{o}nar{o}$	phēün-yōnō
Gen.	tes, tāsā	phos	ten	phēün
$\left\{egin{array}{l} ext{Dat.} \ ext{Loc.} \end{array} ight\}$	$tar{e}$ - $rar{a}$, $tar{a}sar{a}$ - $rar{a}$	(?) phō-rā	$ten-dar{a}$	$phar{e}\ddot{u}n ext{-}dar{a}$

In the Specimen we have $t\bar{\imath}$ instead of $s\bar{o}$ - $y\bar{a}$, in $t\bar{\imath}$ ten- $d\bar{a}$ $d\bar{e}$, he gave to them.

The following examples of the use of $h\bar{a}$, $h\bar{u}$, or $h\bar{o}$, this, that, occur in the Specimens:—

hā-mö yē bet, what is this?

hō mūsh-pō-yā bō phak charistā tē, that man sent him to feed swine.

hū-gā kī-gā nā det, even this (or 'that') no one gave to him.

hū wakhspī-chī bōnō tshrēshūs-kari. Hū-chō sō yē, at that time the elder (son) was on the field. From that (field) having come (he heard music, etc.).

hā apsh-pō-s lō katāk sar billā, how old is this horse? (List No. 221).

hā bunē mūsh-ēkō-chī-sümā, with a man of that country.

hus rin- $p\bar{o}$, the price of this (List No. 232).

 $h\bar{u}$ - $r\bar{u}$ - $n\bar{o}$ (for $h\bar{u}$ - $r\bar{a}$ - $n\bar{o}$), from among them (the younger said to his father).

With this pronoun, we may compare hun-chō, from here (List No. 222), and hātuk sar bai, these many years having gone (I have not disobeyed you).

There is one other demonstrative pronoun $b\bar{o}$, of which a solitary example occurs in the Specimen, viz. in $h\bar{o}$ $m\bar{u}\underline{s}h$ - $p\bar{o}$ - $y\bar{a}$ $b\bar{o}$ $t\underline{s}h$ r $\bar{e}\underline{s}h\bar{e}$ $\underline{z}h\bar{e}$ $\underline{p}hak$ $charist\bar{a}$ $t\bar{e}$, that man sent him to feed swine.

Other pronominal forms are $k\bar{o}$, who? $kis\bar{e}$, whose? $kis\bar{e}-\underline{z}h\bar{a}-n\bar{o}$, from whom? $y\bar{e}$, what? $k\bar{\imath}-g\bar{a}$, by any one (Agent II); $kat\bar{a}k$, how many?

V. VERBS.—The conjugation of the verb in the Brōkpā of Dāh-Hanū is in the main the same as that of Dras, but in some respects it more nearly follows Kāshmīrī.

A. Auxiliary verbs, and verbs substantive.

Present, 'I am, etc.'

		Sing.		Plur.	
1	, ·	$m\widetilde{ec{\sigma}}$ $h\widetilde{ec{a}}s$	· .	bā hānis	
2		tü h ã ya	. *	<u>ts</u> ī hānī	× • •
3		sō $h\widetilde{\widetilde{a}}y$		 tē hānī	2

The word bet can be used, instead, for any person of either number (see below).

Past, 'I was, etc.'

	Sing.	Plur
, 1	mõ hüs	bā hũs
2	tü hüā, āstu	<u>ts</u> ī hüī, āstin
3	sō hüā, āstu	t ē hün , āstin

The forms $h\ddot{u}\bar{a}$, $h\ddot{u}\bar{a}$, and $h\ddot{u}n$ are employed when the subject of the verb is near, and $\bar{a}stu$ and $\bar{a}stin$ when it is far. The initial h of $h\ddot{u}a$ is elided on one occasion in the Specimen, so that we have ' $\ddot{u}\bar{a}$.

I have not come across any instances of the feminine of either of these tenses.

The following parts of the verb 'to become' occur in the Specimens:-

bō, become (Imperative).

billā, they are (List No. 221). This is probably really a third person singular. Compare byāllā, he is going; kutyāllā, he is striking. At the same time it may be the same as the Dras bilā, which, as I have pointed out, may be an instance of borrowing from Burushaski.

bet, this has been already given under the verb substantive as meaning 'am,' 'is,' 'are.' It seems to be by origin a third singular past (compare kutet), and to be literally 'he became.' Similarly biss, he became, is used in Bashgalī to mean 'he is.'

 $b\bar{u}$, he became. In $b\bar{u}st\bar{e}$ $b\tilde{u}$, literally 'he became to be,' it means 'began,' as in other cognate languages.

 $b\bar{u}d\bar{o}\bar{s}$, I became (a sinner). Compare Sarīqōlī $v\bar{u}dam$, Persian $b\bar{u}dam$, I was. $b\bar{u}st\bar{e}$, to be (Infinitive).

bet- $t\bar{o}$, on becoming.

B. Active Verb.—The conjugation of Transitive verbs differs from that of Intransitive verbs only in the past tenses.

The Brōkpā of Dāh-Hanū differs from other Shinā dialects in its formation of the Future. In other dialects this tense is the same as the Simple Present. In Dāh-Hanū it has two forms, one which does not change for number and person formed with the suffix $k\bar{o}$, and another which is the same as the Definite (not the Simple) Present.

Imperative.—The Imperative singular usually ends either in $\bar{\imath}$ or in \bar{e} . The plural ends in \bar{a} . Examples are, $kut\bar{\imath}$, strike; $y\bar{e}$, come; $uth\bar{e}$ or $\ddot{o}t\bar{e}$, rise, stand (with dental th); $d\bar{e}$, give; $bah\bar{e}$, cultivate; $sky\bar{e}$, look. In the following there is no final $\bar{\imath}$ or \bar{e} , $b\bar{o}$, go; $kh\bar{a}$, eat; $b\bar{a}\underline{s}\underline{h}$, sit; $m\ddot{u}$, die; $tab\bar{u}$, run; $b\bar{o}$, become, be; $p\bar{\imath}$, drink; $s\bar{o}$, sleep; $l\bar{\imath}$, lick; $b\bar{o}$, weave; $\underline{z}h\bar{\imath}$, see. The following adds $r\bar{e}$, $chh\bar{\imath}$ - $r\bar{e}$, make (me thy servant), and is possibly a respectful Imperative. Shaw also gives qun- $t\bar{e}$, hear; and $zbr\bar{\imath}$ - $t\bar{e}$, write.

Examples of the Imperative plural are $nagh\bar{a}l\bar{e}ar\bar{a}$ (? $nagh\bar{a}l\bar{e}ar\bar{a}$), bring ye forth; $phan\bar{a}$, put ye on (clothes); $khant\bar{a}r\bar{a}$, put ye on (a ring); $unj\bar{a}r\bar{a}$, put ye on (shoes); $y\bar{e}$ (sic), come ye; $kh\bar{a}$, eat ye; $b\bar{o}$ (sic), become ye. With the termination $r\bar{a}$ compare $r\bar{e}$ in $chhir\bar{e}$, above.

:	Sing.		Pı	LUR.
	80	$ph\bar{o}$	80	phō
Nom.	$sar{o}$, fem. $sar{a}$	phē, (? fem.)	tē	$phar{e}$
Ag. I.	sō-sā	$phar{\circ} ext{-}sar{a}$	$tar{e}$ - $sar{a}$	$phar{e}$ -s $ar{a}$
Ag. II.	$sar{o}$ - $yar{a}$	$phar{o} ext{-}yar{a}$	$tar{e}$ - $yar{a}$	$phar{e}$ - $yar{a}$
Acc.	$tar{e}$ - $zhar{a}$	(?) $ph\bar{o}$ - $zh\bar{a}$	$ten ext{-} \underline{z} \underline{h} ar{a}$	$phar{e}ar{u}n$ - $zhar{a}$
Abl.	$tar{e} ext{-}yar{o}nar{o}$	(?) $ph\bar{o}\cdot y\bar{o}n\bar{o}$	ten-yōnō	phēün-yōnō
Gen.	tes, tāsā	phos	ten .	$phar{e}\ddot{u}n$
$\left\{egin{array}{l} ext{Dat.} \ ext{Loc.} \end{array} ight\}$	tē-rā, tāsā-rā	(?) pħō-rā	$ten ext{-}dar{a}$	$phar{e}in-dar{a}$

In the Specimen we have $t\bar{\imath}$ instead of $s\bar{o}$ - $y\bar{a}$, in $t\bar{\imath}$ ten- $d\bar{a}$ $d\bar{e}$, he gave to them.

The following examples of the use of $h\bar{a}$, $h\bar{u}$, or $h\bar{o}$, this, that, occur in the Specimens:—

hā-mō yē bet, what is this?

hō mūsh-pō-yā bō phak charistā tē, that man sent him to feed swine.

 $h\bar{u}$ - $g\bar{a}$ $k\bar{\imath}$ - $g\bar{a}$ $n\bar{a}$ det, even this (or 'that') no one gave to him.

hū wakhspī-chī bōnō tshrēshūs-kari. Hū-chō sō yē, at that time the elder (son) was on the field. From that (field) having come (he heard music, etc.).

hā apsh-pō-s lō katāk sar billā, how old is this horse? (List No. 221).

hā buné mūsh-ékō-chī-sümā, with a man of that country.

hus rin-pō, the price of this (List No. 232).

 $h\bar{u}$ - $r\bar{u}$ - $n\bar{o}$ (for $h\bar{u}$ - $r\bar{a}$ - $n\bar{o}$), from among them (the younger said to his father).

With this pronoun, we may compare hun-chō, from here (List No. 222), and hātuk sar bai, these many years having gone (I have not disobeyed you).

There is one other demonstrative pronoun $b\bar{o}$, of which a solitary example occurs in the Specimen, viz. in $h\bar{o}$ $m\bar{u}\underline{sh}$ - $p\bar{o}$ - $y\bar{a}$ $b\bar{o}$ $t\underline{sh}r\bar{e}\underline{sh}\bar{e}$ $\underline{zh}\bar{e}$ $\underline{ph}ak$ $charist\bar{a}$ $t\bar{e}$, that man sent him to feed swine.

Other pronominal forms are $k\bar{o}$, who? $kis\bar{e}$, whose? $kis\bar{e}-\underline{z}h\bar{a}-n\bar{o}$, from whom? $y\bar{e}$, what? $k\bar{\imath}-g\bar{a}$, by any one (Agent II); $kat\bar{a}k$, how many?

V. VERBS.—The conjugation of the verb in the Brōkpā of Dāh-Hanū is in the main the same as that of Dras, but in some respects it more nearly follows Kāshmīrī.

A. Auxiliary verbs, and verbs substantive.

Present, 'I am, etc.'

The forms $h\ddot{u}\bar{a}$, $h\ddot{u}\bar{a}$, and $h\ddot{u}n$ are employed when the subject of the verb is near, and $\bar{a}stu$ and $\bar{a}stin$ when it is far. The initial h of $h\ddot{u}a$ is elided on one occasion in the Specimen, so that we have ' $\ddot{u}\bar{a}$.

I have not come across any instances of the feminine of either of these tenses.

The following parts of the verb 'to become' occur in the Specimens:—

bō, become (Imperative).

billā, they are (List No. 221). This is probably really a third person singular. Compare byāllā, he is going; kutyāllā, he is striking. At the same time it may be the same as the Dras bilā, which, as I have pointed out, may be an instance of borrowing from Burushaski.

bet, this has been already given under the verb substantive as meaning 'am,' 'is,' 'are.' It seems to be by origin a third singular past (compare kutet), and to be literally 'he became.' Similarly biss, he became, is used in Bashgalī to mean 'he is.'

 $b\bar{u}$, he became. In $b\bar{u}st\bar{e}$ $b\tilde{u}$, literally 'he became to be,' it means 'began,' as in other cognate languages.

 $b\bar{u}d\bar{o}\bar{s}$, I became (a sinner). Compare Sarīqōlī $v\bar{u}dam$, Persian $b\bar{u}dam$, I was. $b\bar{u}st\bar{e}$, to be (Infinitive).

bet- $t\bar{o}$, on becoming.

B. Active Verb.—The conjugation of Transitive verbs differs from that of Intransitive verbs only in the past tenses.

The Brōkpā of Dāh-Hanū differs from other Shinā dialects in its formation of the Future. In other dialects this tense is the same as the Simple Present. In Dāh-Hanū it has two forms, one which does not change for number and person formed with the suffix $k\bar{o}$, and another which is the same as the Definite (not the Simple) Present.

Imperative.—The Imperative singular usually ends either in $\bar{\imath}$ or in \bar{e} . The plural ends in \bar{a} . Examples are, $kut\bar{\imath}$, strike; $y\bar{e}$, come; $uth\bar{e}$ or $\ddot{o}t\bar{e}$, rise, stand (with dental th); $d\bar{e}$, give; $bah\bar{e}$, cultivate; $sky\bar{e}$, look. In the following there is no final $\bar{\imath}$ or \bar{e} , $b\bar{o}$, go; $kh\bar{a}$, eat; $b\bar{a}\underline{s}\underline{h}$, sit; $m\ddot{u}$, die; $tab\bar{u}$, run; $b\bar{o}$, become, be; $p\bar{\imath}$, drink; $s\bar{o}$, sleep; $l\bar{\imath}$, lick; $b\bar{o}$, weave; $\underline{z}h\bar{\imath}$, see. The following adds $r\bar{e}$, chhi- $r\bar{e}$, make (me thy servant), and is possibly a respectful Imperative. Shaw also gives qun- $t\bar{e}$, hear; and $zbr\bar{\imath}$ - $t\bar{e}$, write.

Examples of the Imperative plural are $nagh\bar{a}l\bar{e}ar\bar{a}$ (? $nagh\bar{a}l\bar{e}ar\bar{a}$), bring ye forth; $phan\bar{a}$, put ye on (clothes); $khant\bar{a}r\bar{a}$, put ye on (a ring); $unj\bar{a}r\bar{a}$, put ye on (shoes); $y\bar{e}$ (sic), come ye; $kh\bar{a}$, eat ye; $b\bar{o}$ (sic), become ye. With the termination $r\bar{a}$ compare $r\bar{e}$ in $chhir\bar{e}$, above.

Verbal nouns, etc.

Infinite.— $Kutist\bar{e}$ (or, as usual, $-st\bar{a}$), to strike. So $b\bar{u}st\bar{e}$, to become; $charist\bar{a}$, to graze; $by\bar{a}st\bar{e}$, to go. For the termination $st\bar{e}$ or $st\bar{a}$, compare the Käfir dialects.

Past Participle.—Kutēdhō, kutē, struck.

Future Participle.—Kutisu, about to strike. So Shaw. With this compare thubūsī, (that share) which is about to fall (to me); tīs, to be made, in tī biü bet tīs nā bet, I am not worthy to be made to be thy son.

Conjunctive Participle.— $Kut\bar{e}$, having struck. So $t\bar{e}$, having done, having made; $uth\bar{e}$, having arisen; $y\bar{e}$, having come; bai, having gone. But $kh\bar{a}$, having eaten.

Gerund.— $Kuty\tilde{u}t\bar{o}$, in striking, whilst striking, on having struck. So Shaw, who also gives $by\tilde{u}t\bar{o}$, on going. The Specimen substitutes \bar{e} for \tilde{u} , so that we have $kut\bar{e}t\bar{o}$, on having struck (List No. 236); $g\bar{e}-t\bar{o}$, on having gone; $y\bar{e}-t\bar{o}$, on coming; $bet-t\bar{o}$, on becoming. Compare $khiy\bar{e}-t\bar{e}$, on being eaten (remains over and above).

Simple Present, 'I strike, etc.'

	· Sing.	Plur.
1	$mar{a}$ -s $ar{a}$ ku $ty\ddot{u}$	bā-sā kutyũ
2	$t\ddot{u}$ -s $ar{a}$ $kuty\widetilde{u}$	<u>ts</u> ī-sā kutyenī
3	sō-sā kutyũ	$tar{e}$ -s $ar{a}$ ku ty en $ar{\imath}$

Similarly, we have 'I go, etc.'

	Sing.	Plur.	
1	mõ byü	bā byữ	
2	$t\ddot{u}$ $by\widetilde{u}$	<u>ts</u> ī byenī	
3	sō byũ	tē byenī	

Other examples of this tense are (List No. 239), $y\tilde{o}$, he comes; (No. 233), $b\tilde{a}y\tilde{u}$, he sits, dwells.

Definite Present and Future,

'I am striking,' 'I shall strike, etc.'

This tense is formed by suffixing the verb substantive to the preceding tense. As in other Shiṇā dialects, it has a feminine form in the singular.

		PLUE.	
Masc.		Fem.	Com. Gen.
1	mā-sā kutyűs	mā-sā kutīnis	bā-sā kutyenis
2	t ü-s ā kutyűyā	tü-sā kutīniā	<u>ts</u> ī-sā kutyenī
3	sō-sā kutyāllā	sā-sā kutīnī	tē-sā kutyān

Similarly, 'I am going,' 'I shall go, etc.'

	, Sn	PLUB.	
	Masc.	Fem.	Com. Gen.
1	mõ byữs	$m\widetilde{\widetilde{\sigma}}$ b ī nis	bā byenis
2	tü byűyā	tü bīniā	<u>ts</u> ī byeni
3	sō byāllā	รสิ ชิวิทริ	të byan

In the Specimen, we have razus, I will say (to my father).

Second Future, 'I shall strike, etc.'

This is $m\tilde{a}$ -s \tilde{a} $kutik\tilde{o}$, I shall strike. $Kutik\tilde{o}$ remains unchanged for all persons and both numbers. Similarly, $m\tilde{\tilde{o}}$ $by\tilde{u}k\tilde{o}$, I shall go.

Future Past, 'I was about to strike, etc.'

This is formed by conjugating the past tense of the auxiliary verb with the future participle. Thus, $m\bar{a}$ - $s\bar{a}$ kutisu hüs, I was about to strike; $t\ddot{u}$ - $s\ddot{a}$ kutisu hüa, thou wast about to strike; $t\bar{e}$ - $s\bar{a}$ kutisu hüa, they were about to strike.

Imperfect.—The only example is List No. 192, which has $m\bar{\imath}-y\bar{a}$ (probably a mistake for $m\bar{a}-s\bar{a}$) $kuty\bar{a}h\ddot{u}s$, I was striking.

Past 'I struck, etc.'

The conjugation of the past tense closely follows Kāshmīrī principles. In the case of transitive verbs, the tense is the past participle, and is absolutely passive, and the subject is put in the Agent II case. Thus, $m\bar{\imath}-y\bar{a}$ kutēdhō or kutē, struck by me. Pronominal suffixes are usually added to the verb, and refer to the direct or to the indirect object. These terminations are—

First person, is, I, to me; we, to us.

Second and third person, t, thou, to thee; he, to him; you, to you; they, to them.

There are two forms of the past participle, a long one, $kut\bar{e}dh\bar{o}$, which has a feminine $kut\bar{e}dh\bar{o}$, and a plural $kut\bar{e}dh\tilde{e}$, and a short one, $kut\bar{e}$, unchanged for gender and number. The suffix of the first person is added to the longer form, and that of the other persons to the shorter one.

We thus get the following compound words-

Kutudhös (for kutēdhō-is), I (masculine) was struck, or a masculine thing was struck for me or for us.

 $Kut\bar{e}dh\bar{\imath}s$ (for $kut\bar{e}dh\bar{\imath}-is$), I (feminine) was struck, or a feminine thing was struck for me or for us.

Kutēdhēs (for kutēdhē-is), we (masculine or feminine) were struck, or masculine or feminine things were struck for me, or for us.

Kutet (for kutē-t), thou wast struck, you were struck, he was struck, or they were struck; or a thing or things were struck for thee, for you, for him, or for them.

Note I.—The long form of the past participle does not always end in $\underline{dh}\bar{o}$. For instance, in the case of the root $d\bar{e}$, give, it is $d\bar{e}t\bar{o}$, the short form being $d\bar{e}$.

Note II.—When a verb has both a direct and an indirect object, and these are separate persons, the suffix refers to the first person rather than to the second or third. Thus:

 $s\bar{o}$ - $y\bar{a}$ $m\tilde{o}$ $gob\bar{a}$ - $r\bar{a}$ $d\ddot{o}t\ddot{o}s$, he gave me to the head-man, literally by him I to the head-man was-given-I.

tü-yā tiü apsh mā-rā dötös (not det), thou gavest thy horse to me, literally by thee thy horse to me was-given-to-me (not 'was given-it').

But, $m\bar{\imath}-y\bar{a}$ miü $ap\underline{sh}$ $t\bar{a}s\bar{a}-r\bar{a}$ det, I gave my horse to him, lit. by me my horse to him was-given-it (or was-given-to-him).

We may thus, following Shaw, write the conjugation of the past tense of a transitive verb as follows:—

Sing. 1.
$$m\bar{\imath} \cdot y\bar{a}$$
 2. $t\bar{\imath} \cdot y\bar{a}$ 3. $s\bar{o} \cdot y\bar{a}$ 3. $s\bar{o} \cdot y\bar{a}$ 4. $t\bar{e}dh\bar{\imath}s$ (fem.), I was struck by thee. by thee. by him. Plur. 1. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 3. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 4. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 3. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 4. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 4. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 5. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 6. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 6. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 7. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 8. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 9. $t\bar{e}gh(\bar{\imath}) \cdot y\bar{a}$ 9.

In the Specimens the form kutet usually appears as kutit, or even as kutat.

The following examples of this tense of transitive verbs occur in the Specimens:-

- A. Without suffixes, $d\bar{e}$, he gave (the property to them); $t\bar{e}$, he made (i.e. sent) him (to feed swine); chhar, (this son who) wasted (thy property).
- B. With suffixes, razit, he said to him; det, he gave to him; tet, he did for him, made him; parit, he filled it; <u>zh</u>it, he saw him; lathit, he heard it; <u>sh</u>umat, he asked him; <u>sh</u>albat, he entreated him.

The conjugation of the past tense of a neuter verb is simpler. The singular has masculine and feminine forms, while the plural is of common gender. Pronominal suffixes are added, in this case referring to the subject. We thus get the following:—

'I went, etc.'

	Sing.	Рібв.
Masc.	Fem.	Com. Gen.
mõ gös	mõ gyīs	bā gyēũs
t ÿ gō	tü gyēüwā	tst gyē, gyē ü ī
sō gō, gōs	sā gyānī	të gyëanî, gyë ü n

Other examples are zazīdüs, I walked; baitō, thou art seated, i.e. dwellest; baitōs, he sat (dwelt); ut, he came; phat, he reached, arrived; nūphat, he arrived.

The Perfect and Pluperfect. 'I have struck,' 'I had struck, etc.'

This is formed by adding the past tense of the verb substantive to the past participle. Although formed from the past participle, according to Shaw this tense is, in the case of transitive verbs, treated actively, the subject being put in the Agent I case. Thus:—

	SING.	PLUE.		
	Com. Gen.	Com. Gen.		
1	mā-sī kutyüs (for k u tē-'üs)	bā-sā kutyűs		
2	tü-sā kutē-āstu	<u>ts</u> ī-sā kutē- ā stin		
3	sō-sā kutē-āstu	tē-sā kutē-āstin		

Similarly 'I have gone, 'I had gone, etc.'

	Sing.	Plur.
1	mī gyē-'üs	bā gyē-'ũs
2	tü gyē-āstu	<u>ts</u> ī gyē-āstin
3	$sar{o}\ gyar{e}$ - $ar{a}stu$	tē gyē-āstin

 $H\ddot{u}\ddot{a}$ can be used instead of $\bar{a}stu$, and $h\ddot{u}\bar{i}$ or $h\ddot{u}n$ (according to person) for $\bar{a}stin$. The only other examples are $mu\hat{n}\bar{o}-h\ddot{u}\bar{a}$, he had died; $mi\underline{s}h\bar{o}-'\ddot{u}\bar{a}$ or $mi\underline{s}h\bar{o}-h\ddot{u}\bar{a}$, he had been lost.

Conditional Mood.

Shaw gives $m\bar{a}$ - $s\bar{a}$ kutet- $t\bar{o}$, if I strike. Kutet- $t\bar{o}$ does not change for number or person. In the Parable we have $t\bar{e}\underline{z}\underline{h}$ is, I might have made (merriment with my friends), which seems to be a sort of conjunctive. Its form reminds one of the Gilgit Shinā passive in $\bar{\imath}\underline{z}\underline{h}$.

Passive Voice.

Shaw gives the following: - 'I am' or 'have been struck, etc.'

	Sing.		Plur.	
1	mī kutellas	be	ng kutelläs	
2	tü kutellā	<u>ts</u>	kutellan	
3	sō kutellā	tē	kutellan	

No instance of this form occurs in the Specimens. The only possible passive form is $khiy\bar{e}$ - $t\bar{e}$, which seems to mean 'on food being eaten (there is enough and to spare),' but the form is very doubtful. There is no instance of the Gilgit Shinā passive in $\bar{\imath}z\bar{l}b$.

Kutet (for kutē-t), thou wast struck, you were struck, he was struck, or they were struck; or a thing or things were struck for thee, for you, for him, or for them.

Note I.—The long form of the past participle does not always end in $\underline{dh}\bar{o}$. For instance, in the case of the root $d\bar{e}$, give, it is $d\bar{e}t\bar{o}$, the short form being $d\bar{e}$.

Note II.—When a verb has both a direct and an indirect object, and these are separate persons, the suffix refers to the first person rather than to the second or third. Thus:

 $s\bar{o}$ - $y\bar{a}$ $m\tilde{o}$ $gob\bar{a}$ - $r\bar{a}$ $d\ddot{o}t\ddot{o}s$, he gave me to the head-man, literally by him I to the head-man was-given-I.

tü-yā tiü apsh mā-rā dötös (not det), thou gavest thy horse to me, literally by thee thy horse to me was-given-to-me (not 'was given-it').

But, $m\bar{\imath}-y\bar{a}$ $mi\ddot{\imath}$ apsh $t\bar{a}s\bar{a}-r\bar{a}$ det, I gave my horse to him, lit. by me my horse to him was-given-it (or was-given-to-him).

We may thus, following Shaw, write the conjugation of the past tense of a transitive verb as follows:—

Sing.	1.	$mar{\imath}$ - $yar{a}$	~ (kutudhös (masc.),),	\int by me.
Ü	2.	$tar{\imath}$ - $yar{a}$	$m\tilde{o}^{\{kutu\underline{dh}\ddot{o}s\ (masc.\}_{m\tilde{o}}\}}kut\bar{e}\underline{dh}\bar{i}s\ (fem.),$) was struck	by thee.
	3.	$sar{o} extbf{-}oldsymbol{y}ar{a}$	$bar{a}$ kut $ar{e}dhar{ar{e}}s,$	we were struck	by him.
Plur.	1.	beng-yā	}	(thou wast, you were, }struck	by us.
	2.	$\underline{ts}ar{\imath} ext{-}yar{a}$	(the rest) kutet,	he was, they were \{\}\struck	J J J
	3.	$t\widetilde{ar{e}}$ - $yar{a}$]	The was, shey were	by them.

In the Specimens the form kutet usually appears as kutit, or even as kutat.

The following examples of this tense of transitive verbs occur in the Specimens:-

- A. Without suffixes, $d\bar{e}$, he gave (the property to them); $t\bar{e}$, he made (i.e. sent) him (to feed swine); chhar, (this son who) wasted (thy property).
- B. With suffixes, razit, he said to him; det, he gave to him; tet, he did for him, made him; parit, he filled it; <u>zh</u>it, he saw him; lathit, he heard it; <u>sh</u>umat, he asked him; <u>sh</u>albat, he entreated him.

The conjugation of the past tense of a neuter verb is simpler. The singular has masculine and feminine forms, while the plural is of common gender. Pronominal suffixes are added, in this case referring to the subject. We thus get the following:—

·.I	went,	etc.'
-1-	11 CLLU9	OLO.

	Sn	NG.	Plue.
	Masc.	Fem.	Com. Gen.
1	mõ gös	$m\widetilde{\widetilde{o}}~gyar{\imath}s$	bā gyēũs
2	t j i g $ar{o}$	tü gyēüwā	tsi gyē, gyēüī
3	sõ gō, gōs	sā gyānī	tē gyēanī, gyē ün

Other examples are zazīdüs, I walked; baitō, thou art seated, i.e. dwellest; baitōs, he sat (dwelt); ut, he came; phat, he reached, arrived; nūphat, he arrived.

The Perfect and Pluperfect.

'I have struck,' 'I had struck, etc.'

This is formed by adding the past tense of the verb substantive to the past participle. Although formed from the past participle, according to Shaw this tense is, in the case of transitive verbs, treated actively, the subject being put in the Agent I case. Thus:—

	Sing.	PLUB.						
	Com. Gen.	Com. Gen.						
1	mā-sī kutyüs (for k u tē-'üs)	bā-sā kuty ũ s						
2	tü-sā kutē-āstu	<u>ts</u> ī-sā kutē-āstin						
3	sō-sā kutē-āstu	tē-sā kutē-āstin						

Similarly

'I have gone,' 'I had gone, etc.'

	•	Sing.	0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0		Plur.	
1		mī gyē-'üs			bā gyē-'ũs	*
2		tü gyē-āstu			<u>ts</u> ī gyē-āstin	
3		sō yyē-āstu		*.	tē gyē-āstin	•

 $H\ddot{u}\bar{a}$ can be used instead of $\bar{a}stu$, and $h\ddot{u}\bar{\imath}$ or $h\ddot{u}n$ (according to person) for $\bar{a}stin$. The only other examples are $mu\hat{n}\bar{o}-h\ddot{u}\bar{a}$, he had died; $mi\underline{s}h\bar{o}-\ddot{u}\bar{a}$ or $mi\underline{s}h\bar{o}-h\ddot{u}\bar{a}$, he had been lost.

Conditional Mood.

Shaw gives $m\bar{a}$ - $s\bar{a}$ kutet- $t\bar{o}$, if I strike. Kutet- $t\bar{o}$ does not change for number or person. In the Parable we have $t\bar{e}\underline{zh}$ is, I might have made (merriment with my friends), which seems to be a sort of conjunctive. Its form reminds one of the Gilgit Shinā passive in $\bar{\imath}\underline{zh}$.

Passive Voice.

Shaw gives the following :- 'I am' or 'have been struck, etc.'

		Sing.	*		Plur.	
1	*	mī kutellas		* * *	 beng kutelläs	
2		$t\ddot{u}$ $kutellar{a}$			<u>ts</u> ī kutellan	
3		$sar{o}$ $kutellar{a}$			tē k utellan	

No instance of this form occurs in the Specimens. The only possible passive form is $khiy\bar{e}$ - $t\bar{e}$, which seems to mean 'on food being eaten (there is enough and to spare),' but the form is very doubtful. There is no instance of the Gilgit Shinā passive in $\bar{\epsilon}z\bar{h}$.

Irregular Verbs.

The verb $b\bar{o}$, go, is altogether irregular. It is conjugated in the preceding pages. The verb $y\bar{e}$, come, has its past tense ut, compare the Gilgit Shiṇā $w\acute{a}t\bar{o}$.

Negative.—The negative particle is $n\bar{a}$. 'No' is $n\bar{e}\underline{sh}$ or $ni\underline{sh}$.

Kashmiri or Köshirü

The Kāshmīrī¹ language is the language of the Valley of Kashmīr. In a dialectic form it has spread south-west into the Valley of Kashṭawāṛ (Kishtwar), and to the south it has flowed over the Pīr Pantsāl Range into the lower hills lying north of the River Chināb, where it reappears in a number of mixed dialects.

The word 'Kāshmīrī' (عَشَارِي) is Persian or Hindī, and is derived from the Name of Language. Sanskrit $K\bar{a}\acute{s}m\bar{i}rik\bar{a}$. It is not the name used by the people of Kashmīr itself. There the country is called $Ka\underline{s}h\bar{i}r^{i}$, and the language $K\ddot{o}\underline{s}hir^{i}$. This word itself is an excellent example of the fact that the language belongs to the Dardic sub-family, for in India the change of $\acute{s}m$ to \acute{s} or $\underline{s}h$ would be impossible.

Kāshmīrī is bounded on the north by the Shinā language of the Dard group of the Dardic sub-family. On the west it is bounded by Linguistic Boundaries. the Chibhālī² and Punchī dialects of Lahndā, a language belonging to the North-Western group of the Indo-Aryan vernaculars, but strongly affected by Dardic influence. To its south it has, on the west, the Pogri dialect of Panjābi; and, to the east of Dogri, the Bhadrawāhi dialect of Western Pahāri. Dogri (see Vol. IX, Pt. i, p. 637) is a real dialect of Panjābi, but Bhadrawāhi is a transitional form of speech between Western Pahārī and Kāshmīrī,—leaning more to the former than to the latter,—and therefore classed under the former (see Vol. IX, Part iv, pp. 888ff.). To the south-east of Kāshmīrī we find Pāḍarī, another Western Pahārī dialect of a character similar to that of Bhadrawāhī (Vol. IX, Part iv, pp. 903ff.). On the rest of the eastern side of Kāshmīrī, and also a little to its north-east, going northwards on the east of Shina, lie a series of Tibeto-Burman dialects, Purik (Vol. III, Part i, pp. 42ff.), Ladakhī (pp. 51ff.), and Baltī (pp. 32ff.), all separated from the Kashmir Valley by inhospitable ranges of mountains and in no way affecting its language.

Kāshmīrī has one true dialect,—Kashṭawāṛī, spoken in the Valley of Kashṭawāṛ (commonly known as Kishtwar), lying to the south-east of the Valley of Kashmīr. Kāshmīrī has also overflowed the Pīr Pantsāl Range into the Jammu Province of the State, and in the valleys between the southern hills of the range, between the water-shed and the valley of the Chināb, there are a number of mixed dialects, such as Pŏgulī, Sirājī of Pōḍā, and Rāmbanī. The first two of these represent Kāshmīrī merging into Western Pahāṛī, while the third rather represents Kāshmīrī merging into Pōgrī. Farther east, over the greater part of the Riasi District of the State, there are more of these mixed dialects, about which nothing certain is known, except that the mixture is rather between Kāshmīrī and the Chibhālī form of Lahndā. Grammars are given below of Kashṭawāṛī, Pŏgulī, Sirājī, and Rāmbanī; but no materials are available for these Riasi dialects.

I According to the system of transliteration followed in this Survey, the word should properly be spelt 'Kāshmīrī,' with a ligature under the 'sh.' But the word is of such frequent occurrence that I have here dropped the ligature as an unnecessary complication. The 'sh,' however, is not to be considered as therefore the same as the Sanskrit sh (ع). It is rather the same as the Sanskrit sa (N) or the Persian shīn (ش).

² Printed 'Chhibhālī' in the map. See the remarks on p. 505 of Part I of this Volume.

In the standard Kāshmīrī of the Valley, there are minor differences of language, which, however, are not sufficient to entitle us to divide it out into further separate dialects. For instance, the Kāshmīrī spoken by Musalmāns differs from that spoken by Hindūs. Not only is the vocabulary of the former more filled with words borrowed from Persian, but also there are slight differences of pronunciation. Again, there is, as in all countries, the distinction between town and village talk. In villages a few old forms have been preserved that have disappeared in towns, and there are also variations of pronunciation. Finally, there is the language between the language of prose and that of poetry. As in other languages, the latter preserves many forms that have disappeared in the modern prose speech.

Returning to the dialects of the Musalmāns and of the Hindūs, it should be remarked that there are more than nine Musalmāns in the Valley to each Hindū. As already stated, the Musalmān dialect borrows freely from the Persian vocabulary. On the other hand, the Hindūs borrow from Sanskrit, but not to the same extent, and, although the speech of a minority of the population, their dialect is much purer Kāshmīrī thán that of their Musalmān brethren.

The figures, based on the Census of 1891, originally returned in the earlier operations of this Survey were incomplete for Kāshmīrī, and I therefore give the population figures for Kāshmīrī spoken in its proper home as recorded in the Census of 1911:—

Standard Kāshmī	rī spol	ken i	n Kasl	ımīr	itself			•			•	1,039,964
Kashtawārī .	•			•						•		7,464
Pŏgulī .												8,158
Sirājī of Dōḍā								•	•			14,732
Rāmbanī .								•		•	•	2,174
Mixed Dialect of	Riasi	•	•		•		•		•			20,252
	r	otal	Numb	er of	Speak	ers o	f Kāsl	ımīrī	at Hor	ne		1,092,744

In addition to the above there were recorded 95,013 speakers of Kāshmīrī in the State of Jammu and Kashmīr, who did not reside in that part of the country of which it was the vernacular.

Kāshmīrī is also spoken by emigrants from Kashmīr to other parts of India. The figures are as follows:—

NW. Frontier I	rovin	ce	•	•			•	• 7	-		•	533
Panjab .	•	•	•	•	•	•	•				•	6,480
Panjab States	•	•	• 1		•	• ,,		•	•	•	•	710
Other Provinces	•	•	•	•	•	•	•		•	•	•	422
									Tora	L °		8,145
												-

¹ The principal is the Musalman tendency to shorten final vowels. Thus, for 'what' the Musalmans say kya and the Hindus $ky\bar{a}$ or $ky\bar{a}h$; for 'I should have struck,' the former say maraha, and the latter $m\bar{a}rah\bar{o}$. The Musalmans also have a Dardic preference for dropping an r. Thus, they say $b\bar{o}nth$, before, while the Hindus say $br\bar{o}nth$; $g\bar{a}ngal$, distraction, where the Hindus prefer $gr\bar{a}ngal$.

² For differences of forms we may quote as an example the village $wanam\bar{o}w^a$, instead of the city $wan\bar{o}w^a$, we shall tell you. In pronunciation, we may quote the frequent interchange of d and r, as in $k\bar{u}d^a$, for $k\bar{u}r^a$, a girl; mod^a , for mor^a , a body. Also, in villages the Dardic confusion between cerebrals and dentals is much more marked. This also occurs in city talk, as in $w\bar{o}thun$, to arise, as compared with the Hindi $uthn\bar{o}$, but in villages it is extremely common.

The total number of speakers of Kāshmīrī is therefore as follows:-

At Home						•					1,092,744
Elsewhere in	Janin	iu and	Kash	ımîr S	tate						95,013
Elsewhere in	India	•	•	•	•	a	•		•	•	8,145
								Тота	ιIι	•	1,195,902

These figures differ from the total given in the Indian census tables (1,180,632), owing to differences of classification of some of the mixed dialects.

Kāshmīrī belongs to the Dard group of the Dardic languages. It is most nearly related to Shiṇā. It has, however, for many centuries been subject to Indian influence, and its vocabulary includes a large number of words derived from India. Its speakers hence maintain that it is of Sanskritic origin, but a close examination reveals the fact that, illustrious as was the literary history of Kashmīr, and learned as have been its Sanskrit Paṇḍits, this claim of Sanskrit origin cannot be sustained for the vernacular of the latter. Kāshmīrī is a very old language. Three words in it are quoted by Kalhaṇa (circ. 1150 A.D.) in his Rājataraṅginī, and these are not very different from the language of the present day.

To the philologist Kāshmīrī is a language of great importance, as it is the only example of an Aryan language in the condition of being converted from an analytic to a synthetic language. The oldest known form of Indian speech is Vedic Sanskrit. This was highly synthetic, with a system of declension of nouns and of conjugation of verbs as complicated as in Latin or Greek. In process of time this, or a kindred and similar language, developed into, say, Western Hindi, a language as analytic as English or French, in which nouns have, at most, only two cases and are declined with the aid of postpositions, while only one or two tenses of the verb have survived, the rest being made up with the help of auxiliary verbs. For instance, in Sanskrit 'a house' is grihah, and in Latin mansio, and 'of a house' is, respectively, 'grihasya' and mansionis, in both of which the change of case-meaning is indicated by a change in the form of the word. This is synthetic declension. But in Hindī 'a house' is ghar and in French it is une maison, and 'of a house' is, respectively, ghar-kā and d'une maison, in which the change of case-meaning is indicated by suffixing or prefixing a post- or pre-position. The word itself undergoes no change. This is analytic declension. Again, 'he speaks' is in Sanskrit kathayati, and 'to speak' was in Mediæval Latin parabolare (from the Latin parabola, a parable). 'He will speak' is respectively kathayishyati and parabolabit. Here the change of tense-meaning is indicated by a change in the form of the word, and we have an example of synthetic conjugation. But in Hindi 'he will speak' is $kah\bar{e}$ - $g\bar{a}$, literally 'he is gone $(g\bar{a})$ that he may speak $(kah\bar{e}, which is merely a cor$ rupted form of the Sanskrit kathayati),' and in French it is parler-a, literally, ' he has (a) to speak (parler, which is a corrupted form of parabolare as if we said "parabolare habet").' In Hindi and French the change of tense meaning is not indicated by a change in the form of the word, but by the addition of the auxiliaries $g\bar{a}$ and a,

¹ This question is dealt with at length in an Appendix to this introduction. See pp. 241ff.

See Sir Aurel Stein's note in his translation of R. T. v. 397. The words are Rangassa Hēlu dinna, which in modern Kāshmīrī would be Rangas Hēlu dyun", (the village of) Helu is to be given to Rang.

VOL. VIII, PART II.

respectively. Here we have instances of analytic conjugation, as compared with the synthetic conjugations of Sanskrit and Latin.

Now, Kāshmīrī illustrates a further stage in the development of language. declension of nouns is in the main analytic. There are a few survivals of the ancient synthetic cases, but in the main cases are differentiated by postpositions, as in Hindi. Thus, we have gara, a house, and $garuk^u$ (for $gara-k^u$), of a house. But note, here, that the k^n has become attached to the gara, and is no longer a separate word like the Hindi Garuk" is now as much one word, and a word in the genitive case, as the Sanskrit grihasya or the Latin mansionis. In other words the declension is again becoming synthetic, and the process has been 'first analytic (gara-k") and then again synthetic (garuk"). But in other cases the declension remains analytic, as in gara-manza, from the house, in which the noun and the postposition are still two entirely distinct words and as yet show no signs of becoming amalgamated into one. Similarly, the conjugation of the Kāshmīrī verb may be analytic. The word for the past participle 'said' is dop", and for the past tense, 'I said,' we may have (as in the Hindī maĩ-nē kahā) $m\tilde{e} dop^{u}$, literally, 'by-me said.' But we may also add a suffix meaning 'by-me' to dop^{u} , so that the two become one word,—thus, dopum, I said. Here we have a synthetic method of conjugation in optional course of formation. We may have dopum, I said; doputh, thou saidst; dopun, he said, and so on, which is just as synthetic as the Latin dixi, dixisti, dixit, with this difference, that in the case of Kāshmīrī, we know exactly how these synthetic forms came into existence.

If, now, we return to India, and take languages of the Outer Circle, like Bengali or Marāthī, we find again a state of affairs similar to that of Kāshmīrī, but more advanced. In Kāshmīrī, the synthetic conjugation is optional. We may use either the analytic më dop" or the synthetic dopum. But Bengali or Marathi have gone a step further. analytic conjugation has been ahandoned and only the synthetic conjugation is now employed. It is no longer optional, but is now compulsory. We have only the Bengali kahilām, and only the Marāthī mhanilo, for 'I said,' from the past participles kahilāand mhanil-, respectively. From these examples, we see the importance of Kashmīrī to the philologist. It is a language caught, so to speak, in the act of changing its nature from analytic to synthetic, and thus shows how the synthetic conjugation of Indian languages of the Outer Circle, such as Bengali and Marathi, has arisen. Hitherto there have been many speculations on the subject, which we now see were all wide Kāshmīrī substitutes certainty for speculation. We can now watch of the mark.2 Indian speech in its developments from birth to birth. First synthetic; then, as in Hindi, analytic; then, as in Kāshmīrī, agglutinative or semi-synthetic; and then, as in Bengali and Marāthī, again synthetic; and so, as in the Indian belief as to the fate of the soul, the chain of samsāra, or weary round of transmigration, goes on perpetually ohne Hast, aber ohne Rast.' In future ages future philologists will, if they have a language like Kāshmīrī to guide them, observe the same series of changes occurring over and over again, synthetic to analytic, analytic to agglutinative, and agglutinative back again to synthetic.

² The usual, but incorrect explanation is that the terminations of kahilān, mhanilõ, etc., are relics of an old verb substautive.

¹ It may be noted that we can see similar instances of the development of analytic declension into synthetic occasionally occurring in Panjabi. Thus, the Panjabi for 'in a house' is either the analytic ghar-vichch or the synthetic gharichch.

Kāshmīrī has a small, but respectable, list of literary works, about which not much is known. So far as I am aware, the oldest author was a Literature. woman named Lalla or Lal Ded. She probably lived in the 14th century A.D. Hundreds of her verses are quoted all over the Valley and are in everyone's mouth, and MS. collections of them have from time to time been made under the Sanskrit title of Lallāvākyāni. She is said to have been a holy woman, and to have been accustomed to wander about the country in an almost nude condition, her excuse being that he only was a man who feared God, and that there were very few such men about. Her verses are all religious and are strongly tinged with Saiva philosophy. The first poem that can be dated is the Bāṇāsuravadha, the name of the author of which is unknown to me. It is in the Hindu dialect, and was written in the reign of Sultan Zainu'l-'abidin (1417-1469 A.D.).2 Other poems of which the approximate dates are known are the following: - Dēvākara Prakāśa Bhatta was alive during the eight years of the reign of the Hindu king Sukhajivana Simha, who came to the throne in 1786 A.D. He lived in the Gojawar (Sanskrit, Gulikavatika) quarter of Śrīnagar, and wrote a history of Rāma entitled the Rāmāvatāracharita, with a sequel entitled the Lavakuśacharita. Both of these are highly poetical works in pure Kāshmīrī. They are specially interesting as containing many legends not found in any Indian version of the Rāmāyana with which I am acquainted.3 Paramānanda of Mārtaṇḍa is said to have died in 1822 A.D. at the age of 68 years. He wrote a history of Krishna entitled the Krishnavatāralīlā, a work which follows the Indian tradition much more closely. These three works are all excellent specimens of the Kāshmīrī language, and, though in the Hindū dialect, are not too highly Sanskritized. With a much fuller Sanskrit vocabulary is a history of the circumstances connected with Siva's marriage with Pārvatī, entitled the Sivapariņaya, written by Krishņa Rāzdān, or Rajanaka, who was alive as an old man at the end of the last century. He lived at Vanpuh (Sanskrit, Vanaposha) in the Anatnag Pargana, and his poem is much admired by Kāshmīrī Paṇḍits. It is full of Śaiva philosophy.4 The late Professor Bühler, in the Report (pp. 1ff.) referred to below in the List of Authorities, mentions the following Hindū works of which he obtained MSS. I have not seen any of them:-

Name of Author.	Name of Work.
Gaņakaprašasta.	Samsāramāyāmōhajālasukhaduķkhacharita.
Sāhib Kaul.	$Krish nar{\imath}vatar{a}ra.$
Anonymous.	The Sanskrit Amarakosha, with a Kashmiri explanation.
27	Janmacharita.
27	Nirvāņadēśaślōkīstava.
**	Rāmāvatāra (perhaps the work already mentioned).
22	Sivalagnavarnana.

Of writers in the Musalman style the best known is Mahmud, or Muhammad, Gāmī, who died in the year 1855 A.D. He wrote a Yūsuf Zulaikhā, a Lailā wa Majnūn,

¹ See Hinton Knowles, Kāshmīrī Proverbs, p. 20.

² Bühler, Report, etc., p. 90.

³ As a sample, in these poems Sītā, the wife of Rāma, is said to have been the daughter of Mandodari, who abandoned her immediately after birth and subsequently married Ravana.

⁴ An edition is in course of publication by the Asiatic Society of Bengal.

and a *Shirīn o Khōsrau*, all on familiar Persian models. An edition of the first-named, with a partial translation, has been prepared by the late K. F. Burkhard, regarding which particulars will be found in the List of Authorities. Other works in the Musalman dialect mentioned by Bühler, and which I have not seen, are:—

Name of Author.	Name of Work.
Saifu'd-dīn.	$Var{a}mik$ -u jra .
Sumty Pandit.	$Nisar{a}b.$
Anonymous.	Amsilla (a poem).
;;	$Har{a}rar{u}n$ Rash $ar{i}d$.
79	$Ma hm ar{u}d$ -i- $Ghaznavar{\imath}.$
,,	<u>Sh</u> ē <u>kh</u> Sannā.

The Serampore Missionaries published a version of the New Testament in 1821. This was printed from type in the Śāradā character.¹ Similar editions were issued at Serampore of the Pentateuch (1827) and of Joshua-Kings (1832), but the Bible was not completed. The British and Foreign Bible Society published a version of the New Testament in 1884, and of the Old Testament with a revised version of the New Testament in 1899, all in the Persian character.

In the year 1879 A.D. the late Pandit Īśvara Kaula completed an excellent grammar of Kāshmīrī, in the Sanskrit language and entitled the Kaśmīraśabdāmṛita. This has been edited by the present writer, and was published by the Asiatic Society of Bengal in 1898. The same author was engaged on a Kāshmīrī-Sanskrit Dictionary at the date of his death in 1893. The materials collected by him for this purpose were subsequently made over to the present writer, and from them and other sources a Kāshmīrī-English Dictionary is now in course of preparation.

Connected with formal literature, though not a part of it, are the subjects of Kashmir is a land of proverbs, and common speech is profusely folktales and proverbs. A valuable collection of Kāshmīrī proverbs has been made by interlarded with them. the Rev. J. Hinton Knowles, particulars regarding which will be found in the List of Authorities. This should be in the hands of every student of the language. It is full of information regarding the customs and the character of the people. Kashmir is also celebrated for its folktales. Not only are some familiar in every home, but there are also professional rāwīs, or reciters, who make a living by telling fairy-tales worthy of the Arabian Nights. These men recite with astonishing verbal accuracy stories that have been handed down to them by their predecessors, now and then containing words that have fallen out of use, and with the meaning of which they are now unacquainted. Sir-Aurel Stein has made a collection of such tales, as dictated by one of these men, which he has handed over to the present writer for translation and publication. Long after they had been recorded it was found necessary to check the texts, and Sir Aurel found the man again, and had him recite again the doubtful passages. They were given by him in exactly the same words as those recorded some sixteen years previously. An interesting illustration of the way in which they have been handed down is given by their form. Every now and then the narrative is broken by the phrase 'dapān wustād,' i.e. '(and my) master says (as follows).' An excellent collection of Kāshmīrī folktales

¹ Some years ago, having occasion to print something in this character, I made enquiries in Calcutta regarding this type. I found that it, and the punches, had long disappeared, having been sold as waste metal. It is the only Sarada type-that has been cast.

- in English has been collected by the Rev. J. Hinton Knowles, and published under the title of 'Folktales of Kashmir' (second edition, London, 1893).

APPENDIX.

THE LINGUISTIC CLASSIFICATION OF KASHMIRI.

In the Kashmir Census Report for 1911 (p. 179) the following remarks are made regarding the classification of Kāshmīrī:—'Kāshmīrī used to be hitherto treated as of Sanskritic origin. It has this time been grouped with Shiṇā-Khō-wār according to the revised system of classification, but the claim locally urged that it is essentially a Sanskritic language persists, and in view of the historical fact that the Valley of Kashmīr, before its conversion to Islām, was wholly populated by Brāhmans with their shastric lore, that claim might merit reconsideration.' As this point has thus been raised in an official publication of the Kashmīr State, it is advisable to discuss the question of the correct classification of the Kāshmīrī language in some detail.

In the first place, questions of sentiment, however much we may sympathize with them, must be put altogether to one side in dealing with a purely scientific question. No one values the contributions of Kashmīr Pandits to Sanskrit literature more highly than the present writer. For upwards of two thousand years Kashmir has been a home of Sanskrit learning, and from this small valley have issued masterpieces of history, poetry, romance, fable, and philosophy. Kāshmīrīs are proud, and justly proud, of the literary glories of their land. During all these centuries, Kashmīr has been subjected to the civilization of India proper. The Piśacha tribes to its north and north-west remained a hostile and barbarous people, devoid of Indian culture and with no literary history of their own. Kāshmīrīs themselves maintain that their country was formerly inhabited by Piśāchas, who were ultimately overcome by Aryan immigrants from India, and this tradition is borne out by the features presented by their language. That the literary activity of the country and the imported Indian culture should not have reacted on the vernacular speech of the inhabitants is impossible. It has reacted most powerfully, and under that influence the language has become deeply imbued with forms and idioms derived from the languages of India proper. But all the time the basis,—the old speech of the original Piśācha inhabitants,—has, as will be shown in the following pages, remained firmly established, and it is upon this basis that linguistic science demands that classification be founded. It in no way follows from this that the Brāhman inhabitants of Kashmīr are of Piśācha origin. The contrary is almost certainly the case. Tradition, ethnology, and linguistics unite in asserting that they are representatives of an early immigration from India.

It has been previously pointed out that the Dardic or Piśācha languages occupy a position intermediate between the Sanskritic languages of India proper and the Eranian languages farther to their west. They thus possess many features that are common to them and to the Sanskritic languages. But they also possess features peculiar to themselves, and others in which they agree rather with languages of the Eranian family. It is unnecessary to discuss here those common to them and to Sanskritic languages, but, as regards the others, we shall see that they are also to be found in Kāshmīrī. That

¹ For further details, see The Pisāca Languages of North-Western India, by G. A. Grierson, published by the Royal Asiatic Society in 1906.

DARD GROUP.

ge possesses nearly all the features that are peculiar to Dardic, and also those in Dardic agrees with Eranian. We therefore now proceed to examine, from this of view, Kāshmīrī phonetics, accidence, syntax, prosody, and vocabulary.

s many languages will have to be referred to, it will be convenient to use abbrens of their names. These are as follows:—

Ksh. = Kāshmīrī. Ar. = Arabic. Av. = Avesta (the ancient Eranian $My. = Maiy\tilde{a}.$ Pash. = Pashai. language). Bsh. = Bashgalī Kāfir. = Prakrit. Grw. = Gārwi. Prs. = Persian. = Shinā. Gwr. = Gawar-bati. Sh. Skr. = Sanskrit. = Hindī (as typical Sanskritic language). ∇ . = Veron. Kh. = Khō-wār. Wai. = Wai-alā. Kl. = Kalāsha.

Phonetics.—In none of the modern Dardic languages, except in the case of a few wed words, are there any sonant aspirates. When such letters originally formed of a word, the aspiration is dropped, so that gh becomes g, jh becomes j or z, dh becomes d or dh decomes dh, and dh becomes dh. There is nothing like this in India proof, but it is a universal rule in Kāshmīrī. Thus:—

- gh becomes g. Skr. ghōṭaka-, a horse, Ksh. gur^u. So Wai. gur, Gwr. gora, Grw. gōr, Pash. gōrā; but all Indian languages ghōrā, etc.
- jh becomes j or z. Skr. $budhyat\bar{e}$, Pr. bujjhai, Ksh. $b\bar{o}zi$, he will hear; but H. $b\bar{u}jh\bar{e}$.
- dh becomes d or r. Skr. vardhatē, Pr. vaddhai, Ksh. badi, he will increase; but H. barhē.
- dh becomes d. Skr. dugdha-, Pr. duddha-, Ksh. död, milk; but H. dūdh.
- bh becomes b. Skr. $bhr\bar{a}tar$, Ksh. $b\delta y^u$, a brother; so Kl. $b\bar{a}ya$, but H. $bh\bar{a}\bar{\imath}$.

All the modern Dardic languages disaspirate their sonant letters in the same way as Ksh., as indicated in the first example given above.

One of the most typical characteristics of modern Dardiclanguages is the frequent hardening of original sonant letters, so that g becomes k, j becomes ch, d becomes t, d becomes t, and d or d becomes d. This was the universal rule in the days when Paiśāchī Prakrit was spoken. In process of time most of the hardened letters have again become softened,—as is the tendency in the growth of all languages,—but, nevertheless, several instances of these hardened letters still survive, and in borrowing from other languages the tendency again comes into play, and sonant letters in borrowed words often become surds. Examples for Kāshmīrī are:—

g becomes k. Skr. khadga-, a sword, Ksh. khadak. Similarly, in other modern Dardic languages, we have Bsh. kile, Wai. kele, V. kili, Pash. kuli, all signs of the plural, and the same in origin as the Prs. gala. For borrowed words, we may quote Prs. lagām, Ksh. lākam, a bridle; Ar. 'ādgāh, Ksh. yēd'kāh, an 'Idgāh; Prs. kāghaz, Ksh. kākaz, paper.

- j becomes ch or \underline{ts} . Skr. $kshudyat\tilde{e}$, Pr. khujjai, Ksh. $kh\tilde{o}\underline{ts}i$, he will fear. Similarly, Bsh. has achu, a tear, as compared with H. $\tilde{a}jh\bar{u}$.
- d becomes t. Skr. dridha-, Ksh. drot*, firm.
- d becomes t. Skr. śvāpada-, Ksh. hāpat-, a bear. Similarly, Prs. dāman, Bsh. tāman, the skirt of a garment; Skr. dugdha-, Pr. duddha-, Sh. dūt, milk.
- b or v becomes p. Skr. śava-, Ksh. hap-, a corpse; Prs. bāz, Ksh. pöz, a falcon. So, Ar. ṭabīb, Bsh. tapīp, a physician; Skr. svasār-, Kh. ispusār, a sister.

It will be noticed that, in respect to the hardening of sonant consonants, Kāshmīrī is in entire agreement with the modern Dardic languages.

A noteworthy peculiarity of the Dardic languages is the confusion between cerebral and dental letters. This is universal and extends to Kāshmīrī. Compare the following:—Sh. $g\bar{o}t$ or $g\bar{o}t$, a house; Bsh., V. osht-, Wai. $\bar{o}sht$, Gwr., Kl. usht-, Ksh. $w\bar{o}th$ -, but H. uth-, arise; Ksh. dal or dal, a leaf; Grw. ath, Sh. ath, eight; and many other similar cases. A very interesting example is the Kāshmīrī phrase, $kr\bar{e}hon^u kta$ - (or kta-) $k\bar{a}l hyuh^u$, dense black, literally 'black like kta- $k\bar{a}l$ ' or 'like kta- $k\bar{a}l$ ' or kta- $k\bar{a}l$ is a corruption of the Sanskrit $k\bar{a}la$ - $k\bar{u}ta$, the celebrated black poison drunk by the god Siva.

A marked feature of Kāshmīrī is consonantal epenthesis, *i.e.* the change in a consonant under the influence of a following vowel or semivowel. This also occurs in the modern Dardic languages, but not in India.

Thus, in Ksh. k becomes ch before palatal letters, as in $thok^u$, weary, fem. $th\ddot{u}ch^{\ddot{u}}$; $h\ddot{\phi}kh^u$, dry, fem. $h\ddot{\phi}chh^{\ddot{u}}$. So from the root kar, do, we have Wai. $ch\ddot{a}$ -st, he does; and the Sh. $m\ddot{o}ch\ddot{o}$, before, is connected with the Skr. mukha-, a face.

Similarly, t and t change in Ksh. to \underline{ts} and ch, respectively, as in $r\bar{a}t$ -, night, plur. $r\bar{o}\underline{ts}^{\bar{u}}$; $p\bar{u}t^{\bar{u}}$, a board, plur. $pach\check{e}$. So, we have Bsh. $kt\bar{\imath}$, but V. $k\underline{ts}eh$, the back; Eranian root yet, come, compared with Bsh. $a\underline{ts}$, Wai. $a\underline{ts}h$; Skr. putra-, a son, Grw. $p\bar{u}ch$, Sh. puch or push; Skr. $str\bar{\imath}$, a woman, Sh. chei or $\underline{ts}hr\bar{\imath}ga$; Sh. trak or chak, see; and others.

In Ksh. under such circumstances d becomes j, and d becomes z, as in $b\bar{u}d^{\bar{u}}$ (fem.), great, plur. $baj\check{e}$; grand, a counting, plur. $gr\bar{u}nz^{\bar{u}}$. Similarly, the H. $dh\bar{\imath}$, a daughter, is $j\bar{u}$ in Bsh.; and the H. $d\bar{o}$, two, is represented in Kh. by $j\bar{u}$, and in Ksh. by z^ah .

In Ksh. l under similar circumstances becomes j, as in $anguj^{\bar{u}}$, a finger, representing the Skr. anguli. So the Panjābi gall (fem.), a word, is represented by $gijj\bar{\imath}$ in Bsh.

The Kāshmīrī system of epenthetic changes of vowels, though strange to nearly all the languages of India proper, obtains also in the Dardic languages, although too little is known of these to enable us to set out definite rules for them. As examples we may quote the change of a to i under the influence of a following i in the V. $izh\tilde{i}$, Gwr. $i\underline{t}sin$, Kl. and Kh. ech, an eye, as compared with the original Av. $a\acute{s}i$. So the Bsh. dusht, a hand, has its plural duisht, for dushti, just as as^i , we, is pronounced a^is^i in Kāshmīrī. Again, the Skr. $\bar{a}sya$ - (i.e. * $\bar{a}sia$ -), a mouth, becomes ish in V. and $\ddot{o}s$ in Ksh., and the Skr. $s\bar{u}rya$ - (i.e. * $s\bar{u}ria$ -), the sun, becomes swir in My., $s\bar{i}r$ in Grw., and $sir\bar{i}$ in Ksh. As an example of the epenthesis of u, we may quote the Kl. $g\bar{u}ro$, for $g\bar{a}ro$ or $g\bar{a}no$, singing, in which the \bar{a} has become u under the influence of the following o. Similarly, in

Bsh. $b\dot{r}oh$, a brother; Sh. dono, a bull; Bsh. kor, Kl. $ku\dot{r}o$, Sh. kon, an ear, and many others, a or a has become u or o. Many more examples could be quoted, but the above are sufficient to show that Kāshmīrī shares its tendency to epenthesis with all the Dardic languages.

In Kāshmīrī, when a word ends in one of the letters k, ch, \underline{ts} , t, t, or p, that letter is aspirated, and becomes kh, chh, $\underline{ts}h$, th, or ph, respectively. There is nothing like this in India, but it certainly also occurs in V., and probably in other Dardic languages. Thus, the Ksh. krak-, noise, becomes krakh, and similarly the V. masek-, moon, becomes masekh.

In the introduction to the section on Lahndā (pp. 237ff. of Part I of this Volume) it was pointed out that when a Prakrit word contained a double letter, this letter was, in the modern languages of India proper, either retained unchanged, or else reduced to a single letter with a lengthening of the preceding vowel in compensation. Thus, the Pr. bhatta-, boiled rice, becomes the Pañjābī bhatt, and the H. bhāt. It was also pointed out that in Ksh., and in Lahndā and Sindhī (two languages much subjected to Dardic influence) the vowel was not lengthened, although the double consonant was reduced to a single one. Thus, the same Sanskrit word becomes bhat in Sindhī and bata in Ksh. It also, perhaps, reappears in the Bsh. bita, meat. There are hundreds of similar examples in Ksh. which it is unnecessary to repeat here. Several will be found in the table given on the pages above referred to. Here we may quote a few from Bsh. to show how typical this is of Dardic generally:—Pr. uchcha-, high, H. ūchā, but Bsh. ucha-sth, to raise; Pr. chamma-, skin, H. chām, Bsh. cham; Pr. kaṭṭēi, he cuts, H. kāṭē, but Bsh. katā, a knife; Pr. piṭṭhī, the back, H. pīṭh, Bsh. ptī (for pitī). Similarly for the other Dardic languages.

So far we have dealt with general phonetic rules, but when we consider letters in detail the connexion between Kāshmīrī and Dardic is equally manifest. Thus:—

In the Dard group of Dardic languages an initial k sometimes becomes g, as in My. $g\bar{\imath}$, what? The same occasionally happens in Ksh. $g\bar{a}sh$, light, as compared with the Skr. $k\bar{a}sa$.

In India, when the letter v in Sanskrit forms the latter member of a compound consonant, the first member of which is a mute, it is elided in Prakrit, and the first member is doubled. Thus, Skr. pakva-, ripe, Pr. pakka-, H. $pakk\bar{a}$. In the Dardic languages, including Ksh., exactly the reverse process is followed. It is the first member that is elided, while the v is retained and is hardened to p. Thus, the Skr. pakva- becomes the Ksh. pop^* . There is very little like this in the modern Indian languages, but in Dardic we have cases like Bsh. $ps\bar{u}r$, a father-in-law (Skr. $\acute{s}va\acute{s}ura$ -); V. pseh, what?, derived from a word akin to Av. $\acute{c}hvant$ -. It will be observed that in these the sibilant is preserved as well as the hardened v, and the same is the case in the Kh. $\acute{s}pus\bar{u}r$, a sister, connected with the Skr. $\acute{s}va\acute{s}ur$ -. In Indian languages this only occurred in Apabhramśa Prakrit, where we find such forms as $pa\~{i}$ for Skr. $\acute{t}vam$, thou, and other cases of the change of $\acute{t}v$ to pp, but no other compound, with v for the second member, became p.

In Indian languages an original t between two vowels is as a rule dropped, as in Skr. kṛita-, done, H. kiā; Skr. pitā, a father, H. piu; Skr. śata-, a hundred, H. sau.

In Paiśāchī Prakrit this t was, on the contrary, preserved, and this rule is followed with great consistency in the modern Dardic languages, as well as in Kāshmīrī. Thus, from the Pahlavi katak, a house, we have Kh. $\underline{kh}atan$; Skr. tata-, a father, Bsh. tot, Waitata, and so others; Skr. krita-, Bsh. kutt, done, Ksh. kyut" (i.e. kit"), for; Skr. $\acute{s}ata$ -, a hundred, Bsh. sher (with change of t to r), Ksh. hat- (with change of \acute{s} to h); Skr. $bh\bar{u}ta$ -, become, Ksh. (Sirājī) $but\bar{o}$, was.

In India an original ty becomes ch, as in H. sach, true, from Skr. satya. In Dardic and Ksh., on the other hand, ty often becomes t, as in Ksh. sat-, true. So, corresponding to the Skr. nrityati, he dances, we have the Bsh. root $n\bar{a}t$ - and the Sh. root nat, but H. $n\bar{a}ch$.

In India a Skr. tr becomes t, as in Skr. putra-, a son, H. $p\bar{u}t$; Skr. gotra-, a clan, H. $g\bar{o}t$, and so on. In the Dardic languages and in Ksh. it may remain unchanged, as in Wai. piutr, Kl. $p\bar{u}tr$, Ksh. $p\bar{o}tr$, a son; Skr. $tr\bar{\iota}n\bar{\iota}$, three, H. $t\bar{\iota}n$, while, compared with the Av. $thr\bar{u}y\bar{o}$, three, we have Bsh., Kl., Ksh. $tr\bar{e}h$, Wai., Sh. $tr\bar{e}$, Kh. troi.

We have seen that in the Dardic languages tr usually remains unchanged. Often, however, in the Dard group it is, as already stated, changed to ch or sh. Thus, we have the Sh. root chak or trak, see; the Skr. $g\bar{o}tra$, a clan, becomes $g\bar{o}t$ or $g\bar{o}sh$, in Sh. The Skr. putra, a son, is push in Sh. and $p\bar{u}ch$ in Grw.; the Skr. $str\bar{i}$, a woman, is chei in Sh. Similarly, in the Rāmbanī dialect of Ksh., we have $ch\bar{e}\bar{i}$ or trai, three, corresponding to the Sh. $ch\bar{e}$, V. $chh\bar{i}$, and My. $ch\bar{a}$. It may be noted that a similar change occurs in the neighbouring Eranian Ghalchah languages, as in Wakhī $p\bar{o}tr$, Sarīqōlī $p\bar{o}ts$, a son.

One of the most persistent consonants in India is the letter n. In the modern languages it almost always survives, but in the Dardic languages and in Ksh. it is liable to elision. Thus, Skr. manusha-, a man, is Kl. mōch, V., Sh. mush. In Ksh. we have the corresponding word mɔ̃ts-, which is said to be the word for 'man' used by demons, the ordinary word being manōsh, which is borrowed direct from Skr. In other words, the original Dard term has been discarded as vulgar in favour of the high-flown borrowed Skr. word. Another important example is the Ksh. word dyār, money, which, strange to say, is a corruption of the Latin denarii, come to Kashmīr through Greek and Sanskrit, or through Greek direct. The Skr. form of the word is dīnārāḥ.

The Hindū Prakrit grammarians noted as a peculiar fact that in Paiśāchī Prakrit ny became ñ. This is not the case in India, where ny became n, as in Skr. dhānya-, H. dhān, paddy; Skr. anya-, H. ān, another. But Ksh. exactly follows the Paiśāchī Prakrit rule. It has dāñĕ, paddy, and several other similar words.

In modern Dardic languages r, when standing alone, is frequently elided. Thus, we have the Sh. root mir, but Gwr. root $m\bar{\imath}$, die; Pash. karam or kam, I do; Bsh. shei, the head, as compared with the Skr. siras; Bsh. $d\bar{a}o$, wood (Skr. $d\bar{a}ru$ -); Kl. chau, four (H. $ch\bar{a}r$). So in Ksh. we have $b\bar{o}s^i$, a kind of almanac, derived from the Skr. $bh\bar{a}skar\bar{\imath}$; $gr\bar{a}ngal$ or $g\bar{a}ngal$, distraction; $gr\bar{o}nd^u$ or $gond^u$, a leg; and $br\bar{o}nth$ or $b\bar{o}nth$, before. So, in the Kashṭawārī dialect of Ksh. we have nyit for $n\bar{\imath}rit$, having emerged; and in the Sirājī dialect ichchh for richchh, a bear, and many others.

In India, when r originally preceded another consonant, it is usually dropped, as in H. sah, all, from Skr. sarva-; but in the Dardic languages and in Kāshmīrī the r is

Bsh. $br\bar{o}h$, a brother; Sh. $d\bar{o}n\bar{o}$, a bull; Bsh. $k\bar{o}r$, Kl. $kur\tilde{o}$, Sh. $k\bar{o}n$, an ear, and many others, a or \bar{a} has become u or o. Many more examples could be quoted, but the above are sufficient to show that Kāshmīrī shares its tendency to epenthesis with all the Dardic languages.

In Kāshmīrī, when a word ends in one of the letters k, ch, $\underline{t}\underline{s}$, \underline{t} , t, or p, that letter is aspirated, and becomes kh, chh, $\underline{t}\underline{s}h$, th, th, or ph, respectively. There is nothing like this in India, but it certainly also occurs in V., and probably in other Dardic languages. Thus, the Ksh. krak-, noise, becomes krakh, and similarly the V. masek-, moon, becomes masekh.

In the introduction to the section on Lahndā (pp. 237ff. of Part I of this Volume) it was pointed out that when a Prakrit word contained a double letter, this letter was, in the modern languages of India proper, either retained unchanged, or else reduced to a single letter with a lengthening of the preceding vowel in compensation. Thus, the Pr. bhatta-, boiled rice, becomes the Pañjābī bhatt, and the H. bhāt. It was also pointed out that in Ksh., and in Lahndā and Sindhī (two languages much subjected to Dardic influence) the vowel was not lengthened, although the double consonant was reduced to a single one. Thus, the same Sanskrit word becomes bhat* in Sindhī and bata in Ksh. It also, perhaps, reappears in the Bsh. bita, meat. There are hundreds of similar examples in Ksh. which it is unnecessary to repeat here. Several will be found in the table given on the pages above referred to. Here we may quote a few from Bsh. to show how typical this is of Dardic generally:—Pr. uchcha-, high, H. ūchā, but Bsh. ucha-sth, to raise; Pr. chamma-, skin, H. chām, Bsh. cham; Pr. kaṭṭēi, he cuts, H. kāṭē, but Bsh. katā, a knife; Pr. piṭṭhē, the back, H. pīṭh, Bsh. ptī (for pitī). Similarly for the other Dardic languages.

So far we have dealt with general phonetic rules, but when we consider letters in detail the connexion between Kāshmīrī and Dardic is equally manifest. Thus:—

In the Dard group of Dardic languages an initial k sometimes becomes g, as in My. $g\bar{\imath}$, what? The same occasionally happens in Ksh. $g\bar{a}sh$, light, as compared with the Skr. $k\bar{a}sa$.

In India, when the letter v in Sanskrit forms the latter member of a compound consonant, the first member of which is a mute, it is elided in Prakrit, and the first member is doubled. Thus, Skr. pakva-, ripe, Pr. pakka-, H. $pakk\bar{a}$. In the Dardic languages, including Ksh., exactly the reverse process is followed. It is the first member that is elided, while the v is retained and is hardened to p. Thus, the Skr. pakva- becomes the Ksh. pop^* . There is very little like this in the modern Indian languages, but in Dardic we have cases like Bsh. $ps\bar{u}r$, a father-in-law (Skr. $\acute{s}va\acute{s}ura$ -); V. pseh, what?, derived from a word akin to Av. chvant-. It will be observed that in these the sibilant is preserved as well as the hardened v, and the same is the case in the Kh. $ispus\bar{u}r$, a sister, connected with the Skr. $svas\bar{u}r$ -. In Indian languages this only occurred in Apabhramśa Prakrit, where we find such forms as pai for Skr. tvam, thou, and other cases of the change of tv to pp, but no other compound, with v for the second member, became p.

In Indian languages an original t between two vowels is as a rule dropped, as in Skr. krita, done, H. $ki\bar{a}$; Skr. $pit\bar{a}$, a father, H. piu; Skr. $\acute{s}ata$, a hundred, H. sau.

In Paiśāchī Prakrit this t was, on the contrary, preserved, and this rule is followed with great consistency in the modern Dardic languages, as well as in Kāshmīrī. Thus, from the Pahlavi katak, a house, we have Kh. $\underline{kh}atan$; Skr. tata-, a father, Bsh. tot, Waitata, and so others; Skr. krita-, Bsh. kutt, done, Ksh. kyut" (i.e. kit"), for; Skr. $\acute{e}ata$ -, a hundred, Bsh. sher (with change of t to r), Ksh. hat- (with change of \acute{e} to h); Skr. $bh\bar{u}ta$ -, become, Ksh. (Sirājī) $but\bar{o}$, was.

In India an original ty becomes ch, as in H. sach, true, from Skr. satya. In Dardic and Ksh., on the other hand, ty often becomes t, as in Ksh. sat, true. So, corresponding to the Skr. nrityati, he dances, we have the Bsh. root $n\bar{a}t$ - and the Sh. root nat, but H. $n\bar{a}ch$.

In India a Skr. tr becomes t, as in Skr. putra-, a son, H. $p\bar{u}t$; Skr. gotra-, a clan, H. $g\bar{o}t$, and so on. In the Dardic languages and in Ksh. it may remain unchanged, as in Wai. piutr, Kl. $p\bar{u}tr$, Ksh. $p\bar{o}tr$, a son; Skr. $tr\bar{i}ni$, three, H. $t\bar{i}n$, while, compared with the Av. $thr\bar{a}y\bar{o}$, three, we have Bsh., Kl., Ksh. $tr\bar{e}h$, Wai., Sh. $tr\bar{e}$, Kh. troi.

We have seen that in the Dardic languages tr usually remains unchanged. Often, however, in the Dard group it is, as already stated, changed to ch or sh. Thus, we have the Sh. root chak or trak, see; the Skr. $g\bar{o}tra$, a clan, becomes $g\bar{o}t$ or $g\bar{o}sh$, in Sh. The Skr. putra, a son, is push in Sh. and $p\bar{u}ch$ in Grw.; the Skr. $str\bar{\imath}$, a woman, is $che\bar{\imath}$ in Sh. Similarly, in the Rāmbanī dialect of Ksh., we have $ch\bar{e}\bar{\imath}$ or trai, three, corresponding to the Sh. $ch\bar{e}$, V. $chh\bar{\imath}$, and My. $ch\bar{a}$. It may be noted that a similar change occurs in the neighbouring Eranian <u>Gh</u>alchah languages, as in Wa<u>kh</u>ī $p\bar{o}tr$, Sarīqōlī $p\bar{o}ts$, a son.

One of the most persistent consonants in India is the letter n. In the modern languages it almost always survives, but in the Dardic languages and in Ksh. it is liable to elision. Thus, Skr. manusha-, a man, is Kl. mōch, V., Sh. mush. In Ksh. we have the corresponding word mɔ̃ts-, which is said to be the word for 'man' used by demons, the ordinary word being manosh, which is borrowed direct from Skr. In other words, the original Dard term has been discarded as vulgar in favour of the high-flown borrowed Skr. word. Another important example is the Ksh. word dyār, money, which, strange to say, is a corruption of the Latin denarii, come to Kashmīr through Greek and Sanskrit, or through Greek direct. The Skr. form of the word is dīnārāḥ.

The Hindû Prakrit grammarians noted as a peculiar fact that in Paiśāchī Prakrit ny became \tilde{n} . This is not the case in India, where ny became n, as in Skr. dhānya-, H. dhān, paddy; Skr. anya-, H. ān, another. But Ksh. exactly follows the Paiśāchī Prakrit rule. It has dāñē, paddy, and several other similar words.

In modern Dardic languages r, when standing alone, is frequently elided. Thus, we have the Sh. root mir, but Gwr. root $m\bar{\imath}$, die; Pash. karam or kam, I do; Bsh. $she\bar{\imath}$, the head, as compared with the Skr. siras; Bsh. $d\bar{a}o$, wood (Skr. $d\bar{a}ru$ -); Kl. chau, four (H. $ch\bar{a}r$). So in Ksh. we have $b\bar{o}s^i$, a kind of almanac, derived from the Skr. $bh\bar{a}skar\bar{\imath}$; $gr\bar{a}ngal$ or $g\bar{a}ngal$, distraction; $gr\bar{o}nd^u$ or $gond^u$, a leg; and $br\bar{o}nth$ or $b\bar{o}nth$, before. So, in the Kashṭawārī dialect of Ksh. we have nyit for $n\bar{\imath}rit$, having emerged; and in the Sirājī dialect ichchh for richchh, a bear, and many others.

In India, when r originally preceded another consonant, it is usually dropped, as in H. sah, all, from Skr. sarva-; but in the Dardic languages and in Kāshmīrī the r is

usually retained, and if any consonant is dropped it is the second one. Thus, corresponding to the Skr. karna-, an ear, we have Bsh. kōr, Kh., Wai. kār, Kl. kuṛỡ; to the Skr. gardabha-, an ass, we have Kl. gardōk, Kh. gurdōgh; to Skr. sūrya-, the sun, we have Kl. sūri, Gwr. suri, Kh. sūrī, My. swīr, and Ksh. sirī; and to Skr. sarva-, all, Ksh· sõr*.

In India, a sibilant now and then becomes h, as in Skr. $\bar{e}kasaptati$ -, H. ikhattar, seventy-one. This change is, however, rare except in Lahndā and Sindhī, which are under strong Dardic influence. On the other hand, in the Dard group, including Ksh., this change is very common, and is subject to the rule that it is mainly confined to an original \acute{e} or sh, s being rarely changed. Moreover, the sibilant is retained before certain vowels. A good example of this latter point is the Ksh. hih^u (pronounced $hyuh^u$), like, derived from an older $*hi\acute{e}u$. But the feminine of hih^u is $hish^{\ddot{u}}$, even in the modern language, because a sibilant does not become h when followed by \ddot{u} - $m\bar{a}tr\bar{a}$. Other examples of this change are:—

Skr. upaviśati, he sits down, Ksh. běhi, and so other Dard languages; Skr. vimśati-, twenty, Sh. bēh, Ksh. wuh; Skr. daśa-, ten, Ksh. dah; Skr. śata-, a hundred, Ksh. hat-; Av. khśvaś, six, Gwr. shoh, My., Kl. shōh, Ksh. shěh; Skr. śiras-, a head, Ksh. hār; Skr. śava-, a corpse, Ksh. hap-; Skr. visha-, poison, Ksh. věh, and many others. It should be observed that this obtains almost exclusively in the Dard group. For instance, in the Kāfir Dardic dialects we have Bsh. vitsi, twenty; dits, ten; shai, a head; and wish, poison.

The compound consonants shp and śm of Skr. sometimes become a simple sh in Dardic. Thus, Skr. pushpa-, a flower, becomes Kl. $p\bar{u}sh$ -ik, Ksh. $p\bar{o}sh$; and the Skr. $Kaśm\bar{v}ra$ -, Kashmīr, becomes $Kash\bar{v}r^{\bar{u}}$ in Ksh. Similarly, sk becomes s in $b\bar{o}s^i$ for Skr. $bh\bar{a}skar\bar{v}$, a kind of almanac. There is nothing like this in India.

It has been stated that the Dardic languages often show changes peculiar to Eranian, especially East Eranian, languages, and which are not found, or are rare, in India. A few of these may be mentioned here, as they are noticeable in Ksh.:—

In East Eranian the change of ch to \underline{ts} is common. So also in modern Dardic and Ksh. The same change occurs in the Indian Marāṭhī, but only before certain vowels. Here it occurs before all vowels. Thus, while Kl. and Pash. have kuch, the belly, Wai. has $kiu\underline{ts}$. Compare H. $ch\bar{a}r$, four, with Gwr. $\underline{ts}\bar{u}r$, Ksh. $\underline{ts}\bar{o}r$; H. $p\bar{a}ch$, five, with Gwr. $pan\underline{ts}$, Ksh. $p\bar{a}n\underline{ts}$; Burushaski $ch\bar{o}mar$ with Gwr. $\underline{ts}imar$, iron; Skr. $chh\bar{a}gala$ - with Ksh. $\underline{ts}h\bar{a}wul^{u}$, a goat.

Another very similar change,—that of j to z,—is frequent in Eranian. It is very common in Ksh. One example will suffice. Compare Skr. $j\bar{\imath}va$ -, life, with Gwr. zien, alive, Ksh. zuv, life. There is a similar change on the Indian Marāṭhī, but not before i.

The change of d to l is regular in East Eranian. It is common in the Dardic Veron, and is also found in other Dardic dialects. An interesting example is the Prs. $m\bar{a}dar$, a mother, which corresponds to the Sh. $m\bar{a}l\bar{i}$. In Ksh. l, but not d, becomes j before \bar{u} - $m\bar{a}tr\bar{a}$, so that we get $m\bar{o}j^{\bar{u}}$, a mother. From Sh. $m\bar{a}l\bar{i}$, a secondary masculine is formed, viz. $m\bar{a}l\bar{o}$, a he-mother, i.e. a father, the Ksh. form of which is $m\bar{o}l^{\bar{u}}$.

In Eastern Eranian sht is frequently changed to t. So, in Dardic and Ksh., the Prs. pusht, the back, becomes Bsh. $pt\bar{\imath}$, Sh. $pat\bar{o}$, Gwr., Ksh. pata, behind, and so on in others, just as in the East Eranian Balochi it becomes phut.

In modern Indian languages, the sh of the Skr., shat, six, becomes chh, as in the H. chha, Bengali chhay, Pañjābī $chh\bar{e}$. The Dardic languages, including Ksh., follow the Eranian method of changing the initial $\underline{kh}\acute{s}v$ of the Av. $\underline{kh}\acute{s}va\acute{s}$, six, to sh, instead of using the Indian chh. Thus we have Bsh. sho, Wai. $sh\bar{u}$, V. ushu, Pash. sh^a , Kl. $sh\bar{o}h$, and so on, which agree with the Ksh. $sh\check{e}h$. There is nothing like this in India.

In modern Eranian dialects, an original δ sometimes changes to ch, as in the Kashānī $ch\bar{u}m$ for the standard Prs. $sh\bar{a}m$, evening. This, also, is not uncommon in Dardic and in Ksh. Thus, the Av. $a\delta i$ -, an eye, is represented by Bsh., Wai. $ach\tilde{e}$, Kl. $\tilde{e}ch$, Ksh. $achh^i$. So Skr. $\delta \bar{u}nya$ -, empty, becomes Ksh. $chhon^u$; Skr. root $pa\delta$, see, is represented by the Sh. pach; Skr. $a\delta ru$ -, a tear, is osh^u in Ksh., but achu in Bsh.; Skr. $\delta v\bar{e}ta$ -, white, Ksh. $chhot^u$. In India, the reverse is the case, chh often becoming s, and the change from δ or sh to chh, as in the H. chha, is very rare.

Finally, Ksh. has certain phonetic changes of its own that are quite foreign to India. In India, dm becomes dd, as in the Bengali $p \check{o} ddo$, from Skr. padma-, a lotus. In Ksh. this becomes m, as in the word $pam-p \check{o} sh$, a lotus-flower. Again, in Ksh. ld becomes l (a thoroughly un-Indian change), as in gal, a shout, connected with the vedic Skr. galda-, and with the Bsh. $gijj\bar{i}$, speech. This word is also heard, under the form gall, in Panjābī and Lahndā, which are, as we know, strongly influenced by Dardic. Sanskrit itself in post-vedic times borrowed it from Prakrit in the form $g\bar{a}li$ -, from which there is a series of modern Indian derivatives meaning 'abuse.'

Accidence.—Turning now to accidence, in the first place it should be noticed that, like Eranian languages, Kāshmīrī possesses a suffix with the force of the indefinite article, equivalent to the Persian $y\bar{a}$ - \check{e} wahdat. Just as in Persian $\bar{\imath}$ (ancient \bar{e}) is suffixed, so, in Kāshmīrī, \bar{a} is suffixed. Thus, Prs. yak- $\bar{\imath}$, Ksh. akh- \bar{a} , a certain one, a. It is hardly necessary to point out that there is nothing like this in India; but the same phenomenon is presented by Bsh., as in $pal\bar{e}$ -i, a servant.

The main principles of the declension of nouns is very similar in Indian languages, in Eranian languages, and in Dardic. We may, however, point out that there are some important differences of detail between Ksh. and Indian languages. Thus, in all the languages of northern India, strong masculine nouns, such as $gh\bar{o}r\bar{a}$, a horse, end in the nominative singular in \bar{a} , and in the nominative plural in \bar{e} ($gh\bar{o}r\bar{e}$). In Ksh., the corresponding nouns end in u- $m\bar{a}tr\bar{a}$ in the singular, and in i- $m\bar{a}tr\bar{a}$ in the plural, as in gur^u , a horse, plural gur^i . Moreover, all masculine nouns have, in Ksh., a dative singular ending in s (as in $ts\bar{u}ras$, to a thief, guris, to a horse), and a dative plural in n (as in $ts\bar{u}ran$, to thieves, $gur\bar{e}n$, to horses). In some Indian dialects there are oblique plurals in n, but there is nothing like the Kāshmīrī dative singular in s till we reach Marāthī, far to the south. Further, Ksh. has cases of the agent (as in gur^i , by a horse) and ablative (as in gur^i , from a horse), to which there is nothing corresponding in India. The s-dative is not peculiar to Ksh., but also exists in Kl. and Pash., and also perhaps in Sh., where it has the force of the agent.

To add definiteness to the meaning of the cases, postpositions are employed in Indian and prepositions in Eranian languages. In the Dardic languages both are used, though Ksh. prefers the former. Of the postpositions, one or two only remind one of India, the rest being peculiar to Dardic. The Ksh. postpositions of the genitive, $sond^u$, uk^u , and un^u , all have parallels in India,—a relative of $sond^u$ being found in the Mārwārī $hand\bar{o}$, of uk^u in the H. $k\bar{a}$, and of un^u in the Gujarātī $n\bar{o}$. Similarly, it is possible to compare manz, in, with the H. $m\tilde{a}jh$, but it more nearly resembles the Dardic V. munj and the My. maz. But the other postpositions are either quite peculiar to Dardic or are borrowed from Persian. As Dardic examples, we may quote $kyut^u$ (an adjective), for; $pu\underline{ts}hy$, for; $p\bar{e}th$, on; $k\bar{e}th$, in; and $p\bar{e}tha$, from.

Ordinary adjectives here call for no remarks, but the Ksh. numerals are so decidedly Dardic and so distinct from the forms current in India that some attention must be paid to them. Thus:—

One This is ak. It may be either Indian, Eranian, or Dardic, but is more like Prs. and Gwr. yak than Indian $\bar{e}k$.

Two, $z^a h$. In Ksh. di becomes z, so that the word is connected with the Bsh. diu and the Kh. $j\bar{u}$, rather than with the Indian $d\bar{o}$.

Three, $tr\check{e}h$. This is regular Dardic. Cf. Bsh. Kl. treh, Wai. $tr\check{e}$, Sh. $tr\acute{e}$, Kh. troi, and so on. India has $t\bar{\imath}n$, and the like.

Four, $\underline{ts\bar{o}r}$. The \bar{o} is Dardie, as in Kh., Grw. $\underline{ch\bar{o}r}$, Gwr. $\underline{ts\bar{u}r}$, Sh. \underline{chorr} . India has \bar{a} , as in $\underline{ch\bar{a}r}$.

Five, pānts. This may be Indian, Eranian, or Dardic.

Six, sheh. This is Dardic, as in Bsh. sho, Waī. shū, V. ushu, Pash. sha, Gwr. shoh, Kl. shōh, Sh. shah, and so on.

Seven, sat. This, with the short a, is Dardic, as in Pash., Gwr., Kl., Grw. sat, Sh. satt, and so others. India has sāt.

Eight, öth or aith. This may be Indian or Dardic, but the vowel is not Indian.

Nine, nav. This may be Indian, Eranian, or Dardic.

Ten, dah. This is Dardic, with the typical change of \acute{s} to h.

Twenty, wuh. The same remarks apply.

Hundred, hat. The same remarks apply.

From the above we see that all the first ten numerals may be of Dardic origin, and that some of them must be. Some are distinctly not Indian.

The first two personal pronouns may be shown as follows:-

Ι,	$b\check{o}h$	thou,	ts^ah .
me,	mě	thee,	<u>ts</u> ĕ.
my,	myôn"	thy,	$chy\delta n^u$.
we,	as^i	ye,	$t\check{o}h^i$.
us,	asĕ	you,	tohě.
our,	sốn ^u	your,	$tuhond^u$.

It will at once be seen that not one of these forms agrees with the corresponding Indian pronouns.

Similarly for the demonstrative pronouns we have :-

	This.	That (near).	That (far).
Sing. Nom.	yih	huh	suh.
Dat. (animate)	yimis	humis, amis	tamis.
Dat. (inanimate)	yith	huth, ath	tath.
Plur. Nom.	tim	hum, am	tim.
Dat.	timan	human, aman	timan.

Again it is not necessary to draw attention to the various points of difference between this and the Indian forms. It may be especially pointed out that India has nothing corresponding to the distinction between the proximate and remote demonstrative pronouns, although it once existed in Sanskrit.

While none of the above forms are Indian, they all have their cognates on other Dardic languages. This has been fully worked out in my Piśāca Languages of North-Western India, and need not be repeated here.

The above remarks also apply to the other pronouns, and space need not here be wasted in considering them. Particulars will be found in the work just mentioned.

As regards verbs, the general principles of conjugation are on the whole the same in Indian, in Eranian, and in Dardic, but a few facts stand out. While the present tense of the verb substantive, based on the participial form chhuh, he is, is also to be found in India, the past tense, formed from the root $\bar{a}s$, sit, in δs^u , he was, is not at all used in that sense in that country. This root $\bar{a}s$ is, however, common in Dardic. Thus, for 'he was 'we have My. $\tilde{a}s$, Grw. $\bar{a}sh$, Kh. $\dot{a}sistai$, Kl. $\bar{a}sis$, and so on.

In the conjugation of the ordinary verb, the present participle ends in $\bar{a}n$, as in $m\bar{a}r\bar{a}n$, striking, a form that does not occur in India, but which has many Dardic relatives, such as Bsh. vinan, Gwr. $\underline{th}lim\bar{a}n$, Kl. $t\bar{\imath}man$, all meaning 'striking.'

While the Indian verb has only one past participle, Ksh. has three,—one $(m\delta r^*, struck)$ indicating past time in the near past, another $(m\bar{a}ry\bar{o}v)$ indicating past time indefinitely, and a third $(m\bar{a}ry\bar{a}v)$ indicating remote past time. One of these $(m\bar{a}ry\bar{o}v, for\ m\bar{a}ry\bar{o})$ has the same origin as the past tense of India (Braj $m\bar{a}ryau$), but the others have had an independent line of growth. Although we do not yet know enough in regard to the other Dardic languages to distinguish between the meanings of the various forms of the past participle in them, it is certain that Wai., Kh., Sh., and My. have at least each two. Thus, Wai. has $vin\bar{a}$ and vinasta, Kh. gani and ganista, Sh. $shid\bar{o}$ and $shid\bar{e}g\bar{o}$, and My. kuta and kutagal, all meaning 'struck.'

The Ksh. infinitive is built on the same lines as in Indian languages, *i.e.* it ends in $un\ (m\bar{a}run)$, which may be compared with the H. ending in $n\bar{a}\ (m\bar{a}rn\bar{a})$. In most Dardic languages, the infinitive ends in k, but in V. it ends in n to which k is added, as in pesumti-n-ik, to strike. The termination is therefore not specially Indian.

In the formation of the tenses Ksh. differs widely from Indian languages. The old present, a tense that survives alike in Indian, Persian, and Dardic, in India generally

has the force of the present subjunctive, but in Ksh. it is used as a future. In its conjugation it shows little relationship with Indian languages. Thus, to compare Ksh. with H., we have:—

		Ksh.	H.
Sing.	1.	$m\bar{a}ra$, I shall strike	$m\bar{a}r\widetilde{u}$, I may strike.
	2.	$mar{a}rakh$	mārē."
	3.	$mar{a}ri$	$mar{a}rar{e}$.
Plur.	1.	$mar{a}rav$	mār ё .
	2.	$mar{a}riv$	mā rō.
	3.	māran	$m \hat{m{a}} m{r} \widetilde{m{e}}$.

On the other hand, as shown in the book above referred to, the Ksh. conjugation closely follows that of the other Dardic languages. The same remarks also apply to the imperative.

As regards the participial tenses, they are made in the Dardic languages on the same principles as in India. A present and imperfect are formed from the present participle conjugated with the appropriate tenses of the verb substantive, and a perfect and pluperfect from the past participle conjugated with the same. These call for no remarks.

Ksh. has three past tenses, one corresponding to each of the three past participles. Indian languages, of course, have only one. Some Indian languages form the past tense by adding pronominal suffixes to the past participle, as in the Bengali $m\bar{a}ril\bar{a}-m$, struck-by-me, *i.e.* I struck. In Ksh. the same procedure is followed, but with the important difference that the suffixes do not form a necessary part of the word. They are removable, and may be used or not as the speaker desires. Thus, he may say either $m\delta rum$, struck-by-me, or $m\check{e}m\delta r^u$, by-me struck, for 'I struck.' This affects the whole structure of the language.

Syntax.—In the order of words in a sentence, Ksh. differs altogether from Indian languages. In the latter the subject comes first, then the object or predicate, and last of all the verb; but, in ordinary Ksh. the verb precedes the predicate, as in Persian. Thus, in Ksh. they say:—

suh chhuh gātul" mahanyuv",

he is clever man,

while in H. they say:-

wŏh hōshyār ādmī hai.

he clever man is.

Now, the order of words used by a man in speaking indicates the order of his thoughts. Hence, the order of thought in Kashmīr is different from the order of thought in India.

Prosody.—In prosody, although the whole literary history of Kashmīr is intimately connected with Sanskrit, modern Kāshmīrī has abandoned Indian metres. The metres used are all Eranian, and what may be called the heroic metre of the language, employed even in Hindū epics like the Rāmāvatāracharita, is the well-known Persian metre called Baḥrī Hazaj.

2 K 2

Vocabulary.—Finally we come to the question of vocabulary. It is on this that the claim that Kāshmīrī is a Sanskritic language is most strongly based, and, if languages were classed according to vocabulary, the claim would be difficult to controvert. But it is well known that vocabulary cannot be used as a basis of linguistic classification. If it were, High Urdū would have to be classed with Persian as an Eranian language, for the great majority of its words are borrowed from Persian. So, if vocabulary were the test, the Kāshmīrī spoken by Musalmāns, who form nine-tenths, and more, of the population of the Valley, might be classed as a form of the same language.

As has been stated above, Kashmīr has for at least two thousand years been under Indian literary influence. It is the only one of the Dardic languages that has a written character and that has a literature. For centuries it was the home of great Sanskrit scholars, and at least one great Indian religion, Saivism, has found some of its most eloquent teachers on the banks of the Vitastā. Some of the greatest Sanskrit poets were born in and wrote in the Valley, and from it has issued in the Sanskrit language a world-famous collection of folklore. Under such circumstances it would be extraordinary if the great bulk of Kāshmīrī vocabulary were not closely connected with the vocabularies of the neighbouring Sanskritic languages, and such, indeed, is the fact.

But, nevertheless, some of the commonest words,—words that are retained longest on any language, however mixed, and that are seldom borrowed, such as the earlier numerals, or the words for 'father,' 'mother,' and the like,—are closely allied to the corresponding Shiṇā words, and are therefore of Dardic origin. The following is a list of some Shiṇā words which have cognate forms in Kāshmīrī. Some of these words also occur in Indian languages, but they are also Dardic, and are examples of the same form appearing in both families of Aryan speech.

English.	Shiṇā.	Kāshmīrī.
acid	churko	$\underline{ts}ok^{u}$.
after	$phatar{u}$	pata.

write	lik-	lĕkh
yes	āwā	awa.
and the second		

We therefore arrive at the following conclusions. Kāshmīrī is a mixed language, having as its basis a language of the Dard group of the Dardic family allied to Shiṇā. It has been powerfully influenced by Indian culture and literature, and the greater part of its vocabulary is now of Indian origin and is allied to that of the Sanskritic Indo-Aryan languages of Northern India. As, however, its basis,—in other words, its phonetic system, its accidence, its syntax, its prosody,—is Dardic, it must be classed as such, and not as a Sanskritic form of speech.

SKETCH OF KĀSHMĪRĪ GRAMMAR.

WRITTEN CHARACTER.—Three alphabets are in current use in the Kashmir Valley,—the Persian, the Nāgarī, and the Śāradā. Besides these, the Ṭākarī character is used in writing the Kashṭawārī dialect and the mixed dialects of the hills. The last named will be dealt with under the head of Kashṭawārī. The Persian character is used by Musalmāns, and by Hindūs who have come under the influence of Musalmān education. It is also the character employed at the present day by Christian Missionaries in writing books designed for natives of the country. Its vowel system is quite inadequate for the representation of the complicated vowel-sounds of the language. The Nāgarī character has a limited use amongst Hindūs, and of late years has been more employed than formerly. The use of these two characters in writing Kāshmīrī is dealt with on pp. 257ff. post.

The Śāradā character is the ancient indigenous character of Kashmīr. It is allied to Nāgarī, being built on the same system, and corresponding with it letter for letter, but the forms of the letters differ greatly. It is more closely allied to the Ṭākrī alphabets of the Panjab hills, but, unlike them, is perfectly regular in its use and has a complete array of signs for the different vowels. It is still generally used by Hindūs and is taught in their schools. Each letter is given a separate name, so that, for instance, a is named ādau a; initial i is named yayav yē; non-initial i is named mūnth²r; kha is named khŏni khō; ksha is named kŏli věthi ksha; and so on for the others.

No types are now available for this character, and hence in the following pages, the Nāgarī character will be used as its substitute. To make up the deficiency a brief account of the Śāradā alphabet is here appended. In the first table I have added the corresponding letters of the alphabet used in Kashṭawār (Kishtwar), which may be looked upon as the connecting link between the Śāradā and the Ṭākrī alphabets of the Northern Pañjāb.

When vowels follow consonants they take the following forms. Virama, is, takes the form 1. In order to show how they are joined, it and all the vowels are here given as added to the letter U pa. Thus:—

In adding these vowels there are a few irregularities. As shown above, non-initial \bar{a} is usually indicated by a short blank triangle suspended from the top line, thus

The letters Γ $\dot{n}a$, ∇r $\dot{j}a$, Γ $\dot{t}a$ and ∇ $\dot{n}a$, have already a similar stroke on the right, and, with non-initial \bar{a} , this stroke and the following vowel combine into a kind of semicircle or hollow triangle, thus \neg , so that we get ∇ $\dot{n}a$, ∇ $\dot{j}a$, ∇ $\dot{j}a$, ∇ $\dot{j}a$, ∇ $\dot{j}a$, ∇

In the following cases non-initial u takes a form more nearly resembling that employed in Nagari:—

Similarly non-initial a takes a varying form in the following:-

Conjunct consonants as a rule present no difficulty. Here we may mention that when r is the first member of a conjunct consonant, it does not change its form, thus,

3 rka. When it is the second member, it takes the form & as in 3 kra.

When ya is the second member of a conjunct consonant, it takes the form as in Ξ kya.

For further particulars regarding the Sarada alphabet reference may be made to an article by the present writer on pp. 677ff of the Journal of the Royal Asiatic Society for 1916, entitled 'On the Sarada Alphabet.'

PRONUNCIATION.—In all the Dardic languages, as well as in the closely connected Lahndā and in the various dialects of Central and Western Pahārī, epenthesis plays a most important part. As regards the Dardic languages it everywhere makes its presence felt, but the rules under which it acts have been studied only in Kāshmīrī. For the other languages, materials are not yet available. By 'epenthesis' is here meant the change in sound produced in a vowel or consonant by a vowel or semivowel following it. There are not a few instances of this in our own English. Thus, to take vowel changes,—the plural of 'foot' is 'feet.' These words are descended from the Old English fot and fet, respectively. The word fet is derived from the Old Saxon plural fôti, and in this the ô has been changed to the Old English é of fét. owing to the influence of the following i. Similarly, the Old English béc, books, is derived from the Old Saxon bóci. Other examples are 'men,' derived from an old form *manni, 'mouse' and 'mice,' 'goose' and 'geese,' in all of which the change of vowels in the plurals is due to epenthesis. Again,—to take consonantal changes, —the c or k in the Old English 'benc,' bench, became ch under the influence of the following i in the Teutonic banki, and under the influence of the following eo, the c of the Old English ceorl became the ch of the modern 'churl.'

In Kāshmīrī, epenthesis prevails to a much greater extent than in English, and it is not too much to say that several instances will be found in every line of the specimens here printed. It causes numerous changes in the declension of nouns and in the conjugation of verbs, which present considerable difficulties to the learner unless the rules for the application of epenthesis are known. If they are known, the difficulties vanish.

In Kāshmīrī, as written by natives of Kashmīr, the spelling is most capricious, each writer being a law unto himself. In the present pages one system will be rigidly adhered to, and this must be thoroughly learnt before the grammar of the language can be understood. The system adopted is that followed in the present writer's Manual of the Kāshmīrī Language, to which reference should be made for further particulars.

The following are the consonants used in Kāshmīrī, written in the order of the English Alphabet:—

Roman character.	Nāgarī character.	Persian character
$oldsymbol{b}$	ब	ب
ch	च्	<u>ल</u>
chh	क्	٥٤÷
d	द्	3
d	ड्	5
f	म्	ن
\boldsymbol{g}	ग्	گ
h	₹	.
$m{j}$	ৰ	٤

DARD GROUP.

Roman character.	Nāgarī character.	Persian character.
k	क्	ک
kh	ख्	aes
Z	स	J
m	म्	, , , , , , , , , , , , , , , , , , ,
n	न्	U
ñ	, ज ्	پ
p	ū	÷
ph	प्	ڿۿػ
r	· र्	, j
8	स्	س
sh	भ्	ش
t	त्	ت
th	ঘ্	č ₉ 3
ţ	ટ્	ٿ
th	ट्	ٿهم
\underline{ts}	च्	@
$\underline{ts}h$	e	هو ج
v, v	ą	,
y	च्	ي
2	জ্	ر

Note.—ch and chh are often written eq and eq, respectively; and when this is the case, eq and eq are often written without the subscript dots,—thus, eq and eq respectively. As regards the letter eq should be transliterated eq and eq should be transliterated
Most of the above are pronounced as in India proper. The letter f, though often written, is usually pronounced like an Indian ph, and at the beginning of a word is often sounded as p. The letter \tilde{n} is pronounced like ny, e.g. $b\tilde{e}\tilde{n}\tilde{e}$, a sister, is pronounced 'benye.' The sound of sh is that of the Indian n and of the Persian $sh\tilde{e}n$. The letter $\underline{t}s$ is pronounced like the 'ts' in the English 'catsup,' and its aspirate $\underline{t}sh$ is sounded like the 'tsh' in 'cat's head,' and not like the 'tsh' in 'cat-shark.' The letter v or w has a sound between the English sounds of these two letters, tending sometimes more to one and sometimes more to the other. As a rule, it is more like v when it precedes e or e, and more like e when it precedes e, e, or e.

Kāshmīrī does not possess the sonant aspirates \mathbf{v} gha, \mathbf{v} gha, \mathbf{v} gha, \mathbf{v} gha, or \mathbf{v} gha. If a word occurs that corresponds to an Indian word containing one of those letters, the aspiration is dropped, as in gur^u , a horse, corresponding to the Indian $gh\bar{o}_{l}\bar{a}$. It will be noted that Kāshmīrī does not possess the cerebral r. On the other hand, d and the dental r are often interchanged, so that, for instance, we have $k\bar{u}r^{\bar{u}}$, a girl, in Śrīnagar city, but often $k\bar{u}d^{\bar{u}}$ in the villages.

As regards vowels, it must first be understood that these have three, not two, grades of length. In most Indian languages a vowel is either short or long, but in Kāshmīrī it may be very short, short, or long. The very short vowels are known as 'mātrāvowels,' and will be called by this name in the following pages. They will be indicated in the Roman character by small letters above the line. They can never commence a word or syllable. The simple vowels in Kāshmīrī are therefore as follows:—

a ā ē i ī ô u ū ai au

The letters in the first column are mātrā-vowels, and are called by Hindus a-mātrā, i-mātrā, and u-mātrā, respectively, and by Musalmāns nīm fatha, nīm kasra, and nīm zamma, respectively. We have something like them in the short neutral a occurring in most Indian languages, as in the Bihārī kah'lak, he said; the Hindī nik'lā, he emerged; or the Marāthī kar'wat, a saw.

The remaining vowels, in the second and third columns above, are the short and long vowels common in India, and require no explanation, except that ai is by most people pronounced something like a prolonged German \ddot{o} , and au is sometimes pronounced \ddot{o} , and sometimes av. In the following pages, when au occurs in the native character, it will be transliterated av or \ddot{o} according to its pronunciation.

Besides the above simple vowels, Kāshmīrī possesses a number of broken vowels made by epenthesis. There are, first, the set of three:—

$$i$$
 ii $ar{i}i$

and also the following:

$$\overset{\circ}{,}$$
 o, $\overset{\circ}{\alpha}$, $\overset{\circ}{\epsilon}$, $\overset{\circ}{\epsilon}$, $\overset{\circ}{\delta}$, and $\overset{\circ}{o}$.

Of these, \ddot{u} is sounded something like the German \ddot{u} , and the \ddot{u} (\ddot{u} -mātrā) is the shortest possible sound of that letter. The letter \ddot{u} is something like a much prolonged German \ddot{u} , but is very difficult for English mouths to pronounce. It almost approaches a long $\bar{\imath}$, and is represented by that letter in the Persian character. Thus, $s\ddot{u}t'$, with, is written \ddot{u} .

The letters ° and o make up a triplet with the simple long \hat{o} , so that, including all three, we get:—

$$o$$
, o , \bar{o} .

Of these, o is the first o, and \bar{o} the second o in the English word 'promote,' and the '(o-matra) represents the shortest possible utterance of these sounds.

The vowel α is of frequent occurrence in Kāshmīrī. Its correct sound can only be learnt from a native. It strikes different English ears differently. To the present writer, it sounds something between the u in 'hut' and the o in 'hot,' but another careful listener says that it most nearly resembles the a in 'cancelled.'

The letters \check{e} and \check{o} are the results of \check{e} and \check{o} , respectively, being epenthetically affected by another vowel. The first is sounded something like \ddot{u} , and the latter something like o. With the latter we may compare the sound of the o in the Irish 'gon' for 'gun.'

The letter δ is the long sound of \check{o} , and is sounded something like the a in the English 'all,' or like the o in 'glory' pronounced very broadly. We thus get the triplet:—

The letter \ddot{o} is pronounced something like a German \ddot{o} , but more broadly,—tending towards the a in 'all.' Its true sound can only be learnt from a native, and differs in different parts of Kashmir. Sometimes, I have heard it almost exactly like the German letter, while in other people's mouths it is quite different, and has been described as the u in 'rut' much prolonged. We have already mentioned that ai is usually pronounced like this letter.

We thus get the following complete list of all the Kāshmīrī vowels:-

With reference to the above list, it must be observed that many Kāshmīrīs seem to be unable to distinguish \check{e} from i, \check{e} from \bar{i} , u from o or \check{o} , or \check{u} from \check{o} , and that, both in writing and in speaking, one vowel of each of these sets is continually interchanged with another of the same set. The spelling in this Survey is that of the $K\bar{a}shm\bar{i}r\bar{i}$ Manual, but the reader must be prepared to meet in actual use frequent apparent irregularities based on this confusion.

In the Nāgarī and Śāradā characters the letter इ h is often put at the end of a more limperceptible h. word, its use being exactly the same as the hā-ě mukhtafī of the Persian character. It is not universally employed. Thus one person will write क्याइ kathāh, and another क्या kathā, a story. It occurs in some very common words, as in ब्वइ bōh, I; इइ ts²h, thou; इइ chhuh, he is; and दिइ dih, give thou. In all these the h does not belong to the word and is not pronounced. It is only added to show clearly that the word ends in a vowel. It is at once dropped if any suffix is added, as in ब्वित bō-ti, I also; इति ts²-ti, thou also; इस chhu-m, there is to me, I have; दिस di-m, give to me. In these pages I shall call this h by its Persian name, the hā-ě mukhtafī.

The mātrā-vowels are so short that to most English ears they are almost or quite inaudible.¹ This is especially the case in the City of Śrīnagar and with rapid speakers generally. With careful speakers, however, and in the village speech, they can often be heard distinctly. Under any circumstances, so faint is their sound that they can safely be omitted in any popular account of Kashmīr, but in a grammatical sketch like the present it is absolutely necessary to write them; for, even if inaudible, they almost always epenthetically affect a preceding vowel, and sometimes a preceding consonant.

We shall first examine the method adopted for writing them in the native characters. In the Nagari or Saradā character they are indicated by putting the sign $vir\bar{a}ma$ under the vowel. Thus, $a_1 = k^a k^a$, $a_2 = k^a k^a$, $a_3 = k^a k^a$, $a_4 = k^a k^a$, $a_4 = k^a k^a$, $a_4 = k^a k^a$. There are all, of course, imaginary syllables, the vowels being tacked on to the letter $a_1 = k^a$ for convenience of exhibition, as no matra-vowel can commence a syllable or stand by itself. In the Persian character, hardly any attempt is made to distinguish between matra-vowels and ordinary short vowels. The only exception is when a matra-vowel ends a word. In that case no $h\bar{a}-\bar{e}$ mukhtafī, or imperceptible h, is written, although, as in Persia and India, this h is written when the word ends in a full ordinary short vowel. Thus, we have $a_4 = k^a k^a k^a$, $a_4 = k^a k^a k^a$

It has already been stated that none of the mātrā-vowels can begin a syllable. Moreover, i-mātrā and u-mātrā can only stand at the end of a syllable, as in wu- chh^u , he was seen; wu- chh^i , they were seen. If, in the process of declension or conjugation, either of these ceases to be at the end of a syllable, then it becomes a full short vowel. Thus if we add n to wu- chh^u , we get wu-chhun, he was seen by him, and, similarly,

We may compare in this respect the final short vowels of Sindhi, described on p. 22 of Part I of this volume. But in Sindhi these vowels exercise no apparent epenthetic effect.

wuchhin, they were seen by him. If, however, in further process of declension or conjugation, the vowel again falls at the end of a syllable, the mātrā-vowel returns. Thus, if we add as to wu-chhun, we get wu-chhu-nas, meaning 'I was seen by him,' and if we add akh to wu-chhin, we get wu-chh-nakh, meaning 'they were seen by him.' On the other hand, ü-mātrā is often found in the middle of a syllable, and is then pronounced like a very short ü. Thus, wu-chh^ū, she was seen, and wu-chh^ūn, she was seen by him.

We have seen that the mātrā-vowels "and "are represented in the Nāgarī character by y and y and y are represented by y, and "are special circumstances, and that everything that concerns "concerns them also. We need not therefore consider them any further. All that we need remember is that when we speak of "we also include these two other mātrā-vowels.

The effect of these matra-vowels may be compared to the effect of the silent e in English, although, of course, in English this is not necessarily an instance of epenthesis. In English, if we add a silent e to the word 'mat,' we get 'mate,' in which the a has an altogether different sound. Similarly, a silent e changes 'cot' into 'cote.'

In the Nāgarī character, when a vowel is thus epenthetically changed, the sign is generally put over it. Thus, the base bad-, great, is written عق. If we add u-mātrā, the a becomes o, and we get bod", written أن in Nāgarī. In the Persian character, the fact that the change is epenthetic is not indicated. Simply the new sound is written. Thus if becomes if or if

We shall now take the mātrā-vowels (omitting c and o) one by one, and show how they change preceding vowels.

a-mātrā (including ĕ-mātrā and ŏ-mātrā):—

changes a preceding a to a. Thus, sizt andar, within, but sizt and ra, from within.

- " , , , ā to ö. Thus, कानुन् kānun, to be one-eyed, but काञ्रावुन् köñ rāwun, to make one-eyed.
 - " , , e to e. Thus, चाउन् věthun, to be fat, but चाउँ रून् větherun, to fatten.
 - " , , ē to ī. Thus, तेज़्न tēzun, to be sharp, but तीज्रावुन tīz²rāwun,
 - " " o to o. Thus, म्बदुन् motun, to be stout, but म्बद्धन् motorun, to stouten.
 - " " , ō to ū. Thus, जोकुन् lōkun, to be small, but जून्रन् lūkarun, to

Other vowels preceding a-mātrā are not changed. Sometimes a-mātrā is employed

Sometimes a-matra are not changed. Sometimes a-matra is employed simply as an aid to the pronunciation of two contiguous consonants. Thus many speakers pronounce *kharch*, expenditure, as *kharch*. In such a case the a-mātrā does not affect the pronunciation of a preceding vowel.

i-mātrā does not change a preceding a, but the *i*-mātrā is itself sounded immediately after that vowel as well as in its proper place. Thus, $\exists \{\vec{s} \ bad^i, \text{ pronounced } ba^id^i, \text{ great (nom. plur. masc.).}$ When other vowels precede they are liable to change, but in each case the *i*-mātrā is pronounced immediately after it as well as in its proper place, as in the case of a. Thus, a preceding

 \bar{a} is changed to \ddot{o} . Thus, the base $m\bar{a}l$ -, a father, has its nom. plur. $m\ddot{o}l^i$, pronounced $m\ddot{o}^il^i$.

ē " " रं. " " च़ेन् tsēn-, a pillar, " nom. plur. च़ीनि tsīni, pronounced tsīini.

o ,, $,\bar{u}$.
pronounced $g\bar{u}^i r^i$. ai , , , $\bar{i}i$, , , कित्- kait-, how much? , plur. कूर्ति $k\bar{i}it^i$, how many?, pronounced $k\bar{i}i^it^i$.

u-mātrā changes a following

a to o. Thus, the base बड्- bad-, great, has its nominative singular बंद् bod".

 \bar{a} to δ . Thus, the base $m\bar{a}l$, a father, has its nominative singular $m\bar{\delta}l^u$.

ĕ to yo. Thus, the base অহ- tĕth-, bitter, has its nominative singular masculine আঁই tyoth.

 \bar{e} to $y\bar{u}$. Thus, the base चेन्- $\underline{t}s\bar{e}n$ -, a pillar, has its nominative singular च्यून $\underline{t}sy\bar{u}n^u$.

i to yu. Thus, the base महनिव-mahaniv-, a man, has its nominative singular महन्यव् mahanyuv".

 $\bar{\imath}$ to $y\bar{u}$. Thus, the base নীজ্- $n\bar{\imath}l$ -, blue, has its nominative singular masculine নুজ্ $ny\bar{u}l^u$.

ŏ to ŏ. Thus, the base عَوِّد الله في
 \bar{o} to \bar{u} . Thus, the base $\bar{\eta}\bar{\chi}$ - $g\bar{o}r$ -, a cowherd, has its nominative singular $\bar{\chi}\bar{\chi}$ $g\bar{u}r^*$.

ai to \bar{u} . Thus, the base केत्- kait-, how much, has its nominative singular masculine कूत् $k\bar{u}t^{\nu}$.

Other vowels preceding u-mātrā are not changed.

ü-mātrā changes a following

a to \ddot{u} . Thus, from the base $\vec{q} = bad$, great, has its nominative singular feminine $\vec{q} = bud$.

 \bar{a} to \ddot{o} . Thus, the base $\pi i \bar{j} - m \bar{a} j$, a mother, has its nominative singular $\pi i \bar{j} = m \ddot{o} j^{\ddot{u}}$.

e to e. Thus, the base عراق الله . bitter, has its nominative singular feminine عراق الله . těth".

ē to ī. Thus, the base चेर- sēr-, a brick, has its nominative singular चौक् sīr".

ŏ to ŏ. Thus, the base \$\frac{1}{4}z - \text{tshot}-, small, has its nominative singular feminine \$\frac{1}{4}z\$.

\$\text{tshot}\cdot t^{\vec{n}}\$.

In this case the \check{o} is sounded almost like \ddot{u} , so that $\underline{ts}h\check{o}t^{\ddot{u}}$ sounds like $\underline{ts}h\ddot{u}t$.

- \bar{o} to \bar{u} . Thus, the base \bar{a} \bar{t} $k\bar{o}r$ -, a girl, has its nominative singular \bar{q} \bar{e} $k\bar{u}r^{\bar{u}}$.
- ai to \bar{u} . Thus, the base केत्- kait-, how much, has its nominative singular feminine कून् $k\bar{u}ts^{\bar{u}}$.

It should be noted that a-mātrā is liable to undergo any of the changes that are undergone by a, becoming o-mātrā when followed by u-mātrā, and becoming \ddot{u} -mātrā when followed by \ddot{u} -mātrā. Thus, from $bal^{u}run$, to make well, we have adv $bal^{v}r^{u}$, he was made well, and adv $bal^{u}r^{u}$, she was made well.

The full vowels i and u often affect a preceding vowel in the same way as mātrāvowels. Thus, when i follows \bar{a} , it almost invariably changes the \bar{a} to \bar{o} . Thus, the Arabic word من $h\bar{a}zir$, present, is pronounced इंज़िए hözir in Kāshmīrī. Similarly we have \bar{e} changing to \bar{i} before i, as in दिखेर dilēr, brave, but दिखीरी dilīrī, bravery; \bar{o} changing to u, is in ब्रिज़्य būzith, having heard, from बोज़्न bōzun, to hear; and ai changing to \bar{u} , as in ब्रिज़्य $h\bar{u}zit$, dative singular masculine of the base कित्- kait, how much?

So before u, we have a changing to o, as in Annual agun or Annual agun of
These changes before the full vowels are not universal. As often as not they do not occur, and one person may make them, while another does not.

These vowel changes are all shown in the following table. When a change is put between marks of parenthesis, it indicates that the change is not universal:—

	a-mātrā	а	ã	ĕ	ē	i	ī	ŏ	ō or au	u	$ar{u}$	ū	ai
	7				- , ,		,		1	*			,
When followed by		a	ö	ě	bec ī	ome 		ŏ	ū	•	•••	•••	
i-mātrā			ö		ī				ū	•••			ū
$u ext{-matra}$	a	0	ô	yo	$y\bar{u}$	yu	$yar{u}$	ŏ	$ar{u}$	***			ū
<i>ü</i> -mātrā	ũ.	ü	ö	ĕ	\vec{i}			ŏ	ü				ū
i		·	(ö)		ī				(\bar{u})	•••			(\vec{u})
u		(0)	(6)		$(y\bar{u})$		$(y\bar{u})$			•••			

As an aid to memory, it may be noted that:

⁽¹⁾ i and i change only before u-matra.

⁽²⁾ \bar{o} becomes \bar{u} before every mātrā-vowel.

⁽³⁾ u, ū, and ū do not ordinarily change.

As regards the indication of these epenthetic vowels in the native characters, the following rules apply:—

A. Nāgarī and Šāradā characters.—As a rule the sign ' is put over the vowel of which the pronunciation is altered. Thus:—

```
\ddot{q} is represented by \ddot{\pi}, as in \ddot{\pi}-\ddot{\pi}-\ddot{\tau} \ddot{q} d^{x}ra.

\ddot{e} , \ddot{u} , \ddot{u
```

We have said above that a is not affected by i-mātrā, but that the i-mātrā is heard both before and after the following consonant. Thus, bad^i is pronounced ba^id^i . Natives represent this fact also by the mark over the a. Thus, a is

Other epenthetic changes are indicated by an actual change of letter. Thus δ is indicated by त्रो, as in मोस् $m\delta l^u$, a father. When \bar{e} is changed to \bar{i} , the \bar{i} is written, as in न्रीन $t\bar{s}\bar{i}n^i$, from न्रेन $t\bar{s}\bar{e}n$. When ai or \bar{o} is changed to \bar{u} , it is written क \bar{u} , as in न्रूत $k\bar{u}t^u$, from न्रेत $k\bar{u}t^u$, from $k\bar{u}t^u$. The changes of \bar{e} to $k\bar{u}t^u$, as in $k\bar{u}t^u$, from $k\bar{u}t^u$, from $k\bar{u}t^u$, as in $k\bar{u}t^u$, from $k\bar{u}t^u$, and of $k\bar{u}t^u$, from $k\bar{u$

B. Persian character.—The only attempt in this character to indicate epenthetic changes is the representation of the sound of \ddot{o} by \tilde{i} , as in $\tilde{e}^{\tilde{i}}$ $m\ddot{o}j^{\tilde{i}}$. In other cases the nearest vowel sound available is employed, and mātrā-vowels, especially \ddot{u} -mātrā, are often omitted. Thus, the above words written in Nāgarī are represented in the Persian character as follows:—

Consonant Changes.—The influence of these mātrā-vowels is not confined to a preceding vowel. A preceding consonant is also liable to change when it is followed by \ddot{u} -mātrā, y, or i. It must be remembered that \ddot{e} is really ya, so that when we say that a consonant can be affected by y, this includes the letter \ddot{e} . The consonants liable to be so affected are the three gutturals k, kh, and g; the three cerebrals t, th, and d; the four dentals t, th, d, and n; and the letters t and t. These changes take place subject to the following rules:—

Before \vec{u} -matra or y (including \check{e}), the gutturals k, kh, and g become ch, chh, and j, respectively, and before the same letters l becomes j. Thus:—

यंक् thok", weary; fem. यंक् thüch"; यञाव thachyōv, he was weary; यच thachĕ, they (fem.) were weary; but यंकि thak¹, they (masc.) were weary, because the k is not followed by ü-mātrā or by y or ĕ.

लेखन lēkhun, to write; लोक् līchh", she was written; लेक्योन lēchhyōv, he was written; लेक्य lēchhĕ, they (fem.) were written.

दगुन् dagun, to pound; दंज düj, she was pounded; दज्योव् dajyōv, he was pounded; दज्य dajĕ, they (fem.) were pounded.

खगु srŏg", cheap; fem. sing. खज् srŏj"; खञ्चर् srŏjër, cheapness.

च्छ्न tsalun, to flee; चेज़ tsüj", she fled; च्छ्योव tsajyōv, he fled; च्छ्य tsajĕ, they (fem.) fled.

Before i or y (including \check{e}) the cerebral letters f, fh, and g become gh, gh, and gh, respectively. They are not changed before \mathring{u} -matra. Thus:—

पंटू $p\ddot{u}t^{\ddot{u}}$, a tablet ; पचि pachi, by a tablet ; पचा pachě, tablets ; पची pachyau, by tablets.

कांट्र köth^a, a stalk; का कि kāchhi, by a stalk; का का kāchhě, stalks; का को kāchhyau, by stalks.

बंडू büd*, great (fem.); agent sing. बिज baji; nom. plur. वच्च bajě; ag. plur. बच्चो bajyau.

Before \ddot{u} -mātrā, the dental letters t, th, d, and n, become ts, tsh, z, and \tilde{n} , respectively. Thus, from the base $\forall i \neq r \ddot{a}t$ -, night, we have the dative singular $\forall i \neq r \ddot{o}t s^{\ddot{u}}$; from $\forall i \neq r \ddot{o}t s^{\ddot{u}}$; and from $\forall i \neq r \ddot{o}t s^{\ddot{u}}$; from $\forall i \neq r \ddot{o}t s^{\ddot{u}}$; and from $\forall i \neq r \ddot{o}t s^{\ddot{u}}$; and anvil, we have the dative singular $\forall i \neq r \ddot{u} a^{\ddot{u}}$. A similar change occurs before y (including \check{e}), but in this case the y is also dropped, and the \check{e} (except after n) becomes a. Thus,

With y following, we have: -

कत् + योव् $kat + y\bar{o}v$ becomes कचीव् $kat s\bar{o}v$, spun.

व्यथ + योव् $w \check{o} t h + y \bar{o} v$ becomes व्योक्त् $w \check{o} \underline{t} \underline{s} h \bar{o} v$, arisen.

खद + थोव lad + yōv becomes खज़ोव lazōv, built.

रन् + योव् $ran + y \delta v$ becomes रञीव् $ran \delta v$.

With e following, we have :-

तत + यर् $tat + \check{e}r$ becomes तच्र् tatsar, heat.

वय + यर् wath + ĕr becomes वक्र् watshar, openness.

थद् + यर् thad + ĕr becomes थज़र् thazar, tallness.

तन् + यर् tan + ĕr becomes तञर् tañĕr, thinness.

Before \ddot{u} -mātrā, or y (including \check{e}), h almost always becomes sh. Thus, the word काइ $k\bar{a}h$, the eleventh lunar day, has its dative singular कांग्र $k\ddot{o}sh^{\ddot{u}}$; and \ddot{u} soh, endured, has its feminine \ddot{u} \ddot{u} s \ddot{u} s \ddot{u} s \ddot{u} , and another derived form (the second past participle) \ddot{u} \ddot{u}

The uncompounded hard consonants k, p, t, t, and ts cannot end a word. In such a position, they are always aspirated, becoming kh, ph, th, th and tsh, respectively. This aspiration is always written in the Nāgarī or in the Sāradā character, but is not indicated in the Persian character or in books written in the Roman character,

I know of no word or root ending in uncompounded ch, khar*ch, expenditure, is properly kharch.

VOL. VIII, PART II.

whose system of writing is based on Kāshmīrī written in the Persian character. Thus:—

ak, one, become	es akh, v	vritten	श्रख्	in the	and	ا ک	in the
				Nāgarī naracter,			Persian character.
$t\bar{a}p$, heat, ,,	$t\bar{a}ph$,	, ,,	ताफ्	99	,,	تاپ	ėė
rāt, night, "	$rar{a}th,$,,	राष्	,,	,,	رات	,,
kat, a ram, "	kath	,,	कठ्	,,	,,	اکت	,,
$k\bar{a}\underline{t}\underline{s}$, glass, "	$k\bar{a}\underline{t}\underline{s}h$,,	कार्छ	,,	,,	©K	>>

There are exceptions to all the above rules. Most of these will be found in detail in the $K\bar{a}shm\bar{r}\bar{r}$ Manual. It is beyond the scope of this Survey to give them here. The principal exception is that none of the rules for the changes of consonants apply to the conjugation of verbs of the third conjugation.

THE ARTICLE.—As in Indian languages and in Persian, there is no definite article. When required, the idea of definiteness is conveyed by the use of one or other of the demonstrative pronouns. Corresponding to the Persian $y\bar{a}$ - \check{e} $tank\bar{\imath}r$ (as in mard- $\bar{\imath}$, a man), \bar{a} or $\bar{a}h$ can be added to the nominative of a Kāshmīrī noun. Thus, kath, a story; kath- \bar{a} or kath- $\bar{a}h$, any story, a certain story. The h of $\bar{a}h$ is the $h\bar{a}$ - \check{e} $mu\underline{kh}taf\bar{\imath}$ (see p. 261).

Emphasis is very commonly made by suffixing y to a word, before which $h\bar{a}$ - \check{e} $mu\underline{k}htaf\bar{\imath}$ disappears. Thus, suh, he; su-y, even he. If the word ends in a vowel, the y is simply added direct, but if the vowel is i-matra or u-matra it (vide p. 261) becomes a full one. Thus, $Kh\check{o}d\bar{a}$, God, $Kh\check{o}d\bar{a}$ -y, God alone; poz^u , true, pozu-y, nothing but the truth; tami-y $d\check{o}ha$, on that very day. If the word ends in a consonant that is not $h\bar{a}$ - \check{e} $mu\underline{k}htaf\bar{\imath}$, \ddot{u} -matra is inserted before the y, as in $n\bar{\imath}z\bar{\imath}kh$, near, $n\bar{\imath}z\bar{\imath}kh$ - $\bar{\imath}y$, quite near. Some words always take this suffix. Thus, $s\acute{o}r^u$, all, always appears under the form $s\acute{o}ruy$, even all, and the y is added throughout the declension, so that, e.g., the dative plural is $s\bar{a}r\check{e}n^{\bar{\imath}}y$.

DECLENSION. Gender.—There are two genders, masculine and feminine. Animate nouns follow the natural gender. As regards inanimate nouns, all those ending in u-mātrā are masculine, and nearly all those ending in i-mātrā, in \bar{u} -mātrā, in \bar{n} , or in y are feminine. The feminine termination corresponding to u-mātrā is \bar{u} -mātrā. Thus, bod^u (masc.), great; fem. $b\bar{u}d^u$. The few masculine nouns ending in i-mātrā refer to male animate beings, e.g., $q\bar{v}z_i$, a judge, a Qāzī; $likh\bar{v}$, a scribe; and munsh, a clerk. There are a few masculine nouns in \bar{u} -mātrā, such as $b\bar{v}\underline{t}\underline{s}^u$, the people of a house; $d\bar{v}n^u$ (with exceptional dental n), a pomegranate; $h\bar{v}nz^u$, a boatman; $k\bar{u}n^u$, the foundation of a house (again note the dental n); and $\bar{u}nz^u$, a goose. The only important masculine noun in y is $r\bar{v}pay$, a rupee, and some people, now and then, under the influence of the analogy of other nouns in y, treat it as a feminine, but this is wrong.

In the formation of feminine nouns in \ddot{u} -matra, the rules for vowel changes and for consonantal changes come into full play. I first give a few examples of nouns in which (if any) only vowel changes occur:-

Feminine. Masculine. dŏb^ū, a washerwoman. dŏb", a washerman, qür". gor", hard, gur", a mare. gur", a horse, $g\bar{u}r^{\bar{u}}$, a cowherdess. $g\bar{u}r^u$, a cowherd, $m \check{o} t^{\bar{u}}$. $m\check{o}t^{u}$, fat, pütü, a tablet. pot", a board,

Words of three or more syllables ending in ur" or ul", change the penultimate u also to ü-mātrā in the feminine. Moreover, under the rules for consonantal changes, before \ddot{u} -mātrā l becomes j. Thus:—

Feminine. Masculine. $gag^{i}r^{i}$. gagur^u, a rat, $kat^{i}r^{i}$, a small potsherd. katur", a large potsherd, volv", a female weaver. wōwuru, a weaver, $g\check{o}g^{i}j^{i}$, a small turnip. gŏgul", a large turnip, $g\bar{a}t^{\bar{u}}j^{\bar{u}}$. $g\bar{a}tul^u$, clever, $phut^{ii}j^{ii}$, a small bundle. phutul", a large bundle, $tsak^{\bar{u}}j^{\bar{u}}$. tsakul", circular, So, other words in l^u form their feminines in $j^{\bar{u}}$, such as : $g\bar{u}j^{\bar{u}}$, a small kernel. $g\bar{u}l^u$, a kernel, $m\ddot{o}j^{\ddot{u}}$, a mother. $m\hat{o}l^{u}$, a father, wöj", a small ring. wol^u , a large ring,

The following are examples of consonantal changes:-

bat"ch", a duck. batuk", a drake,

(This word, being a trisyllable, and having u in the penultimate, follows the example of words in ur" and ul", in changing the penultimate u to ü-mātrā.)

hochh". $h\breve{o}kh^u$, dry, dīj", a small ditto. $dy\widetilde{u}g^{u}$ (for $d\widetilde{i}g^{u}$), a ball of string, mütsü. mot^u , mad, kotsh^u, a bag. köth^u, a sack, $u\ddot{o}r^{\ddot{u}}z^{\ddot{u}}$, a second wife. worud", a second husband,

(Here, again, the penultimate u of a trisyllable has become ü-mätrā.)

hūñ", a bitch. hūn", a dog, chhöñ", a carpentress.

chhān, a carpenter, Nouns of agency ending in wun", such as karawun", a doer, change wun" to wüñ" in

the feminine, as in karawiiñ^u.

Some nouns form their feminines by adding ar, as:mondar, a small log. mondu, a log, photer, a small basket. photu, a basket, matshor, a female calf. wotshu, a male calf,

Many words signifying names of animals form their feminines in $i\tilde{n}$. Thus:—

host", an elephant, hastiñ, a she-elephant.

 $k\bar{a}v$, a crow, $k\bar{a}vi\tilde{n}$, a hen-crow. $w\tilde{u}th$, a camel, $w\tilde{u}thi\tilde{n}$, a she-camel.

So also words such as:—

bota, a Tibetan, botin, a Tibetan woman.

bugiy, a master, bugiñ, a mistress.

and others.

All nouns having the termination $w \delta l^{*}$ (=the Hindi $w \bar{a} l \bar{a}$) change the $w \delta l^{*}$ to $w \bar{a} j e \bar{n}$ in the feminine. Thus:—

karanwōl^u, a doer, karanwājěñ.

dyārawōl^u, a rich man, dyārawājěñ, a rich woman.

So also all nouns having the terminations $d\bar{a}r$ and lad change the $d\bar{a}r$ to $d\bar{a}r\tilde{e}\tilde{n}$ and lad to $ladi\tilde{n}$ in the feminine. Thus, $al\bar{a}kad\bar{a}r$, the owner of an estate, has its feminine $al\bar{a}kad\bar{a}r\tilde{e}\tilde{n}$; dokhalad, an unhappy man; $d\tilde{o}khaladi\tilde{n}$, an unhappy woman.

Words signifying castes or professions generally form the feminine in añ. Thus:—

bata, a Brāhman, batañ.

musalmān, a Musalmān, musalmānañ.

hākagrākh, a greengrocer, hāgagrākań.

(So also all other nouns in grākh.)

wôn", a shopkeeper, wānañ.

Masculine substantives ending in "r form the feminines by adding $e\tilde{n}$: Thus:—

 $s\bar{a}l^ar$, a wedding guest, $s\bar{a}l^ar\tilde{n}$. $rang^ar$, a dyer, $rang^ar\tilde{n}$.

 $s\check{o}n^ar$, or $s\check{o}nur$, a goldsmith, $s\check{o}n^ar\check{e}\tilde{n}$. $k\tilde{a}d^ar$, a baker, $k\tilde{a}d^ar\check{e}\tilde{n}$.

Similarly:

 $s\check{o}\tilde{n}^{u}$, a co-father-in-law, $s\check{o}\tilde{n}\check{e}\tilde{n}$. $mah\bar{a}r\bar{a}za$, a bridegroom, $mah\bar{a}r\check{e}\tilde{n}$, a bride. $r\bar{a}za$, a king, $r\bar{a}jar\check{e}\tilde{n}$, a queen.

Two nouns form the feminine in $\ddot{o}\tilde{n}^{\ddot{u}}$, viz.:—

pandith, a paṇḍit, pandit, $qujur^u$, a Gujar, $qujur^u$, a Gujar, $qujur^u$.

The above rules refer principally to substantives. The only adjectives that change for gender are those ending in ", such as gor", heavy.

Number.—Kāshmīrī has two numbers,—Singular and Plural. The rules for the formation of the plural must be gathered from the paradigms. Here it must suffice to say that masculine nouns in u-mātrā form the nominative plural in i-mātrā, and that other masculine nouns take no termination in the nominative plural. Thus, gur^* , a horse, nominative plural gur^i ; $\underline{ts}\bar{u}r$, a thief, nom. plur. $\underline{ts}\bar{u}r$. Similarly, all feminine nouns in i-mātrā or \ddot{u} -mātrā form the nominative plural in \check{e} . Thus, $achh^i$, an eye, nominative plural $achh\check{e}$; gur^* , a mare, nominative plural $gur\check{e}$.

Case.—The Kāshmīrī noun has four cases, viz. Nominative, Dative, Agent, and Ablative. The Accusative may be represented either by the Nominative or by the Dative, as in Hindī. The Ablative is used, much as in Latin, in a variety of senses. Other case relations are indicated by postpositions, some of which govern the Dative, while others govern the Ablative. Thus, manz, in; nish (=Hindī $p\bar{a}s$); govern the Dative: and manza (=Hindī $m\tilde{e}$ $s\tilde{e}$), from in; $nish\tilde{e}$ (=Hindī $p\bar{a}s$ $s\tilde{e}$), from near; and $p\tilde{e}tha$, from on $(par\ s\tilde{e})$; govern the Ablative.

Some postpositions govern both cases. Thus, $s\bar{u}t^i$ means 'together with' when it governs the Dative, but 'with,' 'by means of' when it governs the Ablative. In the case of animate masculine nouns any postposition that governs the Ablative may also govern the Dative.

There are several ways of forming the genitive, and as all genitives are adjectives, these will be described under that head. So also, one form of the Dative is adjectival, and will be there described.

Declension.—There are four declensions of nouns,—two masculine, and two feminine. The second declension includes all masculine nouns in *u*-mātrā, and the third declension includes all feminine nouns in *i*-mātrā and in *ü*-mātrā. The first declension includes all other masculine nouns, and the fourth declension all other feminine nouns. Thus:—

First Declension Second Declension Masculine { all nouns except those in u-mātrā. Third Declension Fourth Declension } Feminine { all nouns in u-mātrā and ū-mātrā. } fall nouns in i-mātrā and ū-mātrā.

Note that throughout:-

- a. In the plural, the Agent and Ablative cases are always the same.
- b. In the feminine, the singular Agent and Ablative are also always the same.
- c. The Dative plural always ends in n.
- d. The Masculine Dative singular always ends in s.

The following are examples of each of the four declensions in their simplest forms:—

· · · · · · · · · · · · · · · · · · ·	First Declension. Base tsūr-, a thief.	Second Declension. Base gur-, a horse.	Third Declension. Base gur-, a mare.	Fourth Declension. Base māl, a garland.
Sing.	29			
Nominative	<u>ts</u> ūr	gur ^u	gur	māl.
Dative .	<u>ts</u> ūras	guris	gurĕ	māli.
Agent	<u>ts</u> ūran	gur ⁱ	} guri	māli.
Ablative	<u>ts</u> ūra	guri	\\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\ \\	,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,
Plur.				
Nominative	<u>ts</u> ūr	gur^i	gurĕ	mala.
Dative	<u>ts</u> ūran	gurĕn	gurĕn	mālan.
Agent and Ablative	<u>ts</u> ūra u or <u>ts</u> ūrav	guryau or gurëv	guryau or gurĕv	mālau or mālav.

First Declension.—Most nouns follow \underline{tsur} exactly, but in some, old forms of the Agent and Ablative singular in i-matra and i respectively have survived. Thus, (Agent) kan^i (base kan-) tal^i , under the ear; (Ablative) gari (base gara-), at home.

Nouns ending in a, like gara, a house, drop this a in all cases except the nominatives singular and plural. Thus, sing. dat. garas, ag. garan, abl. gara or (see above) gari;

plur. nom. gara, dat. garan, ag.-abl. garau, garav.

Nouns of two or more syllables, and ending in a consonant, usually insert a u before the final consonant of the nominative singular, but not in the nominative plural or other cases of the singular or plural. In some of the following examples it will be seen that the rule about the aspiration of a final surd consonant is followed (see p. 267).

Examples are :-

Base $g\check{o}gal$ -, a turnip; sing. nom. $g\check{o}gul$, but dat. $g\check{o}galas$, plur. nom. $g\check{o}gal$. So, base $w\bar{a}tal$ -, a sweeper; sing. nom. $w\bar{a}tul$, and many others in al-.

Base batak-, a drake; sing. nom. batukh, but dat. batakas, plur. nom. batakh. So, base pŏstak-, a book, sing. nom. pŏstukh.

Base karan-, the act of doing; sing. nom. karun, but dat. karanas, plur. nom. karan. This is an important example, as all infinitives end, like karun, in un, and hence follow this rule. Note that all infinitives use both forms of the ablative singular,—that in a and the old one in i. Ablatives in a are most used in forming the passive voice, as in karana yun, to be done (see p. 309), while the ablative in i is used in making infinitives of purpose, as in karani gōv, he went to do (so and so), and in some inceptive compounds (see p. 311).

Base $w\tilde{a}dar_{\bar{s}}$, a monkey; sing. nom. $w\tilde{a}dur$, but dat. $w\tilde{a}daras$, plur. nom. $w\tilde{a}dar$. So many others, including several indicating professions, as base $s\check{o}nar$ -, sing. nom. $s\check{o}nur$, a goldsmith.

Base bandat-, relationship; sing. nom. banduth, but dat. bandatas, plur. nom. bandath, and so numerous other abstract nouns in -at- (nom. -uth).

Of the few masculine nouns in \ddot{u} -mātrā, some retain the \ddot{u} -mātrā throughout, as base $d\bar{u}n$, a pomegranate; sing. nom. $d\ddot{o}n^{\ddot{u}}$, dat. $d\ddot{o}n^{\ddot{u}}s$, and so on, the ag.-abl. plur. being $d\ddot{o}n^{\ddot{u}}v$. Others optionally drop the \ddot{u} -mātrā in all cases except the nominative. Thus, base $h\bar{a}nz$, a boatman; sing. nom. $h\ddot{o}nz^{\ddot{u}}$, dat. $h\ddot{o}nz^{\ddot{u}}s$ or $h\bar{a}nzas$.

Most nouns ending in \bar{a} insert an h before the terminations. Thus, $saz\bar{a}$, punishment, sing. dat. $saz\bar{a}has$. But $dary\bar{a}$, a river, has sing. dat. $dary\bar{a}was$, and $Kh\check{o}d\bar{a}$, God, has $Kh\check{o}d\bar{a}y\check{e}s$.

Words ending in sh or y naturally change a following a to \check{e} (see p. 259), as in $d\bar{u}sh$, a fault, sing. dat. $d\bar{u}sh\check{e}s$; $r\check{o}pay$, a rupee; sing. dat. $r\check{o}pay\check{e}s$.

For other irregularities, see the Kāshmīrī Manual.

Second Declension.—In this declension, owing to the presence of u-mātrā, i-mātrā and y (including \check{e}) in the terminations, epenthesis is common. Moreover, in the Dative singular, the full i of the termination is exercises the same epenthetic effect as i-mātrā. In fact, some native writers write this termination is. Thus:—-

Base kar-, a bracelet; sing. nom. kor^u , but dat. karis, and so on, the a not being affected by a following i-mātrā, i, or y (\check{e}).

Base $m\bar{a}l$ -, a father; sing. nom. $m\hat{o}l^u$, dat. $m\ddot{o}lis$, ag. $m\ddot{o}l^i$, but abl. $m\ddot{a}li$; plur. nom. $m\ddot{o}l^i$, but dat. $m\ddot{a}l\check{e}n$, ag.-abl. $m\ddot{a}lyau$ or $m\ddot{a}l\check{e}v$.

Base mahaniv-, a man; sg. nom. mahanyuv*, but dat. mahanivis, and so on.

Base $\underline{ts\bar{e}n}$, a pillar; sg. nom. $\underline{tsy\bar{u}n}^s$, dat. $\underline{ts\bar{i}nis}$, ag. $\underline{ts\bar{i}n}^i$, but abl. $\underline{ts\bar{e}ni}$; pl. nom. $\underline{ts\bar{i}n}^i$, but dat. $\underline{ts\bar{e}nen}$, ag.-abl. $\underline{ts\bar{e}nyau}$, $\underline{ts\bar{e}nen}$.

Base $n\bar{\imath}l$ -, blue; sg. nom. $ny\bar{\imath}l^{\imath}$, dat. $n\bar{\imath}lis$, and so on.

Base $g\bar{o}r$ -, a cowherd; sg. nom. $g\bar{u}r^{i}$, dat. $g\bar{u}ris$, ag. $g\bar{u}r^{i}$, abl. $g\bar{u}ri$; pl. nom. $g\bar{u}r^{i}$, but dat. $g\bar{o}r\check{e}n$, ag.-abl. $g\bar{o}ryau$, $g\bar{o}r\check{e}v$.

Bases of two or more syllables, and ending in a consonant preceded by a, generally change the a to u in the nominative singular. Some writers, however, employ the more regular o. These words also change the a to a-mātrā, if followed by i-mātrā. Thus, base $g\bar{a}tal$ -, clever (masc.); sg. nom. $g\bar{a}tul^u$ (or, according to some, $g\bar{a}tol^u$), dat. $g\bar{a}talis$, ag. $g\bar{a}t^al^i$, abl. $g\bar{a}talis$, pl. nom. $g\bar{a}t^al^i$, dat. $g\bar{a}tal\tilde{e}n$, ag.-abl. $g\bar{a}talyau$, $g\bar{a}tal\tilde{e}v$.

Third Declension.—For this declension, the example given was that of a noun in \ddot{u} -mātrā. Nouns in \dot{i} -mātrā are declined in an exactly similar way. In fact many nouns, especially those whose bases end in \dot{j} , may end in either one or other. Thus, instead of $g\bar{a}t^{\ddot{u}}j^{\ddot{u}}$, a clever woman, we may have $g\bar{a}t^{\dot{u}}j^{\dot{i}}$.

In this declension epenthesis plays as prominent a part as in the second. Thus:—

Base gar-, a clock; sg. nom. gürü, but dat. garĕ, and so on.

Base $m\bar{a}j$ -, a mother; sg. nom. $m\ddot{o}j^{\bar{u}}$, but dat. $m\bar{a}j\check{e}$, and so on.

Base sēr-, a brick; sg. nom. sīrā, dat. sērē, and so on.

Base $k\bar{o}r$ -, a girl; sg. nom. $k\bar{u}r^{\bar{u}}$, dat. $k\bar{o}r\check{e}$, and so on.

Base $p\bar{o}th$ -, a book; sg. nom. $p\bar{u}th^i$, dat. $p\bar{o}th\check{e}$, and so on.

It will be observed that, in this declension, it is only in the nominative case singular that the vowel is epenthetically affected.

Bases ending in <u>ts</u>, <u>tsh</u>, or z, change the <u>ĕ</u> of the termination to a in the plural, but retain it in the singular. Thus, base <u>mats</u>, a mad woman; sing. nom. <u>müts</u>, dat. <u>mats</u>, abl. <u>mats</u>; but plur. nom. <u>mats</u>a (not <u>mats</u>e), dat. <u>mats</u>an, ag.-abl. <u>mats</u>au, <u>mats</u>au.

There are also in this declension epenthetic changes of consonants. If a base ends in t, th, or d, these letters are changed, respectively, to ch, chh, and j, in all the cases except the sing. nom. Thus:—

Base, pat-, a tablet; sg. nom. püt^ū, dat. pachě, ag.-abl. pachi; pl. nom. pachě, dat. pachěn, ag.-abl. pachyau, pachěv.

Base kāth-, a stalk; sg. nom. köth", dat. kāchhe, and so on.

Base bad-, great; fem. sg. nom. būdū, dat. baje, and so on.

Fourth Declension.—For most nouns this declension calls for no remarks. If a noun ends in y, the terminations \check{e} and i are often interchanged, and, of course, after y, α becomes \check{e} . Thus:—

Base $b\bar{a}y$ -, a wife; sg. nom. $b\bar{a}y$, dat. $b\bar{a}y\check{e}$, or $b\bar{a}yi$, ag.-abl. $b\bar{a}y\check{e}$ or $b\bar{a}y\check{e}$; pl. nom. $b\bar{a}y\check{e}$, dat. $b\bar{a}y\check{e}n$, ag.-abl. $b\bar{a}yau$, $b\bar{a}y\check{e}v$

Some nouns of this declension add \ddot{u} -matra in all cases except the nominative singular. Thus:—

Base $y \check{e} d$, the belly; sg. nom. $y \check{e} d$, dat. and ag.-abl. $y \check{e} d^{\check{u}}$; pl. nom. $y \check{e} d^{\check{u}}$, dat. $y \check{e} d^{\check{u}} n$, ag.-abl. $y \check{e} d^{\check{u}} v$. Similarly other words, such as $k h \bar{a} r$, a certain measure, vol. VIII, PART II.

First Declension.—Most nouns follow \underline{tsur} exactly, but in some, old forms of the Agent and Ablative singular in *i*-matra and *i* respectively have survived. Thus, (Agent) kan^i (base kan-) tal^i , under the ear; (Ablative) gari (base gara-), at home.

Nouns ending in a, like gara, a house, drop this a in all cases except the nominatives singular and plural. Thus, sing. dat. garas, ag. garan, abl. gara or *(see above) gari;

plur. nom. gara, dat. garan, ag.-abl. garau, garav.

Nouns of two or more syllables, and ending in a consonant, usually insert a u before the final consonant of the nominative singular, but not in the nominative plural or other cases of the singular or plural. In some of the following examples it will be seen that the rule about the aspiration of a final surd consonant is followed (see p. 267).

Examples are :—

Base gŏgal-, a turnip; sing. nom. gŏgul, but dat. gŏgalas, plur. nom. gŏgal. So, base wātal-, a sweeper; sing. nom. wātul, and many others in al-.

Base batak-, a drake; sing. nom. batukh, but dat. batakas, plur. nom. batakh. So, base põstak-, a book, sing. nom. põstukh.

Base karan-, the act of doing; sing. nom. karun, but dat. karanas, plur. nom. karan. This is an important example, as all infinitives end, like karun, in un, and hence follow this rule. Note that all infinitives use both forms of the ablative singular,—that in a and the old one in i. Ablatives in a are most used in forming the passive voice, as in karana yun, to be done (see p. 309), while the ablative in i is used in making infinitives of purpose, as in karani gov, he went to do (so and so), and in some inceptive compounds (see p. 311).

Base $w\tilde{a}dar_{\bar{s}}$, a monkey; sing. nom. $w\tilde{a}dur$, but dat. $w\tilde{a}daras$, plur. nom. $w\tilde{a}dar$. So many others, including several indicating professions, as base $s\check{o}nar$ -, sing. nom. $s\check{o}nur$, a goldsmith.

Base bandat-, relationship; sing. nom. banduth, but dat. bandatas, plur. nom. bandath, and so numerous other abstract nouns in -at- (nom. -uth).

Of the few masculine nouns in \ddot{u} -mātrā, some retain the \ddot{u} -mātrā throughout, as base $d\bar{a}n$ -, a pomegranate; sing. nom. $d\ddot{o}n^{\ddot{u}}$, dat. $d\ddot{o}n^{\ddot{u}}s$, and so on, the ag.-abl. plur. being $d\ddot{o}n^{\ddot{u}}v$. Others optionally drop the \ddot{u} -mātrā in all cases except the nominative. Thus, base $h\bar{a}nz$ -, a boatman; sing. nom. $h\ddot{o}nz^{\ddot{u}}s$, dat. $h\ddot{o}nz^{\ddot{u}}s$ or $h\bar{a}nzas$.

Most nouns ending in \bar{a} insert an h before the terminations. Thus, $saz\bar{a}$, punishment, sing. dat. $saz\bar{a}has$. But $dary\bar{a}$, a river, has sing. dat. $dary\bar{a}was$, and $Kh\check{o}d\bar{a}$, God, has $Kh\check{o}d\bar{a}y\check{e}s$.

Words ending in sh or y naturally change a following a to \check{e} (see p. 259), as in $d\bar{u}sh$, a fault, sing. dat. $d\bar{u}sh\check{e}s$; $r\check{o}pay$, a rupee; sing. dat. $r\check{o}pay\check{e}s$.

For other irregularities, see the Kāshmīrī Manual.

Second Declension.—In this declension, owing to the presence of u-mātrā, i-mātrā and y (including \check{e}) in the terminations, epenthesis is common. Moreover, in the Dative singular, the full i of the termination is exercises the same epenthetic effect as i-mātrā. In fact, some native writers write this termination is. Thus:—-

Base kar-, a bracelet; sing. nom. kor, but dat. karis, and so on, the a not being affected by a following i-mātrā, i, or y (\check{e}).

Base māl-, a father; sing. nom. môl*, dat. mölis, ag. möl*, but abl. māli; plur. nom. möl*, but dat. mālěn, ag.-abl. mālyau or mālěv.

Base mahaniv-, a man; sg. nom. mahanyuv*, but dat. mahanivis, and so on.

Base $\underline{ts\bar{e}n}$, a pillar; sg. nom. $\underline{tsy\bar{u}n}^{v}$, dat. $\underline{ts\bar{i}nis}$, ag. $\underline{ts\bar{i}n}^{i}$, but abl. $\underline{ts\bar{e}ni}$; pl. nom. $\underline{ts\bar{i}n}^{i}$, but dat. $\underline{ts\bar{e}n\bar{e}n}$, ag.-abl. $\underline{ts\bar{e}nyau}$, $\underline{ts\bar{e}n\bar{e}v}$.

Base $n\bar{\imath}l$ -, blue; sg. nom. $ny\bar{\imath}l^{\imath}$, dat. $n\bar{\imath}lis$, and so on.

Base $g\bar{o}r$ -, a cowherd; sg. nom. $g\bar{u}r^{u}$, dat. $g\bar{u}ris$, ag. $g\bar{u}r^{i}$, abl. $g\bar{u}ri$; pl. nom. $g\bar{u}r^{i}$, but dat. $g\bar{o}r\check{e}n$, ag.-abl. $g\bar{o}ryau$, $g\bar{o}r\check{e}v$.

Bases of two or more syllables, and ending in a consonant preceded by a, generally change the a to u in the nominative singular. Some writers, however, employ the more regular o. These words also change the a to a-mātrā, if followed by i-mātrā. Thus, base $g\bar{a}tal$ -, elever (masc.); sg. nom. $g\bar{a}tul^u$ (or, according to some, $g\bar{a}tol^u$), dat. $g\bar{a}talis$, ag. $g\bar{a}t^al^i$, abl. $g\bar{a}talis$, pl. nom. $g\bar{a}t^al^i$, dat. $g\bar{a}tal\bar{e}n$, ag.-abl. $g\bar{a}talyau$, $g\bar{a}tal\bar{e}v$.

Third Declension.—For this declension, the example given was that of a noun in \ddot{u} -mātrā. Nouns in i-mātrā are declined in an exactly similar way. In fact many nouns, especially those whose bases end in j, may end in either one or other. Thus, instead of $g\bar{a}t^{\dot{u}}j^{\dot{u}}$, a clever woman, we may have $g\bar{a}t^{\dot{u}}j^{\dot{i}}$.

In this declension epenthesis plays as prominent a part as in the second. Thus:—

Base gar-, a clock; sg. nom. gürü, but dat. garĕ, and so on.

Base $m\bar{a}j$ -, a mother; sg. nom. $m\ddot{o}j^{\ddot{u}}$, but dat. $m\ddot{a}j\ddot{e}$, and so on.

Base sēr-, a brick; sg. nom. sīrī, dat. sērē, and so on.

Base $k\bar{o}r$ -, a girl; sg. nom. $k\bar{u}r^{\bar{u}}$, dat. $k\bar{o}r\check{e}$, and so on.

Base $p\bar{o}th$ -, a book; sg. nom. $p\bar{u}th^i$, dat. $p\bar{o}th\check{e}$, and so on.

It will be observed that, in this declension, it is only in the nominative case singular that the vowel is epenthetically affected.

Bases ending in \underline{ts} , \underline{tsh} , or z, change the \check{e} of the termination to a in the plural, but retain it in the singular. Thus, base mats, a mad woman; sing. nom. $m\ddot{u}ts\dot{e}$, dat. $mats\dot{e}$, abl. $mats\dot{e}$; but plur. nom. $mats\dot{a}$ (not $mats\dot{e}$), dat. matsan, ag.-abl. matsan, matsan.

There are also in this declension epenthetic changes of consonants. If a base ends in t, th, or d, these letters are changed, respectively, to ch, chh, and j, in all the cases except the sing. nom. Thus:—

Base, pat-, a tablet; sg. nom. püt^ū, dat. pachě, ag.-abl. pachi; pl. nom. pachě, dat. pachěn, ag.-abl. pachyau, pachěv.

Base kāth-, a stalk; sg. nom. köth", dat. kāchhĕ, and so on.

Base bad-, great; fem. sg. nom. büdü, dat. baje, and so on.

Fourth Declension.—For most nouns this declension calls for no remarks. If a noun ends in y, the terminations \check{e} and i are often interchanged, and, of course, after y, a becomes \check{e} . Thus:—

Base $b\bar{a}y$ -, a wife; sg. nom. $b\bar{a}y$, dat. $b\bar{a}y\check{e}$, or $b\bar{a}yi$, ag.-abl. $b\bar{a}y\check{e}$ or $b\bar{a}y\check{e}$; pl. nom. $b\bar{a}y\check{e}$, dat. $b\bar{a}y\check{e}n$, ag.-abl. $b\bar{a}yau$, $b\bar{a}y\check{e}v$.

Some nouns of this declension add \ddot{u} -matra in all cases except the nominative singular. Thus:—

Base $y \not\in d$, the belly; sg. nom. $y \not\in d$, dat. and ag.-abl. $y \not\in d^{\bar{u}}$; pl. nom. $y \not\in d^{\bar{u}}$, dat. $y \not\in d^{\bar{u}}n$, ag.-abl. $y \not\in d^{\bar{u}}v$. Similarly other words, such as $kh\bar{a}r$, a certain measure, vol. VIII, PART II.

sg. dat. $kh\ddot{o}r^{\ddot{a}}$; thar, the back, sg. dat. $th\ddot{u}r^{\ddot{a}}$. Irregular are $z\bar{a}m$, a sister-inlaw, and $g\bar{a}v$, a cow, which make their datives singular $z\bar{o}m^{\ddot{a}}$ and $g\bar{o}v^{\ddot{a}}$, respectively, and so on through the remaining cases.

If, among these nouns, the base ends in t, th, d, or n, these are, under the usual rule, changed, before \ddot{u} -mātrā, to \underline{ts} , $\underline{ts}h$, z, and \tilde{n} , respectively. Thus:—

Base $r\bar{a}t$ -, night; sg. nom. $r\bar{a}th$, dat. and ag.-abl. $r\ddot{o}\underline{t}\underline{s}^{\bar{a}}$, and so on.

Base kŏth-, a hank; sg. nom. kŏth, dat. and ag.-abl. kŏtshū, and so on.

Base grand-, enumeration; sg. nom. grand, dat. and ag.-abl. grünz", and so on.

Base yīran-, an anvil; sg. nom. yīran, dat. and ag.-abl. yīrüñi, and so on.

Similarly, before \ddot{u} -mātrā, a final h becomes sh, and a final l becomes j. Thus:—Base $k\bar{a}h$ -, the eleventh lunar day; sg. nom. $k\bar{a}h$, dat. and ag.-abl. $k\ddot{o}sh^{\ddot{u}}$, and so on.

Base $z\bar{a}l$, a net; sg. nom. $z\bar{a}l$, dat. and ag.-abl. $z\bar{o}j^{\bar{a}}$, and so on.

Not all bases ending in these letters take \ddot{u} -mātrā, although most do. Several, however, follow the regular declension like $m\ddot{a}l$. Thus:—

Base wat-, a road; sg. nom. wath, dat. wati, and so on.

Base kath-, a story; sg. nom. kath, dat. kathi, and so on.

Base hand-, chicory; sg. nom. hand, dat. handi, and so on.

In all four declensions, there are many exceptions to the above rules, and many variations, besides those mentioned, due to epenthesis. The principal of these will be found in the $K\bar{a}shm\bar{i}r\bar{i}$ Manual.

Adjectives.—Adjectives ending in u-mātrā agree with the qualified noun in gender, number, and case. Other adjectives do not change when in agreement with a substantive, although, when used themselves as substantives, they are declined like any other substantive. Thus, garīb mahanyuv, a poor man; garīb mahanivēn, to poor men; garīb zanāna, a poor woman. Some adjectives not ending in u-mātrā have feminine forms, but these are used only as substantives. Thus, dŏkhalad, afflicted. As an adjective this is not inflected. We have dŏkhalad mahanyuv, an afflicted man; dŏkhalad mahanivēn, to afflicted men; dŏkhalad zanāna, an afflicted woman. But, used as substantives, we have dŏkhalad, an afflicted man, and dŏkhaladēn, an afflicted woman, each of which is declined as a substantive, the former in the first, and the latter in the fourth declension.

On the other hand, attributive adjectives ending in *u*-mātrā, are declined throughout. Thus:—

Maso	culine.			Feminine.
A great	man.		\mathbf{A}	great woman.
Sing.			7,	
Nom.	bod" mahanyuv"			büḍ" zanāna.
Dat.	badis mahanivis			bajě zanāni.
$\mathbf{Ag}.$	badi mahanivi			
Abl.	badi mahanivi 🕽	,		baji zanāni.
Plur.,				
Nom.	badi mahanivi	70 - 11 - 1 40 - 1		bajě zanāna.
Dat.	baděn mahanivěn			**
Am Abl S	badyau mahanivya	uu,		
AgADI.	baděv mahanivěv		- 4	bajev zanānav.
AgAbl.	badyau mahanivya	w,	- 4	bajěn zanānar bajyau zanāna bajěv zanānav

Genitive.—All genitives are adjectives. There are three usual postpositions of the genitive, viz. $hond^u$, uk^u , and un^u . Of these $hond^u$ governs the dative case and uk^u and un" the ablative.

 $Hond^n$ is used :—

- a. with all masculine singular animate nouns that are not proper names,
- b. with feminine nouns of every kind, and in both numbers,
- c. and with all masculine plural nouns whether animate or inanimate.

From the above it will be observed that all plural nouns of every kind, whether masculine or feminine, take hond. The only limitation to its use is in the masculine singular.

As already stated, hond governs the dative. As pointed out on p. 271, the dative singular of all masculine nouns ends in s. Thus, first declension, tsūras, to a thief; second declension, guris, to a horse. After this s, the h of $hond^u$ is dropped, so that \underline{tsuras} -hond becomes \underline{tsuras} -'ond, and \underline{guris} -hond becomes \underline{guris} -'ond. These are usually written $\underline{ts\bar{u}ra}$ -sond" and \underline{gur}^{i} -sond" (with i-matra), respectively, so that the genitive singular of masculine singular animate nouns apparently ends in sond", although the s is really the last letter of the dative singular governed by (h) and u. As the datives of plural nouns and of feminines singular do not end in s, this change does not occur in their case. We thus get the following examples of the genitives of:-

- a. Masculine animate nouns singular:- \underline{tsura} -sond", of the thief. gur^{i} -sond^u, of the horse.
- b. Feminine nouns: $gur\check{e}$ -hond^u, of the mare. sērĕ-hond", of the brick. gurĕn-hond", of the mares. sēren-hond", of the bricks.
- c. Masculine nouns plural, whether animate or inanimate:tsūran-hond", of the thieves animate. guren-hond, of the horses garan-hond", of the houses karen-hond", of the bracelets } inanimate.

These are declined regularly as adjectives, agreeing with the thing possessed in gender, number and case. The feminine of sond" is (quite regularly) sünz", and of hond", hünzü. Thus, to take tsūra-sondu gara, the house of the thief, and tsūra-sünzü gurü, the mare of the thief, as examples, we have:-

Masculine. Feminine. Sing. \underline{tsura} -sunz^u gur^{u} , the mare of the thief. Nom. tsūra-sond gara, the house of the thief. tsūra-sandis garas, to the house tsūra-sanze gure, to the mare of the thief. Dat. of the thief. by the mare of the tsūra-sandi garan, by the house Ag.

thief. of the thief. tsūra-sanzi guri tsūra-sandi gara, from the house from the mare of the thief. of the thief. 2 N 2

VOL. VIII, PART II.

Masculine.

Feminine.

Plur.		
Nom.	$\underline{ts}\bar{u}ra$ -sand $gara$, the houses of	tsūra-sanza gure, the mares of the thief.
	the thief.	
Dat.	tsūra-sandĕn garan, to the	tsūra-sanzan gurĕn, to the mares of the
	houses of the thief.	$ \mathbf{thief.}$
Ag.	(by the houses)	(by the mares of
5.	by the houses of the thief. $ts\bar{u}ra$ -sandyau of the thief. $garau$, etc. from the houses	tsūra-sanzau guryau, the thief.
$\mathbf{Abl}.$	garay etc. from the houses	etc. from the mares of
7±01•	of the thief.	the thief.
	or one of the content of	m / - 7 - 74

Genitives in $hond^u$ are treated in exactly the same way. Thus, $\underline{ts\bar{u}ran\text{-}hond^u}$ gara, the house of the thieves; $\underline{ts\bar{u}ran\text{-}h\bar{u}nz^u}$ gur^u , the mare of the thieves, and so on, substituting h for s, throughout.

The genitive termination uk^u , as we have said, governs the ablative. It is used to form the genitive singular of masculine inanimate nouns. The plurals, as we have just seen, take $hond^u$. All masculine nouns belong either to the first declension or to the second. The ablative singular of the first declension generally ends in a. Thus, the base $s\check{o}n$ -, gold, has its ablative singular $s\check{o}na$. The final a is elided before adding the uk^u , so that the genitive singular is $s\check{o}nuk^u$, of gold. The few nouns of the first declension that end in \ddot{u} -mātrā, such as $d\ddot{o}n^{\ddot{u}}$, a pomegranate, make the genitive singular like $d\ddot{o}n^{\ddot{u}}k^u$.

The ablative singular of the second declension always ends in i, as in base kar, a bracelet; sg. nom. kor^u , abl. kari. Before uk^u this i becomes y, as in $karyuk^u$, of a bracelet. The feminine of these genitives is regularly formed by changing k^u to ch^u , so that we get the following declensions:—

			G	denitive	of First	Declension.
Sin	g.	Masculine.			h ,	Feminine.
	Nom.	$s \check{o} n u k^u$				s ŏn $\ddot{u}ch^{\ddot{u}}.$
	Dat.	sŏnakis				sŏnachĕ.
	Ag. Abl.	$\left. egin{scriptsize} s \check{o} n a k^i \ s \check{o} n a ki \ \end{array} ight\}$				sŏnachi.
Plu						*
	Nom.	$s \check{o} n a k^i$				sŏnachĕ.
	Dat.	sŏnakĕn				sŏnachĕn.
	AgAbl.	sŏnakyau,	sŏnai	kĕv	• 0	sŏnachyau, sŏnachĕv.
			(denitive	of Secon	d Declension.
Sin	g,	Masculine.				Feminine.
	Nom.	karyuk"				$karich^{\ddot{u}}$.
	Dat.	karikis				karichě.
	Ag. Abl.	$\left. egin{array}{l} karik^i \ kariki \end{array} ight\}$				karichi.

¹ The termination is really k^u , and $sona + k^u$ should regularly become $sonak^u$, but in this very common case the o of the ok^u is pronounced u, so that we get $sonuk^u$. See the remarks on p. 261 regarding the interchange of o and u, and those about bases of two or more syllables in the second declension on p. 273.

Masculine.

Feminine.

Plur.

Nom. karikⁱ karichě. Dat. karikěn karichěn.

Ag.-Abl. karikyau, karikev karichyau, karichev.

These are declined in agreement with nouns on exactly the same principles as $\underline{ts\bar{u}ra}$ -sond. Thus, $\underline{karyuk^u}$ $\underline{ts\bar{u}r}$, the thief of the bracelet; $\underline{karikis}$ $\underline{ts\bar{u}ras}$, to the thief of the bracelet; $\underline{karich^{\bar{u}}}$ \underline{grand} (4th decl.), the counting of the bracelet; $\underline{karich^{\bar{u}}}$ \underline{grand} (5), to the counting of the bracelet, and so on.

The termination un^* (also governing the ablative), the use of which is closely parallel to that of uk^* , is employed only with masculine proper names in the singular. Its feminine is $\tilde{u}\tilde{n}^{\tilde{u}}$. Thus, from the base $R\tilde{a}m$, a proper name, we have the genitive singular masculine $R\tilde{a}mun^*$, fem. $R\tilde{a}m\tilde{u}\tilde{n}^{\tilde{u}}$, which is thus declined:—

Masculine. Feminine.	
Sing.	
Nom. $R\bar{a}mun^*$ $R\bar{a}m\bar{u}\tilde{n}^{\bar{u}}$.	
Dat. $R\bar{a}manis$ $R\bar{a}ma\tilde{n}\tilde{e}$.	
Ag. Rāmani \	
$\{Abl. R\bar{a}mani\}$ $\{R\bar{a}mani. R\bar{a}mani. \}$	
Plur.	
Nom. Rāmani Rāmañě.	
Dat. Rāmaněn Rāmañěn.	
AgAbl. Rāmanyau, Rāmaněv Rāmañau, Rām	ıañĕv.

If two or more genitives are coupled together, the termination $hond^u$, $sond^u$, uk^u , or un^u is added only to the last, and the other genitives are each put in the case which its particular genitive termination governs. Thus, $w\bar{a}wa$ to $tratan-hond^u$ wakth, a time of wind and thunderings. Here tratan takes $hond^u$ because it is plural, and as the termination is $hond^u$, it is in the dative plural. $W\bar{a}v$, wind, is an inanimate masculine singular noun, and hence its genitive would be $u\bar{a}wuk^u$, i.e. the ablative $u\bar{a}wa + uk^u$. Hence we have $u\bar{a}wa$ in the above phrase, which, written fully, would be $u\bar{a}wuk^u$ to $tratan-hond^u$ wakth.

An adjective agreeing with a genitive is naturally put into the case to which the genitive suffix is added. Thus, we have $ba\dot{q}is$ (dat. sing. masc.) $\underline{t}\underline{s}\bar{u}ra\text{-}sond^*$, of the great thief, because $hond^*$ governs the dative, but $ba\dot{q}i$ $karyuk^*$, of the great bracelet, as uk^* governs the ablative.

Datives with kyut".—In addition to the regular dative given in the paradigms, another dative may be formed by adding kyut", which itself governs the dative, and means 'for.' Thus, tsūras-kyut", for the thief; guris-kyut", for the horse; gurě-kyut", for the mare; māli-kyut", for the garland. Kyut" is an adjective, and its feminine is, quite regularly, kits". It is thus declined:—

As in the case of uk^u , the true termination is n^u and, according to rule, the genitive should be $R\bar{a}mon^u$. See the footnote on the preceding page.

•	Masculine.	Feminine.
Sing.		
$\mathbf{Nom}.$	$kyut^u$	$ki\underline{t}\underline{s}^{\ddot{u}}.$
Dat.	kitis	ki <u>ts</u> ĕ.
Ag. Abl.	$\left. egin{array}{c} kit^i \ kiti \end{array} ight\}$	$km{i} t s i$.
Plur.		
Nom.	kit^i	$ki\underline{t}sa.$
Dat.	kitĕn	$ki\underline{t}\underline{s}an.$
AgAbl.	kityau, kitĕv	ki <u>ts</u> au, ki <u>ts</u> av.

These datives agree in gender, number, and case with the governing noun. Thus, $\underline{ts\bar{u}ras-kyut^u}$ gara, a house for the thief; $\underline{ts\bar{u}ras-kit\underline{t}s^u}$ guri, a mare for the thief; $\underline{ts\bar{u}ras-kit}$ guri, horses for the thief; $\underline{ts\bar{u}ras-kit\underline{t}s}$ guri, mares for the thief, and so on.

Comparison is made with the help of the postposition $kh\check{o}ta$ or $kh\check{o}tan$, than. Or nishe or nishin, from, may be used. All these govern either the ablative or the ablative masculine of the genitive. Thus, from $k\ddot{u}\tilde{n}^i$, a stone (3rd decl.), we have $ka\tilde{n}i$ (or $ka\tilde{n}i$ -handi) $kh\check{o}ta$ $trakur^u$, harder than a stone. The superlative is, as in India, made with $s\delta ruy$, all, as in $s\bar{a}r\check{e}v^iy$ $kh\check{o}ta$ $trakur^u$, harder than all, i.e. hardest. It will be remembered that $s\delta r^u$, all, always takes emphatic y (see p. 268).

Numerals.—The earlier of these are given in the List of Words and Sentences on pp. 488ff. Musalmāns, in counting, use the word barkath, or 'blessing' (spelt in the Persian character), instead of 'one.'

```
The first ordinals are:—

akyum" or gŏḍañuk", first.

dŏyum", second.

trĕyum", third.

½ūryum", fourth.

pūn½yum", fifth.

shĕyum", sixth.

satyum", seventh.

aiṭhyum", eighth.

navyum", ninth.

dahyum", tenth.
```

For further particulars, see the Kāshmīrī Manual.

PRONOUNS.—The first two Personal Pronouns are thus declined :-

	I.		Thou.
Sing.			- 1
Nom.	bŏh		ts^ah .
Dat., Ag. and Abl.	mĕ		<u>ts</u> ĕ.
Plur.			
Nom.	as^i		$t\check{o}h^i.$
Dat., Ag. and Abl.	asĕ	·	tŏhĕ.

Instead of the genitives, the possessive pronouns $my\delta n^u$, my; $s\delta n^u$, our; $chy\delta n^u$, thy; and $tuhond^u$, your, are employed. These are adjectives, and are regularly declined,

the feminines being $my\ddot{o}\tilde{n}^{i}$, $s\ddot{o}\tilde{n}^{i}$, $chy\ddot{o}\tilde{n}^{i}$, and $tuh\ddot{u}nz^{i}$, respectively. The final h of $b\ddot{o}h$ and $\underline{t}s^{a}h$ is the $h\ddot{a}-\check{e}$ $mu\underline{k}htafi$, or 'imperceptible h' (see p. 261), and is dropped when any suffixes are added. Thus, $b\ddot{o}h + y$ becomes $b\ddot{o}y$, even I; and $\underline{t}s^{i}h + ti$ becomes $\underline{t}s^{i}ti$, thou also.

The **Demonstrative**, **Relative**, **Interrogative**, and **Indefinite** pronouns have, in the singular, three sets of forms, viz. Animate Masculine (e.g. 'this man'), Animate Feminine (e.g. 'this woman'), and Inanimate (without distinction of gender) (e.g. 'this thing'). In the plural, the distinction between animate and inanimate disappears, and gender is observed only in the nominative, there being in this case, and in this case of the plural only, a masculine form agreeing with any masculine plural noun, and a feminine form agreeing with any feminine plural noun. The other cases of the plural are of common gender.

In the singular, the only cases that distinguish animate gender are the nominative and the agent. The other animate singular cases are of common gender. As the genitives are often irregular, they are also given in the paradigms.

There are three grades of the **Demonstrative Pronouns**,—not two, as in English or Hindī. The first corresponds to the English 'this,' but refers only to things within sight, or just mentioned. The second corresponds to the English 'that,' but also refers only to things within sight or just mentioned. The third also corresponds to the English 'that,' but refers only to things not within sight, or to things referred to some time ago.

The following are the tables of the declension of these pronouns. There are two forms each of the two first grades of Demonstrative Pronouns for 'this (within sight)' and 'that (within sight).' As in India, the Demonstrative Pronouns are all also used as pronouns of the third person, meaning 'he,' 'she,' and 'it.'

			0					

The plural is the same as in the case of the animate pronouns, and need not be repeated. There are several variations in the pronunciation of these pronoun of what P is often spelt kyah; käh, anyone, is often spelt käh; and këh, anything, is often spelt këh. In villeges, we often hear němis, etc., in place of nömis, etc., these prenouns is the hæ-ë mukktuf i (see p. 261), and is dropped before suffixes. Thus yi-ti, this also; hu-ti, that also.

The above may all be used either as substantives or as adjectives. The genitives, of course, can be used only as substantives. As in the case of other adjectives, when agreeing, as an adjective, with a noun in the genitive, a pronoun is put into the dative or the ablative according to circumstances.

The **Reflexive Pronoun** is $p\bar{a}na$, self (equivalent to the Hindi $\bar{a}p$). It is declined like a noun of the first declension, except that its genitive is $panun^u$ (=Hindi $apn\bar{a}$), own. Note that, as is the case in $apn\bar{a}$, the a of $panun^u$ is short. $P\bar{a}na$, self, must be distinguished from $p\bar{a}n$ (genitive $p\bar{a}nuk^u$), the human body, as in $panun^u$ $p\bar{a}n$, one's own body.

Pronominal Adjectives of quality are:

 $yuth^u$ (fem. $yi\underline{ts}h^{\bar{u}}$), of this kind (=Hindī $ais\bar{a}$).

 $tyuth^u$ (fem. $ti\underline{ts}h^{\bar{u}}$), of that kind $(tais\bar{a})$.

 $yuth^u$ (fem. $yi\underline{t}\underline{s}h^{\overline{u}}$), of what kind ($jais\overline{a}$).

 $kyuth^{u}$ (fem. $ki\underline{ts}h^{\bar{u}}$), of what kind? ($kais\bar{a}$).

Pronominal Adjectives of quantity are:

 $y\bar{u}t^u$ (fem. $y\bar{\imath}\underline{t}\underline{s}^{\bar{u}}$ or $y\bar{u}\underline{t}\underline{s}^{\bar{u}}$), this much (=Hindī $itn\bar{a}$).

 $ty\bar{u}t^{u}$ (fem. $t\bar{\imath}\underline{t}\underline{s}^{\bar{u}}$ or $t\bar{u}\underline{t}\underline{s}^{\bar{u}}$), that much $(titn\bar{a})$.

 $y\bar{u}t^u$ (fem. $y\bar{\imath}\underline{t}\underline{s}^{\bar{u}}$ or $y\bar{u}\underline{t}\underline{s}^{\bar{u}}$), how much $(jitn\bar{a})$.

 $k\bar{u}t^u$ (fem. $k\bar{\imath}t\underline{s}^{\bar{u}}$ or $k\bar{u}t\underline{s}^{\bar{u}}$), how much? ($kitn\bar{a}$).

The bases of these are $y\bar{\imath}t$ -, $t\bar{\imath}t$ -, $y\bar{\imath}t$ -, and $k\bar{u}t$ -, respectively, and the datives singular masculine are $y\bar{\imath}tis$ or $y\bar{u}tis$, $t\bar{\imath}tis$ or $t\bar{u}tis$, $y\bar{\imath}tis$ or $y\bar{u}tis$, and $k\bar{\imath}tis$ or $k\bar{u}tis$, respectively, and so on for the other cases.

Pronominal Suffixes. -Just as occurs in Lahndā and Sindhī, Kāshmīrī uses pronominal suffixes very freely, but only with verbs. It does not use them with nouns. They will therefore be dealt with after the paragraphs referring to verbs.

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—The Verb Substantive is declined as follows: The present is formed from the base chhuh, he is, but the other tenses are formed from the root $\bar{a}s$, be. Only those tenses of $\bar{a}s$ are here given that are used as auxiliary verbs. The rest are quite regular, and can be formed on the analogy of the conjugation of a verb of the second conjugation, given later on. Several of the persons of the present tense end in the letter h. This h is the $h\bar{a}$ -e $mukhtaf\bar{\imath}$ (see p. 261), and is dropped before suffixes. Thus, chhuh means 'he is,' and if we add the negative na, we get chhu-na, not chhuh-na, he is not. It will be observed that this tense and also the Past are participial in their conjugation, i.e. they have each both masculine and feminine forms:—

Present, 'I am, etc.'

1950	Sing	ULAR.	Pru	RAL.
	Masculine.	Feminine.	Masculine.	Feminine.
1	chhus	chhĕs	chhih	chhĕh
2	chhukh	chhĕkh	chhiwa	chhewa
3	chhuh	chhěh	chhih	$chhreve{e}h$

SKETCH OF KĀSHMĪRĪ GRAMMAR.

Past, 'I was, etc.'

2	āsahökh or āsahakh	$\ddot{o}s^ihar{\imath}w$		
3	āsihē or āsiha	āsahön or āsahan		

As with other verbs, various suffixes are added to the verb substantive, giving interrogative, negative, and other forces. These suffixes, and also pronominal suffixes, will be discussed later on (p. 314). Here it will suffice to give the present tense of the verb substantive with these suffixes. Thus:—

The suffixes a, \bar{a} , and ay give an interrogative force. The suffix ay is used only when a woman is addressed. Thus:—

	SINGULAR.		Pi	Plural.	
	Masculine.	Feminine.	Masculine.	Feminine.	
,		7.14			
L	chhusa or chhusā	chhĕsa or chhĕsay	$chhyar{a}$	chhyā or chhĕy	
, 2	$chhukha ext{ or } chhukhar{a}$	chhĕkha or chhĕkhay	chhiwa or chhiwā	chhĕwa or chhĕway	
3	$chhwar{a}$	chhyā or chhĕy	$chhy\bar{a}$	chhyā or chhĕy	
		٠			

Present, 'am I?, etc.'

If na is suffixed, it gives a negative force. This presents no difficulty. The only change in the verb is that the $h\bar{a}$ - \check{e} $mu\underline{kh}taf\bar{\imath}$ is dropped before this, as before all suffixes. Thus, chhusna, I am not; chhuna, he is not.

If $n\bar{a}$ or nay is added, it gives the force of an interrogative negative. Nay, like ay, is used only in addressing a woman. Examples are $chhusn\bar{a}$, am I not?; $chhun\bar{a}$, is he not?

If ti is suffixed, it signifies 'also' or 'indeed.' Thus, chhusti, I also am, or I am indeed; chhuti, he also is, or he is indeed.

To this ti the interrogative suffix \bar{a} or ay may be added, as in the case of na. A question is then asked with emphasis, as in $chhusty\bar{a}$, am I indeed?; $chhuty\bar{a}$, is he indeed?

If the suffix $\bar{a}sana$ is added, it asks a question with doubt, as in *chhwāsana* (for *chhuh* + $\bar{a}sana$), is he really?

B. The Active Verb.—There are several impersonal verbs in Kāshmīrī, which are construed impersonally in the tenses formed from the past participles. Thus, the verb asun, to laugh, is impersonal, and its third person singular past is osun, he laughed, or, literally, 'it was laughed by him.'

There are three conjugations of verbs, viz.:-

The first conjugation includes all transitive and all impersonal verbs.

The second includes about sixty-seven intransitive verbs.

The third conjugation includes all other intransitive verbs, except those that are impersonal.

The following is a list of the verbs of the second conjugation:-

āsun, to be.

basun, to dwell.

bāsun, to become manifest.

bëhun, to sit down.

bodun, to dive.

bowun, to become.

busun, to become yellow.

dalun, to pass over.

dazun, to be burnt.

dolun, to be derelict.

doshun, to trickle.

galun, to melt.

gatshun, to be proper.

Gatshun, to go, belongs to

the third conjugation.

hökhun, to become dry.

hõtsun, to decay.

 $k^a tsun$, to be wet.

kharun, to be disliked.

khasun, to ascend.

khōtsun, to fear.

lagun, to begin.

lasun, to live long.

layun, to be of full value.

lōsun, to be weary.

marun, to die.

mashun, to forget.

mēlun, to be met.

nashun, to disappear.

pakun, to go.

palatun, to melt.

palazun, to be useful.

patsun, to trust.

phalun, to bear fruit.

pharun, to be a cause of loss.

phasun, to be entangled.

phatun, to be split.

phērun, to go round.

pholun, to bloom.

phorun, to quiver.

phutun, to be broken.

pōshun, to be victorious.

prārun, to wait.

prayun, to be pleased.

punun, to be fulfilled.

rāwun, to be lost.

roshun, to be angry.

rōtun, to be stopped.

rōtsun, to be preferred.

rōzun, to remain.

samakhun, to become visible.

sapadun, sapanun, or sapazun,

to become.

shongun, to go to sleep.

shrapun, to be soaked up.

sorun, to be expended.

tagun, to be possible.

tarun, to be crossed.

thakun, to be weary.

/= 7 / 1 / L. C. J

toshun, to be satisfied.

tsalun, to flee.

tshënun, to be torn.

větsun, to pervade.

wasun, to descend.

wātun, to arrive.

wayun, to agree with.

wöbazun, to increase.

wopazun, to be born.

wöthun, to arise.

wupun, to burn inwardly.

The above list is that given by native grammarians, with a few additions gathered from my own reading. It is probably not quite complete. Sometimes individual

As with other verbs, various suffixes are added to the verb substantive, giving interrogative, negative, and other forces. These suffixes, and also pronominal suffixes, will be discussed later on (p. 314). Here it will suffice to give the present tense of the verb substantive with these suffixes. Thus:—

The suffixes a, \bar{a} , and ay give an interrogative force. The suffix ay is used only when a woman is addressed. Thus:—

	Singular.		Plural.		
	Masculine.	Feminine.	Masculine.	Feminine.	
1 2 3	chhusa or chhusā chhukha or chhukhā chhwā	chhĕsa or chhĕsay chhĕkha or chhĕkhay chhyā or chhĕy	chhyā chhiwa or chhiwā chhyā	chhyā or chhěy chhěwa or chhěway chhyā or chhěy	

Present, 'am I?, etc.'

If na is suffixed, it gives a negative force. This presents no difficulty. The only charge in the verb is that the $h\bar{a}$ - \check{e} $mu\underline{k}htaf\bar{\imath}$ is dropped before this, as before all suffixes. Thus, chhusna, I am not; chhuna, he is not.

If $n\bar{a}$ or nay is added, it gives the force of an interrogative negative. Nay, like ay, is used only in addressing a woman. Examples are $chhusn\bar{a}$, am I not?; $chhun\bar{a}$, is he not?

If ti is suffixed, it signifies 'also' or 'indeed.' Thus, chhusti, I also am, or I am indeed; chhuti, he also is, or he is indeed.

To this ti the interrogative suffix \bar{a} or ay may be added, as in the case of na. A question is then asked with emphasis, as in $chhusty\bar{a}$, am I indeed?; $chhuty\bar{a}$, is he indeed?

If the suffix $\bar{a}sana$ is added, it asks a question with doubt, as in *chhwāsana* (for *chhuh* + $\bar{a}sana$), is he really?

B. The Active Verb.—There are several impersonal verbs in Kāshmīrī, which are construed impersonally in the tenses formed from the past participles. Thus, the verb asun, to laugh, is impersonal, and its third person singular past is osun, he laughed, or, literally, 'it was laughed by him.'

There are three conjugations of verbs, viz.:-

The first conjugation includes all transitive and all impersonal verbs.

The above list is that given by native grammarians, with a few additions gathered from my own reading. It is probably not quite complete. Sometimes individual

writers or speakers differ, one putting a verb in the second, and another in the third, conjugation.

The conjugation of the Kāshmīrī verb is comparatively simple. The only serious difficulty is that presented by epenthetic changes, and provided the rules given on pp. 262ff. are strictly followed, the rest is easy. Epenthetic changes of vowels occur in all the three conjugations, but the changes of consonants before mātrā-vowels and before y and \check{e} occur only in the first and second conjugations, and do not occur in the third. It will be remembered that the only vowels that do not change under the influence of epenthesis are u, \check{u} , and \check{u} . In order to simplify the conjugation in the following paradigms, verbs have therefore been selected of which the radical vowel is u, and of which the final consonants are not liable to change. Such verbs are comparatively few in number. Those selected are:—

First conjugation,—wuchhun, to see.

Second conjugation, - wupun, to burn inwardly.

Third conjugation,—wuphun, to fly.

The three conjugations differ only in the tenses derived from the past participles. The other tenses are conjugated in the same way in all three.

The **Root** of a verb is most easily obtained by dropping the final i of the third person singular of the future. Thus, wuchhi, he will see. Dropping the final i, we get the root wuchh.

The **Infinitive** is formed by adding un to the root. Thus, wuchh-un, to see; wup-un, to burn inwardly; wuph-un, to fly. The termination is often spelt un^u or on^u so that we find words like $wuchh-un^u$ and $wuchh-on^u$, but, whatever the spelling, the word is pronounced as if it were written wuchhun. This is really a verbal noun, and means, properly, the act of seeing. It is declined in the first declension. As explained on p. 272, the u of the termination un is changed to a in all cases except the nominative. Thus, sg. dat. wuchhanas, abl. wuchhana. We have seen on p. 272 that the ablative singular in the first declension sometimes ends in i. This is common in the case of the infinitive, and, with this termination, the word has especially the force of an infinitive of purpose. Thus, wuchhani, instead of wuchhana, in order to see, as in '(he went) to see.' If a verb be transitive, and its object happen to be feminine, then the infinitive is put into the feminine, and ends in $\tilde{u}\tilde{n}^{\tilde{u}}$. Thus, the word wath, a road, is feminine, and 'to see a road' is wath $wuchhu\tilde{n}^{\tilde{u}}$, not wath wuchhun.

The **Present Participle** is formed by adding $\bar{a}n$ to the root. Thus, $wuchh-\bar{a}n$, seeing; $wup-\bar{a}n$, burning inwardly; $wuph-\bar{a}n$, flying. In poetry the termination is often an instead of $\bar{a}n$. Thus, wuchhan. This participle does not change for gender, number, or case.

The **Future Passive** Participle is formed by adding un^u to the root. Thus, $wuchhun^u$, meet to be seen; $wupun^u$, meet to be burnt inwardly; $wuphun^u$, meet to be flown. The termination is often written un or on^u , so that we also have wuchhun, $wuchhon^u$, etc. It is declined like a noun of the second declension. Its feminine is $wuchhün^u$ belonging to the third declension.

An Impersonal Future Passive Participle is formed by adding the termination and to the root. Thus, wuchh-and, it is to be seen.

The Conjunctive Participle is formed by adding *ith* to the root. Thus, *wuchk-ith*, having seen; *wup-ith*, having burnt inwardly; *wuph-ith*, having flown. In the Persian character, and in many books in the Roman character, this termination is written *it*. Thus, *wuchh-it*, etc. It should be noted that the *i* of this termination has all the effect of a mātrā-vowel, and, if possible, affects the preceding root-vowel. Thus, the conjunctive participle of *mārun*, to kill, is *mörith*, having killed.

A Negative Conjunctive Participle is formed by adding anay to the root. Thus, wuchh-anay, not having seen; wup-anay, not having burnt inwardly; wuph-anay, not having flown.

The **Frequentative Participle** is formed by adding i-mātrā to the root, which is then repeated, as in $wuchh^i$ $wuchh^i$, seeing repeatedly, as (he) kept seeing.

An Adverbial Participle is formed by adding *i*-mātrā to the Present Participle, with the consequent epenthetic change of the preceding \bar{a} . Thus, wuchhān, seeing, from which is formed the Adverbial Participle wuchhönⁱ, while seeing.

There are several forms of the **Noun of Agency**. The two commonest are formed by adding $awun^u$ (fem. $aw\ddot{u}\tilde{n}^u$) and $anw\dot{o}l^u$ (fem. $anw\ddot{a}j\check{e}\tilde{n}$), respectively, to the root. Thus, $wuchhawun^u$, fem. $wuchhaw\ddot{u}\tilde{n}^u$, and $wuchhanw\dot{o}l^u$, fem. $wuchhanw\ddot{a}j\check{e}\tilde{n}$, one who sees, a seer. The form in $awun^u$ is often used adverbially, to signify immediately on the action of the verb occurring. Thus, $wuchhawun^u$ means also 'immediately on seeing' like the Hindī $d\bar{e}kht\bar{e}\cdot h\bar{e}$.

There remain the Past Participles. In Kashmīrī three different kinds of past time are provided for in the conjugation of the verb. Just as there are three demonstrative pronouns, one meaning 'this within sight,' another 'that within sight,' and the third 'that not within sight,' so there are three past participles, one, a proximate past, indicating something that has lately occurred; another, an indefinite past, indicating something that has occurred, but without reference to whether it has occurred lately or not; and a third, a remote past, indicating something that has occurred a long time ago. The third past participle is therefore the proper past to be used in historical narration, although the second past participle can also be used for These remarks apply only to the first and second conjugations. this purpose. The third conjugation has no first past participle, but has a fourth, which is wanting in the first and second conjugations. It thus has its three participles, the second, the third, and the fourth, and, so to speak, moves each of their meanings a stage up, giving the second past participle the force of a proximate past, to the third the force of an indefinite past, and to the fourth, the meaning of a remote past. Thus:-

	1st and 2nd conjugations.		3rd conjugation.
Proximate Past.	I. Past Participle.	II.	Past Participle.
Indefinite Past.	II. Past Participle.	III.	Past Participle.
Remote Past.	III. Past Participle.	IV.	Past Participle.

There are thus four Past Participles to be considered, viz.:—

The First Past Participle, which occurs only in the first and second conjugations, is formed by adding u-mātrā to the root, as in $wuchh^u$, (lately) seen; wup^u , (lately) burnt inwardly. The feminine is made by changing u-mātrā to \ddot{u} -mātrā. Thus, $wuchh^{\ddot{u}}$, $wup^{\ddot{u}}$. The masculine and feminine belong to the second and third declensions, respectively.

The second Past Participle, which occurs in all three conjugations, is formed by adding $y\bar{o}v$ to the root. Thus, $wuchhy\bar{o}v$, seen; $wupy\bar{o}v$, burnt inwardly; $wuphy\bar{o}v$, (lately) flown. The masculine plural of this is made by changing $y\bar{o}v$ to $y\bar{e}y$, and the feminine, both singular and plural, by changing it to $y\bar{e}y\bar{e}$. Thus, singular masculine $wuchhy\bar{o}v$, feminine $wuchhy\bar{e}y\bar{e}$; plural masculine $wuchhy\bar{e}y$, feminine $wuchhy\bar{e}y\bar{e}$.

The Third Past Participle, which also occurs in all three conjugations, is formed by adding $y\bar{a}v$ to the root. The feminine is the same as the feminine of the Second Past Participle, but the masculine plural differs. In the first conjugation this ends in $y\bar{e}y\bar{e}y$, and in the second and third conjugations in $\bar{a}y$. Thus, $wuchhy\bar{a}v$, seen (a long time ago), feminine $wuchhy\bar{e}y\bar{e}$; plural masculine $wuchhy\bar{e}y\bar{e}y$, feminine $wuchhy\bar{e}y\bar{e}y$; $wupy\bar{a}v$, burnt inwardly (a long time ago), feminine $wupy\bar{e}y\bar{e}y$; plural masculine $wupy\bar{a}y$, feminine $wupy\bar{e}y\bar{e}y$; $wuphy\bar{a}v$, flown, feminine $wuphy\bar{e}y\bar{e}y$; plural masculine $wuphy\bar{a}y$, feminine $wuphy\bar{e}y\bar{e}y$.

The Fourth Past Participle, which occurs only in the third conjugation, is formed from the Third Past Participle by inserting *i* before the $y\bar{a}v$. It is declined on the same principle as the Third Past Participle of the third conjugation. Thus, wuphiyāv, flown (a long time ago), feminine wuphiyēyě; plural masculine wuphiyāy, feminine wuphiyēyě.

It will be observed that in the Second, Third, and Fourth Past Participles, the masculine singular ends in v, and the masculine plural ends in y. This v and this y are added only to assist the pronunciation, and, like the $h\bar{a}$ - \check{e} $mukhtaf\bar{\imath}$, are dropped before any suffix added at the end of the word. Thus, if to $wuchhy\bar{o}v$, he (was) seen, we add the suffix n, meaning 'by him,' we get $wuchhy\bar{o}n$, not $wuchhy\bar{o}vn$, he (was) seen by him. Similarly, from $wuchhy\bar{e}y$, they (were) seen, we get $wuchhy\bar{e}n$, they (were) seen by him. This does not apply to the feminine, which always ends in $y\check{e}$. This $y\check{e}$ is always preserved, as in $wuchhy\bar{e}y\check{e}n$, she (was) seen by him.

These four participles, although adjectives in form, are never used as adjectives. They are used only in the formation of the three corresponding past tenses,—the Proximate Past, the Indefinite Past, and the Remote Past. When they are used as adjectives, the word mot^{*} (feminine mits^{*}) must be added to them. They are then called Perfect Participles, and are thus declined:—

I. Perfect Participle, '(lately) seen, etc.'

		SINGULAB.		Plubal.		
~	Masc.	Fem.	Masc.	Fem.		
Nom.	$wuchh^u$ - mot^u	wuchh ^z -mü <u>ts</u> z	wuchh'-mat'	wuchhĕ-ma <u>ts</u> a		
Dat.	$wuchh^i$ -matis	wuchhĕ-ma <u>ts</u> ĕ	wuchhi-matĕn	wuchhĕ-ma <u>ts</u> an		
Ag.	$wuchh^i$ - mat^i) ,,,				
Abl.	$wuchh^i$ -mati	} wuchhĕ-ma <u>ts</u> i	wuchh ⁱ -matyau	wuchhĕ-ma <u>ts</u> au		
		II. Perfect Partic	iple, '(lately) flown,	etc.'		
Nom.	wuphyō-mot ^u	wuphyē-mü <u>ts</u> *	wuphyē-mat'	wuphyē-ma <u>ts</u> a		
Dat.	wuphyē-matis	wuphyē-ma <u>ts</u> ĕ	vcuphyē-matĕn	wuphyē-ma <u>ts</u> an		
Ag.	$wuphyar{e} ext{-}mat^i$	} wuphyē-matsi	wuphyē-matyau	wuphyē-ma <u>ts</u> au		

The above are examples of the declension of the First Perfect Participle (for the first and second conjugations) and of the Second Perfect Participle (for the third conjugation). The other possible Perfect Participles are hardly, if ever, used.

Radical and Participial tenses.—Like all Indo-Aryan and Eranian languages, and more especially like the languages of the North-Western Group of the former, some tenses of the Kāshmīrī verb are formed from the Root, while others are formed from Participles. The radical tenses are the Future Indicative (also used as a Present Indicative and as a Present Subjunctive); the four tenses of the Imperative, viz. the Present, the Polite Present, the Future, and the Past; the Benedictive, which is very rare; and the Past Conditional.

The Participial tenses fall into two groups, viz.:-

- (a) those formed from the Present Participle, viz.:—the Present Indicative; the Imperfect Indicative; the Durative Future Indicative; the Durative Imperative; and the Durative Past Conditional;
- (b) those formed from the Past and Perfect Participles, viz.:—the Proximate Past; the Indefinite Past; and the Remote Past. These are, respectively, formed from the corresponding Past Participles. Formed from the Perfect Participles are the Perfect, the Pluperfect, and the Future Perfect (also used as a Perfect Conditional).

There are thus four Past Participles to be considered, viz.:-

The First Past Participle, which occurs only in the first and second conjugations, is formed by adding u-mātrā to the root, as in $wuchh^u$, (lately) seen; wup^u , (lately) burnt inwardly. The feminine is made by changing u-mātrā to \ddot{u} -mātrā. Thus, $wuchh^{\ddot{u}}$, $wup^{\ddot{u}}$. The masculine and feminine belong to the second and third declensions, respectively.

The second Past Participle, which occurs in all three conjugations, is formed by adding $y\bar{o}v$ to the root. Thus, $wuchhy\bar{o}v$, seen; $wupy\bar{o}v$, burnt inwardly; $wuphy\bar{o}v$, (lately) flown. The masculine plural of this is made by changing $y\bar{o}v$ to $y\bar{e}y$, and the feminine, both singular and plural, by changing it to $y\bar{e}y\bar{e}$. Thus, singular masculine $wuchhy\bar{o}v$, feminine $wuchhy\bar{e}y\bar{e}$; plural masculine $wuchhy\bar{e}y$, feminine $wuchhy\bar{e}y\bar{e}$.

The Third Past Participle, which also occurs in all three conjugations, is formed by adding $y\bar{a}v$ to the root. The feminine is the same as the feminine of the Second Past Participle, but the masculine plural differs. In the first conjugation this ends in $y\bar{e}y\bar{e}y$, and in the second and third conjugations in $\bar{a}y$. Thus, $wuchhy\bar{a}v$, seen (a long time ago), feminine $wuchhy\bar{e}y\bar{e}$; plural masculine $wuchhy\bar{e}y\bar{e}y$, feminine $wuchhy\bar{e}y\bar{e}$; $wupy\bar{a}v$, burnt inwardly (a long time ago), feminine $wupy\bar{e}y\bar{e}$; plural masculine $wupy\bar{a}y$, feminine $wupy\bar{e}y\bar{e}$; $wuphy\bar{a}v$, flown, feminine $wuphy\bar{e}y\bar{e}$; plural masculine $wuphy\bar{a}y$, feminine $wuphy\bar{e}y\bar{e}$.

The Fourth Past Participle, which occurs only in the third conjugation, is formed from the Third Past Participle by inserting *i* before the $y\bar{a}v$. It is declined on the same principle as the Third Past Participle of the third conjugation. Thus, $wuphiy\bar{a}v$, flown (a long time ago), feminine $wuphiy\bar{e}y\check{e}$; plural masculine $wuphiy\bar{a}y$, feminine $wuphiy\bar{e}y\check{e}$.

It will be observed that in the Second, Third, and Fourth Past Participles, the masculine singular ends in v, and the masculine plural ends in y. This v and this y are added only to assist the pronunciation, and, like the $h\bar{a}$ - \check{e} $mu\underline{k}htaf\bar{\imath}$, are dropped before any suffix added at the end of the word. Thus, if to $wuchhy\bar{o}v$, he (was) seen, we add the suffix n, meaning 'by him,' we get $wuchhy\bar{o}n$, not $wuchhy\bar{o}vn$, he (was) seen by him. Similarly, from $wuchhy\bar{e}y$, they (were) seen, we get $wuchhy\bar{e}n$, they (were) seen by him. This does not apply to the feminine, which always ends in $y\check{e}$. This $y\check{e}$ is always preserved, as in $wuchhy\bar{e}y\check{e}n$, she (was) seen by him.

These four participles, although adjectives in form, are never used as adjectives. They are used only in the formation of the three corresponding past tenses,—the Proximate Past, the Indefinite Past, and the Remote Past. When they are used as adjectives, the word mot^u (feminine $m\ddot{u}ts^{\ddot{u}}$) must be added to them. They are then called Perfect Participles, and are thus declined:—

I. Perfect Participle, '(lately) seen, etc.'

	SINGULAR.			PLUBAL.		
7	Masc.	Fem.	Masc.	Fem.		
īош.	$wuchh^u$ - mot^u	wuchh ^z -mü <u>ts</u> ^z	wuchhi-mati	wuchhĕ-ma <u>ts</u> a		
Oat.	wuchhi-matis	wuchhë-ma <u>ts</u> ë	wuchhi-matĕn	wuchhĕ-ma <u>ts</u> an		
lg.	$wuchh^i$ - mat^i)	773	77.0		
Abl.	wuchhi-mati	wuchhĕ-ma <u>ts</u> i	wuchh ⁱ -matyau	wuchhĕ-ma <u>ts</u> au		
		II. Perfect Partic	iple, '(lately) flown,	etc.'		
om.	$wuphyar{o} ext{-}mot^u$	wuphyē-mü <u>ts^u</u>	$wuphyar{e} extbf{-}mat^i$	wuphyē-ma <u>ts</u> a		
at.	wuphyē-matis	wuphyē-ma <u>ts</u> ĕ	wuphyē-matěn	wuphyē-ma <u>ts</u> an		
g. bl.	wuphyē-mati wuphyē-mati	} wuphyē-ma <u>ts</u> i	wuphyē-matyau	wuphyē-ma <u>ts</u> au		

The above are examples of the declension of the First Perfect Participle (for the first and second conjugations) and of the Second Perfect Participle (for the third conjugation). The other possible Perfect Participles are hardly, if ever, used.

Radical and Participial tenses.—Like all Indo-Aryan and Eranian languages, and more especially like the languages of the North-Western Group of the former, some tenses of the Kāshmīrī verb are formed from the Root, while others are formed from Participles. The radical tenses are the Future Indicative (also used as a Present Indicative and as a Present Subjunctive); the four tenses of the Imperative, viz. the Present, the Polite Present, the Future, and the Past; the Benedictive, which is very rare; and the Past Conditional.

The Participial tenses fall into two groups, viz.:-

- (a) those formed from the Present Participle, viz.:—the Present Indicative; the Imperfect Indicative; the Durative Future Indicative; the Durative Imperative; and the Durative Past Conditional;
- (b) those formed from the Past and Perfect Participles, viz.:—the Proximate Past; the Indefinite Past; and the Remote Past. These are, respectively, formed from the corresponding Past Participles. Formed from the Perfect Participles are the Perfect, the Pluperfect, and the Future Perfect (also used as a Perfect Conditional).

So far as the Radical Tenses are concerned, person and number are indicated by the various terminations, just as is the case with other connected languages. We know, e.g., that wuchha means 'I shall see' and that wuchhakh means 'thou wilt see' by the terminations a and akh, respectively. Also, in the case of the tenses formed from the Present Participle the number and person are sufficiently indicated by the auxiliary verb which accompanies the participle. But in the cases of those tenses that are formed from the Past Participles, we have not got either of these resources, and the person of the subject must be indicated by the subject itself, either a noun or a pronoun. Just as in Hindostānī, when we say 'dēkhā,' the word only means 'seen,' and, if we wish to say who it was that saw, we must add a pronoun, as in 'maī-nē dēkhā,' 'I saw,' 'us-nē dēkhā,' 'he saw,' so, in Kāshmīrī, wuchh" means 'seen,' and for 'I saw' or 'you saw' we must add the appropriate pronoun.

Again, as in Hindostānī, the Past and Perfect Participles of Intransitive Verbs, i.e. of all verbs of the second and third conjugations, are active in signification, and the subject is in the nominative case; while the Past and Perfect Participles of Transitive and of Impersonal Verbs, i.e. of all verbs of the first conjugation, are passive in signification, and the subject must be put in the Agent case, the participle agreeing with the object in gender and number, if the latter is in the form of the nominative, but remaining in the masculine singular if the object is in the form of the dative. Here, we see, that the construction is exactly the same as that usual in Hindostani. In the method of employing the pronouns that indicate the subject in these participial tenses, Kāshmīrī closely agrees with the Indo-Aryan languages of North-Western India,— Sindhī and Lahndā,—and, in this respect, parts company with Hindōstānī. The subject may be written in full, as in me wuchh, 'by-me seen,' or it may be indicated by a pronominal suffix, as in wuchhu-m, 'seen-by-me,' or both methods may be used at the same time, as in më wuchhu-m, 'by-me seen-by-me.' All these three methods may be used with either the first or third person, but the second person can be indicated only by the second or third methods, as it is a rule in Kāshmīrī that whenever the second person occurs in a sentence, its presence must be indicated by a pronominal suffix attached to the verb.

Before, therefore, proceeding with the conjugation of the verb, it is necessary to state those pronominal suffixes that are required for our immediate purposes. These are the suffixes of the nominative and of the agent cases. A full account of all the suffixes will be found on a later page. These particular suffixes are as follows:—

	First person.	Second person.		Third person.
Nominative Singular	8	kh		None.
Agent Singular	m	th(y)		n.
Nom. and Agent Plura	l None	wa	4	kh.

When the suffix of the Agent Singular of the second person is added to an auxiliary verb, it is y, not th. If there is an Auxiliary Verb with a Perfect Participle, the suffixes are added to the Auxiliary Verb, but in the case of those tenses that are formed from the Past (and not from the Perfect) Participles, they are added to the Participle.

A few Kāshmīrī verbs are conjugated only in the feminine, and in the case of these the Past Participle is necessarily put in the feminine, even when the object is masculine and in the form of the dative.

The suffixes of the Nominative are added in the case of intransitive verbs, and those of the Agent in the case of transitive verbs. Finally, it may be observed that, if a suffix is available, it must be used if the verb is intransitive. Thus, 'flew' is wuphyōv and 'I flew' is always wuphyō-s or bŏh wuphyō-s, and never bŏh wuphyōv. It will be remembered that when a Past Participle ends in v or y, that letter is elided before any suffix.

We shall now proceed to consider the manner in which the various tenses are formed. Of the Radical Tenses, the Future Indicative corresponds to what I have called the 'Old Present' in the Indo-Aryan languages. It is derived from what was originally a present tense, but, as also has happened in the Indo-Aryan languages, it has in the course of time changed its function. In them it has usually become a Present Subjunctive, as in the Hindī mai dekhi, I may see, but in the eastern languages it still retains its present force, as in the Bengali ami dekhi, I see. In Kāshmīrī it generally has the force of a future, as in boh wuchha, I shall see, but sometimes it retains the force of the present, as in gatshi, it is proper (3rd person singular); kuwa zana, how do I know? It is also used, as in the Indo-Aryan languages, as a present subjunctive, so that boh wuchha may also mean 'I may know' or '(if) I know.' This tense is formed by adding the old personal terminations directly to the root.

The **Present Imperative**, as in the Indo-Aryan languages, is also formed by adding the personal terminations directly to the root. It is used only in the second and third persons. If a first person is required, the first person of the future indicative is used in its place. The second person singular takes no termination, thus, wuchh, see thou, but if the root ends in a hard consonant, this, according to the general rule, is aspirated (see p. 267). Thus, from gupun, to protect, the root is gup, and the second person singular imperative is guph, protect thou.

The **Polite Present Imperative** is formed by adding ta to the simple Present Imperative. This ta, which closely corresponds to the Hindī $t\bar{o}$, is inserted between the root and the termination, when there is a termination. Thus, wuchh-ta, please see thou (cf. the Hindī $d\bar{e}kh$ $t\bar{o}$); wuchh-ta-n, please let him see.

The **Future Imperative** is formed by adding 'zi to the second person singular of the simple present Imperative, as in wuchh-'zi, thou shouldst see, thou must see (at some future time). From its meaning this tense is commonly used in giving instructions as to future conduct. It does not change in conjugation, being the same in form for all persons and for both numbers.

The **Past Imperative** is formed by adding $h\bar{e}$ to the Future Imperative, thus wuchh-izi- $h\bar{e}$, thou shouldst have seen, thou oughtest to have seen. Like the Future Imperative, it does not change in conjugation.

The Benedictive tense occurs only in the case of a few verbs, and is then based on the Future Indicative. It is not used in the case of the verb wuchhun. As an example, we may quote the verb lasun, to live long, of which the second person singular Benedictive is lashĕkh, mayst thou live long. Note, how in this verb the s has become sh before the ĕ.

The Past Conditional is said to be formed by adding hö or ha to the Future Indicative, but there are several irregularities in the method of adding, which will be seen in VOL. VIII, PART II.

So far as the Radical Tenses are concerned, person and number are indicated by the various terminations, just as is the case with other connected languages. We know, e.g., that wuchha means 'I shall see' and that wuchhakh means 'thou wilt see' by the terminations a and akh, respectively. Also, in the case of the tenses formed from the Present Participle the number and person are sufficiently indicated by the auxiliary verb which accompanies the participle. But in the cases of those tenses that are formed from the Past Participles, we have not got either of these resources, and the person of the subject must be indicated by the subject itself, either a noun or a pronoun. Just as in Hindostānī, when we say 'dēkhā,' the word only means 'seen,' and, if we wish to say who it was that saw, we must add a pronoun, as in 'maī-nē dēkhā,' 'I saw,' 'us-nē dēkhā,' 'he saw,' so, in Kāshmīrī, wuchh" means 'seen,' and for 'I saw' or 'you saw' we must add the appropriate pronoun.

Again, as in Hindostānī, the Past and Perfect Participles of Intransitive Verbs, i.e. of all verbs of the second and third conjugations, are active in signification, and the subject is in the nominative case; while the Past and Perfect Participles of Transitive and of Impersonal Verbs, i.e. of all verbs of the first conjugation, are passive in signification, and the subject must be put in the Agent case, the participle agreeing with the object in gender and number, if the latter is in the form of the nominative, but remaining in the masculine singular if the object is in the form of the dative. Here, we see, that the construction is exactly the same as that usual in Hindostani. In the method of employing the pronouns that indicate the subject in these participial tenses, Kāshmīrī closely agrees with the Indo-Aryan languages of North-Western India,— Sindhī and Lahndā,—and, in this respect, parts company with Hindōstānī. The subject may be written in full, as in me wuchh, 'by-me seen,' or it may be indicated by a pronominal suffix, as in wuchhu-m, 'seen-by-me,' or both methods may be used at the same time, as in më wuchhu-m, 'by-me seen-by-me.' All these three methods may be used with either the first or third person, but the second person can be indicated only by the second or third methods, as it is a rule in Kāshmīrī that whenever the second person occurs in a sentence, its presence must be indicated by a pronominal suffix attached to the verb.

Before, therefore, proceeding with the conjugation of the verb, it is necessary to state those pronominal suffixes that are required for our immediate purposes. These are the suffixes of the nominative and of the agent cases. A full account of all the suffixes will be found on a later page. These particular suffixes are as follows:—

	First person.	Second person.	Third person.
Nominative Singular	8	kh	None.
Agent Singular	m	th(y)	n.
Nom. and Agent Plural	None	wa	kh.

When the suffix of the Agent Singular of the second person is added to an auxiliary verb, it is y, not th. If there is an Auxiliary Verb with a Perfect Participle, the suffixes are added to the Auxiliary Verb, but in the case of those tenses that are formed from the Past (and not from the Perfect) Participles, they are added to the Participle.

A few Kashmiri verbs are conjugated only in the feminine, and in the case of these the Past Participle is necessarily Put in the feminine, even when the object is masculine and in the form of the dative.

The suffixes of the Nominative are added in the case of intransitive verbs, and those of the Agent in the case of transitive verbs. Finally, it may be observed that, if a suffix is available, it must be used if the verb is intransitive. Thus, 'flew' is $wuphy\bar{o}v$ and 'I flew' is always $wuphy\bar{o}-s$ or $b\bar{o}h$ $wuphy\bar{o}-s$, and never $b\bar{o}h$ $wuphy\bar{o}v$. It will be remembered that when a Past Participle ends in v or y, that letter is elided before any suffix.

We shall now proceed to consider the manner in which the various tenses are formed. Of the Radical Tenses, the Future Indicative corresponds to what I have called the 'Old Present' in the Indo-Aryan languages. It is derived from what was originally a present tense, but, as also has happened in the Indo-Aryan languages, it has in the course of time changed its function. In them it has usually become a Present Subjunctive, as in the Hindī mai dekhi, I may see, but in the eastern languages it still retains its present force, as in the Bengali ami dekhi, I see. In Kāshmīrī it generally has the force of a future, as in boh wuchha, I shall see, but sometimes it retains the force of the present, as in gatshi, it is proper (3rd person singular); kuwa zāna, how do I know? It is also used, as in the Indo-Aryan languages, as a present subjunctive, so that boh wuchha may also mean 'I may know' or '(if) I know.' This tense is formed by adding the old personal terminations directly to the root.

The **Present Imperative**, as in the Indo-Aryan languages, is also formed by adding the personal terminations directly to the root. It is used only in the second and third persons. If a first person is required, the first person of the future indicative is used in its place. The second person singular takes no termination, thus, wuchh, see thou, but if the root ends in a hard consonant, this, according to the general rule, is aspirated (see p. 267). Thus, from gupun, to protect, the root is gup, and the second person singular imperative is guph, protect thou.

The **Polite Present Imperative** is formed by adding ta to the simple Present Imperative. This ta, which closely corresponds to the Hindī $t\bar{o}$, is inserted between the root and the termination, when there is a termination. Thus, wuchh-ta, please see thou (cf. the Hindī $d\bar{e}kh$ $t\bar{o}$); wuchh-ta-n, please let him see.

The **Future Imperative** is formed by adding *izi* to the second person singular of the simple present Imperative, as in *wuchh-izi*, thou shouldst see, thou must see (at some future time). From its meaning this tense is commonly used in giving instructions as to future conduct. It does not change in conjugation, being the same in form for all persons and for both numbers.

The **Past Imperative** is formed by adding $h\bar{e}$ to the Future Imperative, thus wuchh-izi- $h\bar{e}$, thou shouldst have seen, thou oughtest to have seen. Like the Future Imperative, it does not change in conjugation.

The Benedictive tense occurs only in the case of a few verbs, and is then based on the Future Indicative. It is not used in the case of the verb wuchhun. As an example, we may quote the verb lasun, to live long, of which the second person singular Benedictive is lashĕkh, mayst thou live long. Note, how in this verb the s has become sh before the ĕ.

The Past Conditional is said to be formed by adding hö or ha to the Future Indicative, but there are several irregularities in the method of adding, which will be seen in VOL. VIII, PART II.

the paradigm. Thus, $wuchhah\ddot{o}$ or wuchhaha, (if) I had seen. This tense, in its formation, closely corresponds to the Lahndā Past Conditional $m\ddot{a}$ $v\bar{e}kh\ddot{a}h\ddot{a}$, (if) I had seen.

As regards the Participial Tenses formed from the Present Participle, the **Present** Indicative is formed by conjugating the Present Participle with the Present Tense of the Verb Substantive. The Participle remains unchanged throughout. Thus, boh chhus wuchhān, I (masc.) am seeing; boh chhēs wuchhān, I (fem.) am seeing. The Auxiliary may either precede or follow the Participle, but most usually it precedes it. As regards meaning, this tense may be a Definite Present, or an Indefinite Present, or a Habitual Present. So that boh chhus wuchhān means 'I am seeing,' or 'I see,' or 'I am in the habit of seeing.'

The Imperfect Indicative is formed by conjugating the Present Participle with the Past Tense of the Verb Substantive. Thus, bŏh ōsus wuchhān, I (masc.) was seeing; bŏh ösüs wuchhān, I (fem.) was seeing. The Participle remains unchanged throughout.

The **Durative Future Indicative** is formed by conjugating the Present Participle with the Future of the Verb Substantive, the participle remaining unchanged throughout. Thus, bŏh āsa wuchhān, I shall be seeing, or I may be seeing.

The Durative Imperative is formed by conjugating the Present Participle with the Present Imperative of the Verb Substantive. Thus, ās wuchhān, keep thou seeing, make thou a practice of seeing.

The **Durative Past Conditional** is formed by conjugating the Present Participle with the Past Conditional of the Verb Substantive. Thus, bǒh āsahö wuchhān, (if) I had been seeing, or 'I should have been seeing, (if).'

As regards the Participial Tenses formed from the Past Participles, these are the Proximate Past, the Indefinite Past, and the Remote Past. Here we must consider the three conjugations separately.

In the first conjugation, the verb is either transitive or impersonal, and the subject must be put into the Agent case. As stated above, the subject may be indicated independently of the verb, as in tami wuchi, by-him he-was-seen; tami wuchi, by-him she-was-seen; tami wuchi, by-him they(masc.)-were-seen; tami wuchi, by-him they(fem.)-were-seen; or (impersonal) tami osi, by-him it-was-laughed, i.e. he laughed. Or the subject may be indicated by a pronominal suffix, as in wuchin-n, he-was-seen-by-him; wuchi-n, she-was-seen-by-him; wuchi-n, they(masc.)-were-seen-by-him; wuchi-n, they(fem.)-were-seen-by-him; or (impersonal) osu-n, it-was-laughed-by-him, i.e. he laughed. Or both methods may be used at the same time, as in tami wuchhu-n, by-him it-was-seen-by-him, and similarly tami wuchhi-n, tami wuchhi-n, tami osu-n. As there is no suffix for the first person plural, the first method can alone be employed in this case.

The process is exactly similar for the Indefinite Past and for the Remote Past. Thus, taking the masculine singular only, we have (Indefinite Past) tam wuchhyōv, wuchhyō-n, or tam wuchhyō-n, and (Remote Past) tam wuchhyāv, wuchhyā-n, or tam wuchhyā-n. Again we remind the reader that the first method cannot be used when the subject is in the second person. In that case a pronominal suffix must be used.

In the second and third conjugations, also, only the second and third of the above methods can be used for the first and second persons. The pronominal suffix represents here the nominative case, not the agent, and a reference to the table given above will show that there are no suffixes of the nominative case in the third person. Hence, in the case of the third person only the first method can be used. So also, for the same reason, the first person plural. The conjugation of the past tenses of intransitive verbs is therefore a mixture of the first and second methods, or of the first and third. Thus, from wupun (second conjugation), we have in the masculine singular of the Proximate Past, wupu-s or böh wupu-s, I burnt inwardly, wupu-kh or tsah wupu-kh, thou burntest inwardly, but suh wupu, he burnt inwardly. So, for the third conjugation, from wuphun, to fly, we have for the masculine singular of the Proximate Past (1) wuphyō-s or bŏh wuphyō-s, (2) wuphyō-kh or tsah wuphyō-kh, (3) suh wuphyōv. So also for the Indefinite Past and for the Remote Past.

As for the tenses formed from the Perfect Participle, they closely follow the analogy of Hindi. Pronominal suffixes are added, not to the Participle, but to the verb substantive that always accompanies it. The methods of expressing the subject are the same as in the tenses formed from the Past Participles, the only difference being that when added to a verb substantive, the suffix of the agent case of the second person singular is y, not th. The verb substantive may either precede or follow the participle, but usually precedes it.

The **Perfect Indicative** is formed by conjugating the Perfect Participle with the Present Tense of the Verb Substantive. Thus, mě chhuh wuchh mot, chhu-m wuchh mot, or mě chhu-m wuchh mot, I have seen him; bŏh chhu-s wup mot, I (masc.) have burnt inwardly; bŏh chhu-s wuphyō-mot, I (masc.) have flown.

Similarly, the **Pluperfect** is made with the Past Tense of the Verb Substantive. Thus, mě ós wuchh or osu-m wuchh or mě ósu-m wuchh or mě ósu-m wuchh had seen him; bŏh ósu-s wupu-mot, I had burnt inwardly; bŏh ósu-s wuphyō-mot, I had flown.

The Future Perfect, which is also used as a Perfect Conditional, is similarly made with the Future Tense of the Verb Substantive. In this tense, the final i of āsi becomes ĕ before most suffixes. We thus get the following examples of the first conjugation:—mĕ āsi wuchh*-mot*, or āsĕ-m wuchh*-mot*, or mĕ āsĕ-m wuchh*-mot*, I shall have seen him, or I may have seen him, (if) I have seen him, or I shall have seen him (if). As for Intransitive Verbs, the subject is already indicated by the person of the tense of the Verb Substantive, so that Pronominal suffixes of the nominative are not required. Thus, bŏh āsa wup*-mot*, I shall have burnt inwardly, etc.; bŏh āsa wuphyō-mot*, I shall have flown, etc.

We shall now proceed to conjugate throughout the verb wuchhun, to see, which belongs to the first conjugation. We shall then conjugate, in the tenses formed only from the Past and Perfect Participles, the verb wupun, to burn inwardly, of the second conjugation, and the verb wuphun, to fly, of the third conjugation.

PARADIGM OF THE FIRST CONJUGATION.

Root, wuchh, see.

Infinitive, masc. wuchhun, wuchhun, or wuchhon; fem. wuchhüñü; the act of seeing, to see.

Present Participle, wuchhān, seeing (common gender).

Future Passive Participle, masc. sing. wuchhun, plur. wuchhan; fem. sing. wuchhüñi, plur. wuchhañi; meet to be seen.

Impersonal Future Participle, wuchhanī, it is to be seen.

Conjunctive Participle, wuchhith, having seen.

Negative Conjunctive Participle, wuchhanay, not having seen.

Frequentative Participle, wuchhi wuchhi, seeing repeatedly, or continually.

Adverbial Participle, wuchhöni, while seeing.

Nouns of Agency, a seer, one who sees:—

Tenses formed from the Past Participles.

As previously explained, in the first conjugation, each of these tenses may be conjugated in three different ways, viz. with the subject expressed fully in the agent case, or with the subject indicated by pronominal suffixes of the agent, or with both. As there is no suffix for the agent case of the nominative plural, this person in this number can be indicated only by the first of these three methods. Moreover, as the second person must always in Kashmiri be indicated by a suffix, for this person the first method is not available. I therefore here give two paradigms for each of these tenses, the first (A.) exemplifying the first method, and the second (B.) exemplifying the second and third methods. I give the pronominal subject throughout, but in each second paradigm I enclose it in marks of parenthesis, in order to show that it is not used in the second method, but only in the third.

Proximate Past, I saw (lately). Literally, seen by me, etc.

Tenses formed from the Perfect Participle.

The tenses formed from the Perfect Participle are the Perfect, the Pluperfect, and the Future Perfect. The last named is also used as a Perfect Conditional. They are formed by conjugating the Perfect Participle with the Present, the Past, and the Future of the Verb Substantive, respectively. There are the same three methods of conjugating each of these three tenses as in the case of the tenses formed from the Past Participles, but the pronominal suffixes are added to the Verb Substantive, and not to the Participle, which changes only for gender and number. The only other difference is that, when added to the Verb Substantive, the suffix of the Agent singular of the second personal pronoun is y, not th.

PARADIGM OF THE SECOND CONJUGATION.

The verb selected to illustrate the second conjugation is wupun, to burn inwardly. I give only the Past and Perfect Participles, and the tenses formed from them. The rest exactly follows the model of the first conjugation.

The tenses of this conjugation that are derived from the Past and Perfect Participles must always have their person defined by a pronominal suffix, when such is available. The suffixes are, of course, those of the nominative, not those of the agent, and as there are no suffixes for the nominative of the first person plural or of the third person singular or plural, these persons take no suffixes. The use of the full pronouns of the subject is optional except in these persons, where it is compulsory. Where it is optional, I put them between marks of parenthesis. The verb is throughout construed actively, and agrees, in these tenses, with its subject in gender, number, and person.

Pluperfect, I had flown, etc.

(boh) osus wuphyomot, and so on, on the analogy of the second conjugation, but, as in the Perfect, with the Perfect Participle wuphyomot of the third conjugation.

Future Perfect, I shall have flown, I may have flown, etc.

 $(b\check{o}h)$ $\bar{a}sa$ $wuphy\bar{o}m\bar{o}t^u$, and so on, on the analogy of the second conjugation, but, as in the Perfect, with the Perfect Participle $wuphy\bar{o}mot^u$ of the third conjugation.

Vowel Changes in Conjugation.—One of the reasons why the above verbs have been selected as illustrations of the three conjugations is that they all contain the letter u, and (vide p. 264) u is one of the few vowels that are not liable to epenthetic changes. Verbs containing this vowel are, however, few in number. The great majority of roots contain other vowels, and these are liable to change under the influence of the vowels following them in the next syllable. The rules for these changes are given above on pp. 262ff., and are rigidly applied through all three conjugations. The vowels that epenthetically affect a preceding vowel, and which appear in the conjugation of verbs are i-mātrā, u-mātrā, ü-mātrā, and (in the conjunctive participle) i. The following table shows all the forms in which these appear and the manner in which they affect a preceding vowel. Six verbs are given as examples, each containing a different vowel. the rules already given are strictly followed, no further explanation is necessary. the Past Conditional, only one person is shown, viz. the second person plural, as this is the only person which contains i-matra. The other persons are quite regular, and the vowel remains unchanged. Thus, while mārun, to strike, has its Past Conditional, second. plural $m\ddot{o}r^{i}h\bar{\imath}w$, its first person singular is $m\bar{a}rah\ddot{o}$, like $wuchhah\ddot{o}$, with the \bar{a} unchanged, as it is not followed by i-matra.

- 1	karun, to do.	mārun, to strike.	livun, to plaster.	chīrun, to squeeze out.	phērun, to be turned (2nd conj.).	bōzun, to hear.

When a form is not given in the above list, it is to be taken as regular.

Consonant Changes in Conjugation.—If the root of a verb ends in one of the hard consonants k, p, t, t, or ts this consonant becomes final in the second person singular of the Imperative, and must hence (vide p. 267) be aspirated. Thus, the verb $h \tilde{e} kun$, to be able, has its 2 sing. imperat. $h \tilde{e} kh$; gupun, to protect, has guph; katun, to spin, has kath; ratun, to seize, has rath; and atsun, to enter, has atsh. As usual, the final h is not written in the Persian character.

Of more importance are the changes of the final consonant of a root before \ddot{u} -mātrā, \ddot{e} , or y. These changes follow the rules laid down on pp. 266ff. The consonants that are liable to change are k, kh, g, l, h, t, th, d, t, th, d, and n. Moreover, if a root ends in s, a y following the s is dropped, and thus \ddot{e} becomes a (see pp. 259, 267). These changes occur in the three Past Participles and in the Perfect Participles and tenses derived from them. Examples of the changes in the case of each kind of verb are given in the following table. As the rules given are strictly followed no further explanations are necessary. It must, however, be remembered that these changes occur only in the first and second conjugations. They do not occur in the third conjugation. Thus the verb chamakun, to shine, belongs to the third conjugation, and its II. Past Participle is chamakyōv, not chamachyōv, as we might otherwise expect from the analogy of thachyōv.

The Perfect Participles of the first and second conjugations follow the changes of the I. Past Participles. Note the irregular declension of the II. and III. Past Participles of Nos. 9-13.

Irregular Verbs.—So far we have dealt with verbs whose roots end in consonants. There are eight verbs whose roots end in vowels, and which hence of necessity present some irregularities. These roots are the following:—

Five ending in ě, viz. khě, eat; chě, drink; hě, take; pě, fall; and zě, be born.

Three ending in i, viz. di, give; ni, take; and yi, come.

These all form their infinitives in n^u ; thus, $khyon^u$, to eat; $chyon^u$, to drink; $hyon^u$, to take; $pyon^u$, to fall; $zyon^u$, to be born; $dyun^u$, to give; $nyun^u$, to take; and yun^u , to come.

Taking $khyon^u$, to eat, and $dyun^u$, to give, as examples, we find the following peculiarities. All those verbs whose roots end in \check{e} follow $khyon^u$, and all those whose roots end in i follow $dyun^u$:—

Present Participle .	khĕwān	$diwar{a}n$
Impersonal Future	**	
Passive Participle .	khĕnī	$dinar{\imath}$
Conjunctive Participle	khĕth	dith
Negative Conjunctive	-	
Participle	khĕnay	dinay
Frequentative Parti-	·	
ciple	khě khě or khěth khěth	di di or dith dith
Adverbial Participle .	khĕwön ⁱ	$diw\ddot{o}n^i$
Noun of Agency I .	khĕwawun"	$diwawun^{*}$
II .	khĕnawól"	$dinaw \delta l^{*}$

The Past (and Perfect) Participles of these verbs are all quite irregular, and will be dealt with below.

In the Future all these verbs insert m in the first person singular and plural, and y in the third person singular and in the second person plural. Thus:—

		1.	$kh\check{e}ma$				dima
		2.	khĕkh				dikh
		3.	$.kh\check{e}yi$				diyi
	Plur.						
		1.	khĕmaw				dima w
lower		2.	khĕyiw		7.		diyiw
		3.	khěn				din
\mathbf{T}	he Present	Imp	erative is	thus conjug	gated:—	-	
	Sing.						
j	'	2.	khĕħ				dih
		3.	khĕyin				diyi n
	Plur.			\			
		2.	khěyivo				diyiv
			khĕyin				diyin

It will be seen that h is added to the second person singular, and that y is inserted in the other persons. The h is $h\bar{a}$ - ℓ multiplication and is dropped before suffixes.

Sing.

For the Polite Imperative we have:

Sing.				
	2.	${\it kh\~e ta}$		dita
	3.	khĕ y itan		$diy^i tan$
Plur.	2.	khĕyitaw		diy^itaw
	3	khěvitan		diy^itan

Future Imperative, khězi, dizi. Past Imperative, khězihē, dizihē.

These verbs are not used in the Benedictive.

The Past Conditional is conjugated as follows:-

Sing.				
Ŭ	1.	khĕmahö		$dimah\ddot{o}$
	2.	khĕhökh	9	$dih\ddot{o}kh$
	3.	khĕyih ē		$diyihar{e}$
Plur.		•		
	1.	khĕmah öw		$dimah\ddot{o}w$
	2.	$khreve{e}y^ihar{\imath}w$		$dim{y}^i ar{h}ar{\imath} w$
9	3.	khĕ h ön		$dih\ddot{o}n$

The terminations vary as in the regular verb.

The Past Participles are given below, and from them the Perfect Participles and the Past Participial tenses are formed in the usual way.

In Hindî there are a few verbs with irregular past participles, like $diy\bar{a}$ from $d\bar{e}n\bar{a}$, to give, but in Kāshmīrī, as in Sindhī, there are many more. In Kāshmīrī, the list includes all the eight verbs whose roots end in vowels, and many more whose roots end in consonants. The following is a list of the more important verbs with irregular past participles that belong to the first and second conjugations. Only the first and second past participles are given. The third can always be formed from the second by changing $\bar{o}v$ to $\bar{a}v$.

A second list gives those verbs of the third conjugation that have irregular past participles.

	I.—PA	II.—PAST PARTICIPLE.	
	Masculine.	Feminine.	Masculine.
khasun, to ascend	khotu	khü <u>ts</u> ü	kha <u>ts</u> ōv
wasun, to descend	$woth^u$	wü <u>ts</u> h ^ü	$wa\underline{t}\underline{s}h\bar{o}v$
lasun, to live long	$lar{u}st^u$	lütsha (pl. lötsha)	lö <u>ts</u> hōv
lōsun, to be weary	$l\bar{u}s^u$	$l\bar{u}s^{\bar{u}}$ or $l\bar{u}\underline{t}sh^{\bar{u}}$ (pl. $l\bar{o}sa$, $l\bar{o}\underline{t}sha$)	lōsōv, lō <u>ts</u> hōv
marun, to die	$m\bar{u}d^u$	тоуё	mŏyōv
hyon ^u , to take	$hyot^u$	hặ <u>ts</u> ª	hĕ <u>ts</u> ōv

				I.—	PAST PARTICIPLE.	II.—PAST PARTICIPLE.
				Masculine.	Feminine.	Masculine.
dyun", to give .		•		dyui*	di <u>ts</u>	di <u>ts</u> ōv
nyun", to take .		•		$ny\bar{u}v$	ni y ĕ	niyōv
khyon ² , to eat .				$khy\bar{o}v$	khĕyĕ	khĕyōv
chyon", to drink		•		$chyar{o}v$	chĕyĕ	chĕyōv
bĕhun, to sit down			•	$byar{u}^{\dagger}h^{u}$	bīṭhª (pl. bēchhĕ)	bēchhy ōv
-dēshun, to see .				$dy \bar{u} t h^u$	dīțh (pl. dēchhě)	<i>dēchhyōv</i>
rōshun, to be angry			•	$rar{u}^{t}h^{u}$	rūṭhā (pl. rōchhĕ)	rōchħyōv
mashun, to forget			•	moțh ^u	müțh# (pl. machhĕ)	$machhy\bar{o}v$
$k^a \underline{ts} un$, to be wet			•	kotu	k* <u>ts</u> *	$k^a \underline{t} \underline{s} ar{o} v$
ho <u>ts</u> un, to decay		•		ħŏt*	h <u>ŏts</u> ⁵	hĭ <u>ts</u> ōv
dazun, to burn .				dod^{u}	düz [≅]	$daz \overline{c}v$
rōzun, to remain	•			$rar{u}d^u$	rūz ^u (pl. rōza)	rōzōv
haharun, to get a gi	l ma	rried		•••	hahür ^u or harüsh ^u (fem.)	haharyēyĕ (fem.) or harashyēyĕ

The following verbs belong to the third conjugation:—

		39	II.—Past Part.	III.—Past Part.	IV.—Past Part.
yunu, to come .	• 10 *		$ar{a}v$	ā yōv	āyāv
zyon ^u , to be born	-		$\bar{a}v$	≈ā yōv	zāyāv
nērun, to go forth		• (,,, •	$dr\bar{a}v$	$drar{a}yar{o}v$	$drar{a}yar{a}v$
atsun, to enter .			tsāv	<u>ts</u> āyōv	<u>tsāyā</u> v
prasun, to be born			pyāv	pyāyōv	pyāyāv
pyonu, to fall .			pyōv or pĕv	pĕyōv	pĕyāv
gatshun, to go, to be	come		gōv or gav	$gayar{o}v$	gayāv

The verb gatshun, to be proper, is regular, and belongs to the second conjugation, making its I. Past Participle $gotsh^u$.

In the above verbs of the third conjugation, the feminine of the 2nd Past Participle, can be obtained by changing the $\bar{o}v$ of the 3rd Past Participle to \check{e} . Thus, the feminine of $\bar{a}v$ is $\bar{a}y\check{e}$.

Passive.—The Passive voice is formed by conjugating the verb yun* with the ablative of the infinitive of the main verb. Thus, from wuchhun, to see, we have the ablative wuchhana, and wuchhana yun* means 'to be seen' or 'to be visible.' We may compare with this the Hindī dēkhnē-mē ānā, to come into seeing, to become visible.

As we have seen in the case of wuchhana yun", the passive often has a potential force. The ablative of the infinitive remains unchanged throughout, and the verb yun" alone changes in conjugation. Some verbs change their meaning in the passive. Thus, bōzana yun", the passive of bōzun, to hear, means 'to be understood' or 'to be seen.' If we wish to say 'it is being heard,' we must use a periphrasis, and say bōzanas andar yiwān chhuh, it comes into hearing, which is exactly equivalent to the Hindī sunnē-mē ātā hai. Intransitive verbs may also be used in the passive, and in this case they do not change their meaning. Thus, zōtān chhuh, he is shining, may also be represented by the passive zōtana yiwān chhuh.

A few passives are irregular. The most important is $dr\tilde{e}th \ yun^u$, to be seen, to be visible, the passive of $d\tilde{e}shun$, to see.

Causal Verbs.—Most verbs form a causal by adding anāw to the root. Thus, karun, to do, karanāwun, to cause to do, or to cause to be done; wuphun, to fly, wuphanāwun, to cause to fly, to fly (a kite, or the like). Double causals, such as are found in Hindi and other languages of India proper, do not seem to exist in Kāshmīrī.

If a root is intransitive and is of more than one syllable, $\bar{a}w$ is added instead of $an\bar{a}w$. Thus, $w\bar{o}barun$, to be finished, causal $w\bar{o}bar\bar{a}wun$, to finish. As in this example, the causal of an intransitive verb is simply transitive. This ending is used only with intransitive verbs. Transitive verbs always take the full $an\bar{a}w$. Thus, kamaw, to earn, $kamawan\bar{a}wun$, to cause to earn.

A few intransitive verbs of one syllable may optionally take aw instead of $an\bar{a}w$, as in $k\tilde{o}pun$, to tremble, causal $k\tilde{o}pawun$, or $k\tilde{o}pan\bar{a}wun$, to cause to tremble.

Many verbs of the third conjugation form the causal (or transitive) by adding "r or "rāw to the root. These two terminations are interchangeable. Before the a-mātrā, the usual vowel changes mentioned on pp. 262ff., and the consonantal changes parallel to those mentioned on pp. 266ff. take place. Examples are:—

kalun, to be dumb.

tēzun, to be sharp.

tatun, to be hot.

lōkun, to be small.

shŏdun, to be pure.

banun, to be.

kalarun or kalarāwun, to make dumb. tīzarun or tīzarāwun, to sharpen. tatsarun or tatsarāwun, to heat. lūkarun or lūkarāwun, to make small. shozarun or shozarāwun, to purify. bañarun or bañarāwun, to make.

A few verbs form their causals by simply lengthening the root vowel, and others are irregular in various ways. Thus:—

talun, to be displaced.
lagun, to be with.
marun, to die.
ratun, to seize.
tarun, to be crossed.
phatun, to be split.
khasun, to ascend.
wasun, to descend.
chyon", to drink.

dālun, to displace.
lāgun, to unite.
mārun, to kill, to strike.
rātun, to cause to be seized.
tārun, to cross.
phātawun, to split.
khārun, to raise.
wālun, to bring down.
chyāwun, to give to drink.

hyon", to take.

khyon", to eat.

pyon", to fall.

zyon", to be born.

dyun", to give.

nyun", to take.

yun", to come.

gatshun, to go.

wöthun, to rise.

hyāwun, to cause to take.

khyāwun, to give to eat.

pāwun, to fell.

zōv*run, to bring forth.

dāwun, to cause to give.

nyāwun, to cause to take.

anun, or ānun, to bring.

pakanāwun, to cause to go, but

gatshanāwun, to send.

tulun, to raise, but

wŏthanāwun, to cause (so and so) to rise.

Especially, besides the forms given above, we

Many of these may also be regular. also find the following:—

chyon", to drink. hyon", to take. khyon", to eat. dyun", to give. nyun", to take. chyāwanāwun, to give to drink.
hēwanāwun, to cause to take.
khyāwanāwun, to give to eat.
diwanāwun, to cause to give.
niwanāwun, to cause to take.

Compound Verbs.—As in India, nominal compounds, such as karun arz, to make a petition, are common, and need no remarks.

Compounds corresponding to the Intensives of Indian languages are formed by prefixing the conjunctive participle of the main verb to the subsidiary verb. The latter is conjugated throughout. Thus, wasith pyon*, to fall down (Hindī gir paṛnā); wasith pyōv, he fell down; tröwith tshunun (phēk dēnā), to throw away; gandith dyun* (bādh dēnā), to tie up.

Potential Compounds are formed by conjugating hěkun, to be able, with the conjunctive participle of the main verb, as in karith hěkun, to be able to do.

Inceptives are formed in two different ways. In the first, lagun, to begin, is conjugated with the ablative of the infinitive ending in i. Thus, kõpani lagun, to begin to tremble (kãpnē lagnā). The second method is to use the past tense of the verb hyon, to take, with the nominative of the infinitive of the main verb. The latter agrees in gender and number with the subject in the nominative. Thus, tami hyot lēkhun, he began to write; grūmphi hētin nēran, the buds began to come out; möfil (fem.) hēts n barkhāst sapazūñ, the assembly began to retire, literally, the assembly was taken to become dismissed. For further particulars, see the Kāshmīrī Manual.

The verbs gatshun, pazun, and lagun, are all used with various forms of the infinitive to signify to be necessary, to must. The infinitive may be used either impersonally, in the nominative singular masculine, or, personally, in agreement with the subject. In these verbs the future is used in the sense of the present. Thus:—

Impersonally:—

asě gatshi karun, to us it is proper to do, or

Personally:—

asi gatshaw karani, we must do.

As we have seen in the case of wuchhana yun", the passive often has a potential force. The ablative of the infinitive remains unchanged throughout, and the verb yun" alone changes in conjugation. Some verbs change their meaning in the passive. Thus, bōzana yun", the passive of bōzun, to hear, means 'to be understood' or 'to be seen.' If we wish to say 'it is being heard,' we must use a periphrasis, and say bōzanas andar yiwān chhuh, it comes into hearing, which is exactly equivalent to the Hindī sunnē-mē ātā hai. Intransitive verbs may also be used in the passive, and in this case they do not change their meaning. Thus, zōtān chhuh, he is shining, may also be represented by the passive zōtana yiwān chhuh.

A few passives are irregular. The most important is $dr\tilde{e}th \ yun^u$, to be seen, to be visible, the passive of $d\tilde{e}shun$, to see.

Causal Verbs.—Most verbs form a causal by adding anāw to the root. Thus, karun, to do, karanāwun, to cause to do, or to cause to be done; wuphun, to fly, wuphanāwun, to cause to fly, to fly (a kite, or the like). Double causals, such as are found in Hindī and other languages of India proper, do not seem to exist in Kāshmīrī.

If a root is intransitive and is of more than one syllable, $\bar{a}w$ is added instead of $an\bar{a}w$. Thus, $w\bar{o}barun$, to be finished, causal $w\bar{o}bar\bar{a}wun$, to finish. As in this example, the causal of an intransitive verb is simply transitive. This ending is used only with intransitive verbs. Transitive verbs always take the full $an\bar{a}w$. Thus, kamaw, to earn, $kamawan\bar{a}wun$, to cause to earn.

A few intransitive verbs of one syllable may optionally take aw instead of $an\bar{a}w$, as in $k\bar{\delta}pun$, to tremble, causal $k\bar{\delta}pawun$, or $k\bar{\delta}pan\bar{a}wun$, to cause to tremble.

Many verbs of the third conjugation form the causal (or transitive) by adding ^ar or ^arāw to the root. These two terminations are interchangeable. Before the α-mātrā, the usual vowel changes mentioned on pp. 262ff., and the consonantal changes parallel to those mentioned on pp. 266ff. take place. Examples are:—

kalun, to be dumb.

tēzun, to be sharp.

tatun, to be hot.

lōkun, to be small.

shŏdun, to be pure.

banun, to be.

 kal^arun or $kal^ar\bar{a}wun$, to make dumb. $t\bar{z}z^arun$ or $t\bar{z}z^ar\bar{a}wun$, to sharpen. $ta\underline{t}\underline{s}^arun$ or $ta\underline{t}\underline{s}^ar\bar{a}wun$, to heat. $l\bar{u}k^arun$ or $l\bar{u}k^ar\bar{a}wun$, to make small. $sh\check{o}z^arun$ or $sh\check{o}z^ar\bar{a}wun$, to purify. $ba\tilde{n}^erun$ or $ba\tilde{n}^er\bar{a}wun$, to make.

A few verbs form their causals by simply lengthening the root vowel, and others are irregular in various ways. Thus:—

dalun, to be displaced.
lagun, to be with.
marun, to die.
ratun, to seize.
tarun, to be crossed.
phatun, to be split.
khasun, to ascend.
wasun, to descend.
chyon, to drink.

dālun, to displace.
lāgun, to unite.
mārun, to kill, to strike.
rātun, to cause to be seized.
tārun, to cross.
phātawun, to split.
khārun, to raise.
wālun, to bring down.
chyāwun, to give to drink.

hyon", to take.

khyon", to eat.

pyon", to fall.

zyon", to be born.

dyun", to give.

nyun", to take.

yun", to come.

gatshun, to go.

wöthun, to rise.

hyāwun, to cause to take.

khyāwun, to give to eat.

pāwun, to fell.

zōv*run, to bring forth.

dāwun, to cause to give.

nyāwun, to cause to take.

anun, or ānun, to bring.

pakanāwun, to cause to go, but

gatshanāwun, to send.

tulun, to raise, but

wothanawun, to cause (so and so) to rise.

Especially, besides the forms given above, we

Many of these may also be regular. also find the following:—

chyon^u, to drink. hyon^u, to take. khyon^u, to eat. dyun^u, to give. nyun^u, to take. chyāwanāwun, to give to drink.
hēwanāwun, to cause to take.
khyāwanāwun, to give to eat.

diwanāwun, to cause to give. niwanāwun, to cause to take.

Compound Verbs.—As in India, nominal compounds, such as karun arz, to make a petition, are common, and need no remarks.

Compounds corresponding to the Intensives of Indian languages are formed by prefixing the conjunctive participle of the main verb to the subsidiary verb. The latter is conjugated throughout. Thus, wasith pyon*, to fall down (Hindī gir paṛnā); wasith pyōv, he fell down; tröwith tshunun (phēk dēnā), to throw away; gandith dyun* (bādh dēnā), to tie up.

Potential Compounds are formed by conjugating hěkun, to be able, with the conjunctive participle of the main verb, as in karith hěkun, to be able to do.

Inceptives are formed in two different ways. In the first, lagun, to begin, is conjugated with the ablative of the infinitive ending in i. Thus, $k\tilde{o}pani\ lagun$, to begin to tremble $(k\tilde{a}pn\tilde{e}\ lagn\tilde{a})$. The second method is to use the past tense of the verb $hyon^u$, to take, with the nominative of the infinitive of the main verb. The latter agrees in gender and number with the subject in the nominative. Thus, $tam^i\ hyot^u\ l\tilde{e}khun^u$, he began to write; $gr\tilde{u}mph^i\ h\tilde{e}tin\ n\tilde{e}ran^i$, the buds began to come out; $m\ddot{o}fil$ (fem.) $h\tilde{e}\underline{t}\underline{s}^{\bar{u}}n\ barkh\bar{a}st\ sapaz\ddot{u}\tilde{n}^{\bar{u}}$, the assembly began to retire, literally, the assembly was taken to become dismissed. For further particulars, see the $K\bar{a}shm\bar{i}r\bar{i}$ Manual.

The verbs gatshun, pazun, and lagun, are all used with various forms of the infinitive to signify to be necessary, to must. The infinitive may be used either impersonally, in the nominative singular masculine, or, personally, in agreement with the subject. In these verbs the future is used in the sense of the present. Thus:—

Impersonally:-

asě gatshi karun, to us it is proper to do, or

Personally:—

asi gatshaw karani, we must do.

Pazun and lagun are treated in an exactly similar manner. For further particulars reference should be made to the $K\bar{a}shm\bar{i}r\bar{i}$ Manual.

There are no other compound verbs in Káshmīrī. For instance, the form corresponding to the Hindī kiyā chāhnā, is simply karun yitshun, to wish to do.

Pronominal Suffixes.—Pronominal Suffixes are very freely used in all the Dardic languages. In the North-Western Indian languages Lahndā and Sindhī, they are attached both to nouns and verbs. In Kāshmīrī they are attached only to verbs. In other Dardic languages, the rules for their application have not yet been sufficiently studied, but in Kāshmīrī the rules have been carefully laid down by native grammarians, and we have full information.

These suffixes can be used for any case of a personal pronoun, and are as follows:—

* .	Case.					First person.		Second person.	Third person.
Sing.									
Nom						8		kh	none.
Acc. and Ag.		•	•		7		(th	n
Gen. and Dat.			•		}	m	i	y	s
Plur.					. ,			4	*
Nom		•	•		}			. (none.
All other cases	•	•	•	•	}	none		wa	kh

It will be observed that there are no suffixes for the nominative singular or plural of the third person or for any cases of the plural of the first person.

There is one important rule that is universally applied. While the use of the suffixes of the first and third persons (where they exist) is entirely optional, the use of the suffixes of the second person is compulsory. In other words, whenever the pronoun of the second person (expressed or understood) occurs in a sentence, the corresponding pronominal suffix must be attached to the verb. Thus, while 'I saw' (lit. he was seen by me) may be expressed either by më wuchh" or by (më) wuchhu-m, 'thou sawest' can be expressed only by (tsë) wuchhu-th. We cannot say tsë wuchh". Similarly, for the accusative, we have (tsë) kara-th, I shall make thee. We cannot say tsë kara, although we can say tath kara, I shall make that. Again, (tsë) wana-y, I shall say to thee, not tsë wana, and so on in both the singular and in the plural.

When these suffixes are added to a verbal form ending in a consonant, the vowel a is generally inserted, so as to aid the pronunciation. Thus, when m, the suffix of the first person singular accusative, is added to wuchhan, they will see, we get wuchhanam (wuchhan-a-m), they will see me. In the second person singular imperative, however, the vowel inserted is u, not a. Thus wuchh, see thou; wuchhum, see thou me; wuchhum, see thou him. The latter must be distinguished from the infinitive wuchhum, to see, which is the same in form. These two forms are often confused by beginners in the language.

Before these suffixes, $h\bar{a}-\check{e}$ $mu\underline{kh}taf\bar{\imath}$, or the 'imperceptible h' is dropped. Thus, chhuh, he is; chhu-m, he is to me, i.e. I have a masculine person or thing; dih, give thou; di-m, give thou to me. The final v and y of the second, third and fourth past participles is similarly dropped. Thus, $wuchhy\bar{o}v$, he was seen; $wuchhy\bar{o}-m$, he was seen by me, I saw him; $wuchhy\bar{e}y$, they were seen; $wuchhy\bar{e}-m$, they were seen by me, I saw them. Irregularly, $\bar{a}v+y$ becomes $\bar{o}y$, he came to thee.

Before these suffixes, the termination aw becomes \bar{o} , and iw becomes $y\bar{u}$. Thus, wuchhaw, we shall see; $wuchh\bar{o}$ -n, we shall see him; wuchhiw, you will see; $wuchhy\bar{u}$ -n, you will see him. Again, the third person singular of the future ends in i, as in wuchhi, he will see. Before the suffixes of the first and third persons this i becomes \check{e} . Thus, $wuchh\check{e}$ -m, he will see me; $wuchh\check{e}$ -kh, he will see them. Before suffixes of the second person the i is not changed, as in wuchhi-y, he will see thee; wuchhi-wa, he will see you.

We have just used the form wuchhi-y (not wuchhi-th) for 'he will see thee,' although, in the above table, y is the suffix of the dative, not of the accusative, and this leads us to another important general rule, viz. that accusative suffixes cannot be added to the third person. We must, in this case, employ the dative suffixes instead of those for the accusative. In the plural and in the first person singular, the accusative and dative suffixes are the same; but with the suffix of the second person singular we have wuchhi-y (not wuchhi-th), he will see thee; and with the suffix of the third person singular we have wuchhē-s (not wuchhē-n), he will see him.

When the agent case of the second person singular is added to a verb substantive used as an auxiliary verb, the suffix is y, not th. Thus, wuchhu-th, he was seen by thee, thou sawest him; but chhu-y (not chhu-th) $wuchh^u mot^u$, he has been seen by thee, thou hast seen him.

We have seen the suffixes of the nominative used in the conjugation of the pastparticipial tenses of intransitive verbs (2nd and 3rd conjugations), and those of the agent used in the conjugation of the same tenses of transitive verbs (1st conjugation), and further examples are unnecessary. Here it will suffice to say that more than one suffix can be employed at the same time, and that when the suffix kh, either of the nominative of the second person singular or of any case of the third person plural. precedes another pronominal suffix, it becomes h. Thus, wuchhu-n, seen-by-him; wuchh-n-akh, seen-by-him-thou; i.e. he saw thee; wuchhu-th, seen-by-thee, wuchh-th-as. seen-by-thee-I, i.e. thou sawest me; wuphyō-kh, thou-flewest; wuphyō-h-am, thouflewest-for-me; wuchhu-kh, seen-by-them; wuchh"-h-as, seen by them I, i.e. they saw me. There is no suffix of the nominative of the third person singular or plural, so that, strictly speaking, we cannot say, e.g., 'seen-by-thee-he'; but in practice the difficulty is got over by using n, the suffix of the accusative singular, for 'he,' and kh. the suffix of the accusative plural, for 'they.' Thus, wuchh -th-an, seen-by-thee-him (for 'he'), i.e. thou sawest him; wuchh"-th-akh, seen-by-thee-them (for 'they'), i.e. thou sawest them.

If the above rules are followed, the conjugation of the verb with suffixes presents no difficulty. I give as an example the third person masculine of the present tense of the verb substantive with the suffixes of the dative. In this the dative is commonly

used as a dative of possession, so that, e.g., 'there-is-to-me' is the usual locution for 'I have':—

	Six	GULAR.	Plural.		
	There is a masculine thing (chhuh).	There is a feminine thing (chhěh).	There are masculine things (chhih).	There are feminine things (chhěh).	
Sing.					
to me	chhu-m	chhĕ-m	chhi-m	chhĕ-m	
to thee	chhu-y	chhĕ-y	chhi-y	chhĕ-y	
to him, her, or it .	chhu-s	chhĕ-s	chhi-s	chhĕ-s	
Plur.					
to us	(ase chhuh)	(asĕ chhĕh)	(asĕ chhih)	(asĕ chhĕh)	
to you	chhu-wa	chhĕ-wa	chhi-wa	chhĕ-wa	
to them	chhu- kh	chhĕ-kh	chhi-kh	chhĕ-kh	

Adverbial Suffixes.—These have been partly described when dealing with the verb substantive (see p. 284). They are suffixes,—interrogative, negative, or emphatic,—which may be added to any verb. Before them the hā-i mukhtafi is dropped, but the other changes that occur before pronominal suffixes do not occur. The adverbial suffix is simply tacked on to the verbal form without causing any change.

The Interrogative suffixes are a, \bar{a} , and ay. The suffix ay is used only in the feminine and when a woman is addressed, as in *chhěs-ay karān*, am I (fem.) making? where a woman is addressing a woman. Had she been addressing a man, she would have said *chhěsa karān*.

The rules for the respective use of a and \bar{a} are somewhat complicated, and not very definite. Generally speaking, we may say that, subject to the rule regarding the employment of ay, \bar{a} must be used with the first person plural, and with the third person singular and plural. In the other persons either may be used, but, especially in the second person, a is the more polite. The present tense of the verb substantive with this suffix is given in full on p. 284. As an additional example, I here give the future of the verb wuchhun, to see, conjugated interrogatively. Owing to the presence of vowels and semi-vowels in the terminations, this tense exhibits a few irregularities:—

		Shall	I see, etc.	
	Singular.			Plural.
1.	$oldsymbol{w}uchhar{a}$, •	wuchhawa
2.	wuchhakha			wuchhiwa
3.	wuchhyā			wuchhana

A verb is rendered negative by adding na to the positive form. Thus, wuchha-na, I shall not see.

A verb is rendered emphatic by adding ti, which means 'even,' 'also.' Thus, wuchha-ti, I shall also see.

If āsana is added to a verb, it asks a question with doubt, as in wuchhān chhw-āsana, does he really see?

These suffixes may be combined. Thus $na + \bar{a}$ becomes $n\bar{a}$ and forms a negative interrogative, as in wuchha-nā, shall I not see? So $ti + \bar{a}$ becomes $ty\bar{a}$, and we get wuchha-tyā, shall I also see?

They may also follow pronominal suffixes, as in wuchh"-n-as-tyā, seen-by-him-I-alsoquery, i.e. did he see me also?

INDECLINABLES.—Adverbs.—Besides the regular adverbs, any adjective in the nominative singular masculine may be used as an adverb. Thus, bod", great, may also be used to mean 'greatly.' The word pothi or pothin is often added to another word to make it an adverb of manner, as in $\bar{a}s\bar{a}n-p\ddot{o}th^i$, easily ($\bar{a}s\bar{a}n$, easy); $paz^i-p\ddot{o}th^i$, truly (poz", true). It is often also added pleonastically to another adverb, as in kětha or kětha-pöthi, how?

The usual negative is na, most often suffixed to the verb of the sentence (see p. 314). With the simple imperative ma or mā is used, as in ma wuchh, do not see. With the polite imperative, we have mata or mata, as in mata wuchhta, please do not see. With the future and the polite imperative na is used.

 $M\bar{a}$ is also used to indicate a question asked with hesitation, as in $m\bar{a}$ chlub wuchhān, I wonder if he does really see it.

Postpositions.—The following is a list of the more usual postpositions:—

A. Governing the Dative: andar, in. $hond^u$ (sond^u), of (see p. 275).

kěth, in (a receptacle).

 $kyut^u$, for (adjectival, see p. 277). manz, in.

nish or $nish\check{e}$, near (=Hindī $p\bar{a}s$).

 $p\check{e}th$, on (= Hindī par). $s\bar{a}n$, together with.

 $s\bar{u}tin$ or $s\bar{u}ty$, with, together with.

B. Governing the Ablative:

 and^ara , from within, from among.

kini, by, owing to.

nishě, from near (= Hindī $p\bar{a}s-s\bar{e}$).

pata, after (=Hindī pīchhē).

 $p\check{e}tha$, from on (= Hindī $par-s\bar{e}$).

putshy, for.

 $s\bar{a}n$, with, together with.

 $s\overline{u}tin$ or $s\overline{u}ty$, with, by means of.

 $\frac{uk^u}{un^u}$, of (see p. 276).

It will be observed that san has the same meaning whichever case it governs; but nishě and sūtin or sūty have different meanings according to the case they govern.

In the case of animate masculine nouns, any postposition may govern the Dative. Thus, we may say guri (abl.) pětha or guris (dat.) pětha, from on the horse.

WOL. VIII, PART II.

used as a dative of possession, so that, e.g., 'there-is-to-me' is the usual locution for 'I have':—

	Sing	ULA B-	Plural.		
	There is a masculine thing (chhuh).	There is a feminine thing (chhěh).	There are masculine things (chhih).	There are feminine things (chhěh).	
to me to thee to him, her, or it	chhu-m chhu-y chhu-s	chhĕ-m chhĕ-y chhĕ-s	chhi-m chhi-y chhi-s	chhĕ-m chhĕ-y chhĕ-s	
Plur. to us to you to them	. (asĕ chhuh) . chhu-wa . chhu-kh	(asĕ chhĕh) chhĕ-wa chhĕ-kh	(asĕ chhih) chhi-wa chhi-kh	(asĕ chhĕh) chhĕ-wa chhĕ-kh	

Adverbial Suffixes.—These have been partly described when dealing with the verb substantive (see p. 284). They are suffixes,—interrogative, negative, or emphatic,—which may be added to any verb. Before them the hā-i mukhtafi is dropped, but the other changes that occur before pronominal suffixes do not occur. The adverbial suffix is simply tacked on to the verbal form without causing any change.

The Interrogative suffixes are a, \bar{a} , and ay. The suffix ay is used only in the feminine and when a woman is addressed, as in $chh\check{e}s$ -ay $kar\bar{a}n$, am I (fem.) making? where a woman is addressing a woman. Had she been addressing a man, she would have said $chh\check{e}sa$ $kar\bar{a}n$.

The rules for the respective use of a and \bar{a} are somewhat complicated, and not very definite. Generally speaking, we may say that, subject to the rule regarding the employment of ay, \bar{a} must be used with the first person plural, and with the third person singular and plural. In the other persons either may be used, but, especially in the second person, a is the more polite. The present tense of the verb substantive with this suffix is given in full on p. 284. As an additional example, I here give the future of the verb wuchhun, to see, conjugated interrogatively. Owing to the presence of vowels and semi-vowels in the terminations, this tense exhibits a few irregularities:—

		Shall T	see, etc.	
	Singular.	MILUIL I	500, 000.	Plural.
1.	wuchha		.	wuchhawa
2.	wuchhakha			wuchhiwa
3.	$wuchhyar{a}$.			wuchhana

A verb is rendered negative by adding na to the positive form. Thus, wuchha-na, I shall not see.

A verb is rendered emphatic by adding ti, which means 'even,' 'also.' Thus, wuchha-ti, I shall also see.

If āsana is added to a verb, it asks a question with doubt, as in wuchhān chhw-āsana, does he really see?

These suffixes may be combined. Thus $na + \bar{a}$ becomes $n\bar{a}$ and forms a negative interrogative, as in $wuchha-n\bar{a}$, shall I not see? So $ti + \bar{a}$ becomes $ty\bar{a}$, and we get $wuchha-ty\bar{a}$, shall I also see?

They may also follow pronominal suffixes, as in $wuchh^u$ -n-as- $ty\bar{a}$, seen-by-him-I-also-query, *i.e.* did he see me also?

INDECLINABLES.—Adverbs.—Besides the regular adverbs, any adjective in the nominative singular masculine may be used as an adverb. Thus, bod*, great, may also be used to mean 'greatly.' The word pöth* or pöthin is often added to another word to make it an adverb of manner, as in āsān-pöth*, easily (āsān, easy); paz*-pöth*, truly (poz**, true). It is often also added pleonastically to another adverb, as in kětha or kětha-pöth*, how?

The usual negative is na, most often suffixed to the verb of the sentence (see p. 314). With the simple imperative ma or $m\bar{a}$ is used, as in ma wuchh, do not see. With the polite imperative, we have mata or $mat\bar{a}$, as in mata wuchhta, please do not see. With the future and the polite imperative na is used.

 $M\bar{a}$ is also used to indicate a question asked with hesitation, as in $m\bar{a}$ chhuh wuchhān, I wonder if he does really see it.

Postpositions.—The following is a list of the more usual postpositions:—

A. Governing the Dative:

andar, in.

 $hond^u$ (sond^u), of (see p. 275).

kěth, in (a receptacle).

 $kyut^u$, for (adjectival, see p. 277).

manz, in.

nish or nishě, near (=Hindī pās).

 $p\check{e}th$, on (= Hindī par).

sān, together with.

 $s\overline{u}tin$ or $s\overline{u}ty$, with, together with.

B. Governing the Ablative:

 and^ara , from within, from among.

kini, by, owing to.

nishě, from near (= Hindī $p\bar{a}s-s\bar{e}$).

pata, after (=Hindī pīchhē).

 $p\check{e}tha$, from on (= Hindī $par-s\bar{e}$).

putshy, for.

sān, with, together with.

 $s\overline{u}tin$ or $s\overline{u}ty$, with, by means of.

 $\begin{cases} uk^u, \\ un^u, \end{cases}$ of (see p. 276).

It will be observed that $s\bar{a}n$ has the same meaning whichever case it governs; but $nish\check{e}$ and $s\bar{u}tin$ or $s\bar{u}ty$ have different meanings according to the case they govern.

In the case of animate masculine nouns, any postposition may govern the Dative. Thus, we may say guri (abl.) pětha or guris (dat.) pětha, from on the horse.

VOL. VIII, PART II.

Conjunctions.—The usual word for 'and' is ta, and for 'also' ti; but ti may be used to mean 'and' when connecting plural nouns. Biye also means 'also.' The commonest word for 'if' is ay, generally used as a suffix, as in chhiwa, ye are; chhiway, if Nay is 'if not.' ye are.

Interjections.—Kāshmīrīs are particular in the use of interjections, and care must be employed in using the right one in addressing the right person. For further

particulars, see the Kāshmīrī Manual.

ORDER OF WORDS.—This is more like that of Persian than like that of Indian languages. The verb very rarely comes at the end of a sentence, but usually occupies the same place as in English. For further particulars, see the $K\bar{a}shm\bar{v}r\bar{i}$ Manual.

The first specimen of standard Kāshmīrī is a version of the Parable of the Prodigal Son, which was prepared for the purposes of this Survey by Mahāmahōpādhyāya Paṇḍit Mukunda Rām Śāstrī, of Śrīnagar. It is in the dialect used by educated Hindus of Śrīnagar, and agrees with the foregoing grammatical sketch. It is written in the Śāradā and in the Nāgarī character. Note that, throughout, the verbs are nearly all in the remote past, as indicating events that occurred a long time ago.

The following specimen is a version of the Parable of the Prodigal Son taken from the last edition of the translation of the New Testament issued by the British and Foreign Bible Society. It is written in the Persian character, and is in the form of the language used by Musalmans. It contains numerous words borrowed from Persian or Arabic. In transliterating these, I have omitted the usual discritical marks that distinguish, e.g., sad from sin, and so on, as these letters are not pronounced as in Persian or Arabic, but are pronounced like the nearest corresponding Kāshmīrī letters, as explained on p. 259 ante.

The following points should also be noted:—

In the Persian character, mātrā-vowels are commonly omitted. These have been supplied in the transliteration. Also, the writing of full vowels is often not what we should expect. In such cases I have not transliterated literatim, but have written, in the transliteration, the vowels required by the system of spelling followed in this Survey.

Musalmāns often pronounce vowels as short that according to the foregoing grammatical sketch should be long. Such are akhah, for $akh\bar{a}h$, one; $k\tilde{a}h$, for $k\tilde{a}h$, anyone; $k\tilde{e}h$, for $k\tilde{e}h$, anything; kyah, for $ky\bar{a}h$, what?; and zah, for $z\bar{a}h$, ever. I have followed this in the transliteration, as it indicates a real variety of pronunciation.

Final surd consonants are not aspirated. Attention has been drawn to this on p. 267 ante. Thus, we have $b\ddot{o}g^arit$, for $b\ddot{o}g^arith$, having divided; karit, for karith, having done; $p\ddot{o}sh\bar{a}k$, for $p\ddot{o}sh\bar{a}kh$, a garment; and so on. Here again, in the transliteration, I follow the Persian character.

On p. 258 ante, it is stated that cha is often pronounced $ch\check{e}$, i.e. chya. In other words, ch is pronounced as if a y followed it. In the present specimen we have the reverse of this, chy being written ch, in $ch\delta n^u$, for $chy\delta n^u$, thy. As this spelling does not affect the pronunciation, I have written $chy\delta n^u$ in the transliteration, although there is no y written in the Persian character.

Unlike the Hindu version, the verbs in this version are nearly all in the Proximate, not in the Remote, Past.

FREE TRANSLATION OF THE FOREGOING.

The portion of the poem immediately preceding this extract describes how Siva, at Pārvatī's request, determined to have a house built. He employed the demigods Dhanishtha Kumāra and Viśvakarman to construct it. They wandered about the universe, seeking for a suitable site, and at length were struck by the beauty of the island of Lankā. They asked the god Brahmā how so exquisite a spot came into existence, and the extract is his reply.

According to Hindū mythology, Garuḍa was a famous bird,—a kind of roc,—and was the son of Kaśyapa. In the first book of the Sanskrit Mahābhārata (Il. 1352ff.) we are told how Garuḍa, while quite young, is instructed by his father to eat the fighting elephant and tortoise in order to gain superhuman strength. As described in this extract, he catches them and breaks a branch of a tree with their weight; but, in the Mahābhārata, he disposes of the latter by dropping it on to a distant mountain, and not into the sea. There is no mention of Lankā, such as we find in the Kāshmīrī poem. The Pārijāta was one of the five trees of Paradise. It is not mentioned in connexion with this story in the Mahābhārata, where only a great Banyan tree is referred to. According to the Sanskrit Rāmāyaṇa (VII, iii), Viśvakarman built Lankā not for Siva, but for the Rākshasas.

Brahmā said to them, 'Garuda had only just been born when he was seized by hunger. He arose and went to his father Kasyapa and said, "speedily give me somewhat to eat." His father replied, "eat thou the mad elephant and the tortoise. They are three hundred kos high, and twice as much long. (600) They have begun to fight a mighty battle." There, where they were, did Garuda see them. Like the wind he fell upon them unawares. He took them up in his talons and flew into the air; and thither went he with them where grew the Pārijāta tree. Behold what mighty zeal that infant did display! He carried them to a fork in the tree, and, as he put down his foot, under their weight one of the boughs broke off. He caught it in his beak, behold what virtues he possessed! If he had not caught it, it would have fallen down to the earth below. (695) He carried it to the water and into it he flung the bough. At its fall the earth began to tremble, the sky, and even the Milky Way. The rootend of the bough sank down and down as far as Hell, and the matted mass of the twigs of the smaller branches thus became an island.' When (therefore) Siva showed his ardent desire, (there) they built the house; and, because its foundation was a bough (lang), its name will be called 'Lanka.'

The fourth specimen is an extract from the $Y\bar{u}suf$ $Zulaikh\bar{a}$ of Mahmud Gāmī. It is a good example of the Musalmān style of Kāshmīrī. It will be observed that there is a tendency to shorten final vowels as in kah for $k\bar{a}h$, eleven (verse 82), and kyah for $ky\bar{a}h$, what (85). Also final surd consonants are not aspirated, as in $sh\check{o}ngit$ for $sh\check{o}ngith$, asleep (79); wanak for wanakh, thou shalt say (83), and many others.

The transliteration from the Persian character is strict, and does not show the correct Kāshmīrī pronunciation. Thus, خراب , a dream, is transliterated khwāb (80, 81), although the Kāshmīrī pronunciation is khāb.

FREE TRANSLATION OF THE FOREGOING.

(After Rebecca's death) how dear did (Joseph) become to Jacob! Ever did he yearn towards him more and more. Over the arch of his eyebrows would he bend, and kiss (the face that was like unto) the flower of jessamine.

Joseph was (once) sleeping by his father—his hands and feet all rosy with henna—and in his dream he laughed, as the sheen of the moon (quivereth) in the water. When he awoke his father asked him what his dream had been. '(I dreamt) that the moon, the sun, and the eleven stars assembled themselves together and did obeisance to me.' 'Silence! Joseph, nor tell thou this unto thy brethren. Otherwise, wilt thou be torn from me.'

No sooner did the step-brothers hear this dream than they were filled with chagrin, and were beyond measure distraught. 'What shall we do unto him? how shall we kill him? No longer doth Jacob show favour unto us.'

¹ This half-line is Arabic. The whole passage is an adaptation of the Qur'an, Sura, xii.

At morn came they together unto their father, and bowed themselves before him with words of reverence. 'Father,' said they, 'Joseph doth lament. Therefore on the morrow send thou him with us. Fair of form is he, and of pleasing aspect. With us on an expedition will we take him on the morrow's morn.'

KASHŢAWĀŖĪ.

The valley of Kashṭawāṛ, vulgo Kishtwar, lies on the upper Chināb, to the southst of the valley of Kashmīr. Immediately to its south lies Bhadrawāh, the iguage of which is a form of Western Pahārī (see Volume IX, Part iv, pp. 881ff.). its west lies the hill country separating Jammu from Kashmīr, in which various oken forms of Kāshmīrī are spoken gradually merging into the Chibhālī and inchhī forms of Lahndā (vide pp. 503ff. of Part i of this volume). To the east and orth-east lies the Zanskar, the language of which is a form of Western Tibetan. The nguage of Kashṭawāṛ is known as Kashṭawārī, and in the Census of 1911 was shown spoken by 7,464 people. It is a dialect of Kāshmīrī but is much corrupted by the ahārī and Lahndā spoken to its south and south-east. On the other hand it retains ie or two Dardie forms (such as the word thu, he is) which have disappeared from andard Kāshmīrī. Moreover, in old Kāshmīrī poetry we occasionally find forms, ch as a present participle in an, instead of ān, that no longer exist in Standard āshmīrī, but which have survived in Kashṭawārī.

The following account of Kashṭawāṛī is partly based on Specimens received from the Kashmīr Darbār, and partly on Specimens kindly given to me by the Rev. T. rahame Bailey. The latter Specimens have also been printed in his work entitled the Languages of the Northern Himalayas, published by the Royal Asiatic Society in 908. As given here, I have followed the originals given to me rather than this printed ersion, which differs in a few unimportant particulars. To the printed version Mr. ailey has prefixed a short grammatical sketch which I have also utilized. The Specimens are thus three in number, viz. two (Nos. I and III) provided by Mr. Bailey, and Io. II provided by the Kashmīr Darbār. The List of Words and Sentences printed on p. 488ff. is based partly on a list provided by Mr. Bailey and partly on one furnished y the Darbār.

Specimens Nos. I and II are versions of the Parable of the Prodigal Son. Mr. Sailey's (No. I) is recorded phonetically in the Roman character. He has recorded ach word as he heard it, and not according to the supposed orthodox spelling. Specinen No. II was supplied in the Kashṭawāṛī character, with a transliteration.

The Kashṭawāṛī character is a variety of the Ṭākrī character used in the hills of he Northern Panjāb. As elsewhere, its vowel system is most incomplete. There are ew signs for the medial vowels, and as a rule long medial vowels and sometimes even hort medial vowels are represented by the initial forms. It is as if we were, in writing he Nāgarī character, to represent the word $b\bar{a}t$ by \bar{a} and instead of \bar{a} and. There re, it is true, forms for medial \bar{a} , medial \bar{a} , medial u, and medial \bar{o} , but these are used almost at random, and, particularly, the sign for medial \bar{o} can be used for almost any rowel. Moreover, the initial forms are often used instead of them. Accordingly, in ransliterating the second specimen, I indicate the use of an initial vowel form by an apostrophe, as if, in the Nāgarī character, I were to transliterate \bar{a} and \bar{a} and \bar{a} and \bar{a} and \bar{a} . The transliteration is first made absolutely literatim, and under each group of etters I put a second line showing the particular Kashṭawārī word which the group is ntended to represent. In this I have been aided by the transliteration provided by the

Kashmir Darbar. In order to assist the student the original in the Kashtawāri character, and the corresponding transliteration and translation are printed on pages facing each other, and agree line for line. I have thus been able, in the grammatical sketch which follows, to quote the particular line in which each word quoted from the second specimen occurs,—thus, II, 3, i.e. in the third line of the second specimen. This could not be done for the first and third specimens, which are merely indicated by 'I' and 'III,' respectively. Arabic numbers, not preceded by a Roman II, indicate the entries in the List of Words and Sentences.

The following table shows the Kashṭawārī alphabet. The letters are taken from Specimen II or from the Kashmīr Darbār List of Words. No example was found in these of the letter jha, of which I am therefore unable to give the form.

In writing Kashṭawāṛī, it will be observed that the consonantal spelling is also very capricious. Special difficulties seem to have been experienced in writing the fricatives \underline{ts} and \underline{tsh} . They are usually represented by \underline{ch} and \underline{chh} , as in Kāshmīrī, but sometimes they are written s or even z. Thus, we have $\underline{sa'al\tilde{o}}$ written for $\underline{tsh\tilde{a}wali}$ (II, 69), a goat; \underline{gasa} written for \underline{gatsha} , I will go (II, 26); and $\underline{za'a}$, for $\underline{ts\tilde{e}}$, by thee (II, 74).

PRONUNCIATION.—Vowels in Kashṭawārī are sometimes shortened. Thus, while the list of words and the second specimen always have $m\bar{a}hn^*$ for 'man,' the first and third have $mahn^*$. So the Kāshmīrī $d\bar{\imath}sh$, a country, becomes dish in the first specimen.

Although, as we shall see, epenthesis is not carried out with the strictness observable in Kāshmīrī, we sometimes find vowels, especially a, liable to change under the influence of neighbouring vowels, even where they would not change in Kāshmīrī. Thus, while II, 79, has samazun, to become, the first specimen in the corresponding passage has samuzun, in which the second a has become u under the influence of the u in the next syllable. Similarly mulku-sun, for mulka-sun, of the country (III). Again in one place in I lag^u or log^a has actually become $l\bar{o}g\bar{u}$, in zabun $l\bar{o}g\bar{u}$, he began to say (I will eat husks), although elsewhere in the same word in the same specimen the a is preserved.

Again the Kāshmīrī sandi (abl. of sond, of) is sini in Kashṭawārī, in which the α has become i under the influence of the following i.

In Kāshmīrī i and ĕ are frequently interchanged. So also in the first specimen we have both isini khātara (thou causedst the fatted calf to be killed) for the sake of this one's sake; and tisinĕ khātira (he killed the fatted calf) for his sake. In khātira and khātara we also see an optional interchange of unaccented a and i, and the same appears in kyāzi or kyāza, why? (94; cf. II, 49, 80). Even an accented i, following y, may become a. Thus we have both yĕth and yath corresponding to the Kāshmīrī yith, for this. This was evidently first an instance of the change of i to ĕ, so that yith became yĕth. In Kāshmīrī we know that yĕth is really yath (see p. 259), so that the change of yĕth to yath in Kashṭawārī is easy. Another example of the change of ĕ to a is hōshas, (he came) to sense, corresponding to the Kāshmīrī hōshĕs. In fact the Kāshmīrī ĕ appears under several forms. It follows Kāshmīrī in warhĕn (for warhyan), for so many years (II, 66), but in the corresponding passage in I it becomes iĕn, in warhiĕn. We shall see numerous examples in datives plural of the 2nd and 3rd declension which in Kāshmīrī end in ĕn. Here we have, ad libitum, in, ĕn, or iĕn.

The vowel ŏ becomes a in wathi, having arisen, of the first specimen, while in II, 26, we have (as in Kāshmīrī) wŏthi (Kāshmīrī wŏthith).

In Kāshmīrī whenever a word begins with \check{t} or \check{e} , a y is prefixed. Thus, the Arabic word $ins\bar{a}f$, justice, becomes $yins\bar{a}f$ in Kāshmīrī. We also often hear a medial \check{t} or \check{e} pronounced as if a faint y precedes it. Thus, $k\tilde{e}ish\bar{a}h$, something, is often heard as $k^y\tilde{e}ish\bar{a}h$, and $kh\check{e}ma$, I shall eat, is often heard as $kh^y\check{e}ma$. This prothesis of y before \check{t} or \check{e} is still more common in Kashṭawārī. In the second specimen, according to the usual Kāshmīrī fashion, it is not indicated in writing; but in the first and third

Darci good exa for an or Atte Dardie the List of Words and Sentences in which each word has been recorded he heard it, it is common, though by no means universal.

ence 231 we have tyisun for tisun, his, and tyĕsiñi for tisiñi (fem. ich latter ĕ has also been substituted for i. So we have in the first r dim, give to me; pananyis (for pananis) zamīnas-manz, (sent him). Again, while we have tyisun baḍḍ shuṛ, his elder son, we also have a nyit, his father having come outside. Similarly there is no proser cases, such as tisinĕ-khātira, for his sake. So we have both tis and ĕs, to him. It is unnecessary to give further examples. Suffice it to or ĕ as often as not pronounced yi or yĕ. With this we may connect to iĕn noted above. The iĕn is really little more than a variant spelling

nīrī, words often end in i-mātrā and u-mātrā, but these are used most

* itrā does not seem to occur, i-mātrā being everywhere used instead.

has given me some interesting information regarding the method in recording these vowels in Specimens I and III and in the List of i, the fact that one may hear, say, rachhmutu and $ju\bar{a}nmutu$ does not ne in writing $m\bar{u}dmutu$ if the word is usually pronounced $m\bar{u}dmut$, the other letters, one does not seem justified in attempting (at any rate knowledge of the dialect) to aim at uniformity of spelling where there of speech. . . . In these specimens the vowels written above the ne with almost a jerk, usually following a very long vowel. Thus, take \bar{o} is very long and the "comes with a slight jerk. The same applies the vowel. Thus, in shup the "sounds almost as if the speaker could it, as if it were a necessary sequence of the r. It thus differs from

trā first, we may quote the following examples of its use:— $ghur^i$, a mare (140); $harn^i$, a she-deer (154); $h\bar{o}n^i$, dogs (148); $h\bar{o}\tilde{n}^i$, a bitch (147); $mi\bar{a}n^i$ (where we should expect $mi\bar{a}nis$) (225); $panan^i d\bar{o}lat$, his own i, bulls (144); $shur^i$, sons (223, and II, 1); $\underline{t}sh\bar{e}l^i$, a she-goat (151); 2).

nātrā sometimes becomes an ordinary i, as in $mh\bar{a}li$, fathers (106); 4); $\bar{a}isi$, they were (eating) (I); and is sometimes even lengthened to \bar{i} , (I; cf. $shur^i$ of II, 1); $hund\bar{i}$, kisses (I).

ā we may quote $badd^u$ (231, I, III) or bad^u (II, 13, 53), great; $bh\bar{a}y^u$, 3, 80); $ghur^u$, a horse (138); lag^u , began, etc. (II, 14, 16); $m\bar{a}hn^u$, a $ih\bar{a}l^u$, the father (came outside) (I; but $mh\bar{a}l$, 233, and $mh\bar{a}lu$, 47, 101); 77, but $mi\bar{a}un$ in I); $rish^u$, a bull (142); $shur^u$, a son (I); $ts\bar{a}un^u$, thy out $ts\bar{a}un$, I); $tsy\bar{o}r^u$, a goat (150).

hal u-mātrā is often dropped, as in the following, some of which also have the u-mātrā:—miāun mhāl, my father (233); myul, he was got (I); ne (III).

Or it may become a full u, as in $m\bar{a}hnu$, a man (I19, but $mahn^u$, II, 56); $mh\bar{a}l^u$ or $mh\bar{a}lu$, a father (47, 101; but $mh\bar{a}l$, 233); $bh\bar{a}yu$, a brother (49; but $bh\bar{a}y^u$, II, 58, 80); rathu, he remained (I); $zulmmi\bar{a}ru$, an oppressor (III).

Or it may be lengthened to \bar{u} . This is always the case in the word $\bar{a}s\bar{u}$, he was, whereas thu, he is, is always written with the u short. Again we have zabun $l\bar{o}g\bar{u}$, he began to say (I will eat husks), whereas in II, 14, 16, we have lagu, and in I, and ar gatshun lag^u na, he did not begin to go inside.

Or it may become \bar{o} or even wa, as in $dand^u$ or $dand\bar{o}$, the back (43), $wa\underline{ts}^u$, or $wa\underline{ts}wa$, a calf (I); $z\check{e}ou$ or $zi\bar{o}$, the tongue (41).

The forms taken by the perfect participle are very instructive. The full forms of the words quoted below are $m\bar{u}d^*mut^*$, $myul^*mut^*$, $rachh^*mut^*$, $r\bar{u}u^*mut^*$, and $samz^*mut^*$, but the forms actually occurring are $m\bar{u}dmut$ (I, and II, S1), $m\bar{u}d^*mut$ (II, 49), dead; myulmut, got (II, S3); rachhmutu and $rachhmut^*$, kept (i.e. fatted) (I); $r\bar{u}u^*mut$, lost (II, S2); and samzumut, become (III).

Epenthesis of vowels occurs in Kashṭawārī as in Kāshmīrī, but, judging from the specimens, its occurrence is here most capricious. We shall take in order the chief epenthetic vowels of Kāshmīrī and observe what happens under similar circumstances in Kashṭawārī.

In Kāshmīrī when a is followed by i-mātrā, and in certain cases (e.g. in the singdat. of the third declension) by i, the a is not changed, but the i-mātrā or i is sounded immediately after the a as well as in its proper place. Thus, bad^i , great (nom. plur.), is pronounced ba^id^i (see p. 263). Similarly karis, to a bracelet, is pronounced ka^iris . We find traces of this in Kashṭawārī, where the dative singular of akh, one, is written aikis in the first specimen, but akis in II, 15. Elsewhere, even in I the a remains unchanged, as in pananis, to his own, or (II, 60) baj^i , great (nom. sing. fem.).

In Kāshmīrī, when a is followed by u-mātrā it becomes o (p. 263), as kor^* (for kar^*), he was made. The o remains even when the u-mātrā becomes u owing to the addition of a suffix, as in korun, he was made by him. In Kashṭawāṛī, the same change sometimes occurs as in korun (II, 9). At other times the a becomes o, as in korun (I, 'when he had wasted everything'), and at other times it becomes o, as in zabun $log\bar{u}$, he began to say (I will fill my belly) (I), in which the u-mātrā has been changed to o. Most commonly, however, in I, III, and the List of Words, the a is unchanged as in karun (III, and 225); marun lagus, I began to die (I); rathu (for $rath^*$), he remained (near a person of that place) (I); zabun, he said (I).

We have already seen that *i*-mātrā is used where Kāshmīrī has ii-mātrā, so that the change of a when followed by the latter does not concern us here.

In Kāshmīrī, when \bar{a} is followed by *i*-mātrā or by *i*, it becomes \ddot{o} , as in $m\ddot{o}l^i$, fathers (see p. 263), $m\ddot{o}riw$, strike ye (see p. 305). In the specimens, there is only one instance of a change resembling this, in which \ddot{a} , followed by *i*, becomes \bar{o} , not \ddot{o} . It is the word $th\ddot{o}yi\ddot{u}$, place ye (227), corresponding to the Kāshmīrī $th\ddot{o}viw$.

In other cases the \bar{a} remains unchanged, as in $\bar{a}sias$ (I) or $\bar{a}sis$ (II, 1), they were to him (Kāshmīrī $\bar{o}sis$); $h\bar{a}kim$ (III), a ruler; $kh\bar{a}tira$, for the sake of (I); $\underline{t}s\bar{a}nis$ $mh\bar{a}l^i$ -sin, of thy father (Kāshmīrī $chy\bar{o}nis$ $m\bar{o}l^i$ -sandis) (223); $w\bar{a}navc\bar{a}lis$, to a shopkeeper (241).

In Kāshmīrī, when \bar{a} is followed by u-mātrā or by u it becomes δ , pronounced something like the a in 'all' (see pp. 263-4). We see traces of this in $s\bar{\delta}r\bar{u}\bar{\iota}$, all (I, but $s\bar{a}r\bar{u}\bar{\iota}$ in II, 8) corresponding to the Kāshmīrī $s\delta ruy$. Another attempt to represent this sound is shown in $\bar{a}us\bar{u}$ (Kāshmīrī δs^u), (the elder son) was (in the field) (I), when II, 53, has $\bar{a}s\bar{u}$; and in $m\bar{a}urum$ (Kāshmīrī $m\delta rum$), I struck (185). As seen above, however, the \bar{a} often remains unchanged, and so also in $bh\bar{a}y^u$ (II, 58, 80) or $bh\bar{\delta}\bar{\iota}$ (I; 49), a brother; $m\bar{a}run$, (thy father) killed (the fatted calf) (I); $uj\bar{a}run$ (I), $ur\bar{a}wun$ (II, 11), or $ud\bar{a}wun$ (II, 74), he wasted.

In Kāshmīrī, when i is followed by u-mātrā or by u, it becomes yu, as in $dyut^u$ (for dit^u), given (see p. 263). The same usually occurs in Kashṭawārī, as in dyutun, he gave (answer) (I); dyututh, thou gavest (II, 70; but dyituth in I); myul (for mil^u), he was found (I). As in the dyituth just mentioned, I also has phirum, I (never) turned (thy word), although, as we have seen, it has dyutum.

In Kāshmīrī, when \bar{e} is followed by *i*-mātrā it becomes \bar{i} , and when it is followed by *u*-mātrā it becomes $y\bar{u}$ (see p. 263). We have in Kashṭawārī one example of what happens to \bar{e} in such circumstance in the base $\underline{tsh\bar{e}r}$, a goat. Its nominative singular is $\underline{tshy\bar{o}r}^u$ (150), and its nominative plural is $\underline{tsh\bar{e}r}^i$, not $\underline{tshy\bar{u}r}^u$ and $\underline{tsh\bar{v}r}^i$.

In Kāshmīrī when \bar{o} is followed by *i*-mātrā or by *u*-mātrā or by *u*, it becomes \bar{u} , as in $\hbar \bar{u} n^u$, plural $\hbar \bar{u} n^i$, from the base $\hbar \bar{o} n$ -, a dog (see p. 263). In Kashṭawārī, \bar{o} in such circumstances remains unchanged. Thus, $\hbar \bar{o} n^u$, a dog (146), pl. $\hbar \bar{o} n^i$ (148); $\hbar \bar{o} \hat{n}^i$, a bitch (147); $\hbar \bar{o} r^i$, a daughter (110); $m \bar{e} t \bar{s} \bar{o} t u m$, I struck (185). We have, however, $k r \bar{u} d \hbar \bar{i}$, angry (I and III), for an original $k r \bar{o} d \hbar \bar{i}$.

From the above it will be seen that while epenthetic vowel changes do occur in Kashṭawāṛī they are subject to no fixed law.

Consonants.—In Kāshmīrī a final surd consonant is aspirated (see p. 267). This rarely occurs in Kashṭawāṛī. Thus in I we have dōlat (not dōlath), wealth; lāik (not lāikh), worthy; pŏshāk (not pŏshākh), a garment; ankhuch (not ankhuchh), a ring, and so on. There are, however, a few examples of this aspiration, and we may quote hĕtsakh, they began (to make merry); dyituth, thou gavest; mārāwuth, thou causedst to be killed; and thukh, or thuk, thou art.

Dardic languages, as a rule, do not possess the sonant aspirates gh, jh, dh, dh, or bh. They are, however, common in Kashṭawārī and are evidently borrowed from Western Pahārī. Thus, we have gh in ghar, a house (67), and $ghur^u$, a horse (68); dh in $kr\bar{u}dh\bar{\iota}$, angry (I and III), and $dh\bar{a}m$, a feast (II, 60); and bh in $bh\bar{a}y^u$, a brother (49); bhain, a sister (50), and $bh\bar{o}chhi$, of hunger (II, 25). We even have initial or medial m becoming mh in $mh\bar{a}l^u$, a father (Kāshmīrī mol^u) (passim); mhast, much (224); samhuzun, to become (II, 14), but samazi (II, 62); and timhau for timau, among them (II, 5).

Dardic languages show a tendency to hardening soft consonants. We have a good example of this in the word ankhuch (I) or ankuchī (II, 46), a ring, which is for an original angujī.

Attention must be drawn to the lax way in which, as in the case of other Dardic languages, the distinction between cerebrals and dentals is observed. For

instance we have badāwun instead of badāwun (III); thukrien dōsan manz, in a few days, in I, but thukrin in II, 6. In II, 26, we have wothi, having arisen, but wothi in II, 33; and in II, 67, zāt, ever, but in II, 69, zāt. In II, 37, the word for 'embrace' is written nala maṭa'u, but pronounced nālamut*.

Kashṭawāṛī possesses a cerebral p, which does not exist in Kāshmīrī. It is probably borrowed from Lahndā or from Western Pahāṛī. It is interchangeable with d, as in $ur\bar{a}wun$ (II, 11) or $ud\bar{a}wun$ (II, 74), he squandered. A few examples, out of many, are $shup^u$, a son (55); $k\bar{o}p^i$, a daughter (56); $ghup^u$, a horse (68); $d\bar{o}pun^u$, to run (85); $ni\bar{o}p^u$, near (87). The interchange of dentals and cerebrals is again illustrated by $tshy\bar{o}p^u$, a he-goat (150), with a cerebral p, but $tsh\bar{e}l^i$, a she-goat (151), with a dental l.

The dental r, as in other Dardic languages, is sometimes elided. Thus we have $br\bar{o}nth$ or $b\bar{o}nth$, before (90); and nyit, having emerged (I), corresponding to the Kāshmīrī $n\bar{i}rith$.

There is one instance of the interchange of w and m in $man\bar{a}mun$, he remonstrated with him (II, 64), for $man\bar{a}wun$.

The epenthetic changes of consonants that are so prominent a feature in Kāshmīrī also occur occasionally in Kashṭawārī. Thus (cf. p. 267), we have the change of t to ch in tsachien, he tore them (fem.) (III), from tsatun, to tear. In Kāshmīrī d becomes j before y or e but not before u-mātrā (see p. 267). Thus, bod^{u} , great, has a feminine $b\bar{u}d^{u}$, with a dative singular baje. In Kashṭawārī, this change is extended by analogy to the feminine nominative, so that we have baj^{e} (II, 60, 75), corresponding to the Kāshmīrī $b\bar{u}d^{u}$.

In Kāshmīrī t under certain circumstances becomes \underline{ts} , and n becomes \tilde{n} (p. 267), so, we have in Kashṭawārī $kyut\bar{a}$ (222) (Kāshmīrī $kyut^*$), how much, feminine $ki\underline{ts}\bar{a}$ (221) (Kāshmīrī $ki\underline{ts}^{\bar{u}}$). So $panun^*$, own, fem. $pana\hat{n}^i$; $\underline{ts}\bar{a}un^*$, thy, fem. $\underline{ts}\bar{a}\hat{n}^i$.

In Kāshmīrī h is liable to become sh, or, more accurately, is liable to revert to an original sh. Thus the feminine of $hyuh^*$, like, is $hish^u$. In Kashtawārī the sh appears also in the masculine, as in $m\check{e}$ pananien mazūran-hish banāyim, make me like thine own servants (I).

DECLENSION .- Nouns .-

Corresponding to the Kashmiri first declension, we have:-

	Sing.	Plur.
Nom.	ghar	ghar.
Dat.	gharas	gharan.
Ag.	gharan	gharau.
Abl.	ghara S	grown co to.

Ropai, a rupee, makes its plur. nom. ropiē.

Examples of this declension are:-

Sing. nom.-acc.—baḍḍ kāl pĕōu, a great famine fell (I). yi rŏpai dyi tis, give this rupee to him (234).

panun yad bhara, I will fill my own belly (I, II, 20). Note that yad is here masculine. In Kāshmīrī it is feminine.

dand, dand, or dando, the back (43). Judging from the two latter forms this word is also of the second declension. The dative singular dandas, given below, belongs to the first declension.

Dat.-acc.—pananis dilas-s \tilde{a} thi zabun, he said with (i.e. in) his heart (I).

těsinyis dandas thōyiū zīn, put ye the saddle to (i.e. on) his back (227).

tath dishas-manz kāl pĕou, a famine fell in that land (I).

gharas-manz thu safēd ghuṛi-sun zīn, in the house is the saddle of the white horse (226, so 223, 233).

gharas-niōr āō, he came near the house (I, so II, 54).

hathas ankhuch lagyus, put ye a ring on his hand (I).

su hōshas-manz $\bar{a}\bar{o}$, he came into sense (I).

zāt tsāni hukmas adal badal na hanthus, I never walked contrary to thy command (II, 68).

tini pananyis zamīnas manz sūr tsunāwani sōzun, he sent him into his land to feed swine (I).

In jawāb-manz (II, 65), for jawābas-manz, in answer, the termination of the dative has been omitted.

su thu dhāri-hinis mŏkhas-pān māl tsunāwan, he is grazing cattle on the top of the hill (229).

 $tath\ mulkas$ -manz $badu\ dr\bar{a}g\ p\check{e}\bar{o}u,$ in that country a great famine fell (II, 12).

tin karun yath mulkas zamīnas kachchh, he measured the land for (i.e. of) this country (III).

aikis naukaras sad dyit, having called a servant (I).

Rām Chandar Sāhabas-sāthi mhast minnat zārī karin, he made much entreaty and lamentation with (i.e. to) Rām Chandar Sāhib (III).

 $tath\ j\bar{a}\bar{e}$ -hinis aikis shakhsas-labi rathu. he stayed with a person of that country (I).

Ag.—āsēāu Nawāb Sāhaban Tahsīldār rachhmutu, he was appointed Tahsīldar by the Nawāb Sāhib (III).

Abl.—khuha-manza $khu\bar{a}l$ $p\bar{a}\hat{n}$, draw water from the well (237).

Plur. nom.-acc.— lūk sārī tyĕs-pān krūdhī samazēī, all the people became angry with him (III).

miāni mhāli-sinyi kityā mazūr thī, how many labourers there are of my father (1).

tathun mõl thu dhāī rõpiē, the price of that is two rupees and a half (232).

tyis hẽ tsa tima rŏpiē, take those rupees from him (235).

tini sūr tsunāwani sōzun, he sent him to feed swine (I).

badien mahnien zamīn ziyāda āsiāi, there were more lands to great men (III).

Dat.-acc. - thukriĕn dōsan-manz, in a few days (I).

tisin hathan ankuchī, biya khōran paḍiōru, a ring for his hand, and a shoe for his feet (II, 46).

panun māl māra kāman-manz urāwun, he wasted his substance in evil deeds (II, 10).

māra kāran-pata māl ujārun, he wasted his substance (following) after evil deeds (I).

mě pananiěn mazūran-hish banāyim, make me as one of thy servants (I).

miānis mhālis-nishē wāra mazūran wāra manjī thī, near my father to many servants there is much bread (II, 23).

panen mazūran-manz, amongst thine own servants (II, 32).

mhālin pananien naukaran zabun, the father said to his servants (I).

kityān warhiĕn (nom. sg. warhy, 1st decl.) tsāñ khĕzmat karyim, for how many years did I do thy service (I).

yītin warhen, for so many years (II, 66).

 $\tilde{a}s\check{e}\tilde{a}u-rachhmutu\ p\tilde{a}\underline{t}\underline{s}an\ warhi\check{e}n$, he was appointed for five years (III).

boh pananiën yāran-sāthi khushī karaha, I might have done rejoicing with my own friends (I).

paněn yāran-manz, among my own friends (II, 71).

Ag.—tyĕs-pān lūkau zamīndārau khuālikh bāsalāt, a complaint was raised against him by the people generally and by farmers (III).

Corresponding to the Kāshmīrī second declension, we have the following. It must be remembered that a final " is often dropped, and also is often written u or even \bar{o} or ua, and that a final ' is often written i or $\bar{\imath}$. Also that in is often written en, u, or u. In the paradigm I shall only give ", i, and u respectively, leaving the other forms to be inferred. Note also that the agent singular ends in u, not in ' as in Kāshmīrī.

	Sing.	Plur.
Nom.	$mh\bar{a}l^{u}$, a father	$mh\tilde{a}l^{i}$.
Dat.	$mhar{a}lis$	mhālin.
Ag.	$egin{array}{c} mhar{a}lin \ mhar{a}li \end{array} \}$	mhāliau.

As examples of the vocative, we may quote ai mhāli, O father (I, and II, 3), and ai shuria (I) and ai shur^u (II, 76), O son.

As other examples of the nominative plural, we can quote from the List of Words (138ff.):—

Nom. Sing.	Nom. Plur.
ghuṛu, a horse	ghuri.
rish", a bull	$rish^i$.
$h\bar{o}n^{u}$, a dog	$h\bar{o}n^i$.
tshvor", a goat	tshēri.

Note that while $h\bar{o}n^*$ shows no epenthesis, we see it in $tshy\bar{o}r^*$.

Other examples are :-

Sing. nom.-acc.— $\underline{ts\bar{a}un^u}$ $bh\bar{a}y^u$ $\bar{a}mut$ thu, thy brother is come (II, 58, cf. 80)- $akh\bar{a}$ $mahn^u$ $hak\bar{a}r\tilde{u}$, having called a man (II, 56). $mi\bar{a}un$ $mh\bar{a}l$, my father (233).

tisun mhāl kanāra nyit bēzāwun lagus, his father, having come outside, beganto persuade him (I).

tyisun baddu shur wajjan-manz āusu, his elder son was in the fields (I).

tsāni mhālin tisinē khātira rachhmutu watsu mārun, thy father hath killed the fatted calf for him (I); but:—

rachhmutu watswa yōr aniū, bring ye the fatted calf (I).

Dat.-acc.—su thu ghuṛis- $p\bar{a}n$ $b\bar{e}\bar{\imath}$, he is seated on a horse (230).

kulyis-tal, under the tree (230).

aikis mahnis zēh shuŗī āsias, to a certain man were two sons (I).

akis badis $m\bar{a}hnis$ -nishin $lag^u g\bar{o}u$, he went and joined himself to a certain man (II, 15).

lökrin shuriën pananis mhālis zubun, the younger son said to his father (I, and so elsewhere, in both I and II, passim).

mě tsotum těsinyis shuris mhast, I have well beaten his son (228).

gāmakis kāsi wānawālis-hata, from a shopkeeper of the village (241).

ak zanis zēh shuri āsis, to a certain man were two sons (II, 1).

Ag.—lőkrin shuriĕn pananis mhālis zabun, the younger son said to his father (I, cf. II, 2).

lokrin shurin akis dūras mulka-sun safar korun, the younger son made a journey to a far country (II, 7).

mhālin pananien naukaran zabun, the father said to his servants (I, cf. II, 43).

su hazza dūr āsū, mhālin lawun, he was yet far off, (when) his father perceived him (I).

shurin tis zabun, the son said to him (II, 38).

miān pětr-sinyi shuriën karun tesiñi bhēnyi-sãthi biāh, the son of my uncle has made a marriage with his sister (225).

Abl. $-n\bar{a}lamați rațun$, he seized him with an embrace (I).

Plur. nom.-acc.—hundī ditinus, he gave him kisses (I).

ak zanis zēh shuri āsis, to a certain man were two sons (II, 1).

aikis mahnis zēh shuŗī āsias, to a certain man were two sons (I).

Dat.-acc.-mhālin paněn māhnin zabun, the father said to his men (II, 44).

lāchāran mahnien badāwun, badien mahnien zamīn ziyāda āsiāi, thukṛī banāyin, for helpless men he increased (the measurement of their land) (and) for great men, who had more lands, he diminished them (III).

Corresponding to the third declension of Kāshmīrī, consisting of feminine nouns in 'or "we have the following. As in the case of nouns of the second declension is often written i or \bar{i} and in is often written yin or $i\check{e}n$. In the paradigm I only give 'and in respectively, leaving the other forms to be inferred (110ff.):—

	Sing.	Plur.
Nom.	$k \bar{o} r'$, a daughter	kōri.
Dat.	$m{k}ar{o}rm{i}$	körin.
Agabl.	$oldsymbol{k}ar{o}oldsymbol{r}oldsymbol{i}$	kōriau.

Other examples of the nominative plural are (139ff.):—

Nom. Sing.	Nom. Plur.
$ghur^i$, a mare	ghuri.
$h\tilde{o}\tilde{n}^i$, a bitch	$h ilde{o} ilde{n} i.$

Other examples are:-

Sg. nom.-acc.—dāṛhi panani puchiĕn, he plucked out his own beard (III).

Dat.-acc.—surti-manz yith zabun, having come into sense he said (II, 22).

Plur. nom.-acc. - zachi tsachien, rags were torn by him (III).

Dat.-acc.—<u>tsāun</u>ⁿ māl gānen-manz uḍāwun, he scattered thy property among harlots (II, 73).

Corresponding to the fourth declension of Kāshmīrī, we have the following examples:—

	Sing.	Plur.
Nom.	kath	katha.
Dat.	kathi	kathan.
Agabl.	kathi, katha	kathau.

The above paradigm is based on the following examples. No example is available for the ag.-abl. plur., but kathau is probably right:—

Sg. nom.-acc.—bhain, a sister (50); dat. bhēnyi-hata, than the sister (231); bhēnyi-sathi, with the sister (225).

 $q\bar{a}u$, a cow (143); pl. nom. $g\bar{a}\bar{e}$ (145).

Dat.-acc. $-bad^u shu^u wajji$ -manz $\bar{a}s\bar{u}$, the elder son was in the field (II, 53).

Abl.—boh bhuchi marun lagus, I began to die (I).

boh bhochhi maran thus, I am dying of hunger (II, 25).

panani dōlata-manza miāun hissa dyim; tĕ tin dōlat banṭī ditsin, give me my share of thy property; and he divided the property (I).

ai katha (sing. nom. kath)-pāna lūk sārī tyĕs-pān krūdhī samazēī, from on (i.e. with regard to) this matter all the people became angry with him (III).

Note that the ablative ends in a ($d\bar{o}lata$, katha) or in i (bhuchi).

Plur. nom.-acc.—yima shima sūr khēwan āisi, what husks the swine were eating (I).

Dat.-acc.—<u>tsāun māl kanjran-sāthi uḍāi dyutun</u>, he wasted thy property on harlots (I).

razan-sathi gandis, bind him with ropes (236).

baḍḍ" shuṛ" wajjan-manz āusū, the elder son was in the fields (I). tin tis panĕn wajjan-manz sōzun, he sent him into his fields (II, 17).

The genitive of all four declensions will be dealt with under the head of adjectives.

Postpositions.—Postpositions are used as in Kāshmīrī. It is noteworthy that the postpositions hata and nish, both meaning 'from,' govern the dative, and not, as we might expect from the analogy of Kāshmīrī, the ablative.

VOL. VIII, PART II.

354The following is a list of the postpositions occurring in the specimens, with the cases they govern: hata, from (dat.). khātara, khātira, for the sake of (abl. or abl. of gen.). labi, near, to (=Hindī $p\bar{as}$) (dat.). manz, in, among, into (dat.). manza, from in, from among (abl.). $ni\bar{o}r$, near (dat.). nish, from (dat.). nisha, nishě, nishin, near (=Hindī pās) (dat.). $p\bar{a}n$, upon (=Hindī par) (dat.). $p\bar{a}na$, from upon (=Hindī par-sē) (abl.). pata, after (dat.). $s\tilde{a}thi$, with, in company with (dat.). $\widetilde{a}thi$, with, by means of (dat.). The following are examples of the use of these postpositions: tsě kas-hata su môl hyututh, from whom did you buy that (240)? gāmakis $k\tilde{a}$ si wānawālis-hata, from a shop-keeper of the village (241). tsāni mhālin tisině khātira rachhmutu watsu mārun, aiyi khātara tin su juān lawun, thy father hath for his sake killed the fatted calf, for the sake of this that (i.e. because) he hath perceived him (to be) well (I). isini khātara rachhmut" wats mārāwuth, for his sake thou causedst the fatted calf to be killed (I). tath jāē-hinis aikis shakhsas-labi rathu, he remained near (i.e. with) a person of that place (I). wathi pananis mhālis-labi āō, having arisen, he came near (i.e. to) his father (I). tath dishas-manz kāl pēōu, a famine fell in that country (I). thukṛiĕn dōsan-manz, in a few days (the younger son went off to a far country) (1). tsāun" māl gāñĕn-manz uḍāwun, he wasted thy property among harlots (II, 73). gharas-manz thu safēd ghuri-sun zīn, in the house is the saddle of the white horse (226; so 223, 233).su hōshas-manz $\bar{a}\bar{o}$, he came into sense (I). badd shur wajjan-manz āusū, the elder son was in the fields (I). tin tis panen wajjan-manz sozun, he sent him into his fields (II, 17). paněn yāran-manz khushī kara, I may make rejoicing with my friends (II, 71). tini pananyis zamīnas-manz sōzun, he sent him into his own lands (I). In javab-manz, in answer (II, 65), the termination of the dative has been dropped. panani dolata-manza miāun hissa dyim, give me my share from in (i.e. out of) thy property (I). timau-manza lokrin mhālis zabun, from among them the younger said to the father (II, 2). khūha-manza khuāl pāñ, draw water from in (i.e. out of) the well (237). yēī gharī gharas niōr āō, when he came near to the house (I; cf. II, 54).

mhālis-nish, from the father (191).

tū sadā mě-nishě thuk, thou art always near (i.e. with) me (II, 76).

boh wathi pananis mhālis-nisha gatsha, I, having arisen, will go near (i.e. to) my father (I; cf. II, 26).

miānis mhālis-nishē wāra mazūran wāra manjī thī, near my father (i.e. in my father's house) many servants have much bread (II, 23).

akis badis māhnis-nishin lag" gõu, he went and stayed near (i.e. with) a great man (II, 16).

ai katha-pāna lūk sārī tyĕs-pān krūdhī samazēī, from upon (i.e. in regard to) this matter all the people became angry upon (i.e. with) him (III).

thukrin dosan-pata, after a few days (II, 6).

 $m\bar{a}$ ra $k\bar{a}$ ran-pata $m\bar{a}$ l $uj\bar{a}$ run, he wasted the property after (i.e. in) evil deeds (I). $tin\ pananis\ dilas-s\tilde{a}$ thi zabun, he said with (i.e. in) his heart (I).

 \underline{ts} āun māl kanjran-sãthi uḍāī dyutun, he wasted thy substance with harlots (I). $t\bar{u}$ hamēsha mě-sãthi thukh, thou art ever with me (I).

boh pananien yāran-sāthi khushī karaha, I might have made merry with my friends (I).

yiman-sāthi panun yaḍ bhara, with these I will fill my belly (I). razan-sāthi ganḍis, bind him with ropes (236).

Adjectives, as a rule, follow the custom of standard Kāshmīrī. Those that do not end in u-mātrā (such as $d\bar{u}r$, distant; hish, like; $ju\bar{a}n$, good; $m\bar{a}ra$, bad; zabar, good) are not declined when in agreement with a substantive in a case other than the nominative singular. Thus:—

dūr dishas safar korun, he went to a far country (I).

māra kāran-pata māl ujārun, he wasted the property in bad actions (I).

panun māl māra kāman-manz urāwun, he wasted his property in bad actions (II, 10).

zabar māhnu, a good man (119); zabar māhni, good men (124).

Sometimes, however, the adjective is declined,—the masculine in this case following the first declension of nouns. Thus we have:—

akis dūras mulka-sun safar korun, he made a journey of a distant country (II, 8).

lāchāran mahnien badāwun, for helpless men he increased (the measurement of the land) (III).

As in Kāshmīrī adjectives ending in *u*-mātrā agree with the noun they qualify in gender, number, and case. It must be remembered that *u*-mātrā is often elided, so that the adjective apparently ends in a consonant. This, however, does not affect the rule. Even when the *u*-mātrā is elided the adjective is treated as if it ended in *u*-mātrā. Thus the pronominal adjective *miāun*, my, is just as often written *miāun*, but it is always declined as if it were *miāun*, and never as if it were really *miāun*.

In Kāshmīrī the feminine termination corresponding to the masculine u-mātrā is \ddot{u} -mātrā. In Kashṭawārī it is i-mātrā, which, as often as not, is pronounced as a full i, as in the third declension of substantives. Thus, the feminine of $l\check{o}kur^u$, small, is $l\check{o}kar^i$ ($l\check{o}kari$). In fact, as in the second and third declensions, \ddot{u} is often written u or even \bar{o} or ua, \dot{u} is often written \dot{u} or \bar{i} , and \dot{u} is often written $\dot{e}n$, \dot{u} , or $\dot{e}n$. In the following paradigm I shall give only \ddot{u} , \dot{u} , and \dot{u} , respectively, but most of the other spellings will be found in the examples.

Under the rules for epenthesis certain consonants are liable to change in the feminine (see p. 266), and in some cases, when they do not change in the nominative feminine, they change in the other cases. Thus, the feminine of the Kāshmīrī $bo\dot{q}^u$, great, is $b\ddot{u}\dot{q}^{\bar{u}}$, the dative singular of which is $baj\check{e}$. In Kashṭawārī these changes appear most capriciously, sometimes they occur, and sometimes they do not.

Adjectives ending in n^u (which in Kāshmīrī becomes \tilde{n}^u in the feminine) appear to make their feminines pretty consistently in \tilde{n}^i . Thus, $mi\bar{a}un^u$, my, has its feminine $mi\bar{a}\tilde{n}^i$; $\underline{ts}\bar{a}un^u$, thy, feminine $\underline{ts}\bar{a}\tilde{n}^i$; $panun^u$, own, feminine $pana\tilde{n}^i$. In the case of the Kashṭawārī word bad^u , great, the d is changed to j, even in the case of the nominative feminine, which is baj^i . This is evidently due to the analogy of the other feminine cases. We thus get the following declension of bad^u or bad^u , great.

	Masc.		Fem.
Sing.			
Nom.	bad^u		$baoldsymbol{j^i}.$
Dat.	badis, badi		baji.
Ag.	badin, badi		baji.
\mathbf{A} bl.	badi		baji.
Plur.			
Nom.	bad'		baji.
Dat.	badin	*	bajin.
Agabl.	badiau		bajiau.

Note that, in the masculine singular, the ablative can optionally be used for any oblique case.

There are one or two irregular adjectives. The pronominal adjective $panun^u$, own, optionally drops the second n in all cases except the nominative singular. Thus, panis for pananis; pani for panani, and so on. The word for 'all' (compare the Kāshmīrī $s\delta ruy$, see p. 269), invariably adds an emphatic $\bar{\imath}$. Thus the masc. sing. nom. is $s\bar{a}r\bar{u}\bar{\imath}$, abl. $s\bar{a}riw\bar{\imath}$ (for $s\bar{a}ri+\bar{\imath}$); plur. nom. $s\bar{a}r\bar{\imath}$ (for $s\bar{a}r^i+\bar{\imath}$).

As examples of the use of these declinable adjectives we may quote:-

Masc. sing. nom.—tath dishas-manz badd kāl peōu (I) or tath mulkas-manz bad drāg peōu (II, 12), in that country a great famine fell.

tyisun baḍḍu shuru wajjan-manz āusū (I) or tisun baḍu shuru wajji-manz āsū (II, 53), his great (i.e. elder) son was in the field(s).

yēī gharī sōrūī barbād kŏrun (I) or yĕli sārūī kharach korun (II, 11), when he had wasted (expended) all.

Dat.-acc.—akis badis māhnis-nishin lag* gōu, he went and stayed with a great man (II, 15).

miānis mhālis-nishē wāra mazūran wāra manjī thī, near my father (i.e. in my father's house) many servants have much bread (II, 23).

lŏkṛin shuriĕn pananis mhālis zabun, the younger son said to his father (I). So pananis mhālis, (I will go) to my father (I), and (he came) to his father (I).

miāun mhāl thu tath lŏkuri gharas-manz rihwan, my father lives in that small house (233).

pani mhālis-nishe gatsha, I will go to my father (II, 26, cf. 34).

zāt tsāni hukmas adal-badal na hanthus, I never walked contrary to thy command (II, 67).

Note miāni for miānis or miāni (225).

Ag.—lőkrin shuriĕn pananis mhālis zabun, the younger son said to his father (I). lőkrin shurin safar korun, the younger son made a journey (II, 7).

tsāni mhālin baji dhām karmatsi thī, thy father hath made a great feast (II, 59). tsāni mhālin rachhmutu wātsu mārun, thy father killed the fatted calf (I).

Plur. nom.—lūk sārī tyĕs-pān-krudhī samazēī, all the people became angry with him (III).

thukṛi banāyin, he made them small (III).

Dat.-acc.—badiën mahniën, for great men (III).

pananiën mazūran-hish banāyim, make me like one of thy servants (I).

mhālin paněn māhnin zabun, the father said to his men (II, 43).

thukriën dōsan-manz, in a few days (I).

thukṛin dōsan-pata, after a few days (II, 6).

Fem. sing. nom.— $\underline{ts\bar{a}ni}$ mhālin bajⁱ dhām karma $\underline{ts^i}$ thī, thy father hath made a great feast (II, 59, cf. 75).

kityān warhien tsāñi khezmat karyim, for how many years I did thy service (I). yītin warhen me tsāñi tahl karan thus, for so many years I am doing thy service (II, 66).

Dat.—karun panañī marzī-sāthi zamīnas kachchh, he measured the country according to his own pleasure (III).

Plur. dat.—tin tis pañen wajjan-manz sozun, he sent him into his fields (II, 16).

The Genitive Case.—As in Standard Kāshmīrī the genitive is an adjective and is declined as such. The postpositions of the genitive are hun", sun", and uk", corresponding to the Kāshmīrī hond", sond", and uk" respectively. These are used almost exactly as in Kāshmīrī. Hun" is used with feminine nouns and with masculine plural nouns. Sun" is used with masculine singular nouns. Both these govern the dative, as in Kāshmīrī, and as in that language the s of sun" is really the termination of the dative, so that āsmāna-sun" of heaven is really āsmānas-'un", for āsmānas-hun" (see p. 225). Unlike Standard Kāshmīrī sun" is used not only with animate, but also with inanimate nouns, so that we have āsmāna-sun", when Kāshmīrī would have āsmānuk";

 $m\bar{a}la$ - sun^u , of the property, where Kāshmīrī would have $m\bar{a}luk^u$; and mulka- sun^u , of the country, where Kāshmīrī would have $mulkuk^u$.

The postposition uk^u is, as in Kāshmīrī, confined to inanimate masculine singular nouns, as in $g\bar{a}muk^u$, of the village; $mulkuk^u$, of the country. We thus see that either sun^u or uk^u may be used with such an inanimate noun as mulk, a country.

All these postpositions are declined, so that we have for sun":—

	Masc.		Fem.
Sing.			. ~
Nom.	sun^u		$si ilde{n}^i,\ s\widetilde{ar{\imath}}.$
Dat.	sinis, $sini$		$si\~ni.$
$\mathbf{A}\mathbf{g}$.	sinin, sini		$si\~ni.$
$\mathbf{Abl}.$	sini		$si\~ni.$
Plur.			
Nom.	sin^i		$si\~ni.$
Dat.	sinin, sin		siñin.
Agabl.	siniau	И ↔	$si\~nau.$

 Sun^u is sometimes written $sund^u$ (102).

As usual there are numerous variants of these forms. The "of sun" is very commonly dropped, so that we get sun. Similarly final i and i are often dropped, so that sin may represent sin^i or sini. Again y is often inserted before i, so that, e.g., sinis and sini become sinyis and sinyi respectively. Again, sometimes \check{e} and sometimes $\bar{\imath}$ is written for i or i, and $i\check{e}n$ or $\check{e}n$ for in, so that sin^i and sini may become $sin\check{e}$ or $sin\bar{\imath}$, and sinin may become $sin\check{e}n$ or $sin\check{e}n$. All this is exactly as in the case of nouns of the second and third declensions.

 Hun^u is declined exactly like sun^u , substituting h for s.

 Uk^u is declined as follows, it being remembered that changes of spelling may occur as in the case of sun^u .

	Masc.	Fem.
Sing.		
Nom.	$uk^u (uk)$	ach^i .
Dat.	akis,aki	achi.
Ag.	akin, aki	achi.
Abl.	aki	achi.
Plur.		
Nom.	ak^i	achi.
Dat.	akin	achin.
Agabl.	akiau	achiau.

Sometimes the genitive postpositions are omitted as in (II, 54) gewanen, for gewanen-hun, of singing, and (II, 55) natsanen, for natsanen-hun, of dancing.

The following are examples of the use of the genitive :-

Sun^u.—masc. sing. nom.—āsmāna-sun gunāh kurmut thum, I have done sin of (i.e. against) heaven (II, 28).

gharas-manz thu safēd ghuri-sun zīn, in the house is the saddle of the white horse (226).

māla-sun hissa mě dim, give me the share of the property (II, 3).

mulku-sun (for mulka-sun^u) su thu měhram, he is acquainted of (i.e. with) the country (III).

dūras mulka-sun safar, a journey of (i.e. to) a far country (II, 9).

Sāhaba-sun gunāh korum, I did sin of (i.e. against) God (I).

Dat.-acc.—tě-sinyis dandas thōyiū zīn, put ye the saddle to (i.e. on) his back (227). mě tsōtum tě-sinyis shuris, I have beaten his son (228).

i-sin hathas ankhuch lägyus, put ye a ring on his hand (I).

tsanis mhāli-sin gharas-manz, in thy father's house (223).

Ag.—ti-sin mhālin su manāmun, his father remonstrated with him (II, 63).

miān pětr-sinyi shuriën karun biāh, the son of my uncle made a marriage (225).

Abl.—<u>tsāni mhālin ti-sinĕ khātira rachhmutu watsu mārun</u>, thy father killed the fatted calf for the sake of him (I).

i-sini khātara rachhmut wats $m\bar{a}r\bar{a}wuth$, thou causedst the fatted calf to be slain for him (I).

Plur. nom.-acc.— $mi\bar{a}ni\ mh\bar{a}li$ - $sinyi\ kity\bar{a}\ maz\bar{u}r\ th\bar{\iota}$, how many labourers there are of my father (I).

Dat.-acc. -ti-sin hathan ankuchī, a ring for his hands (II, 46).

Fem. sing. nom.-acc.—ghuri-si ummar, the age of the horse (221).

Dat.-acc.—tyĕ-siñi bhēnyi-hata baḍḍ", taller than his sister (231).

 Hun^u .—masc. sing. dat.— $dh\bar{a}ri$ - $hinis\ m\ddot{o}khas$ - $p\bar{a}n$, on the top of the hill (229).

 $tath j\bar{a}\check{e}$ -hinis aikis shakhsas-labi rathu, he remained near a person of that place (I).

For further examples of sun" and hun", see the List of Words, 102, etc.

 Uk^{u} .—masc. sing. nom.— $na\underline{tsunuk}$ $w\bar{a}z$ lawun, the sound of dancing was perceived by him (I).

Dat.-acc. $-g\bar{a}makis\ k\tilde{a}si\ w\bar{a}naw\bar{a}lis-hata$, from a shopkeeper of the village (241).

tath mulkakis akis badis māhnis-nishin lag" gōu, he went and joined himself to a great man of that country (II, 15).

Fem. sing. nom. $-y\bar{o}r$ yinach marzī karan thu, he is making a desire of (i.e. for) coming here (III).

Adjectives in agreement with genitives in sun^* or hun^* are put in the dative, as in $d\bar{u}ras\ mulka-sun\ safar$, a journey of a far country (II, 9).

No examples are available of any adjective agreeing with a genitive in uk^{u} .

Comparison.—This is made as in Kāshmīrī. The usual postpositions are hata and nishi. Thus:—

-nishi zabar, better than (133).

sāriwī-nishi zabar, better than all, best (134).

bhēnyi-hata badd, taller than the sister (231).

sāriwī-nishi juān pŏshāk kaḍi aniū, bring ye forth the best robe (I).

Another mode of forming the superlative is shown in :— asalas-nishě asal, good than good, i.e. best (II, 14).

Numerals.—These are given in the List of Words and Sentences (pp. 488ff.).

The word for 'one' is ak which is either indeclinable as in ak zanis $z\bar{e}h$ shur' $\bar{a}sis$, to one man were two sons (II, 1), or else is declined as if from a nominative ok^n or ak^n , its dative being akis or aikis. Thus:—

akis dūras mulka-sun safar, a journey to a far country (II, 8).

akis badis māhnis-nishin, near a great man (II, 15).

aikis mahnis zēh shurī āsias, to one man were two sons (1).

aikis naukaras sad dyit, having given a call to one (i.e. a) servant (I).

With the suffix of the indefinite article ak becomes, as in Kāshmīrī, $akh\bar{a}$, and simply means 'a,' as in $akh\bar{a}$ $m\bar{a}hn^u$ $hak\bar{a}r\tilde{u}$, having called a man (II, 56).

The word for 'five' is given as pants in the List of Words, but the dative is given as $p\tilde{a}tsan$ in:—

yěti āsēāu rachhmutu pātsan warhien, he was placed here for five years (III).

PRONOUNS.—These closely follow Kāshmīrī, and will be dealt with in the order employed in describing the pronouns of that language.

Personal Pronouns.—The first two Personal Pronouns are declined as follows:—

I.	4	Thou.
bŏh, mĕ ¹		$tar{u}$, tsa .
mĕ		<u>ts</u> ĕ.
as^i , as		tus.
asi, asī		$tusi,\ tusar{\imath}.$
	$m\check{e}$ as^i , as	$m\check{e}$ $as^i,\ as$

It will be observed that final i is liable to be dropped, and that final i is liable to be lengthened. The $t\bar{u}$ of the second person connects Kashṭawāṛī with Western Pahāṛī, while \underline{tsa} connects it with Kāshmīrī.

Instead of the genitives, the possessive pronouns $mi\bar{a}un^u$, my; $asun^u$, our; $ts\bar{a}un^u$, thy; and $tusun^u$, your, are employed. As usual the final u-mātrā is frequently dropped. These are adjectives, and are regularly declined, with all the vowel changes noted under the head of adjectives, and shown in the declension of bad^u , great (see p. 356), the feminines being $mi\tilde{a}\tilde{n}^i$; (?) $as\tilde{n}i^i$, $as\tilde{a}i^i$; $ts\tilde{a}\tilde{n}i^i$; and (?) $tusi\tilde{n}i^i$, $tus\tilde{a}i^i$, respectively. I have no authority for the plural genitives, and the forms given are based on the feminine of the genitive postposition sun^u (p. 358).

The following are examples of the use of these pronouns:--

First Person.—Sing. nom.—boh wathi pananis mhālis-nisha gatsha, I, having arisen, will go to my father (I).

boh bhochhi maran thus, I am dying of hunger (II, 25).

bốh hanthus az mhast dūr, I walked a long way today (224).

¹ See below.

In one passage in the second specimen,—viz. $m\tilde{e}$ $t\tilde{s}\tilde{a}\tilde{n}^i$ tahl karan thus, I am doing thy service (II, 66),—the nominative of this pronoun is $m\tilde{e}$, which is probably borrowed from the Lahndā $m\tilde{a}$.

Dat.-acc.—mě pananiěn mazūran-hish banāyim, make me like thine own labourers (I; so II, 31).

mě zāt pūt dyituth na, thou never gavest to me a goat (I).

māla-sun kissa yu mē wātim, mē dim, give to me the share of the property which will come to me (II, 3).

tū hamēsha mĕ-sãthi thukh, thou art ever with me (I; so, mĕ-nishĕ, II, 76).

Ag.—mě gunāh körum, I did sin (I; so II, 27).

mě tsotum těsinyis shuris mhast, I beat his son much (228).

Plur. nom. -as' khěmau, we shall eat (II, 48).

as khyĕmau, id. (I).

as Nawāb Sāhabas-labi faryād gatshau, we will go as complainants to the Nawāb Sāhib (III).

Dat.—su hākim asi gatshi na, that ruler is not proper for us (III).

Sing. gen. (masc. sing. nom.) – $mi\bar{a}un^u$ zi shur $m\bar{u}d^umut$ $\bar{a}s\bar{u}$, this my son was dead (II, 49).

yis-kěn miāun" thu, whatever is mine (II, 77).

miāun yi shu;" mūdmut āsū, this my son was dead (I).

i-kēntsa miāun thu, whatever is mine (I).

panani dolata-manza miāun hissa dyim, out of thy wealth give me my share (I).

(Dat.-acc.)—miānis mhālis-nishē wāra mazūran wāra manjī thī, in my father's house many servants have much bread (II, 23).

miāni (for miāni, miānis) pětra-sinyi shuriěn, by the son of my uncle (225).

miāni mhāli-sinyi kitya mazūr thī, how many labourers there are of my father (I).

Second Person.—Sing. nom.— $t\bar{u}$ hamēsha mě-sãthi thūkh, thou art ever with me (I; so II, 76).

tyis hĕ tsa tima rŏpiē, take thou those rupees from him (235).

Dat.-acc.—kasun shur thu tsĕ-pata yūan, whose boy comes behind thee (239)?

Ag.—<u>ts</u>ě zāṭ ak <u>ts</u>hāwali-pūt mě dyututh na, thou never gavest me a kid (II, 69).

tsĕ baj' dhām karith, thou madest a great feast (II, 74).

tse kas-hata su mol hyututh, from whom didst thou buy that (240)?

Sing. gen. (masc. sing. nom.)—<u>tsāun</u>^u zab^u zāt phirum na, I never disobeyed thy word (I).

tsāun" nām kyā thūī, what is thy name (220)?

phīri tsāun" shur" zabāwa, I again may be called thy son (II, 30).

tsāun" bhāy", thy brother (II, 58, 80).

tsāuni zi shuru, this thy son (II, 72).

yis-ken miāun" thu, su tsāun" thu, whatever is mine, that is thine (II, 77).

ath-lāik raṭhus na tsāun shuṛu zaba, I am not worthy (that) I may say (that I am) thy son (I).

tsāun bhōī āuī, thy brother came (I).

 $y\bar{e}\bar{\imath}$ -ghaŗ $\bar{\imath}$ $t\bar{s}$ āun yi shuŗ \bar{a} ō, when this thy son came (I).

(Dat.-acc.)—<u>tsānis mhāli-sin gharas-manz kityā shuri thī</u>, how many sons are there in thy father's house (223)?

zāt tsāni hukmas adal-badal na hanthus, I never walked contrary to thy command (II, 67).

(Ag.)—<u>tsāni mhālin rachhmutu watsu mārun</u>, thy father killed the fatted calf (I). <u>tsāni mhālin baji dhām karmatsi</u> thī, thy father hath made a great feast (II, 59).

(Fem. sing. nom.)—kītyān warhiĕn tsāñi khĕzmat karyim, for how many years did I do thy service (I)?

yītin warhen me tsāñ ṭahl karan thus, for so many years I am doing thy service (II, 66).

As in Kāshmīrī, the Demonstrative, Relative, Interrogative, and Indefinite pronouns have, in the singular, separate forms for animate and inanimate objects. There are feminine forms for the animate pronouns, but only a few examples occur in the specimens.

Demonstrative Pronouns.—As in Kāshmīrī, these are used also as pronouns of the third person. The following forms occur in the Specimens. Forms for which I have no authority, and which are based on analogies found elsewhere, are enclosed in marks of parenthesis:—

'This.'

	Sı		
	Animate.	Inanimate.	Plus.
Nom.	i,yi,zi	i, yi, zi	(im, yim, f. ima, yima; zi)
Dat	is,yis	(yith), yĕth, yath	iman, yiman
Gen.	i-sun ^u , yi-sun ^u	(yithunu)	iman-hun ^u , yiman-hun ^u .
Ag.	(in, yin)	(in, yin)	7
Abl.	(is, yis)	$(yar{e}i)$	timau, yimau.

There is an emphatic dative inanimate singular in ai katha-pāna, on this very matter (III), and a corresponding emphatic ablative in aiyi-khātara tin su juān lawun, for this

very reason (that) he perceived him safe and sound (I). The form zi may be compared with the Dras Shiṇā $zh\bar{o}$ (see p. 193), and the Bashgalī Kāfir $iz\bar{e}$, both meaning 'he.'

The following are examples of the use of this pronoun:-

Sing. nom. acc. - miāun yi shur mūdmut āsū, this my son was dead (I).

yēī gharī tsāun yi shur āō, when this thy son came (I).

miāun" zi shuṛ" mūd"mut āsū, this my son was dead (II, 49).

tsāun" zi shur", this thy son (II, 73).

tsāun" zi bhāy", this thy brother (II, 80).

Inan.—yi kyā samuz, what is this (I)?

yi ropai dyi tis, give this rupee to him (234).

Dat. an.—is ghuri-sĩ ummar kitsā thẻ, how much is the age of this horse (221)? sāriwī-nishi juān pŏshāk kaḍi aniū tĕ yis lāgyus, bring ye forth the best robe, and put ye it on this one (I).

Inan.—su thu yëth kulyis-tal ghuris-pān bēī, he is seated on a horse under this tree (230).

yath-laik thus na, I am not worthy of this (II, 30).

yath kilas-manz kaid samuz, he became imprisoned in this fort (III).

tin karun yath mulkas panañi marzī-sāthi zamīnas kachchh, he made the land-measurement for this country according to his own wishes (III).

yath mulku (for mulka)-sun su thu měhram samzumut, he has become acquainted of (i.e. with) this country (III).

Gen.—isin hathas ankhuch lāgyus, put ye on to this one's hand a ring (I).

isini khātara rachhmut" wats" mārāwuth, thou causedst the fatted calf to be killed for this one's sake (I).

Plur. masc. nom.—zi kyā thī, what are these (II, 57)?

Dat.—yiman-sathi panun yad bhara, with these I will fill my belly (1).

In Kāshmīrī there is a defective pronoun, of which the inanimate dative singular is ath, meaning 'that within sight.' It occurs once in the Specimens in the phrase ath-lāik rathus na, I remained not worthy of that (I).

Corresponding to the Kāshmīrī suh, he; tih, that (not within sight), we have the following:—

	Sing.		
	Animate. Inanimate.	Flux.	
Nom	su, (fem. sa) su, (ti)	tim, (fem. tima)	
Dat	tis, tyis, tyes tath	timan	
Gen	ti-sun", tyisun", těsun", tyĕsun" tathun"	timan-hunu	
Ag.	tin, tini)	
Abl	tyis (tēī)	} timau	

Corresponding to the emphatic ai of yi, we have tail in tail-pata yath mulku-sun su thu mehram samzumut, for that very (reason that) he is become acquainted with this country (III). Tisau is 'to him also,' see below.

Examples of the use of this pronoun are:-

Sing. nom. acc.—su lāchār gōu, he became helpless (I).

su salāmat thu, he is safe and sound (II, 81).

su thu māl tsunāwan, he is grazing cattle (229).

Inan.—yis-ken miāun thu, su tsāun thu, whatever is mine, that is thine (II, 77).

Dat.-acc.—tis tars āwus, compassion came to him (I).

mhālin tis zabun, the father said to him (I).

tin tyis zabun, 'tsāun bhōī āuī,' he said to him, 'thy brother is come' (I).

tyis <u>ts</u>ōtis jān, beat him well (236).

lūk sārī tyĕs-pān krūdhī samazēi, all the people became angry upon (i.e. with) him (III).

tisau zabas, I will also say to him (II, 27).

tath dishas-manz baddu kāl pēōu, in that country a great famine fell (I).

 $tath j\bar{a}\bar{e}$ -hinis aikis shakhsas-labi raṭhu, he remained with a person of that place (I).

tath mulkas-manz badu drāg peou, in that country a great famine fell (II, 12).

tath (Kāshmīrī would have tami) mulkakis akis badis māhnis-nishin, near a great man of that country (II, 14).

miāun mhāl thu tath lökuri gharas-manz rihwan, my father lives in that small house (233).

Gen.—This follows the declension of sun on p. 358, as in :—

tisun mhāl" kanāra nyit bōzāwun lagus, his father, having come outside, began to persuade him (I).

tisun badu shuru wajji-manz āsū (II, 53), but

tyisun baddu shuru wajjan-manz āusū (I), his elder son was in the field (fields).

tyisun bhōī thu tyĕsiñi bhēnyi-hata badd, his brother is taller than his sister (231).

těsinyis dandas thōyiū zīn, put ye the saddle upon his back (227).

mě tsotum těsinyis shuris mhast, I beat his son well (228).

shur tyĕsun marī gōs, his son died (III).

tisin mhālin su manāmun, his father remonstrated with him (II, 63).

tisine (for tisini) $khatira\ rachhmutu\ watsu\ marun$, he killed the fatted calf for his sake (I).

tisin hathan ankuchī, a ring for his hands (II, 46).

těsiñi bhēnyi sãthi, with his sister (225).

tyěsiñi bhēnyi-hata baḍḍu, taller than his sister (231).

tathun mõl thu dhāī ropiē, the price of that is two and a half rupees (232).

Ag.—tin pananis dilas sathi zabun, he said in his heart (I).

tin māl timhau bāthi ditnuk, he divided the property among them (II, 5).

tini pananyis zamīnas-manz sōzun, he sent (him) into his land (I).

Abl.—tyis hě tsa tima röpiē, take those rupees from him (235).

Plur. nom. masc.—tim khushī karañ lagi, they began to do rejoicing (II, 52).

tyis hĕ tsa tima (probably incorrect for tim) rŏpiē, take those rupees from him (235).

Dat.-acc.—tin timan panani dolat bantī ditsin, he divided his wealth to them (I).

timan děl-tisha (?) panun yad bhara, I may fill my belly with those husks (II, 19).

Gen.—timan-hun, their (30).

Ag.-abl.—timau-manza lokṛin mhālis zabun, from among them the younger said to the father (II, 2).

In II, 5, we have timhau or timhō translated 'among them.' This is for timau, with the change of m to mh noted above (p. 348).

Relative Pronoun.—The following forms occur in the Specimens or are given by Mr. Bailey:—

		Sin	G.	7		
		Animate.	Inanimate.	Plub.		
Nom.	•	$i,\ yi,\ yu$	yi, yu	yim, f. yima		
Dat.		yis	yath	yiman		
Gen.	•	$yisun^u$	(yathun)	yiman-hu n u		
Ag.		yin	(yin))		
Abl.	,	(yis)	$yar{e}ar{\imath}$	yimau		

Examples from the Specimens are:-

Sing. nom. inan.—māla-sun hissa yu mē wātim, the share of the property which will come to me (II, 4).

Ag.—<u>tsāun yi shur</u> āō, yin <u>tsāun māl kanjran-sāthi udāī dyutun (I)</u>, or <u>tsāun</u> zī shur āō, yin <u>tsāun</u> māl gāñĕn-manz udāwun (II, 72), this thy son came, who wasted thy substance among harlots.

Abl.—yēī gharī sōrūī barbād kōrun, at what hour (i.e. when) he had wasted everything,—and so many times in I.

Plur. nom. masc.—timan děl-tīsha (?), yu sūr khěwan thī, with those husks which the swine are eating (II, 19).

Fem.—yima shima sūr khēwan āisi, the husks which the swine were eating (I).

The Interrogative pronoun can be thus declined, so far as materials are available:—

	Sı	NG.	D		
	Animate.	Inanimate.	PLUE.		
Nom.	kỡ (92)	kyā	(kam, f. kama)		
Dat	kas	(kath)	(kaman)		
Gen.	$kasun^u$?	(kamau)		
Ag.	?)			
Abl.	?				
•	***	4.			

Examples are:—

Sing. nom. masc.—yi kyā samuz (I), what is this? or zi kyā thī (II, 57), what are these?

 $\underline{ts}\bar{a}un^u$ $n\bar{a}m$ $ky\bar{a}$ $th\bar{u}\bar{i}$, what is thy name (220)?

Dat.-acc.—<u>tsě</u> kas-hata su mỗi hyututh, from whom didst thou buy that (240)? Gen.—kasun shur^u thu <u>ts</u>ě-pata yūan, whose boy comes behind thee (239)?

The Indefinite Pronoun is $k\tilde{u}$, anyone, someone. Its oblique case is $k\tilde{a}si$, as in $g\bar{a}makis\ k\tilde{a}si\ w\bar{a}naw\bar{a}lis-hata$, from some shopkeeper of the village (241). The corresponding inanimate form for 'anything,' 'something' is $k\tilde{e}n$ or $k\bar{e}n\underline{t}sa$.

As an example of $k\tilde{u}$ we may quote:—

tis $k\tilde{u}$ diwan āsū na (I) or $k\tilde{u}$ tis nō diwan āsus (II, 21), no one was giving to him.

Reflexive Pronoun.—No example occurs of the reflexive pronoun meaning 'self.' The pronominal adjective panun', 'own,' is, on the other hand, very common in the specimens. Its feminine is panañ', written panan' in the first specimen. As the word yad, belly, is feminine in Kāshmīrī, we should expect to find panañ' yad for 'his own belly,' but both the first and second specimens give panun yad, as if yad was masculine. Panun' is an adjective and its declension is referred to on p. 356. As usual the final u-mātrā of panun is commonly dropped, and in the process of declension we often find yi written for i, as in pananyis for pananis, and ien or en written for in, as in pananien for pananin. Moreover, in the second specimen, the second n is often dropped,

so that we find pani instead of panani. The word is declined as follows, the optional written forms being omitted from the paradigm:—

					Masculine.	de production de l'annue de l'application de	Feminine.
Sing.						and advantage for a different control	
	Nom.	•	•	٠	panun ^u	Statement with the control of the co	panañi (panani in 1st Spec.)
V.	Dat.			•	pananis		panañi
•	Ag.			•	pananin		
	Abl.			•	panani, pani	}	panañi
Plur.					,		
	Nom.			.•	panan ⁱ		panañ
	Dat.			•	pananin, panin	The state of the s	panañin
	Agabl.		•		pananiau	Transfer and Artist to the Control of the Control o	panañiau

As examples of the use of this word we have:-

Masc. sing. nom.—panun yad bhara, I will fill my own belly (see above) (I, II, 20).

panun māl mara kāman-manz urāwun, he wasted his property in evil deeds (II, 10).

Dat.-acc.—tin pananis dilas-sãthi zabun, he said in his own heart (I). wathi pananis mhālis-labi āō, having arisen, he came to his own father (I). tini pananyis zamīnas-manz sōzun, he sent him into his own land (I). wōthi pani mhālis-nishĕ gatsha, having arisen, I will go to my father (II, 26; so II, 34).

Plur. dat.—mē pananiën mazūran-hish banāyim, make me like thy servants (I). mhālin pananiën naukaran zabun, the father said to his servants (I).

boh pananiën yāran-sāthi khushī karaha, I might have done rejoicing with my friends (I).

më panën mazūran-manz akis manish thainī, make me one man among thy servants (II, 32).

mhālin panen māhnin zabun, the father said to his men (II, 43).

Fem. sing. nom.— $tin\ timan\ panan^i$ (for $pana\tilde{n}^i$) $d\tilde{o}lat\ bant\bar{\imath}\ ditsin$, he divided his own property to them (I).

dārhi panani (for panani) puchien, he plucked out his own beard (III).

· Abl.—panani (for panañi) dōlata-manza miāun hissa dyim, give me my share from in thine own property (I).

Plur. dat.—tin tis pañen wajjan-manz sozun, he sent him into his own fields (II, 16).

Other Pronominal forms noted are:-

 $i-k\bar{e}n\underline{t}sa$, whatever, in $i-k\bar{e}n\underline{t}sa$ $mi\bar{a}un$ thu, $\underline{t}s\bar{a}un$ thu, whatever is mine is thine (I).

yis-ken, whatever, in yis-ken miāun thu, su tsāun thu, id. (II, 77).

'How much?', (pl.) 'how many?' is $kyut\bar{a}$, f. $kit\underline{s}\bar{a}$; m. pl. nom. $kity\bar{a}$, dat. $kity\bar{a}n$. In these the \bar{a} is really an interrogative or indefinite suffix added to $kyut^{x}$, $kit\underline{s}^{i}$, and kit^{i} . Examples are:—

yĕti-hata Kashīrī-tāī kyutā thu, how much (distance) is it from here to Kashmīr (222)?

is ghuri-sĩ ummar kitsā thĕ, how much is the age of this horse (221)?

 $mi\bar{a}ni\ mh\bar{a}li$ -sinyi $kity\bar{a}\ maz\bar{u}r\ th\bar{\iota}$, how many servants are there of my father (I)!

tsānis mhāli-sin gharas-manz kityā shuri thī, how many sons are there in thy father's house (223)?

kityān warhien tsāñi khezmat karyim, for how many years did I do thy service
(I)!

Another word for 'how much?' and for 'how many?' is kitrud (222, 223).

 $y\bar{u}t$, so much, or (pl.) so many, occurs only in the examples in the dative plural, in :—

 $y\bar{\imath}tin\ warhen\ me\ \underline{ts}\bar{\imath}\tilde{\imath}^i\ tahl\ karan\ thus$, for so many years I am doing thy service (II, 66). Its feminine is probably $y\bar{\imath}\underline{ts}^i$, and its masculine plural probably $y\bar{\imath}t^i$.

Pronominal Adverbs are:-

těli, then (II, 33).

yĕli, when (II, 11, 54, 72).

těti, there (II, 10), tētē (I, there wasted his substance).

yĕti, here (I, I here am dying, and 222, III).

kyāzi, kyāza, why? (94), because (II, 49).

CONJUGATION. -A. -Auxiliary Verbs and Verbs Substantive.

Present.—I am, etc.

2	thuk, thukh	?
3	thu	thī, thĕ
Plur.	en en en	
1	$thar{\imath}$?
2	thĕaua	?
3	$thar{\imath}$?

This tense, like the Kāshmīrī chhuh, he is, is adjectival, and has masculine and feminine forms. The only feminine form available in the Specimens is that for the third person singular. As regards the use of thu instead of chhuh, we may compare the $th\bar{u}$ of the dialects of the Indus Kōhistān (Gārwī, Maiyã, etc., pp. 510, 524), the Western Pahārī $\bar{a}th\bar{i}$, he is (not); and the Sindhī $thian^u$, to become.

The Past is thus conjugated in the Masculine. No forms of the feminine are available.

I was, etc.

	1-	 Masc.	
Sing.			
1		ās u s, āusus	
2		āsuk, āusuk, āsukh, āusukh	
3		asū, ausū, asĕ a u	
Plur.			
1		$ar{a}is^i$	
2		āsēaua, ausēaua	
3		āsai, āusai, āis ⁱ , āsiāi	

Examples of the use of the Verb Substantive are as follows:-

yath-lāik thus na, I am not worthy of this (II, 30).

tū hamēsha mě sāthi thukh, thou art ever with me (I).

 $t\bar{u}$ sadā mě-nishě thuk, id. (II, 76).

i-kēntsa miāun thu, tsāun thu, whatever is mine is thine (I).

With a pronominal suffix of the second person singular dative we have :— $\underline{ts\bar{a}un^u}\ n\bar{a}m\ ky\bar{a}\ th\bar{u}\bar{\imath}$, thy name what is-to-thee, *i.e.* what is thy name (220)? For the feminine third person singular, we have :—

miānis mhālis-nishē wāra mazūran wāra manjī thī, in my father's house many servants have much bread (II, 23).

<u>ts</u>āni mhālin bajⁱ dhām karmatsⁱ thī, thy father hath made a great feast (II, 59). is ghuri-sī ummar kitsā thĕ, what is the age of this horse (221)?

For the masculine third person plural, we have:-

zi kyā thī, what are these (II, 57)?

 $\underline{ts\bar{a}nis\ mh\bar{a}l^i}$ -sin gharas-manz kity $\bar{a}\ shur^i\ th\bar{\imath}$, how many sons are there in thy father's house (223)?

For the Past, we have:—

miāun yi shuŗ mūdmut āsū, this my son was dead (I).

su āsū haza dūr, he was yet distant (II, 35).

 $r\bar{a}mut\ \bar{a}us\bar{u}$, he was lost (I).

 $badd^u shu^u wajjan-manz \bar{a}us\bar{u}$, the elder son was in the fields (I).

yĕti āsĕāu Nawāb Sāhaban Labbhū Rām Tahsīldār rachhmutu, Labbhū Rām was posted here as Tahsīldār by the Nawāb Sāhib (III).

yima shima sūr khěwan āisi, what husks the swine were eating (I).

badien mahnien zamīn ziyāda āsiāi, more lands were to great men (III).

With the pronominal suffix of the third person singular dative, we have:—
zēh shurī āsias, two sons were to him (I).

 $z\bar{e}h \ shur^i \ \bar{a}sis$, id. (II, 1).

There is one instance of the third person feminine singular with the same pronominal suffix in $k\tilde{a}khy\tilde{a}$ asis, a wish was to him (II, 18).

B.—The Active Verb.

The conjugation of the Kashtawārī verb closely follows Kāshmīrī.

As in Kāshmīrī, there are three conjugations. The first consists of all transitive verbs, and all impersonal verbs; the second of those intransitive verbs which employ the first past participle in the formation of the past tenses; and the third of those intransitive verbs which employ the second past participle in the formation of the past tenses.

There is only one example of an impersonal verb in the Specimens. It is the verb riwun, to lament. In the third specimen we have its past ryūwan (for ryuwun), it was lamented by him, i.e. he lamented.

The following verbs of the second conjugation appear in the Specimens:— běhun, to sit.

gatshun, to be proper.

hanthun, to walk.

lagun, to become attached, to begin.

milun, to be got (also third conjugation).

marun, to die.

rihun, to remain.

samazun, samhazun, or sapazun, to become.

Only four verbs of the third conjugation appear in the Specimens. These are:—
gatshun, to go, to become.
milun, to be got (also second conjugation).

pěun, to fall.

yiun, to come.

Epenthetic changes of vowels occur very capriciously in the Specimens. In the same word sometimes they appear, and sometimes they do not. Thus, we have karun (III), kŏrun (I), and korun (II, 9), all meaning 'he made.' We therefore do not here discuss the matter further. The whole subject is dealt with at length in the section on pronunciation (ante, p. 347).

The **Infinitive** ends in un^u , of which the final u-mātrā is commonly (as in Kāshmīrī) omitted. Thus, $ts\bar{o}tun^u$ or $ts\bar{o}tun$, to strike. Its ablative singular masculine is, as in Kāshmīrī, used as an infinitive of purpose and ends in ani. Its feminine, also used as in Kāshmīrī, ends in $a\tilde{n}^i$ or $a\tilde{n}$. The nominative is, as usual, employed as a verbal noun. It is often used with the verb lagun, to form an inceptive compound. Examples of the use of the infinitive are:—

khushī karañ (fem.) të khush samuzun (masc.) gatshihi, to do rejoicing and to become happy is proper for thee (I).

khushī karañ (fem.) biya khush samazun (masc.) wājib āsū, to do rejoicing and to become happy was proper (II, 79).

So khushī karan (for karan) hētsakh (I), and tim khushī karan lag (II, 52), they began to do rejoicing.

dhōl wāyun lawun, the playing of a drum was perceived by him (I).

andar gatshun lagu na. Tisun mhāl" bōzāwun lagus, he did not begin to go inside. (Then) his father began to persuade him (I).

boh yeti bhuchi marun lagus, here I begin to die (I).

su zabun $l \bar{o} g \bar{u}$, he began to say ('I will fill my belly with the husks') (I).

tini sūr tsunāwani sōzun, he sent (him) to feed swine (I; so II, 17).

For the genitive singular, we have :-

natsunuk wāz lawun, the sound of dancing was perceived by him (I).

yōṛ yinach marzī (fem.) karan thu, he is making a desire of coming here (III).

In the two following examples of the genitive plural, the postposition of the

genitive has been omitted:—

gewanen biya natsanen shor bozin, the sounds of singings and of dancings were heard by him (II, 54).

The **Present Participle** is formed by adding an to the root, as in \underline{tsotan} , striking. Examples will be given under the heads of the present and imperfect tenses. In Kāshmīrī, at the present day, this participle ends in $\bar{a}n$, not an; but an is used in the old language and also in modern poetry.

An irregular present participle is $y\bar{u}an$, coming, from yiun, to come.

Past Participles.—There are in the Specimens many examples of a participle corresponding to the first past participle of Kāshmīrī, and there are a few forms corresponding to the second past participle. There are no forms corresponding to the third and fourth past participles.

First Past Participle.—As in Kāshmīrī this is formed by adding u-mātrā to the root, as in $t\underline{s}\bar{o}t^u$, struck. As usual, the u-mātrā may be dropped, or may be represented by u, \bar{u} , or \bar{o} , so that instead of $t\underline{s}\bar{o}t^u$, we may have forms corresponding to $t\underline{s}\bar{o}t^u$, $t\underline{s}\bar{o}t\bar{u}$, or $t\underline{s}\bar{o}t\bar{o}t$. The masculine plural ends in $t\underline{s}\bar{o}t^i$, and, again, we may have forms corresponding to $t\underline{s}\bar{o}t^i$ or $t\underline{s}\bar{o}t\bar{o}t$. The feminine ends in $t\underline{s}\bar{o}t^i$, plural $t\underline{s}\bar{o}chi$.

The epenthetic changes of vowels and consonants which are common in Kāshmīrī appear very capriciously in Kashṭawāṛī. The consonantal changes will be noted lower down. As for vowel changes, see the section regarding vowels (ante, p. 347).

There are irregular first past participles. The following have been noted:—

diun, to give $dyut^u$ (fem. $dits^i$). $h \check{e}un$, to take marun, to die $m \check{u}d^u$. $rath^u$.

As another example of an epenthetic change of a consonant, we may quote <u>tsaci</u> (fem. plur.), torn, from <u>tsatun</u>, to tear.

There is one example of this first past participle used as a participle, and not to form a past tense, in the word zab^u in :—

tsaun" zab" zāt phirum na, I never turned aside thy said (thing), i.e. I never disobeyed thy word (I).

Other examples of the first past participle will be found under the head of the first past tense.

Second Past Participle.—In Kāshmīrī this is formed by adding $y\bar{o}v$ to the root, as in $wuchhy\bar{o}v$, from wuchhun, to see. Judging from the only example of the singular that occurs in the Specimens, the termination is probably $\bar{o}v$, with a masc. plur. $\bar{e}\bar{\imath}$. The forms that occur are the following:—

The second perfect participle of milun, to be got, is milōmut (II, 51), from which we infer that the second past participle is milōv.

For the masculine plural, we have samazēī (III).

Irregular second past participles are:—

Examples of the second past participle will be found under the head of the second past tense.

The Perfect Participle is formed by adding mut^u to the first or second past participle, as in $\underline{tso}t^umut^u$, struck. As usual, the final u-mātrā is often dropped, both at the end of the past participle, and at the end of mut^u , or may be represented by u so that we get several varying forms.

The feminine ends in mats. Examples of the first and second perfect participles are:—

gatshun, to go, to becomeyiun, to comemilun, to be gotmarun, to die

rachhun, to keep

rāwun, to lose

samazun, to become

For feminine, we have:-

karun, to make

1st or 2nd Perf. Part.

gŏmut (219) (irreg.).

āmut (II, 59) (irreg.).

myulmut (II, 83).

mūd*mut (II, 49) (irreg.; but mūdmut in I, and II, 81).

rachhmutu, and rachhmut", kept, i.e. fatted (I).

rāw^umut (II, 51, 82).

rāmut (I).

samzumut (III).

karmatsi (II, 60).

For the second perfect participle we have further, milōmut, got (II, 51), which shows that here milun is treated as belonging to the third conjugation, but myulmut (II, 83) shows that it also belongs to the second conjugation.

* In Kāshmīrī, the conjunctive participle is sometimes used instead of the perfect participle as in $suh\ chhuh\ bihith$, instead of $suh\ chhuh\ by\bar{u}th^umot^u$, he is seated. The same thing occurs in Kashṭawārī, where we have (230) $sa\ thu\ b\bar{e}\bar{\imath}$, he is seated. Here $b\bar{e}\bar{\imath}$ is the conjunctive participle.

Conjunctive Participle.—The usual conjunctive participle ends in i or $\bar{\imath}$, as in $\underline{ts\bar{o}t\bar{\imath}}$, having struck. This is specially common in intensive compound verbs. This form does not occur in Kāshmīrī, but is common in Pahārī and Lahndā. Examples are:—

panani dolat bantī ditsin, he divided out his wealth (I).

tin māl timhau bāṭhi ditnuk, he divided out his property among them (II, 5).

kityā mazūr thī yaḍ bhari khēwan, how many labourers, having filled the belly, are eating (I).

sōrūī jama kari, having collected everything (I).

shur" tyĕsun marī gōs, his son died (III).

khafā samazi, having become angry (II, 62).

yin <u>tsāun māl kanjran-sāthi udāi dyutun</u>, (thy son) who squandered thy property on harlots (I).

boh wathi pananis mhālis nisha gatsha, I, having arisen, will go to my father (I), similarly wothi in II, 26.

The word karī may be added to this participle, as in Lahndā and Pahārī. Thus:—
lökṛin shuṛin sārūī khē jōrī-karī akis duras mulka-sun safar korun, the younger
son, having collected everything, went to a far country (II, 7).

Another form of the Conjunctive Participle ends in ith or it, corresponding to the Kāshmīrī form with the termination ith. Thus, tsōṭith or tsōṭit, having struck.

Examples are:-

surti-manz yith, having come into (his) sense (II, 22).

tisin mhālin guth yith su manāmun, his father, having come outside, remonstrated with him (II, 63).

aikis naukaras sad dyit guārun, having called a servant, he asked him (I).

tisun mhāl^u kanāra nyit bōzāwun lagus, his father, having come outside, began to persuade him (I).

A third form of the conjunctive participle ends in $\bar{\imath}ta$, as in $\underline{ts}\bar{o}t\bar{\imath}ta$, having struck. Examples are:—

tis tars āwus, dōrīta nālamati raṭun, to him compassion came, having run, he seized him in an embrace (I).

tis wuchhīta, tis mhālis tars āwus, biya dōrīta tis nālamut korus, having seen him, to his father compassion came, and, having run, he embraced him (II, 35).

Finally in II, 56, $hak\bar{a}r\tilde{u}$, if it is a correct form, is a conjunctive participle meaning 'having called.'

We thus get the following list of the non-finite parts of the verb tsōtun, to strike:—

Infinitive.— $\underline{ts}\bar{o}tun^u$ or $\underline{ts}\bar{o}tun$, to strike; sing. abl. $\underline{ts}\bar{o}tani$; fem. sg. nom. $\underline{ts}\bar{o}ta\tilde{n}^i$ or $\underline{ts}\bar{o}ta\tilde{n}$.

Present Participle. - tsōṭan, striking.

1st Past Participle.—<u>tsōṭ</u>" (<u>tsōṭu</u>, <u>tsōṭū</u>, <u>tsōṭō</u>), struck.

2nd Past Participle.— tsōchov (?), struck.

1st Perfect Participle.—<u>tsōṭ"mut" (tsōṭmutu, tsōṭmut)</u>, been struck.

2nd Perfect Participle (3rd conjugation).—milōmut, been got.

Conjunctive Participle,—

- (1) tsōṭi, tsōṭī, having struck.
- (2) tsōṭī-karī, having struck.
- (3) tsōtith, tsōtit, having struck.
- (4) tsōṭīta, having struck.
- (5) (?) $\underline{ts}\bar{o}t\tilde{u}$, having struck.

Coming to the finite parts of the verb, the imperative is thus conjugated in the second person:—

Sing.

Plur.

tsōt, strike thou

tsōţîū, strike ye.

There are no materials from which it is possible to state the form of the 3rd person. Examples of this tense are as follows:—

yi rŏpai dyi tis, give this rupee to him (234). mĕ bōnṭh hanṭh, walk before me (238). tyis hě tsa tima ropie, take those rupees from him (235).

khūha-manza khuāl pāñ, draw water from the well (237).

wuchchh, kityān warhien tsāñ khezmat karyim, see! for how many years I did thy service (I). In the corresponding passage in II, 65, an interjection ō has been added, and we get wuchhō.

sāriwī-nishi juān poshāk kadi āniū, having taken out the best robe bring ye it (I; so II, 45).

těsinyis dandas thōyiū zīn, put ye the saddle on his back (227).

The Future Indicative, also used as a Present Subjunctive, is thus conjugated:—

'I shall strike,' 'I may strike,' etc.

	Sing.	Plur.
1.	<u>ts</u> ōṭa	<u>ts</u> ōṭau.
2.	<u>ts</u> ōṭakh	<u>ts</u> ōṭiū.
3.	<u>ts</u> ōṭi	<u>ts</u> ōṭan.

It will be noted that, allowing for variations of spelling, it is the same as in Kāshmīrī. Examples of its use are as follows:—

yiman-sāthi panun yaḍ bhara, with these I will fill my own belly (I; so II, 20). wŏthi pani mhālis-nishē gatsha, having arisen, I will go to my father (II, 26; so I).

ki paněn yāran-manz khushī kara, that I may make rejoicing among my friends (II, 70).

ath-lāik rathus na tsāun shur zaba, I remained not worthy of this (that) I may say (that I am) thy son (I).

yath-lāik thus na ki phīri tsāun shur zabāwa, I am not worthy of this that again I may be called (zabāwa is passive) thy son (II, 30).

na <u>tsāhun zi andar gats</u>hi, he did not wish that he may go within (II, 62).

su hākim asi gatshi na, that ruler will not be (i.e. is not) proper for us (III).

as Nawāb Sāhabas-labi faryād gatshau, we will go as complainants to the Nawāb Sāhib (III).

as' khěmau, we shall eat (II, 48).

as khyĕmau, khushī karau, we shall eat, we shall make rejoicing (I).

For the **Past Conditional** there is only one certain example karaha, I might have made, in the first person singular. As it stands it is the same as in Kāshmīrī. The full passage is bŏh pananiĕn yāran-sāthi khushī karaha, I might have made rejoicing with my friends (I).

In khush samuzun gatshihi, it would have been proper to rejoice (I), the form gatshihi is that of the 3rd singular Past Conditional, but the sense required is 'it is proper,' not 'it would have been proper.'

As in Kāshmīrī the **Present** tense is formed by conjugating the present participle with the present tense of the verb substantive. The participle is unchanged throughout. It is thus conjugated in the masculine:—

'I strike,' 'I am striking,' etc.

Sing.

1. thus <u>ts</u>ōṭan

2. thukh <u>ts</u>ōṭan

3. thu <u>ts</u>ōṭan

4hē aua <u>ts</u>ōṭan

thē aua tsoṭan.

Similarly for 'I go' we have thus gatshan, etc. (205-210).

The Auxiliary verb may precede or follow the participle. For the feminine, the feminine of the auxiliary verb is used, but no examples are available. The participle does not change.

The following are examples of this tense:—

mě tsāñi tahl karan thus, I am doing thy service (II, 66).

boh bhochhi maran thus, I am dying of hunger (II, 25).

yōr yinach marzī karan thu, he is making a desire of coming hither (III).

miāun mhāl thu tath lökuri gharas-manz rihwan, my father lives in that small house (233).

su thu māl tsunāwan, he is grazing cattle (229).

kasun shur thu tse pata yūan, whose boy comes behind thee (239).

kityā mazūr thī yad bhari khēwan, how many labourers, having filled their belly, are eating (I).

timan děl-tisha yu sūr khewan thī, with those husks which the swine are eating (II, 19).

The **Imperfect** is similarly made by conjugating the past tense of the verb substantive with the present participle. Thus, boh āsus tsoṭan, I was striking. It is unnecessary to give a complete paradigm. The following examples occur in the Specimens:—

tis $k\tilde{u}$ diwan āsū na, no one was giving to him (I). yima shima sūr khẽwan āisi, the husks which the swine were eating (I).

perfect participles closely follow Standard Kāshmīrī (vide p. 292, ante). There are the same three methods of conjugation, viz. (1) with the subject fully expressed, and no pronominal suffix added to the participle; (2) with the subject indicated only by a pronominal suffix; and (3) with the subject fully expressed in the agent case and also by a pronominal suffix. As in the case of Kāshmīrī, I therefore give two paradigms for each tense, the first (A) exemplifying the first method and the second (B) exemplifying the second and third methods, the pronominal subject being enclosed in brackets in order to show that it is not used in the second method, but only in the third.

As in Kāshmīrī, the first person plural can only be indicated in the first method, the second person only in the second and third methods (vide ante, p. 292).

Past, 'I struck,' literally, 'struck by me,' etc.

		Si	NGULAR.	PLU	PLURAL.		
	•	He was struck.	She was struck.	They (masc.) were struck.	They (fem.) were struck.		
Sing			A		(
1.	by me	mĕ <u>ts</u> ōţ ^u	mĕ <u>ts</u> ōţi	mě <u>ts</u> ēt ⁱ	mě <u>ts</u> āchi		
3.	by him	tin <u>ts</u> ōţ ^u	tin <u>ts</u> ōṭi	tin <u>ts</u> ōt ⁱ	tin tsōchi		
Plur				_	<u>ESOCIAL</u>		
I.	by us	asi <u>ts</u> ōṭu	asi <u>ts</u> ōt ⁱ	asi <u>ts</u> ōt ⁱ	asi <u>ts</u> ōchi		
2.	by them	timau <u>ts</u> ōt²	timau <u>ts</u> ōṭi	timau <u>ts</u> ōţi	timau <u>ts</u> ōchi		
Sing			В	•	, e		
1.	by me	(mĕ) <u>ts</u> ōṭum	(mĕ) <u>ts</u> ōṭim	(mĕ) <u>ts</u> ōţim	(mĕ) <u>ts</u> ōchim		
2.	by thee	(<u>ts</u> ĕ) <u>ts</u> ōṭuth	(<u>ts</u> ĕ) <u>ts</u> ōţith	(<u>ts</u> ĕ) <u>ts</u> ōṭith	(<u>ts</u> ĕ) <u>ts</u> ōchith		
3.	by him	(tin) <u>ts</u> ōṭun	(tin) tsōțin	(tin) tsōţin	(tin) <u>ts</u> ōchin		
Plur.		- ,					
2.	by you	(tusi) <u>ts</u> ōṭĕau	(tusi) <u>ts</u> ōțiau	(tusi) <u>ts</u> ōṭiau	(tusi) <u>ts</u> ōchiau		
3.	by them	(timau) <u>ts</u> ōṭukh	(timau) <u>ts</u> ōṭikh	(timau) <u>ts</u> ōṭikh	(timau) <u>ts</u> ōchikh		

Of course the final u-mātrā of $\underline{ts}\bar{o}\underline{t}^u$ and the final i-mātrā of $\underline{ts}\bar{o}\underline{t}^i$ are often dropped. Or instead of u-mātrā, we may have u, \bar{u} , or \bar{o} , and instead of i-mātrā, i or $\bar{\imath}$. Also, instead of $\underline{ts}\bar{o}\underline{t}\underline{i}m$, we may have $\underline{ts}\bar{o}\underline{t}\underline{y}\underline{i}m$ or $\underline{ts}\bar{o}\underline{t}\underline{i}\bar{e}m$, etc., and so throughout.

There is only one example of the A method in the Specimens. It is:— $tin \ zab^u$, he said (II, 58).

There are many examples of the B method. The forms karun, körun, and korun are good examples of the careless way in which the rules of epenthesis are applied:—

Singular First person.—mě gunāh körum (I) or mě gunāh korum (II, 41), I did sin.

tsāun" zab" zāt phirum na, I never turned thy command (I).

mě tsotum těsinyis shuris mhast, I beat his son well (228).

tsāñi khězmat (fem.) karyim, I did thy service (I).

Second person.—mě zāt pūt dyituth na (I) or zāt ak tshāwali-pūt mě dyututh na (II, 70), thou never gavest me a kid.

tsě kas-hata su mõl hyututh, from whom didst thou buy that (240)?

rachhmut" wats" mārāwuth, thou causedst the fatted calf to be slain (I). vol. viii, part ii.

baji dhām (fem.) karith, thou madest a great feast (II, 75).

Third person. $-l\bar{a}ch\bar{a}ran$ mahnien badāwun, for helpless men he increased (the land measurement) (III).

tin pananis mhālis jawāb dyutun, he gave answer to his father (I).

yin <u>tsāun māl kanjran-sāthi udāī dyutun</u>, he who squandered thy property with harlots (I).

aikis naukaras sad dyit guārun, having called a servant he asked (I).

miān pětr-sinyi shuriěn karun těsiñi bhēnyi-sāthi biāh, the son of my uncle made a marriage with his sister (225).

tin karun zamīnas kachchh, he made measurement of the land (III).

lŏkṛin shuṛiĕn dūr dishas safar kŏrun, the younger son made a journey to a far country (I).

lŏkṛin shuṛin akis dūras mulka-sun safar korun, id. (II, 9).

su hazza dūr āsū, mhālin lawun, he was still a great way off (when) his father perceived him (I).

natsunuk wāz lawun, he perceived the sound of dancing (I).

tisin mhālin su manāmun, his father remonstrated with him (II, 64).

tsāni mhālin rachhmutu watsu mārun, thy father killed the fatted calf (I).

mhast minnat zārī (fem.) karin, panun pān (masc.) mökalāwun, he made much entreaty and lamenting, and (thus) freed his own person (III).

nālamati ratun, he seized him with an embrace (I).

mhast ryūwan (for ryuwun), it was much lamented by him, i.e. he lamented much (III).

tini sūr tsunāwani sōzun, he sent him to feed swine (I; so II, 18).

na tsāhun zi andar gatshi, he did not wish to go inside (II, 62).

māl urāwun (II, 11) or māl udāwun (II, 74), he wasted the property.

māra kāran-pata māl ujārun, he wasted the property on evil deeds (I). zabun, he said (passim).

tin timan panan dolat (fem.) bantī ditsin, he divided his wealth to them (I).

mhast minnat zārī (fem.) karin, he made much entreaty and lamenting (III).

thukṛi (plur. masc.) banāyin, he made them small (III).

zachi tsachien, dārhi panani puchien, he tore (his clothes to) rags (plur. fem.), he plucked out his own beard (sing. fem.) (III).

Third person plural. - shahr sozukh, they sent him to the city (III).

lūkau zamīndārau khuālikh bāsalāt, people (and) farmers raised a complaint (fem. sing.) (III).

No examples occur of the second or third pasts of the first conjugation.

The **Perfect** and **Pluperfect** tenses exactly follow Kāshmīrī, substituting the Kashṭawārī verb substantives for those of that language. It is hence unnecessary to give paradigms of them. The following are examples:—

Perfect.—mě gunāh kurmut thum, I have done sin (II, 29).

tsāni mhālin baji dhām (fem.) karmatsi thī, thy father hath made a great feast (II, 60).

Pluperfect.—rāmut āusū, tě myul, he had been lost, and was found (I).

rāw mut āsū, hun milōmut thu, he had been lost, now he has been found (II, 51; so II, 82).

āsēāu Nawāb Sāhaban Labbhū Rām Tahsīldār rachhmutu, the Nawāb Sāhib had appointed Labbhū Rām to be Tahsīldār (III).

The Second Conjugation also closely follows Kāshmīrī. The First Past is thus conjugated. The verb taken as a sample is samazun, to become:—

'I became,' etc.

	Masc.		Fem.
Sing.			
1.	(bŏh) samuzus		(bŏh) samazis.
2.	(tar u) $samuzukh$		$(tar{u})$ samazikh.
3.	su samuz"		sa samazi.
Plur.		•	
1.	$as\ samaz^i$		as samazi.
2.	(tus) samazĕaua		(tus) samaziaua.
3.	tim samazi		tima samazi.

Note that, as usual, final u-mātrā may be dropped, or may be represented by u, \bar{u} , or \bar{o} , and that i-mātrā may be represented by i or \bar{i} .

The following are examples. They are all in the masculine:-

Sing. First Person.—<u>tsāni hukmas adal-badal na hanthus</u>, I did not walk contrary to thy command (II, 68).

bốh hanthus az mhast dūr, I walked much today (224).

ath-lāik rathus na tsāun shur zaba, I remained not worthy of this (that) I may say (that I am) thy son (I).

Third Person.—su kangāl samhuzun lag*, he began to become poverty-stricken (II, 14).

su krūdhī samuz, andar gatshun lagu na, he became angry, and did not begin to go inside (I).

 \dot{su} zabun $l\bar{o}g\bar{u}$, $yiman-s\tilde{a}thi$ panun yad bhara, he began to say, 'with these I will fill my belly' (I).

tath $j\bar{a}\bar{e}$ -hinis aikis shakhsas-labi rathu, he remained near a person of that place (I).

yi kyā samuz, this what became?, i.e. what is the matter (I)?

sapuz maukūf, yath kilas-manz kaid samuz, he became dismissed, he became imprisoned in this fort (III).

rāmut āusū, tĕ myul, he had been lost, and was got (I).

Plur. Third Person.—tim khushī karañ lagi, they began to make rejoicing (II, 52).

One instance occurs of the **Second Past** of this conjugation in samazēī, they (masc.) became (III). This corresponds to the Kāshmīrī sapazēy.

VOL. VIII, PART II.

For the Perfect we have:-

su hun myulmut thu, now he has been got (II, 83).
yath mulku-sun su thu měhram samzumut, he has become acquainted with this
country (III).

For the **Pluperfect**, we can quote $m\bar{u}dmut\ \bar{a}s\bar{u}$, he was dead (I, and II, 49), but this is hardly a true example of the tense.

The **Third Conjugation** also closely follows Kāshmīrī. The following is the paradigm (in the masculine) of the **Second Past** of gatshun, to go, to become. Forms for the feminine are not available:—

'I went, I became,' etc.

	Sing.	Plur.
1.	$(b\check{o}h)$ $gar{o}s$	as $gar{e}$.
2.	(tar u)~gar o k h	i (tus) gēaua.
3.	su gōu, gau	$tim~gar{e}.$

The following examples of the second past of the third conjugation are taken from the Specimens, where many others of the same verbs will be found:—

su hōshas-manz āō, he came into sense (I). gharas-miōr āō, he came near the house (I).

gharas-niōr $\bar{a}v$, id. (II, 54).

yěli tsāun" zi shur" āō, when this thy son came (II, 73).

miāun yi shur" mūdmut āsū, zinda gōu, this my son was dead, he became alive (I).

pani mhālis nishě gōu, he went to his father (II, 34).

 $badd^{u}$ $k\bar{a}l$ $p\check{e}\bar{o}u$, a great famine fell (I).

badu drāg peou, id. (II, 13).

For the Perfect of this conjugation we have:

tsāun" bhāy" āmut thu, thy brother is come (II, 59).

rāw mut āsū, hun milomut thu, he had been lost, now he has beer found (II, 51).

Passive.—According to Mr. Bailey, the passive is formed by adding a to the root, and conjugating it with the various parts of gatshun, to go. Thus:—

bŏh thus <u>ts</u>ōṭa ga<u>ts</u>han, I am being struck (202).

boh āusus tsota gatshan, I was being struck (203).

bŏh tsōta gatsha, I shall be struck (204).

The system employed in Kāshmīrī, viz. adding the ablative of the infinitive to yiun, to come, also obtains. Thus:—

boh thus mārana yūan, I am being struck (202).

boh āusus mārana yūan, I was being struck (203).

boh mārana yima, I shall be struck (204).

We have a potential passive, formed by adding \tilde{a} to the root, in:— $\underline{ts}\bar{a}un^u shur^u zab\tilde{a}wa$, I may be called thy son (II, 31).

Causal Verbs.—The regular method of forming a causal root is to add $\bar{a}w$ to the original root. Thus from urun or udun, to fly, we have $ur\bar{a}wun$ or $ud\bar{a}wun$, to cause to fly, to squander. Examples are:—

tisun mhāl" bōzāwun lagus, his father began to cause him to understand (I).

isini-khātara rachhmut" wats mārāwuth, thou causedst the fatted calf to be killed for his sake (I).

tin tis sūr tsunāwani sōzun, he sent him to graze swine (II, 18).

su thu māl tsunāwan, he is grazing cattle (229).

panun māl urāwun, he caused to fly (i.e. wasted) his property (II, 11, but uḍāwun, II, 74).

As usual there is a series of verbs whose root vowel is lengthened in the causal, as in the Hindī marnā, mārnā. An example is:—

asalas nishë asal poshāk tis lāgiūs, put ye on him the best robe (II, 44).

In Kāshmīrī the causal of khasun, to rise, is khārun or khālun, to raise. In Kashṭawārī the corresponding causal is khuālun. Thus:—

iyes-pan lūkau zamīndārau khuālikh bāsalāt, the people and farmers raised a complaint against him (III).

khūha-manza khuāl pāñ, raise (i.e. draw) water from the well (237).

In the form $ban\bar{a}yim$, make me (as one of thy servants) (I), $\bar{a}y$ has been added to the root instead of $\bar{a}w$.

Pronominal Suffixes.—Pronominal suffixes are added to verbs as in Standard Kāshmīrī. The suffixes of the agent case have been already dealt with in the paradigms of the first conjugation, and will not be further noticed. For the other eases we have the following:—

First Person Singular.—The suffix is m, for all cases except the nominative. Thus:—

mě pananiěn mazūran hish banāyim, make-me as one of thy servants (I).

māla-sun hissa yu mě wātim, mě dim, give-to-me the share of the property which will come-to-me (II, 3).

miāun hissa dyim, give-to-me my share (I).

Second Person Singular.—The suffix of the second person singular for all cases except the nominative and the agent is $\bar{\imath}$, as in:—

tsāun bhōī āuī, thy brother came-of-thee (I), i.e. the 'thy' is repeated in the suffix.

 $\underline{ts\bar{a}un^u}$ $n\bar{a}m$ $ky\bar{a}$ $th\bar{u}\bar{\imath}$, thy name what is-of-thee (220). The same remarks apply.

Third Person Singular.—The suffix for all cases except the nominative and the agent is s. After the letter i, this is sometimes as. Thus:—

aikis mahnis zēh shurī āsias, to a certain man there were-to-him two sons (I, but II, 1, has āsis).

kākhyā (fem.) āsis, a desire was-to-him (II, 18).

kữ tis nō diwan āsus, to him no one was giving-to-him (II, 21).

tis tars āwus, to him pity came-to-him (I, so II, 36).

khabar (fem.) āyas, news came-to-him (III).

tyis tsōṭis jān paiṭhyi tĕ razan-sāthi ganḍis, beat-him well, and bind-him with ropes (236).

shur tyĕsun marī gōs, his son died-of-him (III).

halāl karius, make ye-it lawful (I).

tis nālamut" korus, to him he made-to-him an embrace (II, 37).

tisun mhāl^u bōzāwun lagus, his father began-to-persuade-him (I).

yis lāgyus, put ye-on-him (the best robe) (I; so lāgiūs, II, 45).

as mānaus na, we will not agree-to-him (III).

su salāmat myulus, he has been joined safe and sound-to-him (II, 61).

zabas, I will say-to-him (I, and II, 27).

The following are cases of double suffixes:—

Agent and dative singular, both third person.—hundī ditinus, kisses were given-by-him-to-him (I).

guārnas (for guārunas), it was asked-by-him-to-him, i.e. he asked him (II, 57).

zabunas, it was said-by-him-to-him (I).

Agent third person singular and dative third person plural.—tin māl timhau bāthi ditnuk (for ditunuk or dyutunak), by him the property was divided-by-him-to-them (II, 6).

Compound Verbs.—There are several instances of Intensive Compounds in the Specimens. They are formed, as usual, by using the first member in the form of the conjunctive participle. Thus:—

panan dolat banți di<u>ts</u>in, he divided out his own property (I, so $b\tilde{a}thi\ ditnuk$ in II, 6).

marī gos, his (son) died (III).

 $yin \ \underline{ts} \bar{a}un \ m \bar{a}l \ u d \bar{a} \bar{i} \ dyutun$, he who squandered thy property (I).

Inceptive compounds are formed with the infinitive, and are described under that head.

FREE TRANSLATION OF THE FOREGOING.

The Nawāb Sāhib kept Labbhū Rām as Tahsīldār here for five years. Then the people and the farmers made a complaint against him, and he was dismissed and imprisoned in this fort. He received news by telegram that his son was dead. He wept much, rent his clothes, and tore out his beard. Then he was sent to the city under an escort. He made many entreaties and implored Rām Chandra Sāhib, and so got himself released. He wants to come back here again, but we will not agree to have him, and intend to make a petition to that effect to the Nawāb Sāhib. He is a great oppressor, and, as he got to know this part of the country very well, he had the land measured just as it suited him. He used to make out the land of the poor people to be more than it really was, while he understated the large areas of the rich people. Everyone became enraged against him for this. We do not want such a ruler.

PŎGULĪ.

Immediately to the west of Kashṭawār, and to the south of the Pīr Pantsāl range that forms the southern boundary of the Valley of Kashmīr, lie the Valleys of the rivers Pŏgal and Parīstān. These unite and join the river Bichlārī (the Bishlar of Mr. Bailey), which in its turn joins the Chināb, south of the Bānihāl Pass. The tract of country across the Bichlārī, where the other two rivers run into it, is called Sar. Over the whole of this tract,—the Valleys of the Pŏgal and the Parīstān, and Sar,—the language is the same, and is called Pŏgulī by Mr. Bailey.

Pŏgulī has to its east the Kashṭawāṛī dialect of Kāshmīrī. To its south, between it and the Chināb lie the two dialects Rāmbanī and Sirājī to be presently described, and beyond the Chināb, further to the south lies Bhadrawāh in which the language is the Bhadrawāhī dialect of Pahāṛī. To the west of Pŏgulī we have various dialects of Lahndā. To its north lies Kāshmīrī. As may be gathered from the above, Pŏgulī, while based on Kāshmīrī, is much mixed with Pahāṛī and Lahndā, and forms a transition dialect. In

1911 the number of speakers was reported to be 8,158.1

The following account of the dialect is entirely based on two specimens and a list of words and sentences kindly given to me by the Rev. Grahame Bailey. These have also been printed in his work The Languages of the Northern Himalayas published together with a grammatical sketch by the Royal Asiatic Society in 1908. As given here the specimens differ slightly from those appearing in that book, but exactly follow the manuscript originally given by him to me, except that the system of spelling followed is that adopted for this Survey. When no materials were available in the specimens or List of Words, I have freely, and gratefully, utilized the information contained in his grammatical sketch.

PRONUNCIATION.—Vowels.—The $m\bar{a}tr\bar{a}$ -vowels, which are so prominent in Kāshmīrī, occur also in Pŏgulī, but they are capriciously employed. Sometimes they are interchangeable with full vowels, as in $m\bar{\imath}^*n$ or $m\bar{\imath}un$, my; $t\bar{\imath}^*n$ or $t\bar{\imath}un$, thy. Similarly $katl^*$ or katlu, a he-goat (150), plural $katl^*$ or katla (152). At other times they are dropped altogether, as in Kāshmīrī $g\bar{a}s^a$, Pŏgulī $g\bar{a}s$, grass; $m\check{o}t$ $w\check{o}ts$, the fatted calf, as compared with the Kāshmīrī $m\check{o}t^*$ $wotsh^*$.

The vowel-scale is very uncertain, vowels, even when accented, being freely interchangeable. Thus, a and \check{e} in yabla or $y\check{e}bla$, when; khal (230) or $kh\check{e}ll$ (II), below. So final a and i are continually interchanged. E.g. in $b\bar{\imath}mi$ or $b\bar{\imath}ma$, seated; or in the dat.-acc. of the 2nd declension $m\bar{a}lis$ or $m\bar{a}las$ (abl. $m\bar{a}li$ or $m\bar{a}la$). Similarly a and u are interchanged in the dat.-acc. of the 1st declension ($m\bar{a}las$ or $m\bar{a}lus$), and a and \check{o} in $z\check{o}p$, speak thou, imperative of zapnu, to speak.

As in Kāshmīrī, i and \check{e} are interchangeable, as in $n\check{e}shun$ or nisun, to emerge; and in the case of $y\ddot{u}un$, to come (80), for $y\bar{\imath}un$, we have the interchange of $\bar{\imath}$ and \check{u} . Again, as in Kāshmīrī, u and \check{o} are interchangeable, as $l\check{o}t$ or lut, a head (40), and \bar{u} and \bar{o} , as in $l\bar{u}k$ (55) or $l\bar{o}k$ (Parable), a son. Again, \bar{a} and \bar{o} are interchangeable. Thus we have both $z\bar{a}t$ and $z\bar{o}t$, meaning 'ever,' within a few words of each other in the Parable.

¹ In the census returns Poguli is classed as a dialect of Western Pahari.

PŎGULĪ. 403

So ai and ö are interchanged in pūra pöṭh, fully, and juāna paiṭh, well, both in the Parable.

A Kāshmīrī yo or yu is represented by \ddot{u} in Pŏgulī. Thus, Kāshmīrī $xyoth^z$, Pŏgulī $y\ddot{u}th$, fat; Kāshmīrī $xyuth^u$, Pŏgulī $z\ddot{u}th$, elder.

A y is often inserted before a vowel. This occurs most often (as in Kāshmīrī) before i or e, but also occurs before a. Thus, chhyi, for chhi, they are; $dy\bar{e}n$, for $d\hat{e}n$, give it (234), but $d\check{e}h$, give (Parable); $khy\check{e}zmat$, for khizmat ($\underline{kh}idmat$), service; $l\check{o}khchyis$, for $l\check{o}khchis$, small (dat. sg.) (233); $l\bar{o}kyas$, for $l\bar{o}kas$, to the son (228); nyistn, for nistn, he emerged, but $n\check{e}sh\ g\bar{o}$, he absconded (II); pananyi, for panani (II); tyabla, for tabla or $t\check{e}bla$, then; $ty\check{e}s$ or $t\check{e}s$, to him. Similarly w or u is inserted in $ghw\ddot{o}r^{\circ}$ or $gu\ddot{o}r^{\circ}$, mares (141), plur. of $gh\bar{o}r^{\circ}$ (139).

Epenthesis is common, but its operation is obscured by the frequent omission of $m\bar{a}tr\bar{a}$ -vowels.

When i or i-mātrā follows a, the two often become ai, as in $agg\bar{e}$ or $aigg\bar{i}$, before (90); bainți, for banți, having divided; $gaiba-d\bar{e}ra$, a sheepfold (II), as compared with Kāshmīrī $gabi-d\bar{e}ra$; laig, they began, for lag^i (II). Sometimes we have i instead of ai, as panin (II), for $pana\tilde{n}^i$, own (fem.).

When the same vowels follow \bar{a} , the most common change is to ai, as in *chapṛais*, for *chapṛāsī*, an orderly (II); *phāiri*, for *phāri*, he will strike (197), but *phāir-kēri*, for *phāri-kēri*, having struck (178); wail (fem.), for wāli (cf. Kāshmīrī woll, for wāli, masc.), a ring. At other times there is no epenthesis shown in writing, as in *rahnawālis*, to a dweller.

When these vowels follow \tilde{o} , the sounds vary. We have $b\tilde{o}^i li$, for $b\tilde{o}l^i$, speech (II); $t\tilde{o}ipa-p\tilde{a}t$, for $t\tilde{o}pi-p\tilde{a}t$, on the hat (II); $gh\tilde{o}_{l}r^i$, a mare (139), and $ghw\tilde{o}_{l}r^i$, mares (141).

For u followed by i-mātrā, we have $hu^i nn^i$, for $h\bar{u}\tilde{n}^i$, a bitch (147).

When the verbal termination u is followed by the suffix n, it becomes \ddot{u} , as in huntün, he heard; dyutün, he gave; prustün, he asked; manaltünsō, he persuaded him. Similarly, from $j\bar{o}$, we have $j\ddot{u}n$, he said, and from $k\bar{o}$, $k\ddot{u}\tilde{n}$, he made. The origin of this \ddot{u} is uncertain. It may be due to epenthesis, if we assume that the n represents an original ni as in the neighbouring Sirājī. We may add here the form such as $k\bar{u}h_l\ddot{u}n$, to daughters, in the plural of the third declension.

Before u-mātrā there are also varying changes. Sometimes there is no epenthesis, as in $gh\bar{o}r^u$ (68, 138), a horse. At other times the mātrā-vowel is simply transferred to the preceding syllable, as in $m\bar{v}^u n$, my, $t\bar{v}^u n$, thy, for $m\bar{v}^u$, $t\bar{v}^u$, respectively. More often it becomes a full u, as in $b\bar{a}run$, for $b\bar{a}ran^u$ (Ksh. pl. $b\bar{a}ran^i$), a brother; $ju\bar{a}nmut$, for $ju\bar{a}nmut^u$, good; $l\bar{e}ug$, for lag^u , he began (II); samuztu, for $samaz^utu$, he became. If \bar{a} precedes, it generally becomes au, as in $\bar{a}ht\bar{u}$ or $auht\bar{u}$ (for $\bar{a}h^utu$), he was; aun, for $\bar{a}n^u$, bring ye; laug, for $l\bar{a}g^u$, clothe ye; maul, for $m\bar{a}l^u$, a father. In $w\bar{o}t$, for $w\bar{a}t^u$, he arrived, the \bar{a} has become \bar{o} , not au. Sometimes we get the Kāshmīrī changes of a to au, as in au, for au, he remained (II); au, for au, a man (51). As other forms of this epenthesis we can note au (Kāshmīrī au), (for how much) time, in the Parable, and au0 au1 au2 au2 au3 au4 au3 au4 au4 au4 au4 au5 au6 au6 au6 au6 au6 au7 au8 au9 au

Consonants.—The consonantal system is on the whole the same as that of Kāshmīrī, but there are many irregularities due to the influence of the neighbouring Western Pahārī and Lahndā.

There is an interesting example of the elision of an initial v in the word $y\ddot{u}th$, fat, as compared with the Kāshmīrī vyoth. The fricatives ts and ts occur, but the ts is pronounced with a more dental sound than in Kāshmīrī, the tip of the tongue making contact at a point nearer the teeth than is customary in that language. Moreover, as we shall see lower down, it is liable to be interchanged with ts.

In the Western Pahārī dialects, especially in Kiūthalī and those related to it, aspiration is frequently transferred. So, in Pŏgulī, we have $\bar{a}ht$, eight (8), for $\bar{a}th$; $\bar{a}ht$, a hand (56), for $\bar{a}th$ or $h\bar{a}th$ (Kāshmīrī atha); and $kurh\bar{\iota}$ or $kuhr\bar{\iota}$, a daughter (56). An h is inserted in halhal for $hal\bar{a}l$, lawful.

In Kāshmīrī when a word ends in a hard consonant (k, ch, ts, t, t, or p) this is always aspirated in the Hindī dialect (see p. 267). This aspiration is nowhere indicated in the writing of the Pŏgulī specimens. In Dardic languages, including Kāshmīrī, there are no aspirated sonant consonants (gh, jh, dh, dh, or bh). When these occur in words occurring in Indian languages, the Dardic languages employ the unaspirated letter, as in the Kāshmīrī gur^u , Hindī $gh\bar{o}r\bar{a}$, a horse. In Pŏgulī, under the influence of the neighbouring Pahārī and Lahndā, these sonant aspirates are usually retained. Thus, we have ubha, up (86); $dha\tilde{u}nu$, to walk (224); ghar, a house (67); $gh\bar{o}r^u$, a horse (68). But the Dardic influence also exists. Thus, while in the Parable we have gharus, (he arrived) in the house; we have in sentence 233, garus-manz. So also we have ginnu, to take (240), while the Lahndā form is $ghinn\bar{a}$.

Attention has often been called to the tendency in the Dardic languages to harden a sonant consonant. So, in Pŏgulī, we have dant, a tooth (37), representing the Persian dand. Again in II we have $d\bar{a}nt$, oxen, where even Kāshmīrī has $d\bar{a}nd$.

In Kāshmīrī certain consonants are liable to change under the influence of a following mātrā-vowel (see p. 266). Thus, before y or \ddot{u} -mātrā, l becomes j, and t becomes \underline{ts} . We see traces of this in Pŏgulī, where the dyut, given, becomes $di\underline{ts}\bar{e}n$, for $dity\bar{e}n$, they were given by him. At another time t becomes ch instead of \underline{ts} , as in $ju\bar{a}nmacha$, the feminine plural of $ju\bar{a}nmut$, good. In Kāshmīrī, the feminine of $w\delta l^u$, a ring, is $w\ddot{o}j^{\ddot{u}}$, a small ring. In the corresponding feminine word in Pŏgulī the l is not changed to j, and we have wail.

In Kāshmīrī, n is liable to become \tilde{n} before y or \tilde{u} -mātrā (see p. 267). There are no certain traces of this in Pŏgulī, although in one place in the second specimen ny

¹ I am indebted to a private letter of Mr. Bailey's for this information.

PŎGULĪ. 405

may perhaps represent \tilde{n} in the feminine pananyi ($t\tilde{o}ipa-p\tilde{a}t$). There is one occurrence of \tilde{n} which I am unable to explain. The suffix of the agent singular of the pronoun of the third person is n, as in $j\tilde{u}n$, it was said by him. But in the word $k\tilde{u}\tilde{n}$, it was made by him, the n has become \tilde{n} .

DECLENSION.—We can clearly trace the four declensions of Kāshmīrī, although complete sets of forms are not available for all four. At the same time it must be observed that there seems to have been considerable intermingling of the first and second declensions. As a sample of the first declension we may take $m\bar{a}l$, property, which is thus declined:—

	Sing.	· Plur.
Nom.	$mar{a}l$	$mar{a}l.$
Accdat.	mālas, mālus	mālan.
Gen.	māla-sun, mālu-sun	mālan-sun.
Agabl.	$mar{a}li$	$mar{a}$ l $reve{e}i$.

As examples of the various cases we may quote the following:-

Sing. nom.—awāz, in tin dhōlan-sun nasni-sun awāz huntün, he heard the sound of singing and dancing.

māl, in tin dyut tiauan-manza panun māl bainți, he divided his property among them.

Acc.-dat.— dēras, in gaiba-dēras-manz pē shāl, a jackal fell upon the sheepfold (II).

Sāhabas, in Sāhabas-sīt āhta trīh mahna, thirty men were with the Sāhib (II). Cf. Sāhabus, below.

āhtus, in tyĕswĕ āhtus-manz wail, a ring on his hand.

dukāndārus, in gāma-sanni dukāndārus-laba, from a shopkeeper of the village (241).

garus, in mī"n maul chhu tes lökhchyis garus-manz rahti, my father lives in that small house (233).

gharus, in su panani gharus wõt, he arrived at his house.

janglus and lutus, in Sāhab rohan janglus lutus-pāt, the Sāhib stayed at the head of the forest (II). Here, as elsewhere, the dative janglus is used instead of the genitive.

luțus, in bāla-sanni luțus-pät, on the top of the hill (228).

mālus, in tīna mālus yō mī hissa yĕau, what share may come to me of thy property. Here again the dative is used for the genitive.

mulkus, in pē tyĕs mulkus-manz sakht kāl, a severe famine fell in that land.

 $t\bar{e}r$ -ki mulkus rahnawālis-laba gō, he went near an inhabitant of that (lit. of there) country. Here again the dative is used for the genitive.

pahrus, in rohun pahrus-ta, he remained (under water) for a watch (II).

Sāhabus, in din dusan rahnus Sāhabus-sīt, I stayed for two days with the Sāhib

(II). Cf. Sāhabas, above. $t\bar{a}pus$, in $t\bar{a}pus$ (for $t\bar{a}pus$ -manz) $\bar{a}ht\bar{u}$ $b\bar{i}mi$ gatshti, he was sitting in the sun (II)

We have seen above that the word ghar or gar, a house, is declined regularly. has also irregular forms of the dative, as in the following:-

chhitti ghōṛa-sun zīn chhu gi-manz, in the house is the saddle of the white horse

(226). Similarly gi-manz in 223.

 $a\widetilde{u}$ geo gatshaha na, I will not go to the house. $a\widetilde{u}$ ās giō-nish, I returned home

Ag.— $S\bar{a}habi$, in $S\bar{a}habi$, $g\ddot{o}nthtu\ dast\bar{a}r\ pananyi\ t\bar{o}ipa-p\tilde{a}t$, the $S\bar{a}hib\ tied\ a\ turban$ on (i.e. round) his hat (II).

Plur. nom.—guāl, in guāl dah peōas raṛa, ten shepherds rushed at it (II).

mözūr, in kyĕta mözūr chhyi, how many servants there are.

Similarly the plural of $d\bar{a}nt$, a bull, is $d\bar{a}nt$ (II, and 144).

The word rupaī, a rupee, is irregular. We have rupaē in:—

īttēk kīmat thī ḍāī rupaē, the price of this is two and a half rupees (232); and rupia (apparently 2nd declension) in:-

yaũ rupĩa gyun tyĕs, take these rupees from him (235). Rupaē may be borrowed

Acc.-dat.—dusan, in din dusan rahnus Sāhabus-sīt, I stayed two days with the

dostan, in au kara khushi panana dostan-sit, I may make rejoicing with my

gazan, in sū-ī gō dahan gazan ḍuggu, he verily went down (dived) for ten yards (II).

khŏran, in khŏran-manz jōr, a pair of shoes on the feet.

naukaran, in māli pananan naukaran jün, the father said to his servants.

pahran, in Sāhab āhtū raṭṭi mī din pahran, the Sāhib was keeping me for two watches (II).

Ag.-abl.—dusĕi, in manĕi dusĕi-pata lökhchyĕ löki sauruī kō jama, after a few days the younger son collected everything.

kōrṛĕi (nom. sing. kŏrṛa), in mī tyĕswĕ lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

Examples of the Genitive will be given under adjectives.

The second declension is of nouns ending in u-mātrā, or originally ending in that letter. In most cases the u-mātrā has been dropped, though it usually has left traces of its former existence in the shape of epenthetic changes of the preceding vowel. As examples I give the declension of two nouns, maul, corresponding to the Kāshmīrī $m \delta l^u$ a father, and mohan, corresponding to the Kāshmīrī mahanyuv, a man.

monar, com	Sing	Plur.
Nom.	maul mālis, mālas	$mar{a}l^a, mar{a}la. \ mar{a}lan.$
Accdat. Gen. Agabl.	māli-sun, māla-sun māli, māla	mālan-sun. mālan.
Nom. Accdat.	mohan mahnis, mahnas	mahna. mahnan.
Gen. Agabl.	mahni-sun, mahna-sun mahni	mahnan-sun. mahnan.

PŎGULĪ. 407

The forms for the Ag.-abl. plural are given on the authority of Mr. Bailey's grammar. On the analogy of the first declension we should expect something like mālyēi and mahnyēi.

We have one example of a vocative singular in $l\bar{o}ka$, $tu\ chhus\ ham \bar{e}sha\ m\bar{i}-s\bar{i}t$, son, thou art ever with me.

Words ending in mut, like $n\bar{a}l\bar{m}ut$, an embrace, make the dative singular like $n\bar{a}lmatis$, $n\bar{a}lmatas$, and so on.

The dative singular, as given above, ends in is or as. These are sometimes written yis and yas, as in lokhchyis, to the small (house); lokyas, to the son.

Similarly, we find the i or a of the agent-ablative represented by $y\check{e}$ in $l\check{o}khchy\check{e}$, by the younger.

The following are examples of the above cases, so far as they are available, except the genitive singular and plural. The genitive will be discussed under the head of adjectives.

Sing. nom.—maul, in maul gotho nyistu, the father came outside.

lok, in au chhus na laik të n lok zaptiam, I am not worthy that they may call me thy son.

nālmut, in tyĕs nālmut kūsnē, he made an embrace to him.

Acc.-dat.—ghōris, in yĕs ghōris ummur kyit thī, how much age is to this horse? i.e. how old is this horse (221)?

ghōris and kŏlis, in su chhu ghōris- $p\tilde{a}t$ kŏlis-khal bīma, he is seated on a horse under a tree (230).

mālis, in lõkhchyĕ panani mālis jō, the younger said to his father.

aŭ mālis-laba gatsha, I will go to my father.

tin panani mālis dyutün jawāb, he gave answer to his father.

rahnawālis, in mulkus rahnawālis-laba gō, he went to an inhabitant of the country.

mahnas, in yakis mahnas dih loka ahta, to a certain man there were two sons.

lŏkhchyis, in mī^un maul chhu tĕs lŏkhchyis garus-manz rahti, my father lives in that small house (233).

· lōkyas, in mī tyĕswĕ lōkyas phārtumut chhu, I have beaten his son (228).

Ag.-abl. $-l\bar{o}ki$, in $l\bar{o}ki$ $j\bar{o}as$, the son said to him (I have sinned).

mīni pēchōw-sani lōki chhu tyĕsyĕ bīna-sīt byāh kyĕmut, the son of my uncle has made marriage with his sister (225).

lõki and lõkhchyĕ, in lõkhchyĕ lõki saurūī kō jama, the younger son collected everything.

lökhchyĕ, in lökhchyĕ paṇani mālis jō, the younger said to his father.

māli, in māli pananan naukaran jün, the father said to his servants.

lassa, in lassa jamadār pēntu aũ, I was called by Lassu Jamadār (II).

Plur. nom.— $gh\bar{o}r^a$, horses (140), $hunn^a$, dogs (148), $katl^a$ or katla, goats (152).

hunna, in hunna wih të guāl dah pēōas raṇa, twenty dogs and ten shepherds rushed at it (II).

lōka, in yakis mahnas dih lōka āhta, to a certain man were two sons.

tīni māla-sani gi-manz kēta lōka chhē, how many sons are there in thy father's house (223)?

mahna, in Sāhabas-sĩt āhta trīh mahna, with the Sāhib there were thirty men (II).

hakka pēntin tsailīh mahna, he sent forty men to the beat (II).

The third declension consists of feminine nouns originally ending in i-mātrā or ü-The final mātrā-vowel is either dropped or becomes $\bar{\imath}$. As an example we give the declension of $k\bar{u}h\gamma\bar{\iota}$, a daughter, equivalent to the Kāshmīrī $k\bar{u}r^{\bar{\iota}}$. Some of the forms are taken from Mr. Bailey's Grammar, and others from the specimens. ples of the genitive will be found under the head of adjectives :-Plur.

Sing. kūhra, kūhra. $k\bar{u}hr\bar{\imath}$ Nom. kūhṛün, kūhṛan. $k\bar{u}hri,\;k\bar{u}hra$ Acc.-dat. kūhrün-sun, kūhran-sun. kūhṛi-sun, kūhṛa-sun Gen. kührün, kühran. kūhrī, kūhra Abl.

Examples are the following:—

 $gh\bar{o}r^i$, a mare (139), pl. nom. $ghu\ddot{o}r^a$ or $ghw\ddot{o}r^a$ (141); hu^inn^i , a bitch (147); pl. nom. $huny^a$ (149).

Acc.-dat.—tōipa (Kāshmīrī sing. nom. tūpi), in Sāhabi gönthtu dastār pananyi $t\bar{o}ipa$ - $p\tilde{a}t$, the Sāhib tied a turban on (i.e. round) his hat (II).

charhi (sing. nom. charh, 43), in tyĕsyĕ charhi-pãt zīn li, put the saddle upon his back (227).

khēti (Kāshmīrī sing. nom. khīti), in tin pyēntu panani khēti-manz, he sent him into his field (to feed swine).

waigi, in züțh lok waigi-manz auhtū, the elder son was in the field.

Ag.-abl.—gaiba (Kāshmīrī sing. nom. güb", a ewe), in gaiba-dēras-manz pē shāl, a jackal got into the sheepfold (II). This word was originally gabi, and the final i became reflected back into the first syllable by epenthesis.

Plur. acc.-dat.—kanjriin, in tī"n lōk, yin kō tī"n māl kanjriin-sīt kharāb, thy son

who destroyed thy property with harlots.

The fourth declension consists of those feminine nouns that originally ended in any letter except i-mātrā or ü-mātrā. Sufficient materials are not available for a complete paradigm, but the following examples occur :--

Sing. acc.-dat. - bīna (sing. nom. bēan, 50), in mīni pēchow-sani loki chhu tyĕsyĕ bīna-sĩt byāh kyĕmut, the son of my uncle has made a marriage with his

sister (225).

Abl.—bīna, in bīna-khota bŏr chhu, he is taller than the sister (231).

wata (Kāshmīrī base wat, sing. nom. wath), in wat-wata tāp āhtū sakht, on the way the sunshine was strong (II).

Plur. nom.—hīma (Kāshmīrī hĕma, sing. nom. hĕm), in yaũ hīma sor āhta, the husks which the swine did eat.

Abl. - razan (Kāshmīrī sing. nom. raz), in razan-sīt gathin, bind him with ropes (236).

 $g\bar{a}\tilde{u}$, a cow, has its plur. nom. $g\check{o}itri$ (143, 145).

Postpositions.—These are very like those used in Kāshmīrī. Some govern the dative and some the agent-ablative. The following is a list of the more important postpositions occurring in the specimens, with the cases they govern:-

khal, beneath (dat.).

kichi, kyichi, or kichya, for (dat. or abl. or abl. of gen.). Cf. Kāshmīrī kyut", fem. kits".

laba, near, from near (dat.). Equivalent to the Hindī pās and pās-sē.

manz or manza, in, into, among, from in (dat.). In Kāshmīrī manza means only 'from among' $(m\tilde{\tilde{e}} - s\tilde{e})$, but in the one case in which it occurs in the Pŏgulī parable it simply neans 'among.'

 $p\tilde{a}t$, upon (dat.).

 $p\widetilde{a}ta$, from on, from (ag.-abl.).

pata, after (ag.-abl.).

pöth or paith, like (? ag.-abl.). Kāshmīrī pöth.

 $s\tilde{\imath}t$ or $s\tilde{u}t$, with, together with (dat.); with, by means of (ag.-abl.). Kāshmīrī $s\bar{u}ty$.

 $t\tilde{a}$, up to, during (dat.). Kāshmīrī $t\tilde{a}$ n.

The following are examples of their use:

su chhu kŏlis-khal bīma, he is seated under a tree (230).

tyěs-kichi tyěs miltu, for this (i.e. because) he has got him (safe and sound).

Sāhab āhtū raṭti mī bō'li-sani (dat. of gen.) kyichi, the Sāhib was keeping me for the language (i.e. to study the language) (II).

tin pyēntu sōr gās khālalně (abl.)-kichya, he sent him for giving swine grass to eat.

tī kyĕmut chhu tyĕswĕ (abl. of gen.)-kichya mŏt wŏts halhal, thou hast made for his sake the fatted calf lawful (i.e. hast slaughtered it).

 $t\bar{e}r$ -ki mulkus $rahnaw\bar{a}lis$ -laba $g\bar{o}$, he went near $(p\bar{a}s)$ an inhabitant of that country.

aũ khaṛta mālis-laba gaṭṣha, I will arise, I will go to (pās) my father.

 $g\bar{a}ma$ -sanni $duk\bar{a}nd\bar{a}rus$ -laba, from $(p\bar{a}s$ - $s\bar{e})$ a shopkeeper of the village (241).

pē tyĕs mulkus-manz sakht kāl, there fell a mighty famine in that country.

chhitti ghōṛa-sun zīn chhu gi-manz, in the house is the saddle of the white horse (226).

dūr mulkus-manz kaujūin safar, he made a journey into a far country.

tin pyēntu panani khēti-manz, he sent him into his field.

tin dyut tiauan-manza panun māl bainți, he divided his property among them.

khūhus-manz pāī kāri, draw water from (mē-sē) the well (237).

Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban on (i.e. round) his hat (II).

 $S\bar{a}hab\ rohan\ janglus\ lutus-p\tilde{a}t$, the Sāhib remained on (i.e. at) the head of the forest (II).

su chhu ghōris-pãt bīma, he is seated on a horse (230).

ita-pãta Kashīr-tã kituk chhu dūr, how far is it from here $(yah\tilde{a}-par-s\tilde{e})$ to Kashmīr (222)?

maněi dusěi-pata lŏkhchyě lōki sauruī kō jama, after a few days the younger son collected everything.

tin-pata kharuttu të ao malis-laba, after that he arose and came to his father.

mahna, in Sāhabas-sīt āhta trīh mahna, with the Sāhib there were thirty men (II). hakka pēntin tsailīh mahna, he sent forty men to the beat (II).

The third declension consists of feminine nouns originally ending in i-mātrā or ü-The final mātrā-vowel is either dropped or becomes $\bar{\imath}$. As an example we give the declension of $k\bar{u}hr\bar{i}$, a daughter, equivalent to the Kāshmīrī $k\bar{u}r^{\bar{u}}$. Some of the forms are taken from Mr. Bailey's Grammar, and others from the specimens. ples of the genitive will be found under the head of adjectives :-

	Sing.	r m.
Nom.	$kar{u}hrar{\imath}$	kūhṛa, kūhṛ".
Accdat.	kūhri, kūhra	kūhṛün, kūhṛan.
	kūhri-sun, kūhra-sun	kūhṛün-sun, kūhṛan-sun.
Gen.	•	kūhrün, kūhran.
Abl.	kūhṛī, kūhṛa	1000101 10109 1001111

Examples are the following:—

 $gh\bar{o}r^i$, a mare (139), pl. nom. $ghu\ddot{o}r^a$ or $ghw\ddot{o}r^a$ (141); hu^inn^i , a bitch (147); pl. nom. $huny^a$ (149).

Acc.-dat.—tōipa (Kāshmīrī sing. nom. tūpi), in Sāhabi gönthtu dastār pananyi $t\tilde{o}ipa-p\tilde{a}t$, the Sāhib tied a turban on (i.e. round) his hat (II).

charhi (sing. nom. charh, 43), in tyĕsyĕ charhi-pat zīn li, put the saddle upon his back (227).

khēti (Kāshmīrī sing. nom. khīti), in tin pyēntu panani khēti-manz, he sent him into his field (to feed swine).

waigi, in züth lok waigi-manz auhtū, the elder son was in the field.

Ag.-abl.—gaiba (Kāshmīrī sing. nom. güb", a ewe), in gaiba-dēras-manz pē shāl, a jackal got into the sheepfold (II). This word was originally gabi, and the final i became reflected back into the first syllable by epenthesis.

Plur. acc.-dat.—kanjrün, in tī"n lōk, yin kō tī"n māl kanjrün-sīt kharāb, thy son who destroyed thy property with harlots.

The fourth declension consists of those feminine nouns that originally ended in Sufficient materials are not available for a comany letter except i-mātrā or ü-mātrā. plete paradigm, but the following examples occur:--

Sing. acc.-dat. - bīna (sing. nom. bēan, 50), in mīni pēchōw-sani lōki chhu tyĕsyĕ bīna-sĩt byāh kyĕmut, the son of my uncle has made a marriage with his

sister (225).

Abl.— $b\bar{\imath}na$, in $b\bar{\imath}na$ -khota $b\check{o}r$ chhu, he is taller than the sister (231).

wata (Kāshmīrī base wat, sing. nom. wath), in wat-wata tāp āhtū sakht, on the way the sunshine was strong (II).

Plur. nom.—hīma (Kāshmīrī hēma, sing. nom. hēm), in yaũ hīma sốr khālti āhta, the husks which the swine did eat.

Abl. - razan (Kāshmīrī sing. nom. raz), in razan-sīt gathin, bind him with ropes (236).

 $g\bar{a}\tilde{u}$, a cow, has its plur. nom. $g\tilde{o}itri$ (143, 145).

Postpositions.—These are very like those used in Kāshmīrī. Some govern the dative and some the agent-ablative. The following is a list of the more important postpositions occurring in the specimens, with the cases they govern :-

khal, beneath (dat.).

kichi, kyichi, or kichya, for (dat. or abl. or abl. of gen.). Cf. Kāshmīrī kyut", fem. kits".

laba, near, from near (dat.). Equivalent to the Hindī pās and pās-sē.

manz or manza, in, into, among, from in (dat.). In Kāshmīrī manza means only 'from among' $(m\tilde{\tilde{e}} \cdot s\tilde{e})$, but in the one case in which it occurs in the Pŏgulī parable it simply neans 'among.'

 $p\tilde{a}t$, upon (dat.).

 $p\tilde{a}ta$, from on, from (ag.-abl.).

pata, after (ag.-abl.).

pöth or paith, like (? ag.-abl.). Kāshmīrī pöthi.

 $s\tilde{\imath}t$ or $s\tilde{u}t$, with, together with (dat.); with, by means of (ag.-abl.). Kāshmīrī $s\bar{u}ty$.

 $t\widetilde{a}$, up to, during (dat.). Kāshmīrī $t\widetilde{a}$ n.

The following are examples of their use:-

su chhu kŏlis-khal bīma, he is seated under a tree (230).

tyěs-kichi tyěs miltu, for this (i.e. because) he has got him (safe and sound).

Sāhab āhtū raṭti mī bō'li-sani (dat. of gen.) kyichi, the Sāhib was keeping me for the language (i.e. to study the language) (II).

tin pyēntu sor gās khālalně (abl.)-kichya, he sent him for giving swine grass to eat.

tī kyĕmut chhu tyĕswĕ (abl. of gen.)-kichya mŏt wŏts halhal, thou hast made for his sake the fatted calf lawful (i.e. hast slaughtered it).

 $t\bar{e}r$ -ki mulkus rahnawālis-laba gō, he went near $(p\bar{a}s)$ an inhabitant of that country.

aũ khaṛta mālis-laba gatsha, I will arise, I will go to $(p\bar{a}s)$ my father. $g\bar{a}ma$ -sanni dukāndārus-laba, from $(p\bar{a}s$ -sē) a shopkeeper of the village (241). $p\bar{e}$ tyĕs mulkus-manz sakht kāl, there fell a mighty famine in that country. chhitti ghōṛ²-sun zīn chhu gi-manz, in the house is the saddle of the white horse (226).

dūr mulkus-manz kaujūin safar, he made a journey into a far country.

tin pyentu panani khēti-manz, he sent him into his field.

tin dyut tiauan-manza panun māl bainți, he divided his property among them.

 $kh\bar{u}hus$ -manz $p\bar{a}\tilde{i}$ $k\bar{a}ri$, draw water from $(m\tilde{e}-s\bar{e})$ the well (237).

Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban on (i.e. round) his hat (II).

 $S\bar{a}hab\ rohan\ janglus\ lutus-p\tilde{a}t$, the Sāhib remained on (i.e. at) the head of the forest (II).

su chhu ghōris-pāt bīma, he is seated on a horse (230).

ita- $p\tilde{a}$ ta Kashīr- $t\tilde{a}$ kituk chhu dūr, how far is it from here $(yah\tilde{a}-par-s\tilde{e})$ to Kashmīr (222)?

maněi dusěi-pata lokhchyě loki sauruž ko jama, after a few days the younger son collected everything.

tin-pata kharuttu të āō mālis-laba, after that he arose and came to his father.

VOL. VIII, PART II.

kasau lōk chhu tī-pata pata dhaūti, whose boy comes behind thee (239)?

pūra-pöṭh iḍḍ chhi bharti, in a full manner (i.e. completely) they fill the belly.

tyĕs-kichi tyĕs miltu juān-paiṭh, because he got him in a good manner (i.e. safe

aŭ kara khushī panana dōstan-sīt, I may make rejoicing with my friends.

mī tyĕswĕ lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with

many stripes (228).

allakmat kār (for kāra)-sũt küñ panun māl phanā, he wasted his substance by means of evil work.

 $ita-p\tilde{a}ta$ $Kash\bar{i}r-t\tilde{a}$, from here to Kāshmīr (222). rohun $pahrus-t\tilde{a}$, he remained for a whole watch (II).

Postpositions are sometimes omitted. Thus we have $t\bar{a}pus$ for $t\bar{a}pus$ -manz in $t\bar{a}pus$ $\bar{a}ht\bar{u}$ $b\bar{\imath}mi$ $ga\underline{t}shti$, he was sitting in the sunshine (II). We shall see that the same sometimes occur with the postposition of the genitive.

Adjectives follow the example of Kāshmīrī. Those that end in, or originally ended in, u-mātrā are declined. Others, such as $d\bar{u}r$, far, or $ju\bar{a}n$, good, are not declined. Thus we have $d\bar{u}r$ mulkus-manz, in a far country.

As for declinable adjectives, it is to be noted that the syllable mut is added to an indeclinable adjective without altering the sense, and the adjective is then declinable,—the mut corresponding to the Kāshmīrī mot*, while in that language is chiefly used to form the Perfect Participle from a Past Participle. Thus, beside juān, good, we have juānmut, and beside allak, bad, we have allakmut.

The word $s\bar{a}ru$ or sauru, all, always takes emphatic $\bar{\imath}$, as in Kāshmīrī, so that the nominative singular masculine is $s\bar{a}ru\bar{\imath}$ or $sauru\bar{\imath}$.

The following is the declension of juanmut, good. It will be observed that the final t undergoes epenthetic changes in the feminine, and that the u of mut is also liable to changes parallel to those that occur in Kāshmīrī:—

		Sing.		PLUE.
	Masc.	Fem.	Masc.	Fem.
Nom.	juānm u t	j u ānmit	juānmata	juānmacha
		juānmat		
Accdat.	. juānmatis	juānmachi	$ju\bar{a}nmatan'$	$ju\bar{a}nmachan$
	juānmatas	juānmacha		columns vis-
Agabl.	. juānmati	juänmachi	juānmatan	juänmachan
~~~~ ~~	juānmata	juānmacha	juānmatēi	*

In the acc.-dat. masculine, the final s is often dropped before a noun in the dative with which an adjective is in agreement, so that juānmati or juānmata may stand for any oblique case of the singular. In the List of Words and Sentences (119ff.) the final vowel is also dropped, so that juānmat stands for all oblique cases of the singular. The

PŎGULĪ. 411

only example of this last in the Specimens is allakmat $k\bar{a}r$ - $s\tilde{u}t$ $k\tilde{u}\tilde{n}$ panun $m\tilde{a}l$ phan \bar{a} , he destroyed his property by evil work.

Similarly, in the masculine plural the final n of the acc.-dat. is sometimes dropped, so that we get $ju\bar{a}nmata$ instead of $ju\bar{a}nmatan$. The same is probably the case in the ag.-abl. and in both cases of the feminine plural, but no examples of this are forth-coming.

As examples of declinable adjectives we can quote the following:-

Masculine sing. nom.— $ju\bar{a}nmut\ mohan$, a good man (119); allakmut $l\bar{u}k$, a bad boy (129).

sauruī, in lŏkhchyĕ lōki sauruī kō jama, the younger son collected all. yĕbla küñ sauruī māl kharch, when he had expended all the property.

sāruī, in sāruī chīj yu chhu mī"n, su chhu tī"n, everything which is mine is thine.

Acc.-dat.—lŏkhchyis (for lŏkhchis), in mī^un maul chhu tĕs lŏkhchyis garus-manz rahti, my father lives in that small house (233).

panani (nom. panun), in yabla su panani gharus wōt, when he arrived at his own house.

lökhchye panani mālis jō, the younger (son) said to his father.

 $m\bar{\imath}na$ (nom. $m\bar{\imath}^{\imath}n$), in $m\bar{\imath}na$ $m\bar{a}lis$ $ky\bar{e}ta$ $m\bar{o}zur$ chhyi, how many servants there are to my father.

 $t\bar{\imath}na$ (nom. $t\bar{\imath}^{\imath}n$), in $t\bar{\imath}na$ $m\bar{a}lus$ $y\bar{o}$ $m\bar{\imath}$ hissa $y\bar{e}au$, the share of thy property which comes to me.

We have the acc.-dat. agreeing with a genitive singular in :-

chhitti ghōṛa-sun zīn, the saddle of the white horse (226).

tīni māla-sani gi-manz, in thy father's house (223).

Ag.-abl. – lŏkhchyĕ (for lŏkhchi), in lŏkhchyĕ lōki sauruī kō jama, the younger son collected all.

tīni māli yüth wŏts halhal küñ, thy father made the fatted calf lawful (i.e. slaughtered it).

We have a Vocative singular in $m\bar{n}na$ $l\bar{o}ka$, my son (thou art always with me). Plur. nom.— $ju\bar{a}nmat$ mahna, good men (124).

Acc.-dat.—pananan, in māli pananan naukaran jün, the father said to his servants. panana, in aũ kara khushī panana dōstan-s̄t, I may make merry with my friends.

Ag.-abl.—shāhṭĕi, in mī tyĕswĕ lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

Fem. sing. nom.—juānmit kurhmahn, a good woman (128); allakmit kuhṛī, a bad girl (131).

panin (masc. panun), in panin bō'li zŏp, speak thine own language (II).

tīni (masc. tīn), in kĕt kuāl khyĕzmat tīni kēmī, tĕ zāt tīni kath balti na mī, for how long did I do thy service, and never disobeyed thy word.

Acc.-dat.—panani, in tin pyēntu panani khēti-manz, he sent him into his field. pananyi, in Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat (II).

Plur. nom.—juānmacha kurhmahnya, good women (130).

Comparison is made, as in Kāshmīrī, with khota (cf. 133-7). Thus, tesau bārun tēsēi bīna-khota bör chhu, his brother is taller than his sister (231).

sārinī-khota dādd juān aun, bring ye the best garment of all.

The earlier numerals are given in the List of Words. The dative of yakh, one, is yakis, as in:—

yakis mahnas dih lõka ähta, to one (i.e. a certain) man were two sons. yakis naukaras dyutün sad, he called a certain servant.

The dative of dih, two, is din, as in: -

din dusan rahnus Sāhabus-sīt, for two days I remained with the Sāhib (II).

Sāhab āhtū rāt raṭti mī din pahran, the Sāhib kept me at n ight for two watches (II).

The dative of dah, ten, is dahan, as in:—

sū-ī gō dahan gazan, he verily went for ten yards (II).

Genitive.—Corresponding to the Kāshmīrī sond, the genitive postposition is sun. This is used with all nouns, both singular and plural. There do not appear to be any forms corresponding to the Kāshmīrī hond or un. We see a trace of the Kāshmīrī uk, in tēr-ki, of there, in tēr-ki mulkus rahnavālis-laba gō, he went near an inhabitant of the country of there, i.e. of that country. Similarly we have it tēk, of that, in 232. In all other cases, the genitive postposition is sun. As in Kāshmīrī, this sun governs the dative, and before it, again as in Kāshmīrī, the final s of the masculine dative is dropped.

Sometimes the dative alone is used as a genitive without the sten. Thus we have $t\bar{e}r-ki$ mulkus, of that country, just quoted. Similarly janglus, in Schech rohan janglus lutus- $p\tilde{a}t$, the Sāhib remained at the head of the forest (II), and $t\bar{e}$ me mulus $y\bar{o}$ $m\bar{e}$ hissa $y\bar{e}au$, the share of thy property which may come to me.

The postposition sun is, of course, an adjective, and is declined like juanmut. Its accusative dative singular is sanis, and its agent ablative is sani or sanni. As usual with adjectives the final s of sanis is usually dropped, so that we get sani or sanni for all oblique cases of the masculine singular. No examples are available for the masculine plural or for the feminine of sun.

The following examples occur of the genitive singular :-

 $gh\bar{o}r^a$ -sun, in chhitti $gh\bar{o}r^a$ -sun zīn chhu gi-manz, in the house is the saddle of the white horse (226).

Khudā-sun, in mī kō Khudā-sun gunā, I did a sin of (i.e. aga inst) God.

dhōlan-sun (gen. plur.) nasni-sun (gen. sing.) awāz hunt ün, he heard the sound of drums and of dancing.

bāla-sanni, in bāla-sanni luṭus-pāt su chhu gallas gās khelled, he is grazing cattle on the top of the hill (229).

gāma-sanni, in gāma-sanni dukāndārus-luba, from a shopkeeper of the village (241).

māla-sani, in tīni māla-sani gi-manz kēta lōka chhē, how many sons are there in thy father's house (223)?

pěchow-sani, in mini pěchow-sani löki chhu tyěsyě bina-sit bych kyěmut, by the son of my uncle a marriage has been made with his sister (225).

We have, in dholan-sun, already quoted, an example of the genitive plural.

PRONOUNS.—The first two **Personal Pronouns** are declined as follows. In the nominative they follow Pahārī and Lahndā rather than Kāshmīrī:—

Sing.		40	I.	Thou.
	Nom.		$a \widetilde{u}$	tu.
,	Acc.-dat.	1	mī	$tar{\imath}.$
	Ag.-abl.		$mar{\imath}$	ťī.
. 0	Gen.		$m\bar{\imath}^u n, \ m\bar{\imath} u n$	$t\bar{\imath}^{\imath}n,t\bar{\imath}un.$
Plur.				
, *	Nom.		as	tus.
	${ m Accdat.}$		asan	tusan.
*	Ag.-abl.		$asreve{e}i$	trısĕi.
	Gen.		ละลน. ละลน	tzisan, tusan.

The genitives, as usual, are adjectives, and are declined as such. Thus:-

	Masc. Sing.	Fem. Sing.
Nom.	$mar{\imath}^u n$	ท ะ กักะ์.
Accdat.	$m\bar{\imath}ni(s),m\bar{\imath}na(s)$	nzīni, mīna.
Agabl.	$m\bar{\imath}ni,m\bar{\imath}na$	mīni, mīna.

Similarly, in the plural, following the 2nd and 3rd declensions.

 $T_{\bar{\imath}}^{u}n$ is declined in the same way.

Asau is declined thus:---

				Masc.	Fem.
Sing.	Nom.			asau	asĕi.
_	Accdat.		(aswĕ	asyĕ.
	Agabl.		d	asıvĕ	$lpha$ sy $reve{e}$.
Plur.	Nom.	-	*	asau	$asy \check{e}.$

Similarly tusau.

No information is available as to the oblique cases of the plural. The following examples occur in the specimens:—

First person sing. nom. $-a\tilde{u}$ khāla, idd bhara, I may eat, I may fill my belly (with the husks that the swine were eating).

aũ chhus phāka phaṭṭi, I am dying of hunger.

aũ kharta, mālis-laba gatsha, tế tyếs aũ zapa, I will stand up, I will go to my father, and will say unto him.

Acc.-dat.—tīna mālus yō mī hissa yĕau, su mī dĕh, give to me the share of thy property which may come to me.

mī tī kara mozur-shō, make me also like a servant.

tī zöt dyit na mī tsēlya-pāṭh, thou never gavest a kid to me.

Ag.-abl.—mī kō gunā, I did sin.

zāt tīni kath balti na mī, I never disobeyed thy word.

Gen.—mī"n lōk phaṭmut auhtū, my son was dead.

yū chhu mī"n, what is mine (is thine).

(Masc. sg. dat.) — mīni pēchōw-sani lōke chhu tyĕsyĕ binā-sīt byāh kyĕmut, the son of my uncle has married his sister (225).

mīna mālis kyēta mozur chhyi, how many servants are there to my father.

As a voc. sing. we have in the Parable mina loka, my son!

Plur. nom.—as khālam, khushī karam, we may eat, we may make rejoicing.

Second person masc. sing. nom.—tu chhus hamēsha mī-sīt, thou art ever with me.

Ag.-abl.—tī zöt dyit na, thou never gavest (me a kid).

tī kas-laba tyĕs mŏl gintu, from whom didst thou buy that (240)?

Gen.—aũ chhus na lāik tī"n lōk zaptiam, I am not worthy to be called thy son.

tī"n bārun āmut-chhu, thy brother is come.

yabla $t\bar{\imath}^{\imath}n$ $l\bar{o}k$ $\bar{a}\bar{o}$, yin $k\bar{o}$ $t\bar{\imath}^{\imath}n$ $m\bar{a}l$ $khar\bar{a}b$, when thy son came, who destroyed thy property.

yu chhu $m\bar{\imath}^u n$, su chhu $t\bar{\imath}^u n$, what is mine is thine.

(Acc.-dat.)— tīna mālus yō mī hissa yĕau, the share of thy property which may come to me.

tīni māla-sani gi-manz, in thy father's house (223).

(Ag.-abl.)—tīni māli yüṭh wŏts halhal küñ, thy father killed the fatted calf.

Fem. sing. nom.—kĕt kuāl khyĕzmat tīni kēmī, tĕ zāt tīni kath balti na mī, for how much time I did thy service (fem.) and never did I disobey thy word (fem.).

The two demonstrative pronouns, also used as pronouns of the third person, are thus declined:—

Sing.	This.	That.
Nom.	$y\check{e},yu$	su.
Accdat.	$y\check{c}s$	těs.
Gen.	$y\check{e}sau$	tësau.
Agabl.	yin	tin.
Plur.		
Nom.	$ya ilde{u}$	tiaŭ.
Accdat.	yanan	tianan.
Gen.	yanan	tiauau.
Agabl.	บลนิยัง	tiaŭëi.

The forms $t\check{e}s$ and $t\check{e}sau$ may insert a y before the \check{e} , so that we also have $ty\check{e}s$ and $ty\check{e}sau$. $Tin-\bar{\imath}$ is 'by him verily,' 'by him alone.'

The genitives, as usual, are adjectives, and tesau is thus declined:

Sing		Masc.	Fem.
O	Nom.	těsau	těsěi.
	Accdat.	těswě	těsyč.
	Abl.	těswě (?)	těsči.
Plur	•	-	
	Nom.	těsau	těsyě.

No information is available for the other cases of the plural.

The following examples occur of these pronouns:-

 $y\check{e}$,—sing. nom.— $y\check{e}$ rupa \bar{i} tyĕs dyēn, give this rupee to him (234). yu kut gō, what is this (that has) happened?

Acc.-dat.—yĕs ghōris ummur kyit thī, how much age is there to this horse (221)? Plur. nom.—yaũ rupīa gyun tyĕs, take these rupees from him (235).

No examples occur of the genitive singular or plural, as given in the above paradigm. We have on the other hand the word $\bar{\imath}tt\bar{e}k$ meaning of this in $\bar{\imath}tt\bar{e}k$ $k\bar{\imath}mat$ $th\bar{\imath}$ $d\bar{a}\bar{\imath}$ rupa \bar{e} , the price of this is two and a half rupees. We may hazard a guess that here itt is an inanimate form corresponding to the Standard Kāshmīrī dative yith, and that to this has been appended the genitive suffix k equivalent to the Kāshmīrī uk^u , vide ante, p. 281. We can, however, say nothing certain regarding one solitary example.

Su,—sing. nom.—yō mī hissa yĕau, su mī dĕh, what share may come to me, that give to me. Note that here su is used as an inanimate pronoun. There does not appear to be anything corresponding to the Kāshmīrī tih.

su samuztu lāchār, he became helpless.

su āhtū tirhūī, he was yet distant.

sū-ī gō dahan gazan duggu luṭ-bakkhī, he verily went head-downwards (dived) for ten yards (II).

Acc.-dat.—mī"n maul chhu tes lokhchyis garus-manz rahti, my father dwells in that small house (233).

pē tyĕs mulkus-manz sakht kāl, a severe famine fell in that land.

tyĕs āō tars, tĕ tyĕs nālmut kūsnē, compassion came to him, and he did to him embracing.

yĕ rupaī tyĕs dyēn, give this rupee to him (234).

tyĕs mast phāri, beat him well (236).

In yaũ rupīa gyun tyĕs, take these rupees from him (235), tyĕs has the force of the ablative.

Ag.-abl.—tin dyut panun māl, he gave his own property.

tin pyēntu panani khēti-manz, he sent him into his own fields.

tin dhōlan-sun nasni-sun awāz huntün, he heard the sound of drums and dancing.

tin-pata kharuttu, after that he arose (and came to his father).

tin-pata gō hakka, after that there was a jungle-beat (II).

tin-ī anta shāl pants, he alone killed five jackals (II).

Plur. dat.—tin dyut tiauan-manza panun māl bainţi, he divided his property among them.

Ag.-abl.—tiaũĕi khushī karnī kē, they made rejoicing.

Gen. (masc. sing. nom.)—tyĕsau züṭh lōk waigi-manz auhtū, his elder son was in the field.

tyěsau maul goțhō nyistu, his father came outside.

těsau bārun těsěi bīna-khota bör chhu, his brother is taller than his sister (231).

(Acc.-dat.) — tyěswě āhtus-manz laugthas wail, put ye a ring on his hand.

mī tyĕswē lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

(Fem. sing. acc.-dat.)—mīni pěchōw-sani lōki chhu tyĕsyĕ bīna-sīt byāh kyĕmut, the son of my uncle has made a marriage with his sister (225).

Acc.-dat.—yĕs ghōris ummur kyit thī, how much age is there to this horse (221)? Plur. nom.—yaũ rupīa gyun tyĕs, take these rupees from him (235).

No examples occur of the genitive singular or plural, as given in the above paradigm. We have on the other hand the word $\bar{\imath}tt\bar{e}k$ meaning of this in $\bar{\imath}tt\bar{e}k$ $k\bar{\imath}mat$ $th\bar{\imath}$ $d\bar{a}\bar{\imath}$ rupa \bar{e} , the price of this is two and a half rupees. We may hazard a guess that here itt is an inanimate form corresponding to the Standard Kāshmīrī dative yith, and that to this has been appended the genitive suffix k equivalent to the Kāshmīrī uk^{n} , vide ante, p. 281. We can, however, say nothing certain regarding one solitary example.

Su,—sing. nom.—yō mī hissa yĕau, su mī dĕh, what share may come to me, that give to me. Note that here su is used as an inanimate pronoun. There does not appear to be anything corresponding to the Kāshmīrī tih.

su samuztu lāchār, he became helpless.

su āhtū tirhūī, he was yet distant.

 $s\bar{u}$ - \bar{i} $g\bar{o}$ dahan gazan duggu lut-bakkh \bar{i} , he verily went head-downwards (dived) for ten yards (II).

Acc.-dat.—mī^un maul chhu tes lökhchyis garus-manz rahti, my father dwells in that small house (233).

pē tyĕs mulkus-manz sakht kāl, a severe famine fell in that land.

tyĕs āō tars, tĕ tyĕs nālmut kūsnē, compassion came to him, and he did to him embracing.

yĕ rupaī tyĕs dyēn, give this rupee to him (234).

tyĕs mast phāri, beat him well (236).

In yaũ rupīa gyun tyĕs, take these rupees from him (235), tyĕs has the force of the ablative.

Ag.-abl.—tin dyut panun māl, he gave his own property.

tin pyēntu panani khēti-manz, he sent him into his own fields.

tin dhōlan-sun nasni-sun awāz huntün, he heard the sound of drums and dancing.

tin-pata kharuttu, after that he arose (and came to his father).

tin-pata gō hakka, after that there was a jungle-beat (II).

tin-ī anta shāl pants, he alone killed five jackals (II).

Plur. dat.—tin dyut tiauan-manza panun māl bainţi, he divided his property among them.

Ag.-abl.-tiaŭĕi khushī karnī kē, they made rejoicing.

Gen. (masc. sing. nom.)—tyĕsau züṭh lōk waigi-manz auhtū, his elder son was in the field.

tyĕsau maul gŏthō nyistu, his father came outside.

těsau bārun těsěi bīna-khota bör chhu, his brother is taller than his sister (231).

(Acc.-dat.) — tyĕswĕ āhtus-manz laugthas wail, put ye a ring on his hand.

mī tyĕswĕ lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

(Fem. sing. acc.-dat.)—mīni pēchōw-sani lōki chhu tyĕsyĕ bīna-sīt byāh kyĕmut, the son of my uncle has made a marriage with his sister (225).

tyěsy
ěchar hi-pãt zīn li, put the saddle upon his back (227).

Ag.-abl.—těsěi bīna-khota, than his sister (231).

The relative prenoun yu or $y\bar{o}$, who, which, is declined like $y\check{e}$ or yu, this. Mr. Bailey gives the genitive singular as yesau. Other examples are:

Sing. nom.—tīna malus yō mī hissa yĕau, the share of thy property which may come to me.

yu chhu $m\bar{\imath}^{\imath}n$, su chhu $t\bar{\imath}^{\imath}n$, what is mine, that is thine.

Ag.-abl.— $yabla\ t\bar{\imath}^*n\ l\bar{o}k\ \bar{a}\bar{o},\ yin\ k\bar{o}\ t\bar{\imath}^*n\ m\bar{a}l\ khar\bar{a}b,\ \text{when thy son came, who des-}$ troyed thy property.

Plur. nom.—yaũ hīma sõr khālti āhta, the husks which the swine were eating.

The interrogative pronoun is kam (92), who?, with an inanimate form kut, what? (93). Its singular dative is kas, and genitive kasau. Thus:—

An. sing. dat.—tī kas-laba tyes mol gintu, from whom didst thou buy that (240)?

Gen.—kasau lok chhu tī pata pata dhaũti, whose boy comes behind thee (239)?

Inan. sing. nom.— $yu \ kut \ g\bar{o}$, what is this (that has) happened?

 $t\bar{\imath}^{\imath}n$ $n\bar{a}m$ kut chhu, what is thy name (220)?

The indefinite pronoun is $k\tilde{a}s$, anyone, as in $k\tilde{a}s$ $\bar{a}ht\bar{u}s$ na $d\bar{e}ti$, no one was giving to him. There is no information as to the remaining forms. With $k\tilde{a}s$ we may compare the Kāshmīrī kaĩsi, the oblique singular of $k\tilde{e}h$, anyone. There is no example of the word for 'anything.'

The only form of the reflexive pronoun available is the genitive panun, own, equivalent to the Kāshmīrī panun", and the Hindī apnā. It is declined as an adjective,

like juānmut. Thus:—

Masc. sing. nom.—tin dyut tiauan-manza panun māl bain!i, he divided his property among them.

Acc.-dat.-lokhchye panani mālis jo, the younger said to his father.

yabla su panani gharus wōt, when he arrived at his own house.

tin panani mālis dyutün javāb, he gave answer te his father.

Plur. acc.-dat.—māli pananan naukaran jün, the father said to his servants.

aŭ kara khushī panana (for pananan) dostan-sit, I may make rejoicing with my friends.

Fem. sing. nom.—panin boʻli zop, speak thine own language (II).

Acc.-dat.-tin pyēntu panani khēti-manz, he sent him into his field.

Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat (II).

The pronoun of quantity is ket or kituk, f. kit; m. pl. keta. As usual a y may be inserted before the e or i, so that we also have kyet, kyituk, kyit, and kyeta. amples are:-

Masc. sing. nom.—kět kuál kyězmat tîni kēmî, for how much time (i.e. for how long) did I do thy service.

ita-pata Kashīr-ta kituk chhu dur, from here how much distance is it to Kashmir (222)?

Plur. nom. - tīni māla-sani gi-manz kēta lōka chhē, how many sons are there in thy father's house (223)?.

mīna mālis kyĕta mozur chhyi, how many labourers are there to my father.

Fem. sing. nom.—yĕs ghōṛis ummur kyit thī, how much is the age of this horse (221)?

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—The present tense of the Verb Substantive follows Kāshmīrī in being based on the root achh. It is conjugated as follows in the masculine. Feminine forms are not available:—

	Sing.	Plur.	
1.	chhus	chhisam.	
2.	chhus	ch hĕth.	
3.	chhu	chhi, chhĕ	ί.

Before \check{e} or i, y may be inserted. Thus, chhyi, $chhy\check{e}$.

Examples are:-

Sing. 1st person.— $a\bar{u}$ chhus na $l\bar{a}ik$, I am not worthy (to be called thy son).

2nd person.—tu chhus hamēsha mī-sīt, thou art ever with me.

3rd person.— $yu \ chhu \ m\bar{\imath}^u n$, $su \ chhu \ t\bar{\imath}^u n$, what is mine, that is thine.

Plur. 3rd person.—*mīna-mālis kyĕta mŏzur chhyi*, how many servants are there to my father.

tīni māla-sani gi-manz kĕta lōka chhĕ, how many sons are there in thy father's house (223)?

The Past tense is conjugated as follows in the masculine. Feminine forms are not available:—

	Sing.	Plur.
1.	$ar{a}htar{u}s$	$\bar{a}hsam.$
2.	$ar{a}htar{u}s$	$\bar{a}htath.$
3.	$ar{a}htar{u}$	$ar{a}hta.$

In the singular the initial \bar{a} may be changed to au, so that we may have $auht\bar{u}s$ and $auht\bar{u}$. Examples of this tense are as follows:—

Sing. 1st person.—dānt lěhti āhtūs aũ, I was grazing oxen (II).

3rd person.— su āhtū tirhūī, he was yet far.

phatmut auhtū, gō zinda; rāutumut auhtū, yablai miltu, he was dead, he became alive; he was lost, even now he is found.

tyĕsau züth lōk waigi-manz auhtū, his eldest son was in the field.

Plur. 3rd person.—yakis mahnas dih loka ahta, to a certain man were two sons.

Sāhabas-sīt āhta trīh mahna, thirty men were with the Sāhib (II).

Sometimes we have a feminine $th\bar{\imath}$, instead of the feminine of chhu. With this we may compare the Kashṭawāṛī masculine thu. Thus, yĕs $gh\bar{o}ris$ ummur kyit $th\bar{\imath}$, how much age (fem.) is to this horse (221)? This is the only example of this verb in the specimens.

B. Active Verb.—There are traces of the three conjugations of Kāshmīrī,—but they are so indefinite that it will be most convenient to consider them as they occur. The verb employed as a model will be *phārnu*, to strike.

The Infinitive and Future Passive Participle ends in nu, as in $ph\bar{a}rnu$, to strike. Its feminine is $ph\bar{a}rn\bar{\imath}$. An example of the use of the infinitive is:—

khushī karnu tĕ khushī āsnu juān chīj gō, to do rejoicing and to become rejoiced is a good thing.

3 н

tyěsyě char hi-pät zīn li, put the saddle upon his back (227).

Ag.-abl.-těsěi bīna-khota, than his sister (231). The **relative** pronoun yu or $y\bar{o}$, who, which, is declined like $y\bar{e}$ or yu, this.

Bailey gives the genitive singular as yesau. Other examples are:

Sing. nom.—tīna malus yō mī hissa yĕau, the share of thy property which may come to me.

yu chhu $m\bar{\imath}^{\imath}n$, su chhu $t\bar{\imath}^{\imath}n$, what is mine, that is thine.

Ag.-abl.—yabla tī"n lōk āō, yin kō tī"n māl kharāb, when thy son came, who destroyed thy property.

Plur. nom.—yaũ hīma sõr khālti āhta, the husks which the swine were eating.

The interrogative pronoun is kam (92), who?, with an inanimate form kut, what? (93). Its singular dative is kas, and genitive kasau. Thus:—

An. sing. dat.—tī kas-laba tyĕs mŏl gintu, from whom didst thou buy that (240)?

Gen.—kasau lõk chhu tī pata pata dhaũti, whose boy comes behind thee (239)?

Inan. sing. nom.—yu kut gō, what is this (that has) happened?

tī n nām kut chhu, what is thy name (220)?

The indefinite pronoun is $k\tilde{a}s$, anyone, as in $k\tilde{a}s$ $\tilde{a}ht\tilde{u}s$ na $d\tilde{c}ti$, no one was giving to him. There is no information as to the remaining forms. With $k\tilde{a}s$ we may compare the Kāshmīrī kaīsi, the oblique singular of $k\tilde{e}h$, anyone. There is no example of the word for 'anything.'

The only form of the reflexive pronoun available is the genitive panun, own, equivalent to the Kāshmīrī panun, and the Hindi apnā. It is declined as an adjective,

like juanmut. Thus:-

Masc. sing. nom. -tin dyut tiauan-manza panun māl bainti, he divided his property among them.

Acc.-dat.—lökhchyĕ panani mālis jō, the younger said to his father.

yabla su panani gharus wot, when he arrived at his own house.

tin panani mālis dyutün jawāb, he gave answer to his father.

Plur. acc.-dat.-māli pananan naukaran jün, the father said to his servants.

aŭ kara khushī panana (for pananan) dostan-sīt, I may make rejoicing with my friends.

Fem. sing. nom.—panin bō'li zŏp, speak thine own language (II).

Acc.-dat.-tin pyēntu panani khēti-manz, he sent him into his field.

Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat (II).

The pronoun of quantity is ket or kituk, f. kit; m. pl. keta. As usual a y may be inserted before the e or i, so that we also have kyet, kyituk, kyit, and kyeta. Examples are :-

Masc. sing. nom.—kět kuāl kyčzmat tīni kēmī, for how much time (i.e. for how long) did I do thy service.

ita-pata Kashīr-ta kituk chhu dur, from here how much distance is it to Kashmir (222)?

Plur. nom. - tīni māla-sani gi-manz kēta loka chhē, how many sons are there in thy father's house (22%)?

mīna mālis kyēta mozur chhyi, how many labourers are there to my father.

The relative pronoun yu or $y\bar{o}$, who, which, is declined like $y\bar{e}$ or yu, this. Mr.

Bailey gives the genitive singular as yesau. Other examples are:

Sing. nom.—tīna malus yō mī hissa yĕau, the share of thy property which may come to me.

yu chhu $m\bar{\imath}^{\imath}n$, su chhu $t\bar{\imath}^{\imath}n$, what is mine, that is thine.

Ag.-abl.—yabla tī n lōk āō, yin kō tī n māl kharāb, when thy son came, who destroyed thy property.

Plur. nom.— $ya\tilde{u}$ $h\bar{\imath}ma$ $s\bar{o}r$ $kh\bar{a}lti$ $\bar{a}hta$, the husks which the swine were eating.

The interrogative pronoun is kam (92), who?, with an inanimate form kut, what? (93). Its singular dative is kas, and genitive kasau. Thus:—

An. sing. dat.—tī kas-laba tyĕs mŏl gintu, from whom didst thou buy that (240)?

Gen.—kasau lôk chhu tī pata pata dhaũti, whose boy comes behind thee (239)?

Inan. sing. nom.—yu kut gō, what is this (that has) happened?

tī"n nām kut chhu, what is thy name (220)?

The indefinite pronoun is $k\tilde{a}s$, anyone, as in $k\tilde{a}s$ $\tilde{a}ht\tilde{u}s$ nu $d\tilde{v}ti$, no one was giving to him. There is no information as to the remaining forms. With $k\tilde{a}s$ we may compare the Kāshmīrī kaīsi, the oblique singular of $k\tilde{e}h$, anyone. There is no example of the word for 'anything.'

The only form of the reflexive pronoun available is the genitive panun, own, equivalent to the Kāshmīrī panun, and the Hindī apnā. It is declined as an adjective,

like juanmut. Thus:-

Masc. sing. nom. -tin dyut tiauan-manza panun māl bainți, he divided his property among them.

Acc.-dat.-lokhchyĕ panani mālis jō, the younger said to his father.

yabla su panani gharus wot, when he arrived at his own house.

tin panani mālis dyutün jawāb, he gave answer to his father.

Plur. acc.-dat.—māli pananan naukaran jün, the father said to his servants.

aũ kara khushī panana (for pananan) dōstan-sīt, I may make rejoicing with my friends.

Fem. sing. nom.—panin bō'li zŏp, speak thine own language (II).

Acc.-dat.-tin pyēntu panani khēti-manz, he sent him into his field.

Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat

The pronoun of quantity is ket or kituk, f. kit; m. pl. ketu. As usual a y may be inserted before the e or i, so that we also have kyet, kyituk, kyit, and kyetu. Examples are:-

Masc. sing. nom.—kět kuāl kyězmat tīn' kēmī, for how much time (i.e. for how

long) did I do thy service.

ita-pata Kashīr-ta kituk chhu dur, from here how much distance is it to Kashmir (222)?

Plur. nom. — tīni māla-sani gi-manz kēta lōka chhē, how many sons are there in thy father's house (22%)?.

mīna mālis kyēta mozur chhyi, how many labourers are there to my father.

Fem. sing. nom.—yes ghōris ummur kyit thī, how much is the age of this horse (221)?

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—The present tense of the Verb Substantive follows Kāshmīrī in being based on the root achh. It is conjugated as follows in the masculine. Feminine forms are not available:—

Sing.	Plur.
1. chhus	chhisam.
2. chhus	$chhreve{e}th.$
3. chhu	chhi, chhĕ.

Before \check{e} or i, y may be inserted. Thus, $chhy\check{e}$.

Examples are:-

Sing. 1st person. $-a\bar{u}$ chhus na $l\bar{a}ik$, I am not worthy (to be called thy son).

2nd person.—tu chhus hamēsha mī-sīt, thou art ever with me.

3rd person.— $yu \ chhu \ m\bar{\imath}^u n$, $su \ chhu \ t\bar{\imath}^u n$, what is mine, that is thine.

Plur. 3rd person.—*mīna-mālis kyĕta mŏzur chhyi*, how many servants are there to my father.

tīni māla-sani gi-manz kēta lōka chhē, how many sons are there in thy father's house (223)?

The Past tense is conjugated as follows in the masculine. Feminine forms are not available:—

	Sing.		Plur.
1.	$ar{a}htar{u}s$	•	$\bar{a}hsam.$
2.	$ar{a}htar{u}s$.		$\bar{a}htath.$
3.	$ar{a}htar{u}$		$ar{a}hta.$

In the singular the initial \bar{a} may be changed to au, so that we may have $auht\bar{u}s$ and $auht\bar{u}$. Examples of this tense are as follows:—

Sing. 1st person.—dānt lěhti āhtūs aũ, I was grazing oxen (II).

3rd person.— su āhtū tirhūī, he was yet far.

phatmut auhtū, gō zinda; rāutumut auhtū, yablai miltu, he was dead, he became alive; he was lost, even now he is found.

tyěsau züth lok waigi-manz auhtū, his eldest son was in the field.

Plur. 3rd person.—yakis mahnas dih lōka āhta, to a certain man were two sons.

Sāhabas-sīt āhta trīh mahna, thirty men were with the Sāhib (II).

Sometimes we have a feminine $th\bar{\imath}$, instead of the feminine of chhu. With this we may compare the Kashṭawāṛī masculine thu. Thus, $y\check{e}s$ $gh\bar{o}ris$ ummur kyit $th\bar{\imath}$, how much age (fem.) is to this horse (221)? This is the only example of this verb in the specimens.

B. Active Verb.—There are traces of the three conjugations of Kāshmīrī,—but they are so indefinite that it will be most convenient to consider them as they occur. The verb employed as a model will be *phārnu*, to strike.

The Infinitive and Future Passive Participle ends in nu, as in $ph\bar{a}rnu$, to strike. Its feminine is $ph\bar{a}rn\bar{\imath}$. An example of the use of the infinitive is:—

khushī karnu tĕ khushī āsnu juān chīj gō, to do rejoicing and to become rejoiced is a good thing.

It will be observed that in the above we have khushī (fem.) karnu (masc.), instead of khushī karnī, as we might expect from the analogy of Kāshmīrī. Here karnu is either an error of the speaker or else either karni or karnu may be used in such a sentence, for at the conclusion of the first section of the Parable we have tiaũĕi khushĩ (fem.) $karn\bar{\imath}$ (fem.) $k\bar{e}$ (fem.), they did making rejoicing.

In the phrase khālnu khain na, he did not eat food (II), the infinitive khālnu, to eat, is used to mean 'food.'

An infinitive of purpose is obtained by putting the infinitive into the ablative case governed by the postposition kichi, kyichi, or kichya, as in tin pyēntu sor gās khālalněkichya, he sent him to give swine grass to eat. The në of khālalnë is for ni, and the form is that of the dative and ablative of khālalnu. We get the regular ni of the dative in the genitive nasni-sun awaz, the sound of dancing.

This oblique form of the infinitive is also used to form inceptive compound verbs.

These will be dealt with later on.

In some verbs, whose roots end in $\bar{\imath}$, the u of nu is epenthetically thrown into the preceding syllable, so that we get, e.g., yīun, to come, instead of yīnu, dīun, to give, instead of $d\bar{\imath}nu$, and $p\bar{\imath}un$, to drink, instead of $p\bar{\imath}nu$.

The Present Participle is formed by adding to the root. Thus, pharti, striking. Sometimes the ti is omitted, so that we get phar, as an optional form. Thus we have su chhu gallas gās khālal, he is giving cattle grass to eat (229), where khālal is used instead of khālalti. Similarly dhōra ginn (for ginti) pēsis, taking a rock I fell upon it (II). Examples of the present participle will be found under the head of the present and imperfect tenses.

Past Participle.—In Kāshmīrī, there are a certain number of verbs which form the past participle by adding t^n to the root. Such are :-

Past Participle. Infinitive. dyut". $dyun^u$, to give hyot". $hyon^u$, to take khot". khasun, to mount $l\bar{u}st^u$. lasun, to live long

In Poguli this manner of forming the past participle is largely extended, so that it has practically become the regular method. Examples are:-

Past Participle. Infinitive. antu. annu, to kill baltu. balnu, to turn dhautu. dhaunu, to walk dyut (for ditu). dīun, to give gintu. ginnu, to take gönthtű. ganthnu, to bind hunt". hunnu, to hear kharuttu. ? khartn", to stand up manaltu. manalnu, to persuade miltu. milnu, to be got nyistu. něshnu, nisnu, or nyisnu, to emerge

Infinitive.

pashun, to see pēnnu or pyēnnu, to send phirnu, to return pīun, to drink prusnu, to ask

samuznu, to become

Past Participle. pashtu. pēntu or pyēntu. phirtu. $p\bar{\imath}ut$ (for $p\bar{\imath}tu$). prustu.

samuztu.

These are all masculine, the feminine singular ends in ti, as in balti, fem. sing. of baltu.

The masculine plural ends in ti or ta. Thus, we have both anti (II) and anta (II), the masculine plural of antu; and pēnti (II), the masculine plural of pēntu. We thus see that the masculine follows the second declension of nouns.

There is no example of the feminine in the specimens. It probably follows the 3rd declension and ends in ti, so that we get the following:—

> Sing. Masc. phārtu Fem. $ph\bar{a}rti$

Plur. phārti, phārta. phārta.

Past Participle.

bin (pl. bina).

bīmi or bīma.

The plural of dyut, given, is probably diti or dita, and its feminine singular ditsi. The feminine singular of $p\bar{\imath}ut$, drunk, is $p\bar{\imath}t$.

Besides the above there are numerous irregular past participles, which may be taken as corresponding roughly to the third conjugation of Kashmiri. Such are:

Infinitive.

bīnu, to fear bīmnu or byīmnu, to sit down gatshnu, to go, to happen, to become karnu, to do, to make khālun, to eat lagnu, to begin (?) $p\bar{e}un$, to fall rahnu, to remain

gō (masc. pl. gĕō or gĕau; fem. sing. $g\bar{e}$). $k\bar{o}$ (fem. $k\bar{e}$). $kh\bar{a}\bar{o}$ (fem. $kh\bar{a}\bar{e}$). lēug (pl. laig). $p\bar{e}$ (pl. $p\check{e}\bar{o}$). rohun, rohan, or rohn (pl. rahna).

wātnu, to arrive $y\bar{\imath}un$, to come zapnu, to say

wōt. $\bar{a}\bar{o}$ (pl. aua). jō.

With zapnu, to say, we may compare the Bhadrawāhī zaunū (past participle $z\tilde{a}\tilde{u}$). and the Kashtawārī zabun (past participle zabu), both meaning 'to say.

The only cases in which a past participle, used as a participle, occur in the specimens are two examples of the past participle of bimnu, to sit down; bimi or bima, here meaning 'seated.' The examples are:

tāpus āhtū bīmi gatshti, he was going seated (i.e. he was sitting) in the sun (II). su chhu ghōris-pāt kŏlis-khal bīma, he is seated on a horse under the tree (230). VOL. VIII, PART II.

3 H 2

Examples of the use of the past participle in finite tenses will be found under the head of the past tense.

The **Perfect Participle** is formed by adding mut to the past participle. Thus, phārtumut, been struck. Thus:—

Infinitive.	Past Part.	Perfect Part.
$r\bar{a}unu$, to lose	$rar{a}utu$	rāutumut.
$y\bar{\imath}un$, to come	$ar{a}ar{o}$	$\bar{a}mut.$
Irregular are—	$kar{o}$	$ky\check{e}mut.$
karun, to do phatun, to die	?	phatmut.

Examples will be found under the head of the Perfect and the Pluperfect tenses.

It is hardly necessary to add that, as elsewhere, the Past and Perfect Participles of transitive verbs are passive in signification, and that when used in finite tenses of verbs, the subject must be put into the agent case.

The Conjunctive Participle is formed by adding to the root *i*, which is generally transferred epenthetically to the preceding syllable. To this *kėri* is usually added. Thus, āis-kěri, for āsi-kěri, having been (171), phāir-kěri (for phāri-kēri), having struck (178). In forming intensive compounds kěri is not used. Thus, dyut panun māl bainti, he divided (bainti dyut) his property. In bainti, the final *i* is not only reflected back into the preceding syllable, but is also retained. In such compounds, the final *i* is sometimes dropped, as in něsh gō, he ran away (II).

We thus get the following list of non-finite parts of the verb pharnu, to strike :-

Infinitive and Future Passive Participle.—phārnu, to strike.

Present Participle.—phārti, phār, striking.

Past Participle.—phārtu, struck.

Perfect Participle.—phārtumut, been struck.

Conjunctive Participle.—phāir-kĕri.

Coming to the finite parts of the verb, the **Imperative** in the second person singular is either the same in form as the root or may add i or a. Thus, phār, phāri, or phāra, strike thou. Irregular is děh, give thou. Examples are:—

li, in tyěsyě charhi-pat zīn li, put thou the saddle on his back (227).

zŏp (for zap), in panin bōili zŏp, speak thou thine own language (II).

kara, in mī tī kara mozur-shō, make me also like a servant.

 $dha\tilde{u}i$, in $m\bar{\imath}$ $aigg\bar{\imath}$ $dha\tilde{u}i$, walk thou before me (238).

 $k\bar{a}ri$, in $kh\bar{u}hus$ -manz $p\bar{a}\tilde{i}$ $k\bar{a}ri$, draw thou water from the well (237).

phāri, in tyĕs mast phāri, beat thou him well (236).

děh, in su mī děh, give thou that (share) to me.

The second person plural is formed by adding u to the root, but this u is epenthetically reflected into the preceding syllable. Thus, $ph\bar{a}ur$, strike ye. So:—

aun and laug, in sārinī-khota dādd juān tswohaī aun te tyes laug, bring ye quickly the best garment, and put ye it on him.

gyun (for giun), in yaŭ rupīa gyun tyĕs, take ye these rupees from him (235).

The Future Indicative, which is also used as a Present Subjunctive, is conjugated as follows:—

"I shall strike," 'I may strike," etc.

Sing.		Plur.
1. phāra	, T	phāram.
2. phārus		phāruth.
3. phairi	•	phārun.

It will be observed that the final i of the 3rd person singular epenthetically affects the preceding vowel. Other examples are ais, he will become, from $\bar{a}snu$; $g\check{e}t\underline{s}hi$, he will go, from $ga\underline{t}\underline{s}hnu$; and rih, he will remain, from rahnu. The following are more or less irregular:—

dīun, to give, has :-

	Sing.	Plar.
1.	dĕāua	 dĕauam.
2.	$d\check{e}ar{o}wus$	$d\ddot{e}ar{o}uth$.
3.	$d\check{e}u$	dēōun.

Very similarly, pīun, to drink, has:—

	Sing.			Plur.
1.	pĕōa			pēōαm.
2.	pĕōus			pĕōath.
3.	$p\bar{\imath}vi$			pĕōun.

bīnu, to fear, has 1st sing. bīwa or biūwa, and so on. yīun, to come, has:-

	Sing.	· · ·	Plur.
1.	yaua	*	yauam.
2.	yōwus		youth.
3.	yĕau		yōun.

Examples of this tense occurring in the specimens are:-

Sing. 1.—khāla and bhara, in aŭ khāla, iḍḍ bhara, I may eat, I may fill my belly (with the husks).

khaṛta, gatsha, and zapa, in aŭ khaṛta, mālis-laba gatsha, tĕ tyĕs aữ zapa, I will arise, I will go to my father, and I will say unto him.

kara, in aŭ kara khushī panana dōstan-sīt, I may make rejoicing with my friends.

Sing. 3.—yĕau, in yō mī hissa yĕau, the share which may come to me.

Plur. 1.—khālam and karam, in as khālam, khushī karam, we may eat, rejoicing we may make.

We have an irregular form which I am unable to explain in gatshaha, for gatsha, in the following:—

aũ gẽo gatshaha na, I will not go into the house. gatshaha looks like a Kāshmīrī past conditional, but the meaning of that tense will not suit.

There is one doubtful example of the **Past Conditional** in the Parable. If it is really this, then the Past Conditional is formed by taking the Present Participle alone without an auxiliary, as in a phārti, (if) I had struck. The one example is zaptiam, they may have said to me (i.e. I may be called) (thy son). Here we have a pronominal suffix added to zapti, and the form will be considered again under the head of pronominal suffixes.

The **Present** is, as usual, formed by conjugating the present participle with the present tense of the verb substantive. Thus, $a\tilde{u}$ phār chhus, or $a\tilde{u}$ phārti chhus, I am striking. The participle does not change for gender, number, or person. Examples are:—

- Sing. 3.—chhu dhaûti, in kasau lõk chhu tī pata pata dhaũti, whose boy comes behind thee (239)?
- chhu khālal, in su chhu gallas gās khālal, he is giving cattle grass to eat (229).
- chhu rahti, in mĩ^un maul chhu tes lokhchyis garus-manz rahti, my father lives in that small house (233).
- Plur. 3.—chhi bharti, in pūra-pöṭh iḍḍ chhi bharti, they are filling their bellies completely.

The **Imperfect** is similarly made with the present participle and the past tense of the verb substantive as in $a\tilde{u}$ phārti āhtūs, I was striking. Examples are:—

Sing. 1.—lěhti-āhtūs, in dānt lěhti-āhtūs aũ, I was grazing cattle (II).

Sing. 3.— $\bar{a}ht\bar{u}$ gatshti, in $t\bar{a}pus$ $\bar{a}ht\bar{u}$ $b\bar{\imath}mi$ gatshti, he was sitting in the sun (II).

āhtū raṭti, in Sāhab āhtū rāt raṭti mī, the Sāhib was keeping me at night (11).

wālti-auhtū, in Sāhab tsāt wālti-auhtū, the Sāhib was swimming (II).

zapti-āhtū, in Sāhab zapti-āhtū, the Sāhib was saying ('speak the language') (II).

Plur. 3.—yaũ hīma sõr khālti-āhta, the husks which the swine were eating.

The Past Tense differs according to whether the verb is intransitive or transitive.

In the intransitive verb the tense is formed by suffixing pronominal suffixes of the nominative to the past participle. The third person, however, takes no suffixes, being the bare past participle. Note that, unlike Kāshmīrī, Pŏgulī has a suffix for the first

person plural. Thus from gatshnu, to go, to become (past participle $g\bar{o}$), we have the following conjugation in the masculine:—

'I went,' 'I became,' etc.

	Sing.			Plur.
1.	aūs			gĕōsam.
2.	•	•		gĕōath.
3.	$gar{o}$			gĕō, gĕau.

Similarly, from $y\bar{\imath}un$, to come (past part. $\bar{a}\bar{o}$), we have :—

1.	$\bar{a}s$			$ar{a}reve{o}sam.$
2.	$\bar{a}s$		<i>\$</i>	$\bar{a}uath$.
3.	$ar{a}ar{o}$.	•		aua.

From rahnu, to remain (past part. rohun, rohan, or rohn), we have:-

1.	rahnus	·	rahnsam.
2.	rahnus		rahnath.
3.	rohun, rohan, rŏhn		rahna.

From binu, to fear, we have: -

1.	$b\bar{\imath}nus$	0.5	bīnsam.
2.	$b\bar{\imath}nus$		$b\bar{\imath}nath.$
3.	$b\bar{\imath}n$		bīna.

Examples of the use of the intransitive past are the following:-

Masc. sing. 1. $-\bar{a}s$, in $a\tilde{u}$ $\bar{a}s$ waiga-manz, I came into the field (II). dha $\tilde{u}tus$, in $a\tilde{u}$ az $d\bar{u}r$ - $t\tilde{a}$ dha $\tilde{u}tus$, I walked a long way today (224). $g\bar{o}s$, in $a\tilde{u}$ $g\bar{o}s$ $b\bar{\imath}\bar{\imath}$, I became afraid (II).

rahnus, in din dusan rahnus Sāhabus-sīt, I stayed for two days with the Sāhib (II).

Masc. sing. 3.—kharuttu and āō, in tin-pata kharuttu tĕ āō mālis-laba, after that he arose and came to his father.

gō, in tēr-ki mulkus rahnawālis-laba gō, he went to a dweller of that country.

gō zinda, he became alive.

yu kut $g\bar{o}$, what (is) this (that has) happened?

lēug, in khěll parhūī lēug dhaũni, he began to go across at the bottom (II).

miltu, in rāutumut auhtū, yablai miltu, he was lost, now he is found.

nyistu, in tyĕsau maul gŏṭhō nyistu, his father came outside, cf. nĕsh gō, he ran away, in II.

 $p\bar{e}$, in ada $p\bar{e}$ tyĕs mulkus-manz sakht kāl, then a mighty famine fell in that land.

gaiba-dēras-manz pē shāl, a jackal fell (i.e. suddenly came) into the sheep-fold (II).

phirtu, in ada khalo phirtu, then he returned below (i.e. to the plains)

rohun, etc., in rohun pahrus- $t\tilde{a}$, he remained (under water) for a whole watch

 $S\bar{a}hab$ rohan janglus lutus- $p\tilde{a}t$, the Sāhib stayed at the head of the jungle

(II).samuztu, in su samuztu lāchār, he became helpless.

wōt, in yabla su panani gharus wōt, when he arrived at his house.

Plur. 3.—tamāsha laig bālni mahna pantsā, fifty men began to watch the spec-

In the case of transitive verb, the participle, as in Hindī, does not change for person, but agrees with the object (if in the form of the nominative) in gender and number. The subject is put into the case of the agent. The subject may also be indicated, as in Kāshmīrī, by the aid of pronominal suffixes. The forms with these will be discussed under that head. Here we shall merely deal with the use of the participle with The following are examples:

A. Object masc. sing. or nominative. dyut, in tin dyut tiauan-manza panun māl bainți, he divided his property among them.

gönthtu, in Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat (II).

jō, in lökhchyĕ panani mālis jō, the younger said to his father.

kō, in lŏkhchyĕ lōki sauruī kō jama, the younger son collected everything.

mī kō guna, I did sin.

yin kō tī"n māl kharāb, (thy son), who destroyed thy property.

pyēntu, or pēntu, in tin pyĕntu panani khēti-manz, he sent (him) into his field.

Lassa Jamādār pēntu aũ, Lassu Jamādār sent me.

Object in the Accusative-Dative.—gintu, in tī kas-laba tyčs mol gintu, from whom didst thou buy that (240)? Note here that, unlike Kāshmīrī, the participle takes no suffix, although the subject is in the second person.

Object masculine plural.—anta, in tinī anta shāl pānts, he killed five jackals (II). Object feminine singular nominative.—balti, in zāt tīni kath balti na mī, I never disobeyed thy word.

kē, in tiaūei khushī-karnī kē, they made rejoicing-doing.

The Perfect tense is formed, as in Kāshmīrī, by conjugating the perfect participle with the present tense of the verb substantive. Thus:-

aũ āmut chhus, I have come; mī phārtumut chhu, I have struck. Examples

tī"n bārun āmut chhu, thy brother hath come.

tī kyĕmut chhu tyĕswĕ-kichya mŏṭ wŏts halhal, thou hast, for his sake, made the fatted calf lawful (i.e. hast slaughtered it).

mīni pěchōw-sani loki chhu tyěsyě bīna-sīt byāh kyēmut, the son of my uncle has made a marriage with his sister (225).

mī tyěswě lokyas shāhtěi korrēi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

PŎGULĪ. 425-

The **Pluperfect** is similarly made with the perfect participle and the past tense of the auxiliary verb, as in $m\bar{\imath}$ $\bar{a}ht\bar{u}$ $ph\bar{a}rtumut$, I had struck. No examples of this tense occur in the specimens. Phrases such as phatmut $auht\bar{u}$, he was dead; $r\bar{a}utumut$ $auht\bar{u}$, he was lost, do not properly fall under this head, the participles being used merely as adjectives.

Passive Voice.—According to Mr. Bailey, the passive is made by using a form such as $ph\bar{a}rani$ with the various tenses of $y\bar{\imath}un$, to come. Thus, $a\tilde{\imath}u$ $\bar{a}s$ $ph\bar{a}rani$, I was beaten; yaua $ph\bar{a}rani$, I shall be beaten. This $ph\bar{a}rani$ is the ablative of the infinitive $ph\bar{a}run$, which we shall again meet when dealing with inceptive verbs. The principle of forming the passive is therefore the same as in Kāshmīrī.

Causal Verbs.—The regular causal is made by adding al to the root. Thus, khālnu, to eat; khālalnu, to cause to eat, to feed; mannu, to heed; manalnu, to cause to heed, to persuade. Examples are:—

bāla-sanni luṭus-pāt su chhu gallas gās khālal, on the top of the mountain he is causing cattle to eat grass, i.e. he is grazing cattle (229).

tin pyēntu sor gās khālalně-kichya, he sent him to give swine grass to eat, i.e. to feed swine.

tyĕsau maul gŏṭhō nyistu tĕ manaltünsō, his father came out and persuaded him. As in India, some causals are made otherwise. Thus from phaṭnu, to die, we have phārnu, to kill, or to strike.

Pronominal Suffixes.—These are as freely used as in Kāshmīrī.

Accusative.—The suffix of the accusative of the 3rd person singular is n, as in gathin (gathi+n), bind ye him; $dy\bar{e}n (d\tilde{e}h+n)$, give it. Thus:—

tyĕs mast phāri tĕ razan-sīt gaṭhin, beat him well, and bind-him with ropes (236). yĕ rupaī tyĕs dyēn, give-it this rupec to him (234).

Dative.—The suffix of the dative of the 1st person singular is m, as in zaptiam (zapti+m), they may have said to me, i.e. they might have called me (thy son). Zapti is here probably the past conditional (see p. 422), but the form is obscure.

The suffix of the dative of the 3rd person singular is s, as in the following:—

 $k\tilde{a}s \ \bar{a}ht\bar{u}s \ (\bar{a}ht\bar{u}+s) \ na \ d\bar{e}ti$, no one was-to-him giving.

yabla hōsh ās $(\bar{a}\bar{o}+s)$, when sense came to him.

 $l\bar{o}ki j\bar{o}as (j\bar{o}+s)$, by the son it was-said-to-him (I have sinned).

dhōra ginn pēsis (pēs, I fell, +s) raṇa, taking a big stone I fell-upon-it (with) a rush (II).

guāl dah pěōas (pěō, pl. of $p\bar{e}$, fell, +s), ten shepherds fell-upon-it (II).

Agent.—The suffix of the agent of the 1st person singular is $m\bar{\imath}$, as in:— $k\bar{e}t \ ku\bar{a}l \ khy\bar{e}zmat \ t\bar{\imath}n^i \ k\bar{e}m\bar{\imath} \ (k\bar{e}, \text{ fem. of } k\bar{o}, \text{ done, } +m\bar{\imath})$, for how long time was thy service done by me.

tēr pashtumī (pashtu+mī) shāput, there was-seen-by-me a bear (II).

The suffix of the agent of the 2nd person singular is i, which, in the one example, is epenthetically reflected back to the preceding syllable, as in:—

tī zöt dyit (for dyutu+i) na mī tsēlya-pāth, thou never gavest me a kid.

phirtu, in ada khalo phirtu, then he returned below (i.e. to the plains)

rohun, etc., in rohun pahrus- $t\tilde{a}$, he remained (under water) for a whole watch

 $S\bar{a}hab$ rohan janglus luțus- $p\tilde{a}t$, the Sāhib stayed at the head of the jungle

samuztu, in su samuztu lāchār, he became helpless.

wōt, in yabla su panani gharus wōt, when he arrived at his house.

Plur. 3.—tamāsha laig bālni mahna pantsā, fifty men began to watch the spec-

In the case of transitive verb, the participle, as in Hindi, does not change for person, but agrees with the object (if in the form of the nominative) in gender and number. The subject is put into the case of the agent. The subject may also be indicated, as in Kāshmīrī, by the aid of pronominal suffixes. The forms with these will be discussed under that head. Here we shall merely deal with the use of the participle with no suffix. The following are examples:-

A. Object mase. sing. or nominative. _dyut, in tin dyut tianan-manza panun māl bainļi, he divided his property among them.

gönthtu, in Sāhabi gönthtu dastār pananyi tōipa-pāt, the Sāhib tied a turban round his hat (II).

 $j\bar{o}$, in $l\bar{o}khchy\check{e}$ panani mālis $j\bar{o}$, the younger said to his father.

kō, in lökhchyĕ lōki sauruī kō jama, the younger son collected everything.

mī kō guna, I did sin.

yin kō tī"n māl kharāb, (thy son), who destroyed thy property.

pyēntu, or pēntu, in tin pyčntu panani khēti-manz, he sent (him) into his field.

Lassa Jamādār pēntu aũ, Lassu Jamādār sent me.

Object in the Accusative-Dative.—gintu, in ti kas-laba tyes mol gintu, from whom didst thou buy that (240)? Note here that, unlike Kashmiri, the participle takes no suffix, although the subject is in the second person.

Object masculine plural.—anta, in tinī anta shāl pānts, he killed five jackals (II). Object feminine singular nominative.—balti, in zāt tīni kath balti na mī, I never disobeyed thy word.

kē, in tiaūči khushī-karnī kē, they made rejoicing-doing.

The Perfect tense is formed, as in Kāshmīrī, by conjugating the perfect participle with the present tense of the verb substantive. Thus:-

aŭ āmut chhus, I have come; mī phārtumut chhu, I have struck. Examples are:

tī"n bārun āmut chhu, thy brother hath come.

tī kyēmut chhu tyĕswĕ-kichya mot wots halhal, thou hast, for his sake, made the fatted calf lawful (i.e. hast slaughtered it).

mīni pěchōw-sani loki chhu tyěsyě bina-sit byāh kyčmut, the son of my uncle has made a marriage with his sister (225).

mī tyĕswē lōkyas shāhṭĕi kōrṛĕi-sīt phārtumut chhu, I have beaten his son with many stripes (228).

Pŏgulī. 425-

The **Pluperfect** is similarly made with the perfect participle and the past tense of the auxiliary verb, as in $m\bar{\imath}$ $\bar{a}ht\bar{u}$ $ph\bar{a}rtumut$, I had struck. No examples of this tense occur in the specimens. Phrases such as phatmut $auht\bar{u}$, he was dead; $r\bar{a}utumut$ $auht\bar{u}$, he was lost, do not properly fall under this head, the participles being used merely as adjectives.

Passive Voice.—According to Mr. Bailey, the passive is made by using a form such as $ph\bar{a}rani$ with the various tenses of $y\bar{\imath}un$, to come. Thus, $a\tilde{u}$ as $ph\bar{a}rani$, I was beaten; yaua $ph\bar{a}rani$, I shall be beaten. This $ph\bar{a}rani$ is the ablative of the infinitive $ph\bar{a}run$, which we shall again meet when dealing with inceptive verbs. The principle of forming the passive is therefore the same as in Kāshmīrī.

Causal Verbs.—The regular causal is made by adding al to the root. Thus, $kh\bar{a}lnu$, to eat; $kh\bar{a}lalnu$, to cause to eat, to feed; mannu, to heed; manalnu, to cause to heed, to persuade. Examples are:—

bāla-sanni luṭus-pāt su chhu gallas gās khālal, on the top of the mountain he is causing cattle to eat grass, i.e. he is grazing cattle (229).

tin pyēntu sor gās khālalně-kichya, he sent him to give swine grass to eat, i.e. to feed swine.

tyĕsau maul gŏṭhō nyistu tĕ manaltünsō, his father came out and persuaded him.

As in India, some causals are made otherwise. Thus from phatnu, to die, we have $ph\bar{a}rnu$, to kill, or to strike.

Pronominal Suffixes.—These are as freely used as in Kāshmīrī.

Accusative.—The suffix of the accusative of the 3rd person singular is n, as in gathin (gathi+n), bind ye him; $dy\bar{e}n (d\check{e}h+n)$, give it. Thus:—

tyës mast phāri tĕ razan-sīt gaṭhin, beat him well, and bind-him with ropes (236). yĕ rupaī tyĕs dyēn, give-it this rupec to him (234).

Dative.—The suffix of the dative of the 1st person singular is m, as in zaptiam (zapti+m), they may have said to me, i.e. they might have called me (thy son). Zapti is here probably the past conditional (see p. 422), but the form is obscure.

The suffix of the dative of the 3rd person singular is s, as in the following:—

 $k\tilde{a}s$ $\bar{a}ht\bar{u}s$ $(\bar{a}ht\bar{u}+s)$ na $d\bar{e}ti$, no one was-to-him giving.

yabla hōsh ās $(\bar{a}\bar{o}+s)$, when sense came to him.

 $l\bar{o}ki \ j\bar{o}as \ (j\bar{o}+s)$, by the son it was-said-to-him (I have sinned).

 $dh\bar{o}ra\ ginn\ p\bar{e}sis\ (p\bar{e}s,\ I\ fell,\ +s)\ rara$, taking a big stone I fell-upon-it (with) a rush (II).

guāl dah pěōas (pěō, pl. of $p\bar{e}$, fell, +s), ten shepherds fell-upon-it (II).

Agent.—The suffix of the agent of the 1st person singular is $m\bar{\imath}$, as in:— $k\bar{e}t \ ku\bar{a}l \ khy\bar{e}zmat \ t\bar{\imath}n^i \ k\bar{e}m\bar{\imath} \ (k\bar{e}, \text{ fem. of } k\bar{o}, \text{ done, } +m\bar{\imath})$, for how long time was thy service done by me.

 $t\bar{e}r$ $pashtum\bar{i}$ $(pashtu+m\bar{i})$ $sh\bar{a}put$, there was-seen-by-me a bear (II).

The suffix of the agent of the 2nd person singular is i, which, in the one example, is epenthetically reflected back to the preceding syllable, as in:—

tī zöt dyit (for dyutu+i) na mī tsēlya-pāth, thou never gavest me a kid.

2 I

The suffix of the agent of the 3rd person singular is n. Before this the termination u becomes \ddot{u} . $K\bar{o}$, made, becomes $k\ddot{u}\tilde{n}$ with this suffix.

Examples are:—

 $t\bar{e}r$ shāput antin (anti, plur. of antu, +n) āht, there eight bears were-killed-by-him (II).

yakis naukaras dyutün $(dyut^u+n)$ sad, tĕ prustün (prustu+n), a call was-given-by-him to a servant, and it-was-asked-by-him.

tin panani mālis dyutün jawāb, by him to his father answer was-given-by-him.

mith ditsen, kisses were-given-by-him. Here ditsen is for ditse + n. Ditse is the solitary example of the second past participle, masculine plural, corresponding to the Kāshmīrī ditsey.

tin dhōlan-sun nasni-sun awāz huntün, by him the sound of drums (and) of

dancing was-heard-by-him.

yabla hōsh ās, tyabla jūn $(j\bar{o}+n)$, when sense came to him, then it-was-said-by-him.

māli pananan naukaran jün, by the father it-was-said-by-him to the servants.

dūr mulkus-manz kaujūin safar, a journey to a far country was-made-by-him. The form kaujūin is obscure, although the suffix n is clear. Perhaps kauju may represent the Kāshmīrī 2nd past participle karyön, it was made.

 $kh\bar{a}lnu\ kh\bar{a}in\ (kh\bar{a}\bar{o}+n)\ na$, he did not eat food (II).

tēr allakmat kār-sũt küñ panun māl phanā, there, by evil deeds, his property was-made-by-him destroyed.

yĕbla küñ sauruī māl kharch, when all the property was-made-by-him expended. tīni māli yüṭh wŏṭs halhal küñ, by thy father the fatted calf was-made-by-him lawful.

hakka pēntin (pēnti, plur. of pēntu, +n) isailīh mahna, to the beat forty men were-sent-by-him (II).

When a suffix is added to the second person plural of the imperative, the verb abandons the imperative form and takes that of the second person plural of the Future and Present Subjunctive. Thus, the second person plural imperative of phārnu is phāru, and the second person plural future and present subjunctive is phāruth. With a suffix phāruth is used, instead of phāur, in the sense of the imperative. When the suffix is added the u of the termination uth is either dropped or reflected by epenthesis on to the preceding syllable, so that we get phārth or phāurth. Thus we have karthas (from karnu, to make), anthan (from ānnu, to bring), and lāugthas (from lāgun, to put on) in the following:—

tyĕswĕ āhtus-manz lāugthas (lāguth+s) wait . . . tĕ yüṭh wöṭs ānthan (ānuth+n), te karthas (karuth+s) halhal, put-ye-to-him on the hand a ring . . . and bring-ye-it the fatted calf, and make-ye-for-it lawful. In this karthas has practically the same meaning as karthan would have, unless it means 'make-ye-for-him' (i.e. for the son).

Double suffixes also occur, as in Kāshmīrī, but the order is more free than in that language. For instance in Kāshmīrī kor nas means 'made-by-him-for-him,' in which the suffix of the agent, n, precedes that of the dative, s. In Poguli we may have either

PŎGULĪ. 427

a form equivalent to kor*nas, or a form equivalent to *kor*san, in which the suffix of the dative precedes that of the agent. Examples are:—

tyĕs nālmut kūsnĕ $(k\bar{o}+s+n)$, to him embrace was-made-to-him-by-him. Here the suffix of the dative precedes that of the agent.

tyësau maul göṭhō nyistu të manaltünsō (manaltu+n+s), his father came outside, and it-was-persuaded-by-him-to-him. Here the suffix of the agent precedes that of the dative.

 $t\bar{e}r$ $j\bar{u}mnai$ $(j\bar{o}+m+n)$, ' $S\bar{a}hab$ $\bar{a}\bar{o}$,' there it-was-said-to-me-by-him, 'the Sāhib is come.' Here the suffix of the dative precedes that of the agent.

Compound Verbs.—We have Intensive compounds in bainti $d\bar{\imath}un$, to divide, and $n\check{e}sh\ g\bar{o}$, he ran away (II).

Inceptive compounds are formed with lagnu, to begin, conjugated with the ablative in ni of the infinitive of the principal verb. Thus:—

khěll parhūī lēug dhaŭni tamāsha laig bālni mahna pantsā, he began to go across the bottom . . . fifty men began to watch the spectacle (II).

According to Mr. Bailey **Potential** compounds are formed by conjugating hagnu, to be able, with the root of the principal verb. Thus, $a\widetilde{u}$ haga $ga\underline{ts}h$, I shall be able to go, or I am able to go.

FREE TRANSLATION OF THE FOREGOING.

I was sent here by Lassu Jamadār, the orderly. I was grazing my oxen when he told me that a Sāhib had come and that I was to speak my own language to him. I stayed two days with the Sāhib. When I arrived, the Sāhib was swimming. He went head downwards ten yards deep. Then he began to swim across the bottom and remained under water for a whole watch (three hours). Fifty people were there looking on at the fun. After that he told me to speak my own language. Before he had eaten anything, he underwent great hardships, and went on further on his march. On the way the sun was very hot. He sat down in the sunshine and said to me, 'Bravo, speak your language.' The heat of the sun was very strong, and the Sāhib tied a turban round his hat. At night the Sāhib kept me for two watches (six hours) enquiring about the language.

I came into a field, and there I saw a bear. I picked up a rock and ran at it. Then I got frightened and went home. A jackal got into the sheepfold, but twenty dogs and ten shepherds ran at it, and it ran away.

The Sāhib had thirty men with him. He alone killed five jackals. After that there was a beat in the jungle. The Sāhib sent out forty men for the beat, and he himself stayed at the top end of the jungle. He killed eight bears and four partridges, and after doing this returned to the plains.

SIRĀJĪ OF DŌDĀ.

The word 'Sirāj' means 'the Kingdom of Śiva,' and hence 'any wild mountainous country.' Such countries are naturally liable to have dialects of their own, and hence we find several Sirājs in existence, each with a distinct form of speech. Thus, there is a Sirājī in the Simla Hill States, a sub-dialect of Kiūthalī (Vol. IX, Pt. iv, p. 593). Another Sirājī is one of the Satlaj Group of sub-dialects (ib. p. 647) and yet a third is allied to Kuļuī (ib. p. 688). All these are forms of Western Pahārī.

South of the tract in which Pŏgulī is spoken, there is a further tract of hill country reaching down to river Chināb, and also called Sirāj. Here that river runs east and west. In Kashṭawār its course has been in the main from north to south, but at Barshala it turns abruptly to the west, separating Kashṭawār on the north from Bhadrawāh on the south. Some twenty miles west of Barshala, on the north bank of the Chināb, is the town of Dōdā, which may be taken as the headquarters of the Sirāj between the Pŏgulī country and the Chināb. The language of this Sirāj is therefore called the Sirājī of Dōdā.

In 1911 this Sirājī of Dodā was reported to be spoken by 14,732 people.¹ To its north lies the Pŏgulī just described. To its east Kashṭawārī. To its south across the Chināb lies the western end of Bhadrawāh, the language of which is Bhadrawāhī, here fading into the Dogrī Pańjābī or Jammū spoken further south and south-west. To the west of Dodā Sirājī we have Rāmbanī, another Kāshmīrī dialect, which will be dealt with later on.

As its position indicates Sirājī is a mixed language. The Bhadrawāhī to its south is a form of Western Pahārī, and moreover is here corrupted by Dōgrī Pañjābī. The Kashṭawārī to its east and the Pŏgulī to its north are forms of Kāshmīrī, already affected by Western Pahārī, and Sirājī is still more corrupted by these languages. It might, with almost equal correctness, be classed as a dialect of Kāshmīrī or as a dialect of Western Pahārī, but I have put it in the former class, because it possesses certain typical Dardic characteristics which do not belong to the latter. Such are the occasional use of vocalic epenthesis, the hardening of d to t, the retention of medial t, the disaspiration of sonant aspirates, the dropping of initial r, and the general method of verbal conjugation including the free use of pronominal suffixes.

On the other hand, the free employment of the cerebral n refers us either to Dōgrī or to Western Pahārī. This letter does not occur in Kāshmīrī. The process of the declension of nouns follows that current use in Dōgrī, while that of the pronouns,² and the formation of the future of the Verb by means of the suffix $l\bar{o}$, are more like that of Western Pahārī. Finally, the genitive postposition $n\bar{o}$ is borrowed from the Lahndā spoken further west. The above is sufficient to give a general idea of the mixed character of Dōdā Sirājī. Further detail are noted in the course of the following grammatical sketch.

For the materials on which this sketch is founded I am indebted to the Rev. T. Grahame Bailey, who kindly prepared for me on the spot a version of the Parable

¹ I.e. 14,562 speakers of Sirājī (classed as a dialect of Western Pahāṣī), plus 170 speakers of Dōḍī (classed as a dialect of Kāshmīrī).

² Cf. mīṇō or mēṇō, my, with the Western Pahārī (Pādarī) mēṇ.

VOL. VIII, PART IT.

of the Prodigal Son, another brief passage dictated by a native of the Sirāj, and the Standard List of Words and Sentences. The first two are printed below. The last will be found on pp. 489ff.

Mr. Bailey has himself printed these in his volume entitled The Languages of the Northern Himalayas, published by the Royal Asiatic Society in 1908, preceded by a brief sketch of the grammar of the dialect. As printed, the specimens differ in a few details from the manuscript sent to me, and I have followed the latter in preparing these pages for the press. My own grammatical sketch which is, perhaps, more full than Mr. Bailey's and is certainly longer, is based entirely on these materials.

PRONUNCIATION.--Vowels.-These as a rule follow Pañjābī rather than Kāshmīrī. We have a trace of Kāshmīrī influence in jiwab, an answer, instead of $jaw\bar{a}b$, as Kāshmīrī would have $jaw\bar{a}b$ or $j\check{e}w\bar{a}b$. The u in antur, within, for antaris not so easy to explain.

There are several doubtful cases which may perhaps be due to epenthesis, but

none are certain. Consonants.—In the treatment of consonants we see much stronger traces of Dardic influence. Both the Kāshmīrī letters to and z are of common occurrence, as in $\underline{t}\underline{s}\bar{a}r\underline{n}\bar{o}$, to graze; $ba\underline{t}\underline{s}ur\bar{o}$, a calf; $na\underline{t}\underline{s}n\bar{o}$, to dance; $z\bar{o}$, what; $zab\bar{n}\bar{o}$, to say; zabla, when; and others. Sometimes z appears as dz, as in uzārņō or udzārņō, to squander.

Very typical of the Dardic languages is the preservation of medial t in $but\bar{o}$, he was. On the other hand, in the borrowed word $bh\bar{v}n\bar{v}$, to become. The t has been dropped. Again as in Dardic d is often hardened to t, as in dant (Persian dand), a tooth (37); $d\bar{a}nt$ (even Kāshmīrī $d\bar{a}nd$), a bull (144); and the genitive postposition $t\bar{o}$ as compared with the Panjābī $d\bar{a}$.

As in Dardic languages, we have disaspiration of the sonant aspirate bh in buchchhā (for bhuchchhā), hungry; butō (Sanskrit bhūtah), he was, but the borrowed bhōnō (with an optional past $b\bar{u}\bar{e}$), to become.

· In Dardic languages the letter r is often dropped. So here we have ichchh for richchh, a bear.

On the other hand, sh does not become h in shuno, a dog, as compared with the Kāshmīrī hūn".

One very interesting fact, peculiar, so far as I am aware, amongst modern Dardic and Indian languages, is the universal change of n to a cerebral n. This was the rule in Prakrit, but has not entirely survived elsewhere. In the specimens every single n becomes n, the only real exceptions being in the word na, not, and in $na\underline{ts}n\bar{o}$, to dance. The other apparent exceptions are all borrowed words, such as din, a day-the Sirājī word is dī (II)—zerīmānō (II) (Persian), a fine; and Panjābī infinitives like $karn\bar{o}$, to do, in which n is preceded by r.

With this change of n to n we may compare the change of r to r in pur, on.

As an instance of Western Pahārī influence we can quote the metathesis of h in brhā for bhrā, a brother. This is typical of Western Pahārī (see Vol. IX, Pt. iv, pp. 377, 560).

DECLENSION.—The declension of nouns follows Western Pahārī rather than Kāshmīrī. As in Western Pahārī strong masculine nouns (corresponding to Hindī nouns in \bar{a} , like $gh\bar{o}r\bar{a}$, a horse) form their nominative singulars in \bar{o} or \bar{u} , and their nominative plurals in \bar{a} . There is also, as in Western Pahārī, a locative in \bar{e} and a tendency to interchange a final \bar{o} with \bar{a} , and a final \bar{a} with \bar{e} . Thus the word for 'horse' is $gh\bar{o}r\bar{o}$, nominative plural $gh\bar{o}r\bar{a}$, and the word for 'dog' is $shu\bar{n}\bar{o}$ or $shu\bar{n}\bar{a}$ in the nominative singular. It will be convenient to treat nouns under the usual four declensions, viz.:—

- (1) Weak masculine nouns, i.e. those ending in any letter except \bar{o} (or \bar{a}), or \bar{u} .
- (2) Strong masculine nouns, i.e. those ending in \bar{o} (or \bar{a}) or \bar{u} .
- (3) Strong feminine nouns, i.e. those ending in $\bar{\imath}$.
- (4) Weak, i.e. all other, feminine nouns.

The only cases are the nominative, the oblique, and the agent-locative. The last named case may have the force either of the agent, or of the locative. The oblique case, by itself, is used to indicate the dative. With the aid of postpositions, it indicates any other case except the nominative.

Declension I.—We take as our example babb, a father.

	Sing.	Plur.
Nom.	babb	babb.
Obl.	$babbar{o}$	$babb\widetilde{\tilde{a}}.$
Agloc.	$babbar{e}$	} babba.

In the oblique singular, the termination \bar{o} , as in Western Pahārī, is often changed to \bar{a} , so that we also have $babb\bar{a}$, and this seems to be the rule when the postposition $n\bar{o}$ of the genitive is added, as in $babb\bar{a}$ - $n\bar{o}$, of a father. Moreover, the form of the agent-locative is also used for other oblique cases of the singular, so that $babb\bar{e}$ may also be substituted for $babb\bar{o}$. This last is no doubt due to the influence of the neighbouring partial
Examples of the declension are:-

Sing. nom.— $m\bar{a}l$, in $apn\bar{o}$ $m\bar{a}l$ $t\bar{e}n\bar{i}$ $bant\bar{i}$ $ditt\bar{o}$, he divided and gave his property. puttur, in $t\bar{i}n\bar{o}$ puttur chhu, he is thy son.

Oblique in ō.—babbō, in těṇī apṇē babbō jiwāb dittō, he gave answer to his father. hatthō, in hatthō chhāp lāwathū, apply ye to (i.e. on) the hand a ring.

mulkhō, in dūr mulkhō safar kĕrūĕnī, he made a journey to a far country.

babbō, in aũ apṇē babbō-kaṇē chalē-gālō, I will go near my father.

 $h\bar{o}sh\bar{o}$, in $zabla\ h\bar{o}sh\bar{o}$ - $m\tilde{a}$ $\bar{a}\bar{o}$, when he came into sense.

Khudāyō (nom. Khudā), in Khudāyō-tō gunāh kĕōryĕm, I did sin of (i.e. against) God.

mulkhō, in tē mulkhō-mã kāl barō paã-gō, a mighty famine fell in that land.

pādrō, in baḍḍō nuksān kĕrūĕnī pādrō-mã, he did great damage on the level ground (II).

 $z\bar{a}r\bar{o}$, in $z\bar{a}r\bar{o}$ - $m\tilde{a}$ sutt \bar{o} - $r\bar{o}$ but \bar{o} , he was as leep in a den (II).

Oblique in ā.—babbā, in mīņē babbā-tē mazūr kitā rajjī rōṭī khã-chhi, how many servants of my father eat bread and are satisfied.

 $m\bar{a}l\bar{a}$, in $tin\bar{e}$ $m\bar{a}l\bar{a}$ - $t\bar{o}$ $hiss\bar{o}$, $z\bar{o}$ $m\bar{i}$ $j\tilde{a}$ -chhu, su $m\bar{i}$ $d\bar{e}$, give me the share of thy property which comes to me.

3 K 2

Note that, in both these examples, it is the postposition of the genitive that is added to the oblique case.

Oblique in ē.—babbē, in nikkā maṭṭhā-ṇē babbē zabū, the younger son said to the father.

yharē, in zabla gharē-nērē āwō, when he came near the house.

 $man\bar{e}$, in su $man\bar{e}$ - $m\tilde{a}$ $kar\tilde{a}$ - $t\bar{o}$, he was making (i.e. saying) in his mind.

 $tahs\bar{\imath}ld\bar{a}r\bar{e}$, in $tahs\bar{\imath}ld\bar{a}r\bar{e}$ - $t\bar{\imath}$ chitth $\bar{\imath}$ $j\tilde{a}$ -chh $\bar{\imath}$, a letter of the tahs $\bar{\imath}ld\bar{a}r$ is coming (II). Here we have \bar{e} before the genitive postposition.

Agent locative.—Agent--babbē, in su babbē hērūō, the father saw him.

tinë babbë batsuro palu-ro halal kërauën, thy father hath had the fatted calf slaughtered.

lōkē, in dōkē dī lōkē mārū, next day the people (singular) killed it (II).

puttrē (nom. puttur), in nikkē puttrē sab jamē kěrī-lō, the younger son collected everything.

puttrē tē zabūē, the son said to him ('I have sinned').

Locative.—gharē, in tila-hatha gharē chalē āwā, thereafter they came into the house (i.e. they came home) (II).

rōshē, in su rōshē būē, he became in anger.

Plur. nom.—mazūr, in mīnē bābbā-tē mazūr, etc., quoted above.

puttur, in ĕkkī māhņuē-tā dūī puttur butā, of a certain man there were two sons. It may be noted that, on the analogy of Kāshmīrī, we should expect the nominative plural to be puttar, not puttur.

 $s\bar{u}r$, in ziņa phalīā s $\bar{u}r$ kh \tilde{a} - $t\bar{a}$, the husks which the swine were eating.

Obl.—dōstā, in aŭ apņē dōstā-ņē sāthī khushī kērāmutū, I might have made rejoicing with my friends.

 $naukar\tilde{a}$, in $babb\tilde{e}$ $naukar\tilde{a}$ - $n\tilde{e}$ $zab\bar{u}\bar{o}$, the father said to the servants.

 $p\bar{e}r\tilde{a}$, in $p\bar{e}r\tilde{a}$ - $n\bar{e}$ $j\bar{o}r\bar{o}$ $l\bar{a}wath\bar{u}$, apply a pair of shoes to his feet.

 $din\tilde{a}$, in $th\bar{o}r\tilde{a}$ $din\tilde{a}$ - $n\bar{e}$ - $m\tilde{a}$, in a few days (the younger son made a journey).

Declension II. - Example, ghōrō, a horse.

Nom. $gh\bar{o}r\bar{o}$ $gh\bar{o}r\bar{a}$. Ag.-loc. $gh\bar{o}r\bar{e}$ $gh\bar{o}r\bar{a}$.

As already stated, the nominative singular sometimes ends in ā, as in shuṇō or shuṇā, a dog (146), pl. shuṇā (148).

 $m\bar{a}hn\bar{u}$ or $mahn\bar{o}$ (51), a man, inserts u before the final vowel of all cases except the nom. sing. Thus, $m\bar{a}hn\bar{u}\bar{e}$, $m\bar{a}hn\bar{u}\bar{a}$, $m\bar{a}hn\bar{u}\bar{a}$ (119ff.). We also, however, have $m\bar{a}hn\bar{a}$ (II), see below.

Examples of this declension are the following:-

Sing. nom.—hisső, in tīnē mālā-tō hisső zō mī jã-chhu, the share of thy property which comes to me.

Abl.—bājē and natsnē, in bājē-tō tĕ natsnē-tō bār shuṇūĕṇī, he heard the noise of music and of dancing.

bakrē, in bakrē-tō bachchō mē-kān na dittūit, thou didst not give me the young of a goat.

dērē, in mazūr dērē-bāpat ārnā, labourers are to be brought for the camp (II). galē, in galē-sāthī lāwĕṇī, he pressed (i.e. embraced) him with (i.e. round) the

māhņuē, in ěkkī māhņuē-tā dūī puttur butā, of a certain man there were two sons.

In $nikk\bar{a}$ $matth\bar{a}$ - $n\bar{e}$ $babb\bar{e}$ $zab\bar{u}$, the younger son said to the father, the oblique form $matth\bar{a}$ is taken from Western Pahārī, while the $n\bar{e}$, used as a postposition of the agent, is taken from the Pogrī $n\bar{e}$, with cerebralization of the n. The oblique form in \bar{e} given in the paradigm belongs to Pogrī.

Plur. nom.—*māhṇā*, in *tē-tē magar bhūā dash māhṇā*, ten men became after him (*i.e.* pursued him) (II).

tallā, in sabbā-ņē-hatha tallā changā lūsha ārō, bring quickly the best garments of all.

Declension III. - Example, dhī, a daughter (110ff.).

		Sing.		Plur.
Nom.		$dhar{\imath}$		$dhar{\imath}ar{e}.$
Obl.	}	$^{ullet}dhar{\imath}ar{a}$		$m{d}hiar{a}$.
Agloc.)	Corocia		wirece

The formation of the oblique singular by adding \bar{a} is taken from Dogri. In the oblique singular and plural \bar{e} is often substituted for \bar{a} , and in the nominative plural \bar{a} is often substituted for \bar{e} , so that we may have $dh\bar{\imath}\bar{e}$, $dh\bar{\imath}\bar{a}$, and $dh\bar{\imath}\bar{e}$, respectively. In other words, in these terminations \bar{a} and \bar{e} are interchangeable.

Examples of the use of this declension are :-

Sing. nom.— $chitth\bar{\imath}$, in $tahs\bar{\imath}ld\bar{a}r\bar{e}$ - $t\bar{\imath}$ $chitth\bar{\imath}$ $j\tilde{a}$ -chhi, a letter of the tahs $\bar{\imath}ld\bar{a}r$ is coming (II).

Sing. obl.—baigīā, in tenī apnīā baigīā-mā bhējusenī, he sent him into his field (or, possibly, plural, into his fields).

khurīē, in khurīē chalē-gāsu, they went to him along the track (locative) (II).

waddīē and nikkīē, in waddīē bī, nikkīē duddh chumnewālī bī, both for a big (she-buffalo), and also for a small one that drinks milk (II).

Plur. nom. - kukkṛīā, in rātī ichchh pōūō kukkṛīā khiāṇī, at night a bear came to eat the hens (II).

phalīā, in ziņa phalīā sūr khā-tā, the husks which the swine were eating.

shundīā, in shundīā dittīānī, he gave kisses.

shuņ $\check{e}\bar{\imath}$, a bitch, plur. shuņ $\check{e}\bar{\imath}\bar{a}$ (147, 149). gh $\bar{o}r\bar{\imath}$, a mare, plur. gh $\bar{o}r\bar{\imath}\bar{e}$ (139, 141).

Obl.—barīē, in mī kitē barīē tēnī khidmat kĕōryĕm, for how many years did 1 do thy service.

zĕṇī tīṇō māl kanjrīē-ṇī-hatha udzārūĕnī, (thy son) who wasted thy property with harlots.

438

Declension IV.—Example, bēhn, a sister.

Nom. $b\bar{e}h\bar{n}$ $b\bar{e}h\bar{n}\bar{i}$ $eh\bar{n}\bar{i}$ $heh\bar{n}\bar{i}$ $heh\bar{n}\bar$

No examples are available for the oblique plural. It is probably the same as the nominative. $G\tilde{o}r\tilde{u}$, a cow, has its nom. plur. $g\tilde{o}r\tilde{u}$ (143, 145).

Examples of the use of this declension are:--

Sing. obl.—bēhņī, in mēņē tsatsē-tō puttur tē-tī bēhņī-sāthī biāō-rō chhu, the son of my uncle is married to his sister (225).

tē-tō brhā tē-tī bēhņī-hathā baḍḍō chhu, his brother is taller than his sister (231). piṭṭhī (nom. piṭṭh, 43), in kāṭhī piṭṭhī-pur kasī latthō, bind the saddle upon the back (227).

 $r\bar{a}t\bar{i}$ (nom. $r\bar{a}t$), in $r\bar{a}t\bar{i}$ ichchh $p\bar{o}\bar{u}\bar{o}$, at night a bear fell (i.e. came) (II).

The word $ma\tilde{\imath}h$, a she-buffalo, does not take $\tilde{\imath}$ in the oblique singular. Thus,— $ma\tilde{\imath}h-t\tilde{o} \ ghiw\tilde{a}n\tilde{o} \ d\tilde{u}\tilde{\imath} \ chilk\tilde{\imath}, \text{ the tax of } (i.e. \text{ on) a she-buffalo (is) two five-anna}$ pieces (II).

Plur. nom.—bandūkī, in bandūkī dittīāsu, guns were fired at him (II).

Postpositions.—The following are the more important postpositions governing the oblique case, except those of the genitive. The latter $(n\bar{o} \text{ and } t\bar{o})$ will be dealt with under the head of adjectives:—

atha, hatha, athā, or hathā, from.

 $m\tilde{a}$, in.

pur, on.

sāthī, together with, with (by means of).

 $n\bar{e}$, to. This postposition, like many other postpositions of the dative, is the locative of the genitive postposition $n\bar{o}$.

Examples of the use of postpositions are:-

tila-hatha gharē chalē-āwā, from then (i.e. thereafter) they went home (II).

yō kāh-hathā mul-āwath? grāmō kētsīō haṭīābāļīā-hathā, from whom didst thou buy that? from a shopkeeper of the village (240, 241).

tē mulkhō-mā kāl barō paī-gō, a mighty famine fell in that land.

 $y\bar{o}$ $\bar{a}h\bar{\imath}$ -pur zulm chhu, this is oppression upon us (II).

kāthī piṭṭhī-pur kasī latthō, bind the saddle on his back (227).

 $babb\bar{e}\ naukar\tilde{a}$ - $ne\ zab\bar{u}\bar{o}$, the father said to the servants.

 $radz\bar{u}$ -sāthī bandhithū, bind ye him with ropes (236). For an example of sāthī meaning 'together with,' see below.

pērā-ņē jōrō lāwathū, apply ye a pair of shoes to his feet.

Postpositions sometimes govern the oblique genitive formed with nē. Thus:-

sabbā-nē hatha tallā changā, good garments from all, i.e. the best garments of all. This is an instance of the ablative of comparison, which will be further dealt with under the head of adjectives.

thōṛã dinã-ṇē mã nikkē puttrē sab jamē kĕrī-lō, in a few days the younger son collected everything.

aŭ apņē dosta-ņē sathī khushī kerāmutū, I may make rejoicing with my friends.

In the following, if it is correctly recorded and correctly translated, hatha, governing the feminine genitive (in no, means 'with':—

zenī tīnō māl kanjrīe-nī hatha udzārūenī, (thy son) who squandered thy property with harlots.

Adjectives.—As usual only strong adjectives, ending in u, \bar{o} (or \bar{u}), are capable of being declined. Other adjectives remain unchanged, the single exception noted being the word sab, all, which makes its oblique plural $sabb\tilde{a}$. As an example of a strong adjective we take $ju\bar{a}nmotu$, good, which is thus declined:—

		Masc.	Fem.
Si	ng.		
	Nom.	$m{j}$ u $ar{a}nmatar{o}$	juānmatī.
	Obl.	juānmatā, juānmatē	$ju\bar{a}nmatar{\imath}ar{a}.$
\mathbf{P}	ur.		
	Nom.	juan anmatar a	juānmatīē.
	Obl.	$juar{a}nmat\widetilde{ar{a}}$	juānmatīā.

The oblique singular in \bar{e} is much more common than that in \bar{a} . Of the latter, there is only one example in the specimens, viz.:—

nikkā maṭṭhā-ṇē babbē zabū, the younger son said to his father.

Other examples are:--

Masc. obl. sing.— $chhitt\bar{e}$, in $chhitt\bar{e}$ $gh\bar{o}r\bar{e}$ - $t\bar{\imath}$ $k\bar{a}th\bar{\imath}$, the saddle of the white horse (226).

 $d\tilde{o}k\tilde{e}$, in $d\tilde{o}k\tilde{e}$ $d\tilde{\imath}$ $l\tilde{o}k\tilde{e}$ $m\tilde{a}r\tilde{u}$, on the second (i.e. next) day people killed (it) (II).

mīnē, in mīnē babbā-tē mazūr kitā rajjī rōṭī khā-chhi, how many servants of my father eat bread and are satisfied.

nikkē (cf. nikkā above), in nikkē puttrē sab jamē kĕrī-lō, the younger son collected everything.

 $t\bar{\imath}n\bar{e}$, in $t\bar{\imath}n\bar{e}$ $m\bar{a}l\bar{a}$ - $t\bar{o}$ hisso, the share of thy property.

Plur. nom.—kitā, in tīnē babbō-tē gharō-mã puttur kitā chha, how many sons are there in thy father's house (223)? So kitā mazūr, above.

Obl.—thōrã, in thōrã dinã-ně mã nikkē puttrē, etc., in a few days the younger son collected everything, as ab.

Fem. sing. nom.— $chang\bar{\imath}$, in $y\bar{a}$ gall $chang\bar{\imath}$ nah $\tilde{\imath}$, this thing is not good (that I should be called thy son).

tēṇī, in mī kitē barīē tēṇī khidmat kĕōryĕm, for how many years did I do thy service.

Obl. — apṇīā, in tĕṇī apṇīā baigīā-mã bhējusĕṇī, he sent him into his own field. Plur. obl. — kitē, in mī kitē barīē, etc., as ab.

Comparison.—This is, as usual, effected by putting the object with which comparison is made in the ablative case,—i.e. the oblique case, or the oblique case of the genitive case, governed by hatha or hathā. Thus, tē-tō brhā tē-tī bēhņī-hathā baḍḍō chhu, his brother is taller than his sister (231); sabbā-ņē hatha tallā chaṅgā lūsha ārō, bring quickly the garments better than all, i.e. the best garments.

Genitive.—As usual, the genitive is an adjective, agreeing with the thing possessed. Two postpositions are used to indicate this case,— $t\bar{o}$ and $n\bar{o}$. Both of these are borrowed forms. The $t\bar{o}$ is the Dōgrī $d\bar{a}$, with the Western Pahārī change of \bar{a} to \bar{o} , and also with the typical Dardic change of \bar{d} to \bar{t} . The $n\bar{o}$ is Lahndā $n\bar{a}$, with the same change of \bar{a} to \bar{o} , and also with the cerebralization of the n which is so prominent a feature of this dialect.

Both $t\bar{o}$ and $n\bar{o}$ are declined like adjectives. Mr. Bailey gives the following forms for $n\bar{o}$,—mase. pl. $n\bar{a}$, fem. sing. and plur. $n\bar{\imath}$. The plural $n\bar{\imath}$ is evidently contracted from the full form $n\bar{\imath}\bar{a}$ or $n\bar{\imath}\bar{e}$. $T\bar{o}$ is similarly declined. $T\bar{o}$ is by far the more common of the two postpositions. In the specimens, $n\bar{o}$ appears only in the oblique masculine form $n\bar{e}$, being then governed by another postposition, but Mr. Bailey gives a complete set of the forms in his grammar. All the available examples of $n\bar{e}$ (and also a doubtful one of $n\bar{\imath}$) are given on pp. 438-9 above.

The following are examples of the use of $t\bar{o}:$ —

Mase. sing. nom.— $t\bar{\imath}n\hat{e}$ $m\bar{a}la$ - $t\bar{o}$ $hiss\bar{o}$ $z\bar{o}$ $m\bar{\imath}$ $j\tilde{a}$ -chhu, the share of thy property which comes to me.

Obl.—tē mulkhō-tē čkkī rahņēbālē-laba gēs, he went near an inhabitant of that country.

Plur. nom.—*ĕkki māhnua-tā dūī puttur butā*, of a certain man there were two sons.

Fem. sing. nom.—parū-tī gall chhi, it is a matter of last year (II). tahsīldārē-tī chiṭṭhī jã-chhi, a letter of the tahsīldār is coming (II).

Occasionally the oblique case by itself, without any postposition, is employed to indicate the genitive. Thus:

 $gr\bar{a}m\bar{o}$, in $gr\bar{a}m\bar{o}$ $k\tilde{e}\underline{l}\underline{s}\bar{\imath}\bar{o}$ $hat\bar{\imath}\bar{a}b\bar{a}l\bar{\imath}\bar{e}$ - $hath\bar{a}$, from a shopkeeper of the village (241).

PRONOUNS.—The first two personal pronouns are declined as follows :-

Sing.		I.	Thou.
	Nom.	$a\widetilde{u}$	$t\bar{u},tu.$
	Obl.	$mar{\imath},mar{e}$	tī, tē.
	Ag.	$m\widetilde{ar{\imath}},mar{\imath},mar{e}$	$t\tilde{i}$, $t\tilde{i}$, $t\tilde{e}$.
	Gen.	mīṇō, mēṇō	tīno, tēno.
Plur.			
	Nom.	$\bar{a}h$	tuh.
	Obl. and Ag.	$asar{e},ar{a}har{\imath}$	tusē, (?) tuhī.
	Gen.	āhmō	tuhmõ.

The genitives are, of course, adjectives, and are declined as such.

Examples of the use of these pronouns are the following: --

First person, sing. nom.—aũ apnō pēṭ bharã, I may fill my belly.

Obl.—apņō mazūr mī banāwā, make me thine own servant.

hisső ző mi jã-chhu, the share which comes to me.

bakrē-tō bachchō mē-kāṇ na dittūit, thou didst not give to me a kid of a goat. mē ārī ārī chal, walk before me (238).

Ag.—mī kitē barīē tēņī khidmat kĕōryĕm, for how many years did I do thy service. tē-tē puttrē mē matē kōrṛē mārū-ā, I have beaten his son with many stripes (228).

Gen.—yō mēṇō puttur marī gō-rō, this my son had died.

 $m\bar{e}n\bar{o}\ babb\ y\bar{e}\ nikk\tilde{e}\ ghar\bar{o}\ rah\tilde{a}$ -chhu, my father lives in that small house (233). $z\bar{o}$ -k \tilde{i} $m\bar{i}n\bar{o}\ chhu$, whatever is mine.

(Obl. sing. masc.)— $m\bar{\imath}n\bar{e}$ babbā-tē $maz\bar{u}r$ kitā $rajj\bar{\imath}$ $r\bar{o}t\bar{\imath}$ kh \tilde{a} -chhi, how many servants of my father eat bread and are satisfied.

mēņē <u>tsats</u>ē-tō puttur tē-tī bēhņī-sāthī biāō-rō chhu, the son of my uncle is married to his sister (225).

Plur. nom.—āh khāmū tě khushī karamū, we may eat and may make rejoicing.

Obl.— $y\bar{o}$ $\bar{a}h\bar{i}$ -pur zulm chhu, this is oppression upon us (II).

Second person, sing. nom.—tū sadā mē-sāthī chhi, thou art ever with me.

Gen.—tīṇō yō brhā mari-gō-rō, this thy brother had died.

(Obl. sing.)—tīnē mālā-tō hissō, the share of thy property.

The two **Demonstrative Pronouns**, also used as pronouns of the third person, are declined as follows:—

		This, he.	That, he.
Sing.			
	Nom.	$yar{o} ext{ (fem. } yar{a})$	su (fem.?).
	Obl.	$yar{e} ext{ (fem. } yar{a})$	$t\bar{e}$ (fem. ?).
	Ag.	yĕņī	tĕņī.
	Gen.	$yar{e}$ - $tar{o}$	$t ar{e}$ - $t ar{o}$.
Plur.			
	Nom.	$yar{o}$	$tin\bar{e}$, tin (29), (fem. ? $tina$).
	Obl. and Ag.	yě ņē	těņē.
	Gen.	yi n $ar{a}$ - $tar{o}$	$tinar{a}$ - $tar{o}$.

Besides the above forms, we have tin, from him, in the following:—
yō rupayyō tin ghinō-jĕ, take these rupees from him (235).

Other examples of these pronouns are:

yō—(sing. nom. masc.)—yō mēṇō puttur marī gō-rō, this my son had died.

 $y\bar{o}$ $\bar{a}h\bar{i}$ -pur zulm chhu, this is oppression upon us (II).

Fem.— $y\bar{a}$ gall changī nahī, this thing is not good (that I should be called thy son).

Ohl. masc. $-y\bar{e}$ - $t\bar{o}$ mul $dh\bar{a}\bar{i}$ rupayy \bar{o} chhu, the price of this is two rupees and a half (232).

Fem.— $y\bar{a}$ gallā, for this reason (that he hath received him safe and sound).

Plur. nom.— $y\bar{o}$ rupayy \bar{a} , these rupees (235), see above.

su—sing. nom.— $su\ d\bar{u}r\ but\bar{o}$, $su\ babb\bar{e}\ h\bar{e}r\bar{u}\bar{o}$, he was distant, he was seen by his father.

Obl.—tē mulkhō-mã kāl barō paī-gō, in that country a mighty famine fell.

 $t\tilde{e} \ k\tilde{\tilde{e}} \ d\tilde{\tilde{a}}$ - $t\tilde{o} \ n\tilde{a}$, no one was giving to him.

tě tē rěhm āō, and compassion came to him.

Ag.—apnō māl těnī bantī-dittō, he divided out his property.

Plur. nom.—tinē khushī karnē lagūā, they began to make rejoicing.

Gen.—tē-tō baddō puttur baigīā-mā butō, his elder son was in the field.

442

The declension of the Relative Pronoun zō, who, which, that, is parallel to that Thus:of su.

Nom.	$zar{o}$ (fem. ? $zar{a}$)	Plar. $zin\bar{e}$ (fem. $zina$).
Obl.	$zar{e}$	$\left. \left. \left$
$egin{array}{l} \operatorname{Ag.} \\ \operatorname{Gen.} \end{array}$	zěņī zē-tō	zi ņ $ar{a}$ - $tar{o}$.

Examples are:-

Sing. nom.— $tin\bar{e}$ $m\bar{a}l\bar{a}$ - $t\bar{o}$ $hiss\bar{o}$ $z\bar{o}$ $m\bar{i}$ $j\tilde{a}$ -chhu, the share of thy property which comes to me.

zō (? zā or ziņa) hōrī lakrī chhīā badņē na dã-chha, they do not permit (us) to fell what other wood there is (II).

Ag.—zĕṇī tīṇō māl kanjrīē-ṇī hatha udzārūĕṇī, (thy son) who wasted thy property with harlots.

Plur. nom. fem.—ziņa phalīā sūr khã-tā, the husks which the swine were eating. The Interrogative Pronoun is (animate) kum (92), who? (inanimate) kut or (93) $k\bar{\imath}$, what? Its oblique singular is $k\bar{a}h$. Examples of its use are:—

yō kut chhu, what is this?

tīņō nām kut chhu, what is thy name (220)?

 $k\bar{a}h$ - $t\bar{o}$ maț $th\bar{o}$ $t\bar{i}$ pata $j\tilde{a}$ -chhu, whose boy comes behind thee (239)?

yō kāh-hathā mul āwath, from whom didst thou buy that (240)?

The Animate Indefinite Pronoun is $k\tilde{e}$, anyone, someone, obl. $k\tilde{e}t\tilde{s}i$ or $k\tilde{e}t\tilde{s}i\tilde{o}$. The inanimate form is $k\tilde{\imath}h$ or $k\tilde{\imath}$, anything, something.

Examples of this pronoun are:

 $t\bar{e} \ k\tilde{e} \ d\tilde{a}$ - $t\bar{o}$ $n\bar{a}$, no one was giving to him.

 $gr\bar{a}m\bar{o}\ k\bar{e}t\bar{s}\bar{\imath}\bar{o}\ hat\bar{\imath}\bar{a}b\bar{a}l\bar{\imath}\bar{a}$ -hath \bar{a} , from a shopkeeper of the village (241).

kĩh kasūr bhēi, (if) there be any fault (II).

 $z\bar{o}-k\tilde{\imath}$ is 'whatever,' as in $z\bar{o}-k\tilde{\imath}$ $m\bar{\imath}\mu\bar{o}$ chhu, $s\bar{o}$ $t\bar{\imath}\mu\bar{o}$ chhu, whatever is mine, that is thine.

The Interrogative Pronoun of Quantity is kito, how much? or, in the plural, how many? Examples are:-

ellā-hathā Kashmīrā-tã kitō dūr chhu, how much distance is there from here to Kashmir (222)?

yē ghōrē-tī ummar kitī (fem.) chhi, how much is the age of this horse (221)?

tīnē babbō-tē gharō-mā puttur kitā chha, how many sons (masc. plur.) are there in thy father's house (223)?

mīnē babbā-tē mazūr kitā rajjī roţī khã-chhi, how many servants of my father eat bread and are satisfied?

mī kitē barīē tēņī khidmat kĕōryĕm, for how many years did I do thy service?

The only form of the Reflexive Pronoun that occurs in the specimens is the genitive apnō, own, which is regularly declined. There are numerous examples of its use in the first specimen, and it is unnecessary to quote them here. It is borrowed from the neighbouring languages. There is nothing connected with the Kashmiri panun, It is treated exactly like the Hindi apnā.

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—The present tense follows Kāshmīrī in being based on *chhu*, he is. It changes for gender, but for the feminine only the third person singular is available in the materials. It is thus conjugated:—

'I am,' etc.

	Sing.		Plur.
1.	chhi, chhis	-10-	chha, chhas.
2.	chhi,chhis		chhath.
3.	$\mathit{chhu}\ (\mathrm{fem.}\ \mathit{chhi})$		chha, chhan (fem. ? chīā).

Examples of this as a Verb Substantive are the following. A few instances of its use as an auxiliary verb are included in order to exhibit forms not found elsewhere:—

Sing. 2nd person. — tū sadā mē-sāthī chhi, thou art ever with me.

3rd person masc.— $t\bar{\imath}n\bar{o}$ puttur chhu, (I am not worthy for people to say) 'he is thy son.'

Fem.—parū tī gall chhi, it is a matter of last year (II).

Plur. 1st person.—ghar zĕ banāwã-chha, if we are making houses (II).

3rd person masc. $-badn\bar{e}$ na $d\tilde{a}$ -chha, they do not allow to fell (II).

mul ghinã-chhan, they take a price (II).

Fem.— $z\bar{o}\ h\bar{o}r\bar{\imath}\ lakr\bar{\imath}\ chh\bar{\imath}\bar{a}$, what other woods there are (II). This is a very doubtful example, and I am unable to explain it fully. $Z\bar{o}$ is masculine singular, and $h\bar{o}r\bar{\imath}$ and $lakr\bar{\imath}$ both seem to be feminine singular. There seems to be something wrong with the text.

One other word for 'is' occurs, which I am quite unable to explain. It is *chhip*, in zĕrīmānō dēṇō chhip, a fine is to be given (II). The form is certainly correctly recorded.

The Past tense preserves the Sanskrit $bh\bar{u}tah$, was, with the disaspiration typical of the Dardic languages. Moreover, though in India proper the t would be elided, here the custom of the Dardic languages is followed, and it is preserved. We thus get $but\bar{o}$, he was. The form current in India is also preserved as a borrowed word, in the form $bh\bar{o}n\bar{o}$, to become.

butō is conjugated as follows in the masculine:-

	Sing.	Plur.
1.	butē, butēs	butā, butās
	butē, butēs	but ath.
3.	$but\bar{o}$ (fem. $but\bar{i}$)	$but ar{a}.$

Examples are the following:-

Masc. sing. 3.—su dūr butō, he was (yet) far off.

Plur. 3.—ěkkī māhņuē-tā dūī puttur butā, of a certain man there were two sons.

In the following both butō and butā occur in the same sentence:-

itthē-mã zō butō ikk-sāla, māp butā, herein, what one was one year old, they (i.e. the taxes) were remitted (II).

There is one example of the 3rd person singular, feminine, viz.—khush bhōṇō chaṅgī gall butī, to become happy was a good thing.

B. Active Verb.—The Infinitive ends in $n\bar{o}$, equivalent to the Pogri $n\bar{a}$, which as in that language after r becomes $n\bar{o}$. Thus, $bh\bar{o}n\bar{o}$, to become; $d\bar{e}n\bar{o}$, to give; $gahn\bar{o}$ or $gisn\bar{o}$, to go; $j\bar{e}n\bar{o}$ or $jain\bar{o}$, to come; but $m\bar{a}rn\bar{o}$, to strike. It may here be noticed that $j\bar{e}n\bar{o}$ or $jain\bar{o}$ means 'to come,' not 'to go,' as we might expect. A transitive infinitive, governing a feminine noun, is put in the feminine in $n\bar{i}$ ($n\bar{i}$), as in $d\bar{e}n\bar{i}$, to give; $k\bar{e}rn\bar{i}$, to do; $m\bar{a}rn\bar{i}$, to strike. The oblique masculine ends in $n\bar{e}$ ($n\bar{e}$), as in $bh\bar{o}n\bar{e}$, $m\bar{a}rn\bar{e}$.

Examples of the use of the infinitive are: —

Nom. mase. and nom. fem.—bhōṇō and kĕrnī, in khushī kĕrnī, khush bhōṇō changī gall butī, to make happiness, and to become happy was a good thing.

In khān, in the following, the ō of khāṇō has been dropped,—titthē khāṇē khāṇ pōūō, there to eat food it fell, i.e. (they) had to eat food (II). Similarly lēn for lēṇō, in az ghinī lēn lagūā, now they began to take the tax.

Nom. fem.—khiāṇī, in ichchh pōūō kukkrīā khiāṇī, a bear fell (i.e. happened to come) to eat fowls (II).

Obl. masc.—gahņē, in antur na gahņē chāchē, he did not wish to go within. těṇā sūr tṣārnē bhējusēnī, he sent him to feed swine.

The **Future Passive Participle** is the same in form as the infinitive, and is declined as an adjective. Thus, $m\bar{a}rn\bar{o}$, meet to be struck; mase, obl. and nom. plur. $m\bar{a}rn\bar{a}$; fem. $m\bar{a}rn\bar{a}$. Examples are:—

Masc. nom.—dēņō, in zĕrīmānō dēņō chhip, a fine is to be given (i.e. has to be paid) (II).

jēņō, in dērō langhēīta gharē jēņō, when the camp has passed on, it is to be come (i.e. we have to go) home (II).

Plur.—mazūr dērē bāpat ārnā, labourers have to be brought for the camp (11).

The **Present Participle** is formed by adding \tilde{a} to the root, as in $m\tilde{a}r\tilde{a}$, striking. Similarly, $ban\tilde{a}w\tilde{a}$, making; $bh\tilde{o}\tilde{a}$, becoming; $gan\tilde{a}$, counting; $ghin\tilde{a}$, taking; $kar\tilde{a}$, doing; $mar\tilde{a}$, dying. Irregular are $d\tilde{a}$, giving; $g\tilde{a}$, going; $j\tilde{a}$, coming; $kh\tilde{a}$, eating. This participle does not change for gender or number. Examples of the present participle will be found under the head of the present tense.

The **Past Participle** is formed by adding \bar{u} or $\bar{u}\bar{o}$ to the root. It is declined as an adjective. Thus, $m\bar{a}r\bar{u}$ or $m\bar{a}r\bar{u}\bar{o}$ (masc. plur. $m\bar{a}r\bar{u}\bar{a}$; fem. sing. $m\bar{a}r\bar{i}$; plur. $m\bar{a}r\bar{i}\bar{a}$), struck. Similarly, $bi\bar{a}\bar{o}$, married; $h\bar{e}r\bar{u}\bar{o}$, seen; $m\bar{o}r\bar{u}$, turned aside, disobeyed; $uth\bar{u}\bar{o}$, arisen; $zab\bar{u}$ or $zab\bar{u}\bar{o}$, said; $lag\bar{u}\bar{a}$ (masc. plur.), begun; $uz\bar{a}r\bar{i}$ (fem. sing.), wasted; $lag\bar{u}\bar{a}$ (fem. plur.), attached. The following Past Participles are irregular:—

Infinitive.

ākhņō, to say bhōṇō, to become

dēņō, to give
gahņō or gisņō, to go
jaiņō or jēņō, to come
lēņō, to take
pēņō (?), to fall

Past Participle.

ākhō.

bhūō or bāū (m. pl. bhūā, fem. sing.

bhūī).

dittō (fem. pl. dittīā).

gō (pl. gā).

āō or āwō (pl. āwā).

lō.

pōūō.

The form of the infinitive pēņō is doubtful.

As in Western Pahārī, the syllable $r\bar{o}$ is often added to a past participle without materially changing its meaning. Thus:—

 $bi\bar{a}\bar{o}$ - $r\bar{o}$, married; $g\bar{o}$ - $r\bar{o}$, gone; palu- $r\bar{o}$, fatted; $sutt\bar{o}$ - $r\bar{o}$, asleep; $\bar{u}r\bar{o}$ (for $\bar{a}\bar{o}$ - $r\bar{o}$), come.

Examples of the past participle will be found under the head of the past tense. Here we may give one example of the participle used as an adjective, viz.—

 $\bar{a}kh\bar{o}$, in $t\bar{\imath}u\bar{o}$ $\bar{a}kh\bar{o}$ $kad\bar{e}$ na $m\bar{\imath}$ $m\bar{o}r\bar{u}$, I never disobeyed thy said thing (i.e. thy order).

The following are examples of the Past Participle in rō:—

biāō-rō, in mēṇē tsatsē-tō puttur tē-tī bēhṇī-sāthī biāō-rō chhu, the son of my uncle is married with (i.e. to) his sister (225).

palu-rō (for palū-rō), in palu-rō batsurō, the kept (i.e. fatted) calf.

 $sutt\bar{o}$ - $r\bar{o}$, in $z\bar{a}r\bar{o}$ - $m\tilde{a}$ $sutt\bar{o}$ - $r\bar{o}$ $but\bar{o}$, he was asleep in the den (II).

Other examples will be found under the head of the past tense.

The Conjunctive Participle is formed by adding $\bar{\imath}ta$ to the root, as in $m\bar{a}r\bar{\imath}ta$, having struck. Sometimes the $\bar{\imath}$ is nasalized, as in $bh\bar{o}\bar{\imath}ta$, having become. Examples are:—

ārīta, in palu-rō batsurō ārīta phaṭṭathū, having brought the fatted calf, slaughter it.

bhōīta, in uṭhūō rāzī bhōīta, he arose having been well (i.e. he has come to life). daurīta, in tē rĕhm āō, daurīta gō, to him compassion came, he went having run (i.e. he ran).

langhēīta, in dērō langhēīta gharē jēnō, the camp having passed on, we have to go home (II).

uțhīta, in aũ apņē babbō-kaņē uțhīta chalē gālō, I having arisen, will go to my father.

The **Noun of Agency** is formed by adding $w\bar{a}l\bar{o}$ or $b\bar{a}l\bar{o}$ to the oblique infinitive. The feminine is formed by changing the final \bar{o} to \bar{z} . Examples are:—

rahņēbālō, in tē mulkhō-tē ĕkkī rahņēbālē-laba gēs, he went to an inhabitant of that country.

nikkīē duddh chumnēwālē, of a small (buffalo cow), (that is to say) a drinker of milk (II).

The Imperative 2nd person singular is the same in form as the root, as in $m\bar{a}r$, strike thou. Similarly $bh\bar{o}$, become thou; gis, go thou, and so on. An example is:—

 $d\bar{e}$, in hissō zō $m\bar{i}$ $j\bar{a}$ -chhu, su $m\bar{i}$ $d\bar{e}$, give to me the share which comes to me.

The 2nd person plural is formed by adding a, as in $m\bar{a}ra$, strike ye. So, $t\bar{e}$ -pur $l\bar{a}wa$, put ye (the best robes) on him.

We have also a Dogrī 2nd plural in ārō, bring ye (the best robes), and a Western Pahārī 2nd plural, used as a singular of respect in banāwā, make (me thy servant).

When a pronominal suffix is added to the 2nd person plural it takes the form mārath, i.e. it becomes the same as the 2nd plural of the Old Present below. See further on under the head of pronominal suffixes.

DARD GROUP.

The Old Present, used as a Present Conjunctive, and not, as in Kashmiri, as a Future, is thus conjugated:—

'I may strike,' etc.

	Sing.	Plur.	
1.	mārā, mārami, or	māras, māramū, or	
mārāmutū		$mar{a}rar{a}matar{a}.$	
2	$mar{a}rar{e}s$	$m ilde{a} r a t h$.	
3.	mā r ī	$m ilde{a} r ilde{c} n t h$.	

These forms strikingly resemble the Sanskrit Present. Thus, the Sanskrit for 'I go' is:—

Sing.		I'lur.
1.	$chalar{a}mi$	$chal ilde{a} mas.$
2.	chalasi	chalatha.
3.	chalati	chalanti.

Except in the second person plural they still more nearly resemble the Prakrit conjugation of the present of the verb 'to strike,' viz.—

	Sing.	Plur.
1.	mārēmi	maremô.
2.	$mar{a}rar{e}si$	märëha.
3	mārēi	märënti.

In the Paisachi dialect of Prakrit, there is maretha for the 2nd person plural.

The verb $bh\bar{o}n\bar{o}$, to become, is slightly irregular in the 3rd person singular, forming $bh\bar{e}\bar{\imath}$, instead of $bh\bar{o}\bar{\imath}$.

The following are examples of this tense:-

1st pers. sing. - bharã, in aũ apṇō pēṭ bharã, I may fill my belly.

kěrāmutū, in aŭ apņē dostā-nē sāthī khushī kerāmutū, (that) I may make rejoicing with my friends.

3rd pers. sing.— $bh\bar{e}i$, in $itth\bar{e}$ - $m\tilde{a}$ $k\tilde{i}h$ $kas\bar{u}r$ $bh\bar{e}i$, (if) therein any fault may become (II).

1st pers. plur.—karamū and khāmū, in āh khāmū tē khushī karamū, we may (i.e. let us) eat and make rejoicing.

3rd pers. plur.—zaběnth, in $y\bar{a}$ gall changī nahĩ lok zaběnth, this thing is not good that people may say (that I am thy son).

The **Present** tense is formed by conjugating the present participle with the present tense of the verb substantive. Thus, $a\tilde{u}$ $mar\tilde{a}$ -chhi, I am striking. Any form of the verb substantive may be used. Moreover, the final \tilde{a} of the present participle may optionally be dropped, so that we may also have mar chhi, and so throughout. Examples of the use of this tense are:—

Sing. 1st person.—marā-chhi, in aŭ itthē buchchhā marā-chhi, I here am dying of hunger.

3rd person masc.— $j\tilde{a}$ -chhu, in hissō zō mī $j\tilde{a}$ -chhu, the share which comes to me. Fem.— $j\tilde{a}$ -chhi, in tahsīldārē-tī chiṭṭhī $j\tilde{a}$ -chhi, a letter of the tahsīldār is coming (II).

Plur. 1st person.—banāwā-chha, in ghar zĕ banāwā-chha, if we are building a house (II).

3rd person.—gaņā-chha, in az gōrū gaņā-chha, now-a-days they are counting the cows (II).

 $ghin\tilde{a}$ -chhan, in $ill\bar{a}$ -tō $mul\ ghin\tilde{a}$ -chhan, they are taking the price thereof (II).

In $m\bar{\imath}n\bar{e}\ b\bar{a}bb\bar{a}$ - $t\bar{e}\ maz\bar{\imath}r\ kit\bar{a}\ rajj\bar{\imath}\ r\bar{o}t\bar{\imath}\ kh\tilde{a}$ -chhi, how many servants of my father are eating bread and are satisfied, we have $kh\tilde{a}$ -chhi, instead of $kh\tilde{a}$ -chha. Here the chhi is evidently borrowed from the Kāshmīrī chhih, they are.

The **Imperfect** is formed by conjugating $t\bar{o}$ with the present participle. This $t\bar{o}$ is conjugated. The present participle is unchanged, and may optionally drop its nasalization, so that we get $m\bar{a}r\tilde{a}$ - $t\bar{o}$ or $m\bar{a}r\bar{a}$ - $t\bar{o}$, he was striking.

This tense is conjugated as follows in the masculine:—

Sing.	Plur.
1. $m\tilde{a}r\tilde{\tilde{a}}$ $(m\tilde{a}r\tilde{a})$ - $t\tilde{e}$	$mar{a}r\widetilde{ar{a}}\ (mar{a}rar{a})$ - $tar{a}$.
$2.$ $m ilde{a}r ilde{\widetilde{a}}$ $(m ilde{a}r ilde{a})$ - $t ilde{e}$	$mar{a}r\widetilde{ar{a}}$ $(mar{a}rar{a})$ - $tath$.
3. $m\bar{a}r\widetilde{a}$ $(m\bar{a}r\bar{a})$ - $t\bar{o}$	$mar{a}r\widetilde{ar{a}}$ $(mar{a}rar{a})$ - $tar{a}$.

As examples we may quote the following:—

3rd pers. $\sin g$. $-d\tilde{a}$ - $t\tilde{o}$, in $t\tilde{e}$ $k\tilde{\tilde{e}}$ $d\tilde{a}$ - $t\tilde{o}$ $n\tilde{a}$, no one was giving to him.

3rd pers. sing.— $kar\tilde{a}$ - $t\bar{o}$; and 3rd pers. plur.— $kh\tilde{a}$ - $t\bar{a}$, in zina phalīā sūr $kh\tilde{a}$ - $t\bar{a}$, su manē-mā $kar\tilde{a}$ - $t\bar{o}$, he was making (i.e. wishing) in (his) mind, that (I may fill my belly) with those husks which the swine were eating.

The **Future** is directly borrowed from Western Pahārī. It is conjugated as follows, in the masculine:—

'I shall strike,' etc.

	Sing.		Plur.
1.	$mar{a}rar{a}lar{o}$		$mar{a}ramalar{a}.$
2.	$mar{a}rar{e}lar{o}$		$mar{a}rathalar{a}.$
3	mārēlā	•	mārenthalā

It will be observed that it is formed by suffixing $l\bar{o}$ to the old present, which undergoes some changes in the process.

Mr. Bailey gives two other examples of this tense, viz.:—

'I shall go,' etc.

•,	Sing.					Plur.
1.	$gar{a}lar{o}$		3.1			gāmalā.
2.	gēlō					gāthalā.
3.	$gar{e}ar{\imath}lar{o}$					$gainthal \~a.$
		, -1	'I shall	l come,	etc.	
1.	$jar{a}lar{o}$					$jar{a}malar{a}$.
~						7. 7. 7

1. $j\bar{a}l\bar{o}$ Jamala.2. $j\bar{e}l\bar{o}$ $j\bar{e}thal\bar{a}$.3. $j\bar{e}l\bar{o}$ $jinthal\bar{a}$.

Two examples occur in the Specimens, viz. $g\bar{a}l\bar{o}$ and $zab\bar{a}l\bar{o}$, in $a\tilde{u}$ appē babhō-kapē uṭhīta chalē $g\bar{a}l\bar{o}$, $zab\bar{a}l\bar{o}$, I having arisen will go away to my father, and will say.

The **Past Tense** is formed from the past participle. In the case of intransitive verbs, this is conjugated like $but\bar{o}$. Thus, to take $uth\bar{u}\bar{o}$, arisen, we get the following conjugation in the masculine. The only thing to note is that in the third person singular, the past participle optionally takes the form $uth\bar{u}\bar{e}$.

'I arose,' etc.

	Sing.	Plur.
1.	$uthar{u}ar{e},\ uthar{u}ar{e}s$	$uthar{u}a,uthar{u}as.$
2.	uțhūē, uțhūēs	$uth\bar{u}ath$.
3.	$uth\bar{u}\bar{o}, uth\bar{u}\bar{e} \text{ (fem. } uth\bar{i})$	$u!har{u}ar{a}$ (fem. $u!har{a}$).

Dlar

Mr. Bailey gives the following two paradigms:-

'I went,' etc.

	Sing.	THIT.
1.	g ės	$gar{a}$.
2.	$gar{e}s$	$g\bar{a}th.$
3.	$gar{o}$	ga .
	'I came,' etc.	
1.	āwē	$ar{a}war{a}.$
2.	$ar{a}voar{e}$	\bar{a} $vath$.
3.	$ar{a}ar{o},ar{a}war{o}$	ãivã.

The following examples of the past of intransitive verbs occur in the Specimens:-

Sing. 1.—āwē, in ajj aŭ barā dūr āwē, today I came a great distance (224).

bhūē, in aũ hāzir bhūē, I became present (II).

3rd pers. mase. $-\bar{a}\bar{o}$, in su appē babbō-kapē uļhīta $\bar{a}\bar{o}$, he, having arisen, came to his father.

 $\bar{a}w\bar{o}$, in zabla gharē-nērē $\bar{a}w\bar{o}$, when he came near the house.

bāū, in tē-tē khātir palu-rō batsurō phaṭṭ-bāū, for his sake the fatted calf was killed.

 $g\bar{o}$, in $phir\bar{\imath}$ dau $r\bar{\imath}ita$ $g\bar{o}$, then he went running.

pōūō, in rātī ichchh pōūō, at night a bear fell (i.e. happened to come) (II).

uțhūō, in hunī uțhūō rāzī bhōīta, now he arose, having become well (i.e. he has become alive).

 $b\bar{u}\bar{e}$, in $su\ r\bar{o}sh\bar{e}\ b\bar{u}\bar{e}$, he became in anger.

 $lag\bar{u}\bar{e},$ in su $pati\bar{a}n\bar{e}$ $lag\bar{u}\bar{e},$ he began to persuade him.

With this group in \tilde{e} we may perhaps connect the anomalous form $ch\tilde{a}ch\tilde{e}$, which I am unable to explain satisfactorily. It occurs in antur na gahņē $ch\tilde{a}ch\tilde{e}$, he did not wish to go within.

Fem.— $bh\bar{u}\bar{\imath}$, in $l\bar{o}$ $bh\bar{u}\bar{\imath}$, light became (i.e. it dawned) (II).

Plur. 3rd pers. masc.—āwā, in tila-hatha gharē chalē-āwā, from there they came home (II).

bhūā, in tē-tē magar bhūā dash māhņā, ten men became after him (i.c. followed him) (II).

 $g\bar{a}$, in $d\bar{u}r$ $g\bar{a}$ -su, they went far to him (II).

lagūā, in tiņē khushī karnē lagūā, they began to do rejoicing.

Fem.—lagīā, in bandūkī dittīā-su, na lagīā, guns were aimed at him, they were not attached (i.e. did not hit him) (II).

In the Past Tense of transitive verbs, the participle is passive, and agrees with the object (when in the form of the nominative) in gender and number. The subject is in the case of the agent. The participle is not altered for person, but may take the form in e, as in the case of intransitive verbs. Thus, $m\bar{\imath}$ $m\bar{\imath}r\bar{\imath}$, $m\bar{\imath}$ $m\bar{a}r\bar{\imath}$, or $m\bar{\imath}$ $m\bar{a}r\bar{\imath}$, $\bar{\imath}$ struck him. Examples are:—

Masc. sing.— $ditt\bar{o}$, in $apn\bar{o}$ $m\bar{a}l$ $t\tilde{e}n\bar{\imath}$ $bant\bar{\imath}$ - $ditt\bar{o}$, he divided out his property. $h\tilde{e}r\bar{u}\bar{o}$, in su $babb\bar{e}$ $h\bar{e}r\bar{u}\bar{o}$, his father saw him.

lō, in nikkē puttrē sab jamē kĕrī-lō, the younger son took and made everything collected.

mārū, in dōkē dī lōkē mārū, next day the people killed (it) (II).

mōṛū, in tinō ākhō kadē na mī mōṛū, I never disobeyed thy command.

zabū, in nikkā maṭṭhā-ṇē babbē zabū, the younger son said to the father.

zabūō, in babbē naukarā-nē zabūō, the father said to the servants.

zabūē, in těnī zabūē, he said ('thy brother is come').

těnī tē zabūē, he said to him ('son, thou art ever with me').

Fem. plur.—dittēā, in titthē phirē bandūkē dittēā-su, then again guns were given to (i.e. fired at) him (II).

There is only one instance of the **Perfect** in the specimens. It is formed by suffixing \bar{a} to the past participle. This \bar{a} is borrowed from Western Pahārī, where it occurs, as the Verb Substantive of the Churāhī dialect of Chamĕālī (see Vol. IX, Pt. iv, p. 825), in which it is also used to form the perfect tense. The example is:—

tē-tē puttrē mē matē kōrŗē mārū-ā, I have beaten his son with many stripes (228).

The **Pluperfect** is formed by adding the past tense of the verb substantive to the past participle, as in $m\bar{\imath}$ $m\bar{a}r\bar{u}$ -but \bar{o} , I had struck (193).

Another form of the Pluperfect of intransitive verbs is made by taking the past participle with $r\bar{o}$ and conjugating. The following two are given by Mr. Bailey:—

'I went,' etc.

	Masc. Sing.	Masc. Plur.
	$g ar{o}$ - $r ar{e}$	$gar{o}$ - $rar{a}$ (? $gar{a}$ - $rar{a}$).
2.	$g ar{o} extbf{-}rar{e}$	$gar{o}$ - $rath$ (? $gar{a}$ - $rath$).
3.	$g ar{o}$ - $r ar{o}$	$gar{o}$ - $rar{a}$ (? $gar{a}$ - $rar{a}$).

'I came,' etc.

1.	$ar{u}$ - $rar{e}$		ū-rō.
2.	$ar{u}$ - $rar{e}$		$ ilde{u} ext{-} rath$.
3.	\bar{u} - $r\bar{o}$		\bar{u} - $r\bar{a}$.

Examples are:

gō-rō, in yō mēṇō puttur marī gō-rō, this my son had died. ū-rō, in zabla tīṇō puttur ū-rō, when thy son had come. The **Passive** is formed by adding \tilde{i} to the root, which is not further changed, and then conjugating with it the verb $gisn\bar{o}$, to go. Thus:—

aũ mārī gō-chhi, I am being struck (202).

aũ mārī gēs, I was struck (203).

 $a\tilde{u} \ m\bar{a}r\tilde{i} \ g\bar{a}l\bar{o}$, I shall be struck (204).

Causal Verbs.—The materials throwing light on the formation of causal verbs are very scanty, but we have enough to show that the process follows the general lines of the formation of the causal in cognate languages. Thus, \bar{a} is added to the root in $k\bar{e}rn\bar{o}$, to make, and $k\bar{e}r\bar{a}n\bar{o}$, to cause to make, and a vowel is lengthened in $uz\bar{a}rn\bar{o}$, to squander.

Pronominal suffixes are freely used, and give Sirājī its chief title to be classed as a form of Kāshmīrī, rather than of Western Pahārī or Pōgrī Pañjābī. The rules for their application cannot yet be definitely stated, and we must content ourselves with examples of their use.

First Person sing. ag.—The suffix is m, to which \check{e} is prefixed as a junction vowel. It occurs twice in the specimens, each time in the form $k\check{e}\bar{o}ry\check{e}m$, I did. There is no information as to what is the past tense of the verb $karn\bar{o}$, to do. It is probably $k\check{e}r\bar{o}$ or some such form. To this the $(y)\check{e}m$ has been suffixed, so that we get $k\check{e}r\bar{o}y\check{e}m$, and thence $k\check{e}\bar{o}ry\check{e}m$. The examples are:—

tīnō gunāh kĕōryĕm, I did sin of (i.e. against) thee. Here gunāh, sin, is masculine.

mī kitē barīē tēnī khidmat kĕōryĕm, for how many years did I do thy service. Here khidmat, service, is feminine. In the original manuscript of the Parable sent to me by Mr. Bailey, we have kĕōryĕm, as above; but in the printed grammatical notes, he here gives kĕŭriĕm.

Second Person sing. ag.—The suffix is t, with i as a junction vowel. Thus, from $ditt\bar{o}$, given, we have $ditt\bar{u}it$, given by thee, in:—

kadē bakrē-tō bachchō mē-kān na dittūit, thou never gavest me a kid.

Third Person sing. dat.—We have apparently an example of this in $g\bar{e}s$, $g\bar{o}s$, or $g\bar{o}\bar{e}s$, he went to him (i.e. to an inhabitant of that country). The suffix is therefore s, as in Kāshmīrī.

More certain is su in the following. The same suffix is employed in the Chibhāli dialect of Lahndā (see p. 510 of Part i of this Volume):—

khurīē chalē-gāsu. Dūr gāsu, they went-to-him on the track. They went-to-him far (II).

phirī bandūkī dittīāsu, then guns were-given-to-him (i.e. aimed at him) (II).

Agent.—The suffix of the agent singular of the 3rd person is $n\bar{\imath}$. It is quite common, and when added to a masculine singular participle, the latter takes the form in $\bar{u}\bar{e}$, the \bar{e} of which is shortened. Thus, $zab\bar{u}\bar{e}$, said; $zab\bar{u}\bar{e}$ - $n\bar{\imath}$, he said. Examples are:—

tīnē babbē batsurō palu-rō halāl kĕrāūĕnī, by thy father the fatted calf was caused-to-be-made-by-him lawful.

dūr mulkhō safar kĕrūĕnī, a journey to a far country was-made-by-him.

baddō nuksān kĕrūĕnī, great damage was-made-by-him (II).

yā gallā changō ladūĕnī, for this reason (that) he was-received-by-him well.

 $titth\bar{e}\ t\check{e}n\bar{\imath}\ m\bar{a}l\ apn\bar{o}\ uz\bar{a}r\bar{\imath}\ l\bar{e}n\bar{\imath}$ (i.e. $l\bar{o}+n\bar{\imath}$), there by him his own property, having squandered, was-taken-by-him.

 $gal\bar{e} \ s\bar{a}th\bar{\imath} \ l\bar{a}w\check{e}n\bar{\imath}$ (i.e. $l\bar{a}u\bar{e}+n\bar{\imath}$), with the neck it-was-pressed-by-him (i.e. he embraced him).

bājē-tō tĕ natsnē-tō bār shuņūĕņī. Ĕkkī apņō māhņō shadūĕņī, su putsūĕņī, the noise of music and of dancing was-heard-by-him. A certain man of his wascalled-by-him. He was-asked-by-him.

zěṇī tīṇō māl kanjrīē-ṇī hatha udzārūčṇī, by whom thy property with harlots

was-squandered-by-him.

tyĕbla zabūĕṇī, then it-was-said-by-him ('how many servants of my father, etc.'). With a participle in the feminine plural we have:—

shundīā dittīānī, kisses were-given-by-him.

In the bhējuseņī, he-was-sent-by-him (into the field to feed swine), we have two suffixes, viz. s of the nominative singular and nī of the agent singular, both of the 3rd person.

As in Pŏgulī (see p. 426) when a suffix is added to the second person plural of the imperative, the verb abandons the imperative form and takes that of the second person plural of the Old Present. E.g. instead of $m\bar{a}ra$, strike ye, we have $m\bar{a}rath$. In the following examples the suffix is \bar{u} , which represents the accusative or dative of the third person:

 $must\ m\bar{a}rath\bar{u},\ t\bar{\imath}\ ra\underline{d}z\bar{u}\ s\bar{a}th\bar{\imath}\ bandhith\bar{u}$, beat-ye-him well, and bind ye him with ropes (236). Here marath is used instead of mara, and bandhith (for

bandhath) instead of bandha.

· · · · tē-pur lāwa; tĕ hatthō chhāp lāwathū, put ye · · · · clothes on him, and put-ye-to-him a ring on the hand. Here we have lāwa without a suffix, and lawath, with one, in the same sentence.

palu-rō batsurō ārīta phaṭṭathū, having brought the fatted calf kill-ye-it.

Compound Verbs.—The following examples of compound verbs occur in the Specimens:

Intensives.—The vowel $\bar{\imath}$ or $\tilde{\imath}$ is added to the root of the principal verb. Compare the passive. Thus:-

banțī-dittō, in apnō māl tenī banţī-dittō, he divided out and gave his property.

 $bh\bar{o}\tilde{\imath}$ - $g\bar{o}$, in su baŗ \bar{o} tang $bh\bar{o}\tilde{\imath}$ - $g\bar{o}$, he became very much straitened.

kěrī-lō, in nikkē puttrē sab jamē kěrī-lō, the younger son collected to himself everything.

 $pa\tilde{\imath}-g\bar{o}$, in $t\bar{e}$ mulkhō-m \tilde{a} kāl barō $pa\tilde{\imath}-g\bar{o}$, a mighty famine fell in that land. Formed from the past participle, equivalent to the Hindī chalē gaē, we have :—

khurīē chalē-gāsu, they went away to him on the track (II).

Inceptives.—As in Panjābī, the principal verb is put into the inflected infinitive. Thus:-

tiņē khushī karnē lagūā, they began to make rejoicing. su patiāņē lagūē, he began to persuade him. VOL. VIII, PART II.

3 m 2

In the following, the final \bar{e} of the inflected infinitive is dropped:—

az ghinī-lēṇ lagūā, now they began (i.e. have begun) to take (the tax) (II).

Permissives.—The principal verb is put into the inflected infinitive, as in:—

baḍnē na dã-chha, they do not allow (us) to fell (trees) (II).

FREE TRANSLATION OF THE FOREGOING.

A bear came by night to eat our hens. Then, on the level ground, he did a great deal of damage. In the morning, as soon as it was light, ten men went after him. They followed his tracks a long way and found him asleep in his den. By this time it was the hour for them to eat their meal, and after that they fired guns at him, but the bullets missed him and he ran away. So they returned home. Next day the people This is an affair of last year. killed him.

A written order of the Tahsīldār is being circulated that labourers are wanted for the Pērō, or camp. Also goats, beds, cooking-vessels, and fowls have to be brought When the $\mathcal{D}\bar{e}r\bar{o}$ has passed by we have to go home, and if any fault is found with our supplies we have to pay a fine. I was present (at the last $D\bar{e}r\bar{o}$).

The tax on a buffalo is ten annas, both for full grown animals and for calves that are still drinking milk. We look upon this as oppression. There is a grazing tax of six rupees four annas for a hundred sheep or goats; but in this case, the tax on lambs and kids under a year old used to be remitted. Now, however, they have begun to collect a tax on them too, and they are counting our cows. If we build a house, they make a charge for it. There is an order forbidding the cutting of deodar trees, and even other trees they do not allow us to fell.

¹ The Dero is the annual procession from Jamma to Śrīnagar, or vice versa, of the Inner Palace, or Mahārāja's Ladies and their Escort.

To the west of the Dōḍā Sirāj, between it and the River Bichlārī, and still to the north of the Chināb, there lies a tract of country of which the principal village is known as Rāmban. This Rāmban is on the road between Śrīnagar and Jammū, 88 miles from the former and 63 from the latter. The language of this tract is known as Rāmbanī, and at the Census of 1911 was returned as being spoken by 2,171 people.

Rāmbanī closely resembles the neighbouring Sirājī. Any important differences are due to the fact that the language immediately to the south, across the Chināb, is the Pogrī dialect of Pańjābī, now firmly established, and not the Bhadrawāhī dialect of Western Pahārī. In fact Rāmbanī can very fairly be described as a mixture of Sirājī and Pogrī. It still possesses enough Kāshmīrī peculiarities to entitle it to be classed as a dialect of that language. Indeed, in one respect—the formation of that future tense—it follows Kāshmīrī, where the Sirājī has adopted the Western Pahārī idiom; but it must nevertheless be considered as a broken form of speech, partly Pogrī and partly Kāshmīrī, and it might with almost equal correctness be classed under either group of languages.

The materials available for a consideration of this dialect consist of (1) a version of the Parable of the Prodigal Son and a List of Words and Sentences received from the Kashmir Darbar and (2) a short sketch of the Grammar and another List of Words contained in the Rev. T. Grahame Bailey's Languages of the Northern Himalayas, published by the Royal Asiatic Society in 1908. The List of Words given on pp. 489ff. has been prepared by me on the basis of the two lists above mentioned, neither being followed to the exclusion of the other. The one specimen printed below is given, as received, in the Takri character, together with a literatim translation, and also with a transcription showing what sounds the writing was intended to convey. In regard to the Takri character, these, as we have seen, are two very different things.1 In the latter transcription I have not had much to help me, beyond comparison with cognate dialects and a careful examination of all the various forms under which the same word appears in the written character, and though I have done my best, I cannot hope that it is en-The account of the grammar here given includes most of what is to be found in Mr. Bailey's brief sketch, but is mainly based on the List of Words and on the forms found in my transcription of the Parable. It should therefore be taken with reserve, as not necessarily correct in every detail. It should be remembered that for ordinary purposes Rāmbanī is never written, and probably differs from mouth to mouth and from valley to valley.

In the following sketch of Rāmbanī grammar, a word or passage taken from the Parable is indicated by the Roman numeral I, followed by the number of the line in Arabic numerals. Thus, marimatā (I, 33) indicates that the word is to be found in the

In India reading a written document and understanding it are often indicated by different expressions. To read a letter is in Hindī parhnā, to read and understand it is parh-lēnā. So we have in the Arabian Nights' tale of King 'Onar bin al-Nu'umān and his Sons, 'when my father read this letter and understood its contents, (it vexed him),' on which Burton (Library Edition ii, 15) remarks, 'this part of the phrase which may seem unnecessary to the European is perfectly intelligible to all Orientalists. You may read many an Eastern letter and not understand it. Compare Boccacio, iv, 1.'

33rd line of the Parable. A word or passage followed by an Arabic numeral not preceded by I, will be found in the List of Words and Sentences on pp. 489ff.

PRONUNCIATION.—Vowels.—Final vowels, especially when short, are most indefinite. Mr. Bailey, who has heard them himself, says of final short vowels that 'it is often extremely hard to tell which vowel is being used, or whether what seems like a short vowel is really one, or is merely the necessary emission of breath after a consonant.' A prominent instance of this is the final short vowel at the end of the oblique case singular of masculine nouns, which Mr. Bailey represents by a, and which is written \check{e} in the following pages. Its nearest English sound is probably, as in Dōgrī, that of the a in 'hat.'

Final \bar{a} is interchangeable with \bar{o} and \bar{u} , and even with ". Here we have the same state of affairs as in Western Pahārī, in which the final \bar{a} , \bar{o} , and \bar{u} are interchangeable (see Vol. IX, Part iv, pp. 379, 559), while the final " is a clear example of Kāshmīrī influence, as for example, in such words as gur^u , a horse, compared with the Pańjābī or Hindī $gh\bar{o}r\bar{a}$.

The mātrā-vowels i and occur very rarely, and only in the List given by Mr. Bailey. They are entirely absent from the materials received from Kashmīr. I have not noticed any clear traces of the vocalic epenthesis which is so common in Kāshmīrī.

Consonants.—The consonantal system is, on the whole, the same as that of Dōgrī, not that of Kāshmīrī. Thus not only are the cerebral r and n common, but also the sonant letters gh, jh, dh, dh, and bh retain the aspiration that they lose in Kāshmīrī. On the other hand the Kāshmīrī letters ts (as in pants, five; $gatshn\bar{u}$, to go) and z (as in zikhan, when) are common. The treatment of these fricatives, and of the palatal letters ch and j is deserving of particular notice, as they present several typical Dardic peculiarities. First of all, there is the typical Dardic interchange of ch and tr, as in $ch\bar{e}\bar{\imath}$ or trai, three. Again fricatives and palatals are interchangeable, as in tsaur or $ch\bar{o}r$, four; pants or panj, five; $samz\bar{a}n\bar{u}$, as compared with the Hindī $samjh\bar{a}n\bar{a}$, to cause to understand. Finally the fricatives ts and tsh sometimes become sibilants, as in $gatshn\bar{u}$ or $gasn\bar{u}$ (Sirājī $gisn\bar{o}$), to go. The interchange between palatals and sibilants is common, as in $chh\bar{e}$ or $sh\bar{e}$, six; $chun\bar{a}n\bar{u}$ or $sun\bar{a}ln\bar{u}$, to feed (cattle) (I, 11; 229); $shil\bar{u}$, for $chh\bar{e}l\bar{a}$, a kid.

As in Sirājī, an original \acute{s} does not become h (as it does in Kāshmīrī), but remains unchanged under the form of sh, as in $shun\bar{a}$, a dog; shir (not sir), a head.

There is the same metathesis of h in the word $brh\bar{a}$, a brother, that we have noted in Sirājī, and another example is $phakr\bar{u}$, for $pakhr\bar{u}$, a bird (76).

There is one interesting trace of the consonantal metathesis of Kāshmīrī. In that language the feminine of $dyut^u$, given, is $di\underline{t}\underline{s}^{\bar{u}}$. In Rāmbanī, the feminine of $dity\bar{a}$, given, is $dist\bar{\imath}$, in which the $\underline{t}\underline{s}$ has become $\underline{s}t$ by metathesis.

DECLENSION.—In the formation of the plural and of the oblique case nouns follow Pogri rather than Kāshmīrī. The series of cases which we find in the latter language is reduced to a nominative and oblique case in each number, as in Pañjābī (of which Pogri is a dialect) and Hindī.

The important class of strong masculine nouns which in Pañjābī and Hindī end in \bar{a} , as in the case of $gh\bar{o}r\bar{a}$, a horse, in Rāmbanī also ends in \bar{a} , but this \bar{a} is sometimes dropped, and is also interchangeable with \bar{o} or \bar{u} , and even with the Kāshmīrī. Thus,

To the west of the Dōdā Sirāj, between it and the River Bichlārī, and still to the north of the Chināb, there lies a tract of country of which the principal village is known as Rāmban. This Rāmban is on the road between Śrīnagar and Jammū, S8 miles from the former and 63 from the latter. The language of this tract is known as Rāmbanī, and at the Census of 1911 was returned as being spoken by 2,171. people.

Rāmbanī closely resembles the neighbouring Sirājī. Any important differences are due to the fact that the language immediately to the south, across the Chināb, is the Dōgrī dialect of Pañjābī, now firmly established, and not the Bhadrawāhī dialect of Western Pahārī. In fact Rāmbanī can very fairly be described as a mixture of Sirājī and Dōgrī. It still possesses enough Kāshmīrī peculiarities to entitle it to be classed as a dialect of that language. Indeed, in one respect—the formation of that future tense—it follows Kāshmīrī, where the Sirājī has adopted the Western Pahārī idiom; but it must nevertheless be considered as a broken form of speech, partly Dōgrī and partly Kāshmīrī, and it might with almost equal correctness be classed under either group of languages.

Its nearest English sound is probably, as in Dōgrī, that of the a in 'hat.'

Final \bar{a} is interchangeable with \bar{o} and \bar{u} , and even with ". Here we have the same state of affairs as in Western Pahāṛi, in which the final \bar{a} , \bar{o} , and \bar{u} are interchangeable (see Vol. IX, Part iv, pp. 379, 559), while the final " is a clear example of Kāshmīrī influence, as for example, in such words as gur^u , a horse, compared with the Pańjābī or Hindī $gh\bar{o}r\bar{a}$.

The mātrā-vowels and cocur very rarely, and only in the List given by Mr. Bailey. They are entirely absent from the materials received from Kashmīr. I have not noticed any clear traces of the vocalic epenthesis which is so common in Kāshmīrī.

Consonants.—The consonantal system is, on the whole, the same as that of Dogri, not that of Kāshmīrī. Thus not only are the cerebral r and n common, but also the sonant letters gh, jh, dh, dh, and bh retain the aspiration that they lose in Kāshmīrī. On the other hand the Kāshmīrī letters ts (as in pants, five; $gatshn\bar{u}$, to go) and z (as in zikhan, when) are common. The treatment of these fricatives, and of the palatal letters ch and j is deserving of particular notice, as they present several typical Dardic peculiarities. First of all, there is the typical Dardic interchange of ch and tr, as in $ch\bar{e}\bar{i}$ or trai, three. Again fricatives and palatals are interchangeable, as in tsaur or t

As in Sirājī, an original \acute{s} does not become h (as it does in Kāshmīrī), but remains unchanged under the form of sh, as in $shun\ddot{a}$, a dog; shir (not sir), a head.

There is the same metathesis of h in the word $brh\bar{a}$, a brother, that we have noted in Sirājī, and another example is $phakr\bar{u}$, for $pakhr\bar{u}$, a bird (76).

There is one interesting trace of the consonantal metathesis of Kāshmīrī. In that language the feminine of $dyut^u$, given, is $dits^{\bar{u}}$. In Rāmbanī, the feminine of $dity\bar{a}$, given, is $dist\bar{\imath}$, in which the \underline{ts} has become st by metathesis.

DECLENSION.—In the formation of the plural and of the oblique case nouns follow Pogri rather than Kāshmīrī. The series of cases which we find in the latter language is reduced to a nominative and oblique case in each number, as in Pañjābī (of which Pogrī is a dialect) and Hindī.

The important class of strong masculine nouns which in Pañjābī and Hindī end in \bar{a} , as in the case of $gh\bar{o}r\bar{a}$, a horse, in Rāmbanī also ends in \bar{a} , but this \bar{a} is sometimes dropped, and is also interchangeable with \bar{o} or \bar{u} , and even with the Kāshmīrī. Thus,

we have $bad\bar{a}$ (I, 35) or $bad\bar{u}$ (231), great; $m\bar{a}hn$ (51), $m\bar{a}hn\bar{o}$ (51), or $m\bar{a}hn\bar{u}$ (I. 1), a man; $gh\bar{o}r^u$ or $gh\bar{o}r\bar{a}$, a horse (68, 138); $kh\bar{o}t^u$ or $kh\bar{o}t\bar{a}$, an ass (74); $lauhr\bar{a}$, a son (I, 32), but nom. plur. $lauhr\bar{u}$ (I, 1); $l\bar{o}k$ or $l\bar{o}k^u$, a son (54); $shil\bar{u}$, a kid (I, 44). These nouns form their oblique singular and nominative plural in \tilde{e} , and the oblique plural in an. The \tilde{e} of the oblique singular and nominative plural has a very indistinct sound, approaching (as in Dogri) the sound of the a in 'hat.' Mr. Bailey represents it by a, and I use \tilde{e} only because, in the native character, it is generally represented by \tilde{e} . Occasionally we find the \tilde{u} of the nominative employed instead of this \tilde{e} . Thus we have $m\bar{a}hn\bar{u}$ (obl. sing.) and $lauhr\bar{u}$ (nom. plur.), both in 1, 1. Whether these are intentional, or mere slips of the pen, I do not venture to say.

Some nouns in \bar{a} , such as $b\bar{a}bb\bar{a}$, or $b\bar{a}b\bar{a}$ (also $b\bar{a}bb$), a father, and $k\bar{a}m\tilde{a}$, a servant, retain the \bar{a} of the nominative in the oblique singular and nominative plural, in this respect closely agreeing with a similar group of nouns in $\bar{D}\bar{o}gr\bar{i}$.

Weak masculine nouns, i.e. those not ending in \bar{a} , \bar{o} , \bar{u} , or ", of which the Pańjābī and Hindī ghar, a house, is a familiar example, form the oblique singular by adding \check{e} or ai, both of which are, as explained above, pronounced like the a in 'hat.' Thus, $g\bar{a}m$, a village, oblique singular $g\bar{a}m\check{e}$ (241); mulkh, a country, obl. sing. mulkhai (I, 6). The nominative plural is the same as the nominative singular, as in $d\bar{a}nt$, an ox or oxen (142-4); harn, a deer or deers (153-5). The oblique plural ends in an as in $g\bar{a}man$, to villages, but no example of this occurs in the specimens. There is one form, $dust\bar{\imath}-s\bar{a}th$ (I, 45), with friends, in which $d\bar{u}st\bar{\imath}$ must be translated as an oblique plural. But the passage appears to be incorrect. At any rate I am unable to explain it. The word ghar, a house, is irregular, making its oblique singular $g\bar{\imath}$.

Strong feminine nouns in $\bar{\imath}$, like $kwrh\bar{\imath}$, a daughter, form the oblique singular in $\bar{\imath}$ or ia, as in $kwrh\bar{\imath}$ or kwrhia. The nominative plural ends in $\bar{\imath}\bar{\imath}$ or $\bar{\imath}\check{\iota}$, as in $kwrh\bar{\imath}\bar{a}$ or $kwrh\bar{\imath}\bar{a}$, as in

Weak feminine nouns ending in any letter except $\bar{\imath}$, such as bahin, a sister (50), form the oblique singular in $\bar{\imath}$, as in bahin $\bar{\imath}$ (225, 231). Mr. Bailey also gives bahin $\bar{\imath}$, i.e. according to the spelling here adopted, bahin \bar{e} . There are no materials from which we can give a general rule for the nominative and oblique plural. Zanāna, a woman, has its nominative plural zanān $\bar{\imath}$ (128, 130), and gau, a cow, has its nominative plural gaw \bar{e} (143-5).

We thus obtain the following table of the declension of nouns in Rāmbanī:-

Singu	LÁR.	PLURAL.		
Nominative.	Oblique.	Nominative.	Oblique.	
ghōru, ghōra, a horse	ghōrĕ	ghāŗĕ	ghōrun	
bābbā, a father	$b\bar{a}bb\bar{a}$	bābbā	bābbaņ	
$gar{a}m$, a village	$gar{a}mreve{e}$	$g\bar{a}m$	yaman	
kurhī, a daughter	kurhī, kurhia	kurhīã, kurhīž	kurhian	
bahin, a sister	bahinī, bahinĕ	?	?	

The oblique form, by itself, is used as a dative or agent. With the aid of postpositions, it indicates other relations, such as those of the genitive or ablative.

Examples of the various cases of the Rāmbanī noun are the following:-

Strong Masculine Nouns.—Sing. nom.—lauhṛā, in mēṇā lauhṛā marimatā thā, my son was dead (I, 32).

 $l\bar{o}k^u$, in $m\bar{i}n\check{e}$ $pitr\bar{i}\check{e}$ -sun $l\bar{o}k^u$ $t\check{e}s\check{e}\tilde{i}$ $bahin\bar{i}$ -sāth \bar{i} $bi\bar{a}htumut$ chhu, the son of my uncle is married to his sister (225).

kasaũ lō k^u tō pat pat \tilde{e} -chhu, whose son comes behind thee (239)?

shilū, in $t\tilde{u}$ bakrī-sun shilū nā dityā, thou didst not give the kid of a goat (I, 44). Sing. obl.—butě, in butě-khal bīmī chhu, he is seated under a tree (230).

dihārē, in thōrē dihārē-patē, after a few days (I, 5). Here the singular is used in the sense of the plural.

 $gh\bar{o}r\check{e}$, in $\check{e}s$ $gh\bar{o}r\check{e}$ - $san\bar{\imath}$ $kit\bar{\imath}$ umr chhi, how much is the age of this horse (221) $gh\bar{o}r\check{e}$ - $bh\bar{e}\tilde{\imath}$ $b\bar{\imath}m\bar{\imath}$ chhu, he is seated on a horse (230).

 $g\bar{a}m\check{e}$ and $hat\bar{\imath}\check{e}b\bar{a}l\check{e}$, in $g\bar{a}m\check{e}$ -saně hat $\bar{\imath}\check{e}b\bar{a}l\check{e}$ -th \tilde{a} , from a shopkeeper of the village (241).

lauhre, in matthe lauhre bolya, by the younger son it was said (I, 2). Here the oblique case has the force of the agent.

mī těswě lōkě matā kōrrā ditmat chhis, I have given many stripes to his son (228). Here the oblique case has the force of the dative.

Plural nom.—lōkĕ, in tīnĕ bābā-sanĕ gī kitĕ lōkĕ chhi, how many sons are there in thy father's house (223)?

 $gh\bar{o}r^{u}$ or $gh\bar{o}r\bar{a}$, a horse, pl. $gh\bar{o}r\check{e}$ (138, 140).

shuṇā, a dog, pl. shuṇĕ (146-8).

Regarding $m\bar{a}hn\bar{u}$ and $lauhr\bar{u}$ in I, 1, see above. The word $rupayy\bar{u}$, a rupee, has its nom. plur. $rupa\bar{e}$. Thus:—

těs yu rupayyū dēnū, to him this rupee is to be given (234).

tin rupaē těs-thã ghinnī-laině, those rupees are to be taken from him (235). So

232.

Other nouns in $\bar{\alpha}$.—Sing. nom.— $k\bar{a}m\bar{a}$, in apnā $k\bar{a}m\bar{a}$ bōlyānī, his servant was addressed by him (I, 37).

Obl.— $b\bar{a}b\bar{a}$, in apně $b\bar{a}b\bar{a}$ - $p\bar{a}s$ chalī- $gas\tilde{a}$, I will go to my father (I, 18). So I, 16; I, 24; I, 29; I, 39; and 223.

 $k\bar{a}m\tilde{a}$, in $tin\bar{i}$ $k\bar{a}m\tilde{a}$ $b\bar{o}ly\bar{a}$, that servant said (I, 38).

Plur. nom.— $k\bar{a}m\tilde{a}$, in $m\bar{e}n\bar{e}$ $b\bar{a}b\bar{a}$ -sane $kitr\bar{e}$ $k\bar{a}m\tilde{a}$ satī, how many servants are there of my father (I, 16). So I, 22.

Plur. obl.—kāmaņ, in tisaņē bābā apnē kāmaņ bōlyānī, his father said to his servants (I, 29).

Perhaps kōrṛā, stripes (nom. plur.) (228), also belongs to this group.

Weak Masculine Nouns :-

Sing. nom.—puttar, in is lāik nā sā tōṇā puttar banā, I am not worthy of this, (that) I may become thy son (I, 21).

Sing. obl.— $g\bar{a}m\check{e}$, in $g\bar{a}m\check{e}$ - $san\check{e}$ $k\tilde{e}\underline{t}s\bar{\imath}$ hat $\bar{\imath}\check{e}b\bar{a}l\check{e}$ - $th\tilde{a}$, from a shopkeeper of the village (241).

Kashmīrē, in itt-ātē Kashmīrē-tā kitō dūr chhu, how far is it from here to Kashmīr (222)?

mulkhai, in tis mulkhai barā kāl pēā, to (i.e. in) that country a mighty famine

fell (I, 8). So I, 6.

pahārě and shirě (sing. nom. shir, 40), in pahārě-saně shirě-bhēt, on the top of a hill (229).

 $g\bar{\imath}$ (nom. ghar, 67), in $g\bar{\imath}$ - $m\tilde{a}$ chhitte $gh\bar{o}r\bar{e}$ - $san\bar{\imath}$ $k\bar{a}th\bar{\imath}$ chhi, in the house is the saddle of the white horse (226). So 223 and 233.

Plur. nom.—dānt, a bull, plur. dānt (142-4).

sikkar and $s\bar{u}r$, in $j\tilde{a}$ -bhar $\bar{\imath}$ $s\bar{u}r$ sikkar $kh\tilde{a}$ -sat $\bar{\imath}$, as the swine are eating husks (I, 13).

 $s\bar{u}r$, in $s\bar{u}r$ chuṇāṇī, for feeding swine (I, 11).

Strong Feminine nouns.—Sing. nom.—kuṛā or kuṛhā, a daughter (110ff.).

Sing. obl. - bagria, in tisun baḍā lauhṛā bagṛia-maz thā, his elder son was in the field (I, 35).

bakrī, in bakrī-sun shilū, a kid of a she-goat (I, 44).

Plur. nom.—ghōṛī, a mare, plur. ghōṛīĕ (139, 141).

bakrīč, and (weak) gawe, in yū pahārē-saņē shirč-bhēī bakrīč gawe sunāl-chhu, he is feeding she-goats and cows on the top of the hill (229).

ghundī \tilde{a} , in ghundī \tilde{a} distisanī, kisses were given to him by him (I, 25).

Plur. obl.—bagṛiaṇ, in tinī tis apnī bagṛiaṇ-maz bhējinī, he sent him into his fields (I, 11).

Weak Feminine Nouns.—Obl. sing.—bahinī (nom. bahin, 50), in mīnĕ pitrīĕ-sun loku tĕsĕī bahinī-sāthī biāhtumut chhu, the son of my uncle is married with (i.e. to) his sister (225). Similarly 231.

gazarī, in gazarī-sāthī ganṭhī, bind (him) with a rope (236).

piṭṭhī (nom. piṭṭh, 43), in kāṭhī tĕsĕĩ piṭṭhī bhēĩ lathas, put ye the saddle upon his back (227).

Plur. nom.—gawe, see under the head of strong feminine nouns.

Postpositions.—The following are examples of the use of the more important postpositions occurring in the specimens. They all govern the oblique case:—

ātě, from, in itt-ātě Kashmīrē-tā kitō dūr chhu, how far is it from here to Kashmīr (222). This is doubtful. Perhaps the words should be divided ittā-tě, for ittě-tě.

 $bh\tilde{e}\tilde{\imath}$, upon, in $k\tilde{a}th\tilde{\imath}$ $t\check{e}s\tilde{e}\tilde{\imath}$ $pitth\tilde{\imath}$ - $bh\tilde{e}\tilde{\imath}$ lathas, put the saddle upon his back (227). Similarly $shir\check{e}$ - $bh\tilde{e}\tilde{\imath}$, on the top (229), and $gh\tilde{o}r\check{e}$ - $bh\tilde{e}\tilde{\imath}$, on a horse (230).

khal, under, in butě-khal bīmī chhu, he is seated under a tree (230).

mã, in, in gī-mã chhittě ghōrě-saṇī kāṭhī chhi, in the house is the saddle of the white horse (226).

maz, in, in tisun badā lauhrā bagria-maz thā, his elder son was in the field (I, 35). So I, 12.

 $p\bar{a}s$, near, in possession of, in $apn\check{e}\ b\bar{a}b\bar{a}$ - $p\bar{a}s\ chal\bar{\imath}\ gas\tilde{a}$, I will go near (i.e. to) my father (I, 18).

 $t\tilde{u}$ sadā mī-pās $h\tilde{e}$, thou art ever near me (I. 49).

- In I, 50, we have $zi-k\tilde{\imath}$ $m\tilde{\imath}-p\bar{a}s\bar{\imath}$, whatever is near me (i.e. in my possession). Here it is possible that $p\bar{a}s\bar{\imath}$ is a compound of $p\bar{a}s$ with the verb substantive.
- $s\bar{a}th$ or $s\bar{a}th\bar{i}$, with, in company with, or with, by means of, in $apn\check{e}zi$ $d\bar{u}st\bar{i}-s\bar{a}th$ $khush\bar{i}$ $kar\tilde{a}$, that I may make rejoicings with my friends (I, 45).
- mīně pitrīě-suņ lōk" těsěĩ bahinī-sāthī biāhtumut chhu, the son of my uncle is married with (i.e. to) his sister (225).
- gozarī-sāthī ganthī, bind him with a rope (236).
- sun, of. This postposition of the genitive will be dealt with under the head of adjectives.
- $t\tilde{a}$, up to, see Kashmīrě- $t\tilde{a}$, above, under $at\check{e}$.
- $th\tilde{a}$, from, in $tin\ rupa\bar{e}\ t\check{e}s$ - $th\tilde{a}\ ghinn\bar{\imath}\ lain\check{e}$, those rupees are to be taken from him (235).
- $g\bar{a}m\check{e}$ -saņ \check{e} hatī $\check{e}b\bar{a}l\check{e}$ -th \tilde{a} , from a shopkeeper of the village (241).
- $m\tilde{a}$ -th \tilde{a} , from in, as in $tala\bar{o}$ - $m\tilde{a}$ -th \tilde{a} $p\bar{a}ni$ $k\bar{a}$, draw water from in (i.e. from) the tank (237).

Adjectives follow the usual rule. Strong adjectives in \bar{a} , \bar{u} , etc., are declined, while weak adjectives are not declined. As an example of a weak adjective, we may quote:—

dūr, in dūr mulkhai chalī-gā, he went to a far country (I, 6).

There are a few examples of adjectives with the Kāshmīrī termination mot^u , which appears under the form mut or $mat\bar{a}$. These are declined. Thus, burmut, bad, in burmut $l\bar{o}k^u$, a bad boy (129), feminine $burmat\bar{i}$, in $burmat\bar{i}$ $kurh\bar{i}$, a bad girl (131); ditmut, given, plur. masc. ditmat, in $m\bar{i}$ $k\bar{o}rr\bar{a}$ ditmat chis, stripes are (i.e. have been) given by me to him (228); $marimat\bar{a}$ $th\bar{a}$, he was dead (I, 33).

The following are examples of the declension of ordinary strong adjectives:-

Masc. sing. nom.— $bar\bar{a}$, $bad\bar{a}$, or $bad\bar{u}$, in $bar\bar{a}$ $k\bar{a}l$ $p\bar{e}\bar{a}$, a great famine fell (I, 9).

tisun badā lauhrā bagria-maz thā, his elder son was in the field (I, 35).

 $t\check{e}sa\tilde{u}$ $brh\bar{a}$ $t\check{e}s\check{e}\tilde{i}$ $bahin\bar{i}$ -th \tilde{a} $bad\bar{u}$ chhu, his brother is taller than his sister (231).

 $bh\bar{u}k\bar{a}$, in amī it $bh\bar{u}k\bar{a}$ mar-s \tilde{a} , I here hungry am dying (I, 17).

Masc. sing. obl.—barë, in tis mulkhai barë bakhtāwarë-sanë ghar $g\bar{a}$, he went to the house of a great rich man of that place (I, 10).

chhittě, in gī-mã chhittě ghōrě-sanī kāthī chhi, in the house is the saddle of the white horse (226).

mațthě, in tisaně matthě lauhrě bōlyâ, by his younger son it was said (I, 2). So matthě gī, in the small house (233).

thōṛĕ, in thōṛĕ dīhāṛĕ patĕ, after a few days (I, 5). Here the singular is used in the sense of the plural.

Masc. plur. nom.— $kitr\check{e}$ (nom. sing. $kitr\bar{a}$), in $m\bar{e}n\check{e}$ $b\bar{a}b\bar{a}$ -san \check{e} $kitr\check{e}$ $k\bar{a}m\tilde{a}$ sat \bar{i} , how many servants are there of my father (I, 15). So $t\bar{o}n\check{e}$ (sing. nom. $t\bar{o}n\bar{a}$) $k\bar{a}m\tilde{a}$ (I, 22).

Masc. plur. obl.—apně (nom. apnā), in tisaně bābā apně kāmantā lyānā, his father said to his servants (I, 29). Here we see the Pañjābī (including Pōgrī) and

Hindī fashion of putting into the oblique singular an adjective agreeing with a noun in the oblique plural. On the other hand, we have the Kāshmīrī method of putting the adjective into the oblique plural in changan (sing. nom. changō) māhnan, to good men (126).

As examples of feminine adjectives, we may quote:—

changī zanāna, a good woman (128).

changiĕ zanānī, good women (130).

burmatī kuṛhī, a bad girl (131).

kitī (masc. kitō), in es ghōrē-saņī kitī umr chhi, how much is the age of this horse (221)?

Comparison is formed as usual with the ablative with $th\tilde{a}$. Thus, $\check{e}s$ - $th\tilde{a}$ chango, better than this; sabban- $th\tilde{a}$ chango, best of all, best (133-4). So:—

těsaũ brhā těsěĩ bahiņī-thã badū chhu, his brother is taller than his sister (231).

Genitive.—The postposition of the genitive, sun, is a corruption of the Kāshmīrī sond, and like that word is an adjective, agreeing with the thing possessed. Pogulī has sun. Like Sirājī, Rāmbanī shows a marked preference for cerebral letters, hence the n of sun. Sun is declined as follows:—

	Masc.	Fem.
Sing .		
Nom.	sun	sanī.
Obl.	saņĕ	sanī.
Plur.		
Nom.	saņĕ	sanyī.
Obl.	sanan	sanian.

As usual, the final \check{e} is pronounced like the a in 'hat.'

Examples are:—

Masc. sing. nom.—bakrī-sun shilū, the kid of a goat (I, 44).

Parmēsharě-sun gunāh, a sin of (i.e. against) God (I, 20).

 $m\bar{\imath}\,n\check{e}\,pitr\bar{\imath}\check{e}$ -sun $l\bar{o}k^{\mu}$, the son of my uncle (225).

Obl.— $tine\ baba$ -sane gi, in thy father's house (223).

bakhtāwarĕ-saṇĕ ghar gā, he went to the house of a rich man (I, 10).

gāmě-saně ketsī hatīebāle-thã, from a shopkeeper of the village (241).

pahārě-saně shirě-bhēã, on the top of a mountain (229).

Masc. plur. nom. – mēņē bābā-saņē kitrē kāmā satī, how many servants are there of my father (I, 16).

ik māhnū-sanē dō lauhrū thēō, of a certain man there were two sons (I, 1).

Fem. sing. nom.—ghōṛē-saṇī umr, the age of the horse (221).

ghōrē-sanī kāthī, the saddle of the horse (226).

Occasionally the oblique case without any postposition is used as a genitive, as in:—

mulkhai, in tis mulkhai barë bakhtāwarë-sanë ghar gā, he went to the house of a great rich man of that country (I, 10).

PRONOUNS.—We have the following forms of the first two Personal Pronouns:—

	I.		Thou.
Sing.			*
$\mathbf{Nom}.$	$a ilde{u},\ amar{\imath}$		$t ilde{u},\; t\widetilde{\overline{u}}.$
Obl.	$m ilde{\imath},m ilde{\imath}$. *	$t ar{\imath}, \ t ar{ar{\imath}}.$
$\mathbf{Ag}.$	$mar{\imath},mar{ar{\imath}}$		$t ilde{\imath},t ilde{ar{\imath}},t ilde{ar{u}}.$
Gen.	mēṇā, mīṇā		tōṇā, tīṇā.
Plur.			
Nom.	as		tus.
Obl. & Ag.	$asa\widetilde{m{ ilde{ ilde{t}}}}$		$tusa\widetilde{ar{\imath}}.$
Gen.	$asa ilde{u}$		$tusa\widetilde{u}.$

Variant forms of $m\bar{\imath}n\bar{a}$ are $m\bar{\imath}n\bar{o}$ and $m\bar{\imath}n^{\imath}$, and of $t\bar{\imath}n\bar{a}$, $t\bar{\imath}n\bar{o}$, and $t\bar{\imath}n^{\imath}$. These are all declined like strong adjectives in \bar{a} . The feminine of $asa\tilde{u}$ and $tusa\tilde{u}$ are $ase\tilde{\imath}$ and $tuse\tilde{\imath}$, respectively. Instead of $asa\tilde{u}$ and $tusa\tilde{u}$, the Sirājī forms, $\bar{a}hm\bar{o}$ and $tuhm\bar{o}$, respectively, are also sometimes used.

The following are examples of the use of these pronouns:-

First Person.—Sing. nom.— $a\tilde{u}$ is- $l\bar{a}ik$ $n\bar{a}$ $s\tilde{a}$, I am not worthy of this (I, 28). $a\tilde{u}$ az $d\bar{u}r$ hanthi-kari chali $g\check{e}us$, I went today having walked far (224). $am\bar{i}$ $kh\tilde{a}$, I may eat (I, 14).

amī it bhūkā mar-sã. Amī apně bābā-pās chalī gasā, I here hungry am dying. I will go away to my father (I, 17).

Obl.— $m\tilde{i}$ $d\tilde{e}\tilde{i}$ - $l\tilde{o}$, give away to me (I, 3).

mī agar chal, walk before me (238).

Ag.— $m\tilde{i}$ gunāh karyā, by me sin was done (I, 19).

mi tahl karyam, by me service was done (I, 43).

mī těswě lôkě matā kôrrā ditmat-chhis, by me many stripes have been given to his son (228).

Gen. (masc. sing. nom.)— $m\bar{e}n\bar{a}$ lauh $r\bar{a}$ marimat \bar{a} th \bar{a} , my son was dead (I, 32). $m\bar{i}n\bar{o}$ b $\bar{a}bb$ is matthe $g\bar{i}$ $r\tilde{a}h$ -chhu, my father lives in this small house (233).

(Masc. sing. obl.)— $m\bar{e}n\check{e}$ $b\bar{a}b\bar{a}$ -saně $kitr\check{e}$ $k\bar{a}m\widetilde{a}$ satī, how many servants there are of my father (I, 15).

 $m\bar{\imath}$ ně $pitr\bar{\imath}$ ě-sun $l\bar{o}k^{\imath}$, the son of my uncle (225).

The masculine oblique form of the genitive may be used as an accusative-dative, as in:—

taĩhārĕ mīnĕ dāki-lō, so keep me (I, 22).

khushī manānā mīně lājam thē, to celebrate rejoicings was proper for me (I, 51). Plur. nom.—as $kh\tilde{a}$, we may eat (I, 31).

Second Person.—Sing. nom.— $t\tilde{u}$ sadā $m\tilde{i}$ - $p\tilde{a}s$ $h\tilde{e}$, thou art ever with me (I, 49).

Sing. obl. — $kasa\tilde{u}$ $l\bar{o}k^u$ $t\bar{\imath}$ pat pat \tilde{e} -chhu, whose boy comes behind thee (239)?

Agent.—tw bakrī-sun shilū nā dityā, thou didst not give a kid of a goat (I, 44). So I, 47.

Gen. (masc. sing. nom.)—tōṇā gunāh, sin of (i.e. against) thee (I, 19).

tonā puttar baņā, I may become thy son (I, 21).

30

tōṇā brhā āsī, thy brother hath come (I, 38). tīṇō nām kut chhu, what is thy name (220)?

(Masc. sing. obl.)—tōnĕ bābā bhārī dhām dityānī, thy father hath given a great feast (I, 39).

tīņē bābā-saņē gī, in thy father's house (223).

(Masc. plur. nom.)—taîhārĕ tōṇĕ kāmã santi, as are thy servants (I, 21).

Demonstrative Pronouns.—The Proximate Demonstrative Pronoun is yih or yu, this. There are two Remote Demonstrative Pronouns, viz. ō and su or so, both meaning 'that.' All these are also used as pronouns of the third person. They are thus declined:—

*	This.	That	
Sing.			
Nom.	yih, yu	ō	su, so.
Obl.	ĕs, is	(us)	těs, tis.
Ag.	(in)	(un)	tiņ, tiņī.
Gen.	$(isun,\ isa\widetilde{u})$	$usa\widetilde{u}$	tisuņ, tēsaũ, tisaũ.
Plur.			
Nom.	(in)	ō	$tim{n}.$
Obl. & Ag.	$(i n reve{e} ar{\imath})$	$(u n \check{e} i)$	$tin \check{e} ar{\imath}.$
Gen.	$(ina\widetilde{u})$	$una\widetilde{u}$	$tina oldsymbol{ ilde{u}}$.

When a form in the above paradigm is enclosed in marks of parenthesis, it is to be understood that there is no authority for it in any of the materials available. They are written after the analogy of the forms of su.

The genitives isun and tisun are declined like the genitive postposition sun, and present no difficulty. The forms in $a\tilde{u}$, like isa \tilde{u} , $usa\tilde{u}$, $ina\tilde{u}$, etc., form the masculine singular oblique in $u\check{e}$; thus, isw \check{e} , $usw\check{e}$, etc. The feminine singular nominative and oblique ends in $\check{e}\tilde{i}$, as in $is\check{e}\tilde{i}$, $us\check{e}\tilde{i}$, and so on.

The oblique form is has an emphatic form isī, to this very (I, 31), and there are no doubt similar forms for the others. Tinī does not seem to be emphatic. The following are examples of the use of these pronouns:—

yih, this. Sing. nom.—zikhan tōnā yih puttar \tilde{e} -thē, when this thy son was coming (I, 46).

yu pahārē-saņē shirē-bhēi bakrie gawe suņāl-chhu, he is feeding goats and cows on the top of the hill (229). So 280.

tes yu rupayyū dēnū, this rupee is to be given to him (234).

yu kas-thã mulī ān-chhut, from whom didst thou buy this (240)?

Obl. sing.—*ĕs ghōṛĕ-saṇī kitī umr chhi*, how much is the age of this horse (221) ? is-lāik, worthy of this (I, 20).

is lagī-launī; angūṭhī bhī lagī-lō isī, tā jōṛa bhī lagī-lō is, (the garment) is to be applied to him; also apply a ring to this very one, and apply a pair of shoes to him (I, 30).

mīnō bābb is maṭṭhe gī rāh-chhu, my father lives in this small house (233). Sing. nom.—ō lachār bhōī-gā, he became helpless (I, 9).

 $usa\tilde{u}$, his (27); \bar{o} , they (29); $una\tilde{u}$, their (30).

su, so, he. Sing. nom.—su, he (26).

so hajū dūr thā, he was still distant (I, 23).

so ghar-nārā ā \bar{o} , he came near the house (I, 36).

so lauhrā ghar āō, that son came home (I, 39).

 $zi-k\tilde{i}$ $m\tilde{i}$ - $p\bar{a}s\bar{i}$, so $t\bar{o}n\bar{a}$ $s\bar{a}$, whatever is in my possession, that is thine (I, 49).

Sing. obl.— $t\check{e}s\ yu\ rupayy\bar{u}\ d\bar{e}n\bar{u}$, this rupee is to be given to him (234).

 $tin rupae tes-th\tilde{a} ghinni laine, those rupees are to be taken from him (235).$ těs juān mārnias, beat him well (236).

tis mulkhai baṛā kāl pēā, in that country a mighty famine fell (I, 8).

tis mulkhai, of that country (I, 10).

tiņī tis sūr chunānī bhējinī, he sent him to feed swine (I, 11).

tis $k\tilde{i}$ nā dã-satī, no one was giving to him (I, 14).

tis $b\bar{o}l\tilde{a}$, I will say to him (I, 18).

tis dēkhī-karī tis bābā dard āsī, having seen him to that father compassion came (1, 24).

Sing. ag.—tin mārtū, he struck (187).

tinī māl bāṇtī ditinī, he divided out the property (I, 4). So I, 11, quoted above. $tin\bar{i} k\bar{a}m\tilde{a} b\bar{o}ly\bar{a}$, that servant said (I, 38).

Sing. gen.—tisun, in tisun badā lauhrā, his elder son (I, 35).

(Masc. sing. obl.)—tisanė matthe lauhre bolya, his younger son said (I, 2).

tisaně bābā apně kāman bōlyānī, his father said to his servants (I, 29).

(Fem. sing. nom.)—tisanī marjī thī, his wish was (I, 12).

těsaũ, tisaũ, in těsaũ brhā, his brother (231).

tisaŭ bābā bāhar gasī-karī samzānī, his father, having gone outside, remonstrated with him (I, 41).

(Sing. obl.) – mī těswě lôkě matā kōrrā ditmat-chhis, I have given many stripes to his son (228).

(Fem. sing. obl.)—těsěž bahinī-sāthī biāhtumut, married with (i.e. to) his sister (225).

kāthī těsẽ piṭṭhī-bhē lathas, put the saddle on his back (227).

těsěĩ bahinī-thã badū, bigger than his sister (231).

Plur. nom.—tin tit rōṭī khã-satī, they are eating bread there (I, 16).

tin rupaē těs-thã ghinnī laině, those rupees are to be taken from him (235).

tiņēī mārtū, they struck (190).

tiņaũ, their (30).

VOL. VIII, PART 11.

The Relative Pronoun is probably zi or zo, who, declined like so, that. The only form occurring in the specimens is the singular agent ziņī, in tōṇā yih puttar, ziṇī tōṇā $m\bar{a}l\ b\bar{e}$ -arth $lut\bar{a}y\bar{a}$, this thy son, by whom thy property was uselessly squandered (I, 47). We also have $zi-k\tilde{i}$, whatever. See below. 302

The Interrogative Pronoun is kam, who (92)? Its inanimate form is ko or kut (93), what. The oblique singular is kas, and the genitive $kasa\tilde{u}$. Thus:—

ko kar-satī, what are they doing (I, 38)?

tīno nām kut chhu, what is thy name (220)?

yu kas-thã mulī ān-chhut, from whom didst thou buy that (240)?

 $kasa\tilde{u}$ $l\bar{o}k^u$ $t\bar{i}$ pat pat \tilde{e} -chhu, whose boy comes behind thee (239)?

The only form of the **Reflexive Pronoun** that occurs is the genitive *apnā*, own, used as in Hindī. The word should probably be *apnā*, but the spelling is so capricious in the specimens that it is impossible to say for certain. As examples, we may quote:—

Masc. sing. nom.—tit apnā māl lutā-lānī, there he squandered his property (I, 6).

Obl.—apně bābā-pās chalī-gasã, I will go away to my father (I, 18).

apně zi dustī-sāth khushī kar \tilde{a} , that I may make rejoicing with my own friends (I, 45). Here apně is separated from its noun by the conjunction zi.

Fem. plur. obl.—tinī tis apnī bagriaņ-maz bhējinī, he sent him into his fields (I, 11).

The Indefinite Pronoun is $k\tilde{i}$, anyone, someone, anything, something. Its singular oblique is $k\tilde{e}t\tilde{s}$. Examples are:—

tis $k\tilde{i}$ nā $d\tilde{a}$ -satī, to him anyone is not giving, i.e. no one is giving (I, 14).

 $k\tilde{e}ts\tilde{i}$ hațīebāle-thã, from a certain shopkeeper (241).

 $sab-k\tilde{i}$ (I, 5), everything.

 $zi-k\tilde{i}$ (I, 3; I, 49), whatever.

Pronominal Adjectives of Quantity are $itr\bar{u}$, so much, so many; $kitr\bar{o}$ or $kit\bar{o}$, how-much (plur. how many). Examples are:—

itrū bār mã tahl karyam, for so many years I did thy service (I, 42).

kitrō, kitō-masc. sing. nom.-kitō dūr, how much distance (222)?

Masc. plur. nom. — $m\bar{e}n\check{e}$ $b\bar{a}b\bar{a}$ -saně $kitr\bar{e}$ $k\bar{a}m\tilde{a}$ satī, how many servants are there of my father (I, 16).

tīnē bābā-saņē gī kitē lōkē chhi, how many sons are there in thy father's house (223)?

Fem. sing. nom.—*ĕs ghōrĕ-sanī kitī umr chhi*, how much is the age of this horse (221)?

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—There are several forms of the Present tense of the Verb Substantive, all borrowed from neighbouring dialects. The first form is connected with the Kāshmīrī chhuh, he is. It is thus conjugated in the masculine. The only feminine form available is that of the 3rd person singular:—

1. chhus

chhus
 chhu (fem. chhi)

Plur.
chhasam.
chhath.
chhi.

The next form occurs in \dot{P} ogrī in the form $s\tilde{a}$, I was, and in the Lahnda (Punchhī) $s\bar{a}$, he was. It will be observed that here the meaning is changed to that of the Present. Only masculine forms are given. No materials are available for the feminine:-

Sing.	Plur.
1. $s\widetilde{\widetilde{a}}$	$s\widetilde{\widetilde{a}}$.
$2.$ $s\widetilde{\overline{a}}$	$s ilde{o},\ s ilde{a}.$
3. $s\bar{a}$, $sat\bar{\imath}$	 $s\tilde{a}$, $sat\bar{\imath}$, $sant\bar{\imath}$.

Compare the Chibhālī forms on p. 509 of Part I of this volume.

The third form is taken from the Dogri $h\tilde{a}$, I am. The forms are probably of common gender:-

	Sing.			Plur
1.	$h\widetilde{\widetilde{a}}$			$h\widetilde{\widetilde{e}}.$
2.	$h\widetilde{\widetilde{e}}$			ħō.
3.	$har{e}$			$h \hat{ar{e}}$.

The following examples occur of the above :-

chhus, etc.—tīnō nām kut chhu, what is thy name (220)?

es ghōre-saṇī kitī umr chhi (fem.), how much is the age of this horse (221)? $g\bar{\imath}$ - $m\bar{a}$ chhittě ghōrě-san $\bar{\imath}$ kāth $\bar{\imath}$ chhi (fem.), in the house is the saddle of the white

tīně bābā-saņē gī kitě lōkě chhi (masc. plur.), how many sons are there in thy father's house (223)?

 $s\tilde{a}$, etc. -is $l\tilde{a}ik$ $n\tilde{a}$ $s\tilde{a}$ $t\tilde{o}n\tilde{a}$ puttar $ban\tilde{a}$, I am not worthy of this, (that) I may become thy son (I, 20).

 $zi-k\tilde{i}$ $m\bar{e}n\bar{a}$ hissā sā, whatever is my share (I, 3).

so $t\bar{o}n\bar{a}$ $s\bar{a}$, that is thine (I, 50).

tis $k\tilde{i}$ nā $d\tilde{a}$ -satī (sing.), no one is giving to him (I, 14).

mēņē bābā-saņē kitrē kāmā satī (plur.), how many servants are there of my father (I, 16).

taîhārě tōně kamã santi, as thy servants are (I, 22).

 $h\tilde{a}$, etc.— $t\tilde{u}$ sadā $m\tilde{i}$ - $p\bar{a}$ s $h\tilde{e}$, thou art ever near me (I, 49).

The Past tense of the Verb Substantive has two forms. The first, ātus, I was, corresponds to the Poguli āhtūs. The second, thās, I was, agrees with the Dogri thā. The Punchhī thēs, I am, is also connected with it, but has changed its meaning (like sa, above) to that of the present. The former is conjugated as follows in the masculine:-

Sing.	Plur.
1. $\bar{a}tus$	$ar{a}tasam.$
$2.$ $\bar{a}tus$	$\bar{a}tath.$
$3. \bar{a}t\bar{u}$	$ar{a}tar{a}.$
nd is conjugated as follows in the masculine:-	

The secon

Is conjugated as form as	
Sing.	Plur.
1. $th\bar{a}s$	$thar{e}.$
$2. th\bar{a}s$	$thar{e}.$
3. $th\bar{a}$, $th\bar{e}$ (fem. $th\bar{i}$)	$thar{e},\ thar{e}\ddot{o}.$

The Interrogative Pronoun is kam, who (92)? Its inanimate form is ko or kut (93), what. The oblique singular is kas, and the genitive $kasa\tilde{u}$. Thus:—

ko kar-satī, what are they doing (I, 38)?

tīņō nām kut chhu, what is thy name (220)?

yu kas-thã mulī ān-chhut, from whom didst thou buy that (240)?

 $kasa\tilde{u}$ $l\bar{o}k^u$ $t\bar{i}$ pat pat \tilde{e} -chhu, whose boy comes behind thee (239)?

The only form of the **Reflexive Pronoun** that occurs is the genitive *apnā*, own, used as in Hindī. The word should probably be *apnā*, but the spelling is so capricious in the specimens that it is impossible to say for certain. As examples, we may quote:—

Masc. sing. nom.—tit apnā māl lutā-lānī, there he squandered his property (I, 6).

Obl.—apně bābā-pās chalī-gasã, I will go away to my father (I, 18).

apně zi dustī-sāth khushī karã, that I may make rejoicing with my own friends (I, 45). Here apně is separated from its noun by the conjunction zi.

Fem. plur. obl.—tinī tis apnī bagṛiaṇ-maz bhējinī, he sent him into his fields (I, 11).

The Indefinite Pronoun is $k\tilde{i}$, anyone, someone, anything, something. Its singular oblique is $k\tilde{e}t\tilde{s}$. Examples are:—

tis $k\tilde{i}$ nā $d\tilde{a}$ -satī, to him anyone is not giving, i.e. no one is giving (I, 14).

 $k\tilde{e}ts\tilde{i}$ hațiebāle-thã, from a certain shopkeeper (241).

 $sab-k\tilde{\imath}$ (I, 5), everything.

 $zi-k\tilde{i}$ (I, 3; I, 49), whatever.

Pronominal Adjectives of Quantity are *itrū*, so much, so many; *kitrō* or *kitō*, how-much (plur. how many). Examples are:—

itrū bār mã tahl karyam, for so many years I did thy service (I, 42).

kitrō, kitō-masc. sing. nom.-kitō dūr, how much distance (222)?

Masc. plur. nom.— $m\bar{e}n\check{e}$ $b\bar{a}b\bar{a}$ -saně $kitr\bar{e}$ $k\bar{a}m\tilde{a}$ satī, how many servants are there of my father (I, 16).

 $t\bar{\imath}n\check{e}\ b\bar{a}b\bar{a}$ -saně $g\bar{\imath}\ kitě\ l\check{o}k\check{e}\ chhi$, how many sons are there in thy father's house (223)?

Fem. sing. nom.—*ĕs ghōrĕ-sanī kitī umr chhi*, how much is the age of this horse (221)?

CONJUGATION.—A. Auxiliary Verbs and Verbs Substantive.—There are several forms of the Present tense of the Verb Substantive, all borrowed from neighbouring dialects. The first form is connected with the Kāshmīrī chhuh, he is. It is thus conjugated in the masculine. The only feminine form available is that of the 3rd person singular:—

	3	$har{e}$					$h \widehat{\!ec{e}}$.
	· ·						

The following examples occur of the above :—

chhus, etc.—tīnō nām kut chhu, what is thy name (220)?

ěs ghōrě-sanī kitī umr chhi (fem.), how much is the age of this horse (221)?
gī-mã chhittě ghōrĕ-sanī kāṭhī chhi (fem.), in the house is the saddle of the white horse (226).

tīņē bābā-saņē gī kitē lōkē chhi (masc. plur.), how many sons are there in thy father's house (223)?

 $s\tilde{a}$, etc.—is $l\tilde{a}ik$ $n\tilde{a}$ $s\tilde{a}$ $t\tilde{o}n\tilde{a}$ puttar $ban\tilde{a}$, I am not worthy of this, (that) I may become thy son (I, 20).

 $zi-k\tilde{i}$ $m\bar{e}n\bar{a}$ hissā sā, whatever is my share (I, 3).

so $t\bar{o}n\bar{a}$ $s\bar{a}$, that is thine (I, 50).

tis $k\tilde{\imath}$ nā dã-satī (sing.), no one is giving to him (I, 14).

 $m\bar{e}$ $n\check{e}$ $b\bar{a}b\bar{a}$ -saně $kitr\check{e}$ $k\bar{a}m\widetilde{a}$ satī (plur.), how many servants are there of my father (I, 16).

taîhārě tōně kamā santi, as thy servants are (I, 22).

 $h\tilde{a}$, etc.— $t\tilde{u}$ sadā $m\tilde{i}$ - $p\bar{a}$ s $h\tilde{e}$, thou art ever near me (I, 49).

The Past tense of the Verb Substantive has two forms. The first, $\bar{a}tus$, I was, corresponds to the Poguli $\bar{a}ht\bar{u}s$. The second, $th\bar{a}s$, I was, agrees with the Pogri $th\bar{a}s$. The Punchhi $th\bar{e}s$, I am, is also connected with it, but has changed its meaning (like $s\bar{a}s$, above) to that of the present. The former is conjugated as follows in the masculine:—

e) to that	of the	present.				Plur	
		Sing.				ātasa	m.
	1.	$ar{a}tus$				$\bar{a}tath$	
	2.	$ar{a}tus$				$\bar{a}tar{a}.$	
	3.	$\bar{a}tar{u}$					
The seco	nd is c	onjugated	as follows in	the maso	euline:—	Plur.	
THE SCOO.	Hu io	Sing.				$thar{e}.$	
	1.	$thar{a}s$				$thar{e}.$	
	2.	$thar{a}s$			-		$thar{e}ar{o}.$
	3.	thā, thē	(fem. thī)			0166,	01000.

With $th\bar{e}\bar{o}$, we may compare the Punchhī $th\bar{e}\bar{a}$, he is. No examples of $\bar{a}tus$, etc. occur in the specimens. For $th\bar{a}s$, etc. we have:—

so hajū dūr thā, he was still distant (I, 24).

mēnā lauhrā marimatā thā, my son was dead (I, 33).

tasun badā lauhrā bagria-maz thā, his elder son was in the field (I, 35).

tisaņī marjī thī (fem. sing.), his desire was (I, 12).

khushī karnā khushī manānā mīnē lājam thē (plur.), to do rejoicing and to celebrate rejoicing were proper for me (I, 51).

ik māhņū-saņē dō lauhŗū thēō, of a certain man there were two sons (I, 1).

Other examples will be found under the present and imperfect tenses.

There is one form, $thay\bar{a}$ - $n\bar{a}$ (I, 34; I, 53), translated 'he was,' which I am unable to explain.

B. The Active Verb.—As in the case of the Verb Substantive, the conjugation of the Rāmbanī verb is a mixture of Dōgrī and Kāshmīrī. In the Present Participle, the termination \tilde{a} is a relic of the Kāshmīrī $\bar{a}n$. In the Past Participle, we have both the termination $t\bar{u}$, which comes from Kāshmīrī (see the remarks on the Pŏgulī Past Participle, ante, p. 418), and the termination $y\bar{a}$ which comes from Dōgrī. The future tense follows the Kāshmīrī rule, in being identical with the Old Present. Pronominal suffixes are used as in Kāshmīrī, though to a less extent.

The Infinitive is formed by adding $n\bar{a}$ or $n\bar{u}$ to the root. The $n\bar{a}$ is borrowed from $\bar{p}\bar{o}gr\bar{\imath}$. The alternative form in $n\bar{u}$ is due partly to the influence of the Kāshmīrī infinitive in n^* , and partly to the fact already noted that the termination \bar{a} of strong masculine nouns is interchangeable with \bar{o} and \bar{u} . As in $\bar{p}\bar{o}gr\bar{\imath}$, the n of $n\bar{a}$ or $n\bar{u}$ becomes n when preceded by r. Thus, we have $bh\bar{o}n\bar{a}$ or $bh\bar{o}n\bar{u}$, to become, but $m\bar{a}rn\bar{a}$ or $m\bar{a}rn\bar{u}$, to strike. Examples of the direct infinitive are $karn\bar{a}$ and $man\bar{a}n\bar{a}$ in:—

khushī karnā, khushī manānā mīnĕ lājam thē, to make rejoicing, and to celebrate rejoicing were proper for me (I, 51).

The oblique infinitive should ordinarily end in $n\check{e}$ $(n\check{e})$; thus, $bh\bar{o}n\check{e}$, $m\bar{a}rn\check{e}$. In the only example in the Specimens, however, it ends in $n\bar{i}$, with which we may compare the Kāshmīrī oblique infinitive in ni. The example is $chun\bar{a}n\bar{i}$, in $tin\bar{i}$ $tis\ s\bar{u}r\ chun\bar{a}n\bar{i}\ bh\bar{e}jin\bar{i}$, he sent him to feed swine (I, 11).

The word $\bar{a}khan$, a word (I, 43), is probably really a weak form of the infinitive of $\bar{a}khn\bar{a}$, to say.

The Future Passive Participle seems to be more frequently used than in other Kāshmīrī dialects. It often has the form of an imperative,—'this rupee is to be given,' having the same force as 'give this rupee.' It is the same in form as the

infinitive, but is an adjective, having a feminine in $n\bar{\imath}$ ($n\bar{\imath}$), and a masculine plural in $n\bar{e}$ ($n\bar{e}$). Examples are:—

tes yu rupayyū dēnū, to him this rupee is to be given, i.e. give this rupee to him (234).

changī pōshāk (fem.) ghinī-āṇī, is lāgī-launī, a good garment is to be brought, it is to be put on him, i.e. bring a good garment and put it on him (I, 29).

tin rupaē (masc. plur.) těs-thã ghinnī-laine, those rupees are to be taken from him, i.e. take those rupees from him (235).

The **Present Participle** is either the same in form as the root, or else adds \tilde{a} to the root. Thus, $m\tilde{a}r$ or $m\tilde{a}r\tilde{a}$, striking.

The following are irregular:-

bhōṇū, to become	Pres.	Par	t. $bh\widetilde{o}$.
$d\bar{e}n\bar{u}$, to give	,,	,,	$d\widetilde{\widetilde{a}}.$
\check{e} $n\bar{u}$ or \bar{a} $n\bar{u}$, to come	, ,,	,,	<i>;</i> €.
$kh\bar{a}n\bar{u}$, to eat	,,	,,	khã.
rahņū, to remain	,,,,	,	$r\widetilde{\widetilde{a}}h.$

Examples of the use of the present participle will be found under the Present and Imperfect Tenses.

There are two methods of forming the **Past Participle**. By one method $t\bar{u}$ is added to the root, as in $m\bar{a}rt\bar{u}$, struck. This form is only used in forming the past tenses, and is not used as a participle. It corresponds to the Poguli Past Participle in t^* . The other is formed by adding $y\bar{a}$ to the root, as in $m\bar{a}ry\bar{a}$, struck.

As usual there are many irregular past participles. The following occur in the specimens:—

bīmņū, to sit	Past	Part.	$b\bar{\imath}m\bar{\imath}$.	
$d\bar{e}n\bar{u}$, to give	>>	23 23	D .	disti (note the the Kāshmīrī ts
			to st).	e
ěnū or ānū, to come gatshnū or	,,	,,,	$ar{a}ar{o}.$	
$gas n \bar{u}$, to go (?) $l \bar{e} n \bar{u}$, to take	,,	" "	gā or gĕū. lā.	
(?) pēnū, to fall	>3	"	$par{e}ar{a}$.	

The infinitive forms $p\bar{e}n\bar{u}$ and $l\bar{e}n\bar{u}$ above given are doubtful, and have no authority.

Examples of the use of the Past Participle will be found under the head of the Past Tense.

There is one example of a past participle used as an adjective in $b\bar{\imath}m\bar{\imath}$ chhu, he is seated (230).

The **Perfect Participle**, employed when the Past Participle in $t\bar{u}$ is used as an adjective and in the Perfect and Pluperfect tenses, is formed as in Kāshmīrī by

adding mut (for declension, see under the head of adjectives, p. 463), before which the u of $t\bar{u}$ is shortened, as in $m\bar{a}rtumut$, struck. In the Parable, the suffix is $mat\bar{a}$ added to the participle in $y\bar{a}$, which $y\bar{a}$ becomes i. Thus, from $m\bar{a}ry\bar{a}$, $m\bar{a}rimat\bar{a}$, struck. The Perfect Participle of $ga\underline{t}shn\bar{u}$, to go, is $g\bar{o}mut$. Examples of the use of this participle are:—

biāhtumut, in mīně pitrīě-sun lok těsěĩ bahinī-sāthī biāhtumut chhu, the son of my uncle is married with (i.e. to) his sister (225).

marimatā, in mēnā lauhṛā marimatā thā, my son was dead (I, 32).

ditmat (masc. plur.), in $m\bar{i}$ k $\bar{o}rr\bar{a}$ ditmat chhi, stripes are (i.e. have been) given by me (228).

The Conjunctive Participle is formed by adding $\bar{\imath}$ to the root, as in $m\bar{a}r\bar{\imath}$, but this form is used only in intensive compound verbs (see below). When used alone, $kar\bar{\imath}$ is added, as in $m\bar{a}r\bar{\imath}-kar\bar{\imath}$. Examples are:—

tis dēkhī-karī, tis bābā dard āsī; daurī-karī gala lāgyānī, having seen him, compassion came to that father; having run he embraced him (I, 24).

tisaũ bābā bāhar gasī-karī samzānī, his father, having gone outside, remonstrated with him (1, 41).

aũ az dūr haṇṭhī-karī chalī-gēus, I went today, having walked far (224).

Imperative.—The second person singular is usually the same in form as the root. Thus, $m\bar{a}r$, strike thou (175); $ga\underline{t}sh$, go thou (217). So chal, in $m\bar{i}$ agar chal, walk before me (238).

The form of the second person plural is doubtful. Some end in \bar{o} , as in $l\bar{o}$, in the following:—

 $m\bar{\imath} d\bar{e}\bar{\imath}$ - $l\bar{o}$, give to me (I, 3).

 $m\bar{\imath}n\check{e}\ d\bar{a}k\bar{\imath}$ - $l\bar{o}$, keep me (I, 22).

 $ang\bar{u}th\bar{i}$ $l\bar{a}g\bar{i}$ - $l\bar{o}$ $is\bar{i}$, put a ring on this very person (I, 31).

There is another form of the second person of the Imperative ending in i or \bar{i} . It is not certain whether this is singular or plural. It occurs in:—

 $k\bar{a}r^{i}$, in $tal\bar{a}\bar{o}$ - $m\tilde{a}$ - $th\tilde{a}$ $p\bar{a}ni$ $k\bar{a}r^{i}$, draw water from the well (237).

ganthī, in gazarī-sāthī ganthī, bind (him) with a rope (236).

When the second plural of the Imperative takes a pronominal suffix, the second plural of the Old Present is used instead, as in Sirājī of Þōḍā and Pŏgulī. See below under the head of pronominal suffixes.

The Old Present is used, as in Kāshmīrī, as a Future Indicative and as a Present Subjunctive, as in $a\tilde{u}$ $m\tilde{a}r\tilde{a}$, I shall strike, or I may strike. It is thus conjugated:—

 $\mathbf{1.}$ $m \tilde{a} r \widetilde{\tilde{a}}$

2. māras

3. māri

Plur.

 $m\bar{a}ram, m\bar{a}r\tilde{a}$.

mārath.

 $m\ddot{a}rti.$

adding mut (for declension, see under the head of adjectives, p. 463), before which the u of $t\bar{u}$ is shortened, as in $m\bar{a}rtumut$, struck. In the Parable, the suffix is $mat\bar{a}$ added to the participle in $y\bar{a}$, which $y\bar{a}$ becomes i. Thus, from $m\bar{a}ry\bar{a}$, $m\bar{a}rimat\bar{a}$, struck. The Perfect Participle of $ga\underline{t}shn\bar{u}$, to go, is $g\bar{o}mut$. Examples of the use of this participle are:—

biāhtumut, in mīņē pitrīē-suņ lōk^u tēsēī bahiņī-sāthī biāhtumut chhu, the son of my uncle is married with (i.e. to) his sister (225).

marimatā, in mēnā lauhŗā marimatā thā, my son was dead (I, 32).

ditmat (masc. plur.), in $m_{\tilde{i}}$ kõrrā ditmat chhi, stripes are (i.e. have been) given by me (228).

The **Conjunctive Participle** is formed by adding $\bar{\imath}$ to the root, as in $m\bar{a}r\bar{\imath}$, but this form is used only in intensive compound verbs (see below). When used alone, $kar\bar{\imath}$ is added, as in $m\bar{a}r\bar{\imath}-kar\bar{\imath}$. Examples are:—

tis dēkhī-karī, tis bābā dard āsī; daurī-karī gala lāgyānī, having seen him, compassion came to that father; having run he embraced him (I, 24).

tisaũ bābā bāhar gasī-karī samzānī, his father, having gone outside, remonstrated with him (1, 41).

aũ az dūr haṇṭhī-karī chalī-gēus, I went today, having walked far (224).

Imperative.—The second person singular is usually the same in form as the root. Thus, $m\bar{a}r$, strike thou (175); $ga\underline{ts}h$, go thou (217). So chal, in $m\bar{i}$ agar chal, walk before me (238).

The form of the second person plural is doubtful. Some end in δ , as in $l\delta$, in the following:—

 $m\bar{\imath} d\bar{e}\bar{\imath}$ - $l\bar{o}$, give to me (I, 3).

 $m\bar{\imath}n\check{e}\ d\bar{a}k\bar{\imath}$ - $l\bar{o}$, keep me (1, 22).

aṅgūṭhī lāgī-lō isī, put a ring on this very person (I, 31).

There is another form of the second person of the Imperative ending in or z. It is not certain whether this is singular or plural. It occurs in:—

 $k\tilde{a}r^{i}$, in $tal\bar{a}\bar{o}$ - $m\tilde{a}$ - $th\tilde{a}$ $p\bar{a}ni$ $k\bar{a}r^{i}$, draw water from the well (237).

ganthī, in gazarī-sāthī ganthī, bind (him) with a rope (236).

When the second plural of the Imperative takes a pronominal suffix, the second plural of the Old Present is used instead, as in Sirājī of Þöḍā and Pŏgulī. See below under the head of pronominal suffixes.

The Old Present is used, as in Kāshmīrī, as a Future Indicative and as a Present Subjunctive, as in $a\tilde{u}$ $m\tilde{a}r\tilde{a}$, I shall strike, or I may strike. It is thus conjugated:—

Sing. Plur.

1. $m\bar{a}r\tilde{a}$ $m\bar{a}ram$, $m\bar{a}r\tilde{a}$.

2. $m\bar{a}ras$ $m\bar{a}rath$.

3. $m\bar{a}ri$ $m\bar{a}rti$.

The following are examples of its use:-

Sing. 1.— $ban\tilde{a}$, in $t\bar{o}n\bar{a}$ puttar $ban\tilde{a}$, I may become thy son (I, 21).

gasa (from gasņu) and bola, in apne baba-pas chalī-gasa, tis bolā, I will go away to my father, I will say to him (I, 18).

karā, in apnē zi dūstī-sāth khushī karā, that I may make rejoicing with my friends (I, 45).

 $kh\tilde{a}$, in $ty\tilde{a}$ -bhari ami $kh\tilde{a}$, so I may eat (I, 13).

Sing. 3.—gasi, in ghar nā gasi, he will not go to the house (I, 41).

Plur. 1.— $kh\tilde{a}$ and $kar\tilde{a}$, in as $kh\tilde{a}$ $t\bar{a}$ $khush\bar{i}$ $kar\tilde{a}$, we may (i.e. let us) eat and make rejoicing (I, 31).

The Present is formed by conjugating one of the forms of the present tense of the verb substantive with the present participle. It will be remembered that the present participle is either the same in form as the root or else ends in \tilde{a} , also that there are several irregular present participles. Both forms are used in this tense. Neither changes at all in conjugation. Examples are:-

Sing. 1.— mar- $s\tilde{a}$, in $am\tilde{i}$ it $bh\tilde{u}k\tilde{a}$ mar- $s\tilde{a}$, I here hungry am dying (I, 17).

Sing. 3.— $d\tilde{a}$ -satī, in tis kī nā $d\tilde{a}$ -satī, no one is giving to him (I, 14).

 $\tilde{\vec{e}}$ -chhu, in kasaŭ l $\tilde{o}k^u$ t $\bar{\imath}$ pat pat $\tilde{\vec{e}}$ -chhu, whose boy comes behind thee (239)?

 $r\tilde{a}h$ -chhu, in $min\tilde{o}$ $b\tilde{a}bb$ is $matth\check{e}$ $g\bar{\imath}$ $r\tilde{a}h$ -chhu, my father lives in this small house (233).

suņāl-chhu, in yu bakrīĕ gawĕ suṇāl-chhu, he is feeding goats (and) cows (229).

Plur. 3.—kar-satī, in ko kar-satī, what are they doing (I, 38)?

 $kh\tilde{a}$ -satī, in sūr sikkar $kh\tilde{a}$ -satī, the swine are eating husks (I, 13).

tiņ tit rōṭī khā-satī, they are there eating bread (I, 16).

nāch-santī, in saganī antar nāch-santī, he heard (that) they are dancing within (I, 37).

gatsh-chhus, I go, is conjugated throughout all persons of both numbers in 205-210.

The Imperfect is similarly made with the present participle and the past tense of the verb substantive.

Thus:-

 $a\widetilde{u}$ mār-ātus, I was striking (192).

 \tilde{e} -thē, in zikhan tōnā yih puttar ghar \tilde{e} -thē, when this thy son was coming to the house (I, 46).

The Past Tense is conjugated differently according as the verb is intransitive or transitive. The Past intransitive is conjugated by adding suffixes to the past participle. No suffix is added to the third person which is therefore the same as the past participle, singular or plural as the case may be. Taking $g\bar{a}$ or $g\check{e}\bar{u}$ as With $th\bar{e}\bar{o}$, we may compare the Punchhī $th\bar{e}\bar{a}$, he is. No examples of $\bar{a}tus$, etc. occur in the specimens. For $th\bar{a}s$, etc. we have:—

so hajū dūr thā, he was still distant (I, 24).

mēņā lauhrā marimatā thā, my son was dead (I, 33).

tasun badā lauhrā bagria-maz thā, his elder son was in the field (I, 35).

tisanī marjī thī (fem. sing.), his desire was (I, 12).

khushī karnā khushī manānā mīnē lājam thē (plur.), to do rejoicing and to celebrate rejoicing were proper for me (I, 51).

ik māhņū-saņě dō lauhŗū thēō, of a certain man there were two sons (I, 1).

Other examples will be found under the present and imperfect tenses.

There is one form, $thay\bar{a}-n\bar{a}$ (I, 34; I, 53), translated 'he was,' which I am unable to explain.

B. The Active Verb.—As in the case of the Verb Substantive, the conjugation of the Rāmbanī verb is a mixture of Dōgrī and Kāshmīrī. In the Present Participle, the termination \tilde{a} is a relic of the Kāshmīrī $\bar{a}n$. In the Past Participle, we have both the termination $t\bar{u}$, which comes from Kāshmīrī (see the remarks on the Pŏgulī Past Participle, ante, p. 418), and the termination $y\bar{a}$ which comes from Dōgrī. The future tense follows the Kāshmīrī rule, in being identical with the Old Present. Pronominal suffixes are used as in Kāshmīrī, though to a less extent.

The Infinitive is formed by adding $n\bar{a}$ or $n\bar{u}$ to the root. The $n\bar{a}$ is borrowed from $\bar{p}\bar{o}gr\bar{\imath}$. The alternative form in $n\bar{u}$ is due partly to the influence of the Kāshnīrī infinitive in n^* , and partly to the fact already noted that the termination \bar{a} of strong masculine nouns is interchangeable with \bar{o} and \bar{u} . As in $\bar{p}\bar{o}gr\bar{\imath}$, the $n\bar{u}$ of $n\bar{u}$ or $n\bar{u}$ becomes n when preceded by r. Thus, we have $bh\bar{o}n\bar{a}$ or $bh\bar{o}n\bar{u}$, to become, but $m\bar{a}rn\bar{a}$ or $m\bar{a}rn\bar{u}$, to strike. Examples of the direct infinitive are $karn\bar{a}$ and $man\bar{a}n\bar{a}$ in:—

khushī karnā, khushī manānā mīnĕ lājam thē, to make rejoicing, and to celebrate rejoicing were proper for me (I, 51).

The oblique infinitive should ordinarily end in $n\check{e}$ $(n\check{e})$; thus, $bh\check{o}n\check{e}$, $m\bar{a}rn\check{e}$. In the only example in the Specimens, however, it ends in $n\bar{i}$, with which we may compare the Kāshmīrī oblique infinitive in ni. The example is $chun\check{a}n\bar{i}$, in $tin\bar{i}$ $tis\ s\bar{u}r\ chun\bar{a}n\bar{i}\ bh\bar{e}jin\bar{i}$, he sent him to feed swine (I, 11).

The word $\bar{a}khan$, a word (I, 43), is probably really a weak form of the infinitive of $\bar{a}khn\bar{a}$, to say.

The Future Passive Participle seems to be more frequently used than in other Kāshmīrī dialects. It often has the form of an imperative,—'this rupee is to be given,' having the same force as 'give this rupee.' It is the same in form as the

infinitive, but is an adjective, having a feminine in $n\bar{\imath}$ ($n\bar{\imath}$), and a masculine plural in $n\bar{e}$ ($n\bar{e}$). Examples are:—

tes yu rupayyū dēnū, to him this rupee is to be given, i.e. give this rupee to him (234).

changī pōshāk (fem.) ghinī-ānī, is lāgī-launī, a good garment is to be brought, it is to be put on him, i.e. bring a good garment and put it on him (I, 29).

tin rupaē (masc. plur.) tes-thā ghinnī-laine, those rupees are to be taken from him, i.e. take those rupees from him (235).

The **Present Participle** is either the same in form as the root, or else adds \tilde{a} to the root. Thus, $m\tilde{a}r$ or $m\tilde{a}r\tilde{a}$, striking.

The following are irregular:-

bhōṇū, to become	$\mathbf{Pres.}$	Par	$bh\widetilde{\tilde{o}}.$
$d\bar{e}n\bar{u}$, to give	,,	,,	$d\widetilde{ar{a}}$.
\check{e} $n\bar{u}$ or \bar{a} $n\bar{u}$, to come	**	>>	<i>ਵੋ</i> . ~
$kh\bar{a}n\bar{u}$, to eat	,,	,,	khã.
rahņū, to remain	,,	***	$r\widetilde{\tilde{a}}h.$

Examples of the use of the present participle will be found under the Present and Imperfect Tenses.

There are two methods of forming the **Past Participle**. By one method $t\bar{u}$ is added to the root, as in $m\bar{a}rt\bar{u}$, struck. This form is only used in forming the past tenses, and is not used as a participle. It corresponds to the Pŏgulī Past Participle in t^u . The other is formed by adding $y\bar{a}$ to the root, as in $m\bar{a}ry\bar{a}$, struck.

As usual there are many irregular past participles. The following occur in the specimens:—

$b\bar{\imath}mn\bar{u}$, to sit Past Part. $d\bar{e}n\bar{u}$, to give	$b\bar{\imath}m\bar{\imath}$. $dity\bar{a}$, fem. $dist\bar{\imath}$ (note the change of the Kāshmīrī ts to st).
(2) $l\bar{e}n\bar{u}$, to take ""	$ar{a}ar{o}.$ $gar{a}$ or $greve{e}ar{u}.$ $lar{a}.$ $par{e}ar{a}.$

The infinitive forms $p\bar{e}n\bar{u}$ and $l\bar{e}n\bar{u}$ above given are doubtful, and have no authority.

Examples of the use of the Past Participle will be found under the head of the

Past Tense.

There is one example of a past participle used as an adjective in bīmī chhu, he is seated (230).

The **Perfect Participle**, employed when the Past Participle in $t\bar{u}$ is used as an adjective and in the Perfect and Pluperfect tenses, is formed as in Kāshmīrī by

adding mut (for declension, see under the head of adjectives, p. 463), before which the u of $t\bar{u}$ is shortened, as in $m\bar{a}rtumut$, struck. In the Parable, the suffix is $mat\bar{a}$ added to the participle in $y\bar{a}$, which $y\bar{a}$ becomes i. Thus, from $m\bar{a}ry\bar{a}$, $m\bar{a}rimat\bar{a}$, struck. The Perfect Participle of $ga\underline{t}\underline{s}hn\bar{u}$, to go, is $g\bar{o}mut$. Examples of the use of this participle are:—

biāhtumut, in mīně pitrīě-suṇ lōk" těsěĩ bahiṇī-sāthī biāhtumut chhu, the son of my uncle is married with (i.e. to) his sister (225).

marimatā, in mēnā lauhrā marimatā thā, my son was dead (I, 32).

ditmat (masc. plur.), in mī kōrṛā ditmat chhi, stripes are (i.e. have been) given by me (228).

The **Conjunctive Participle** is formed by adding $\bar{\imath}$ to the root, as in $m\bar{a}r\bar{\imath}$, but this form is used only in intensive compound verbs (see below). When used alone, $kar\bar{\imath}$ is added, as in $m\bar{a}r\bar{\imath}-kar\bar{\imath}$. Examples are:—

tis dēkhī-karī, tis bābā dard āsī; daurī-karī gala lāgyānī, having seen him, compassion came to that father; having run he embraced him (I, 24).

tisaũ bābā bāhar gasī-karī samzānī, his father, having gone outside, remonstrated with him (1, 41).

aũ az dūr hanthī-karī chalī-gēus, I went today, having walked far (224).

Imperative.—The second person singular is usually the same in form as the root. Thus, $m\bar{a}r$, strike thou (175); $ga\underline{t}sh$, go thou (217). So chal, in $m\bar{i}$ agar chal, walk before me (238).

The form of the second person plural is doubtful. Some end in \bar{o} , as in $l\bar{o}$, in the following:—

 $m\bar{\imath} d\bar{e}\bar{\imath}$ - $l\bar{o}$, give to me (I, 3).

 $m\bar{\imath}n\check{e}\ d\bar{a}k\bar{\imath}\text{-}l\bar{o},$ keep me (1, 22).

angūṭhī lāgī-lō isī, put a ring on this very person (I, 31).

There is another form of the second person of the Imperative ending in ' or 7. It is not certain whether this is singular or plural. It occurs in:—

kāri, in talāō-mã-thã pāṇi kāri, draw water from the well (237).

ganthī, in gazarī-sāthī ganthī, bind (him) with a rope (236).

When the second plural of the Imperative takes a pronominal suffix, the second plural of the Old Present is used instead, as in Sirājī of Dōdā and Pŏgulī. See below under the head of pronominal suffixes.

The Old Present is used, as in Kāshmīrī, as a Future Indicative and as a Present Subjunctive, as in $a\widetilde{u}$ $m\tilde{a}r\widetilde{a}$, I shall strike, or I may strike. It is thus conjugated:—

Sing.

1. $m\bar{a}r\tilde{a}$ 2. $m\bar{a}ras$

3. māri

Plur. $m\bar{a}ram,\ m\bar{a}r\widetilde{\tilde{a}}.$ $m\bar{a}rath$.

 $m\bar{a}rti.$

The following are examples of its use:-

Sing. 1.— $ban\tilde{a}$, in $t\bar{o}n\bar{a}$ puttar $ban\tilde{a}$, I may become thy son (I, 21).

 $gas\widetilde{a}$ (from $gasn\overline{u}$) and $b\overline{o}l\widetilde{a}$, in $apn\widecheck{e}$ $b\overline{a}b\overline{a}$ - $p\overline{a}s$ $chal\overline{i}$ - $gas\widetilde{a}$, tis $b\overline{o}l\widetilde{a}$, I will go away to my father, I will say to him (I, 18).

karā, in apne zi dūstī-sāth khushī karā, that I may make rejoicing with my friends (I, 45).

 $kh\tilde{a}$, in $ty\tilde{a}$ -bharī amī $kh\tilde{a}$, so I may eat (I, 13).

Sing. 3.—gasi, in ghar nā gasi, he will not go to the house (I, 41).

Plur. 1.— $kh\tilde{a}$ and $kar\tilde{a}$, in as $kh\tilde{a}$ $t\bar{a}$ $khush\bar{i}$ $kar\tilde{a}$, we may (i.e. let us) eat and make rejoicing (I, 31).

The Present is formed by conjugating one of the forms of the present tense of the verb substantive with the present participle. It will be remembered that the present participle is either the same in form as the root or else ends in \tilde{a} , also that there are several irregular present participles. Both forms are used in this tense. Neither changes at all in conjugation. Examples are:

Sing. 1.— mar- $s\tilde{a}$, in $am\bar{i}$ it $bh\bar{u}k\bar{a}$ mar- $s\tilde{a}$, I here hungry am dying (I, 17).

Sing. 3.— $d\tilde{a}$ -satī, in tis kī nā da satī, no one is giving to him (I, 14).

 $\tilde{\vec{e}}$ -chhu, in kasaŭ l $\tilde{o}k^u$ t $\tilde{\imath}$ pat pat $\tilde{\vec{e}}$ -chhu, whose boy comes behind thee (239)?

 $r\tilde{a}h$ -chhu, in $min\tilde{o}$ $b\tilde{a}bb$ is $matth\check{e}$ $g\bar{\imath}$ $r\tilde{a}h$ -chhu, my father lives in this small house (233).

suņāl-chhu, in yu bakrīĕ gawĕ suṇāl-chhu, he is feeding goats (and) cows (229).

Plur. 3.—kar-satī, in ko kar-satī, what are they doing (I, 38)?

 $kh\tilde{a}$ -satī, in sūr sikkar $kh\tilde{a}$ -satī, the swine are eating husks (I, 13).

tiņ tit rōṭī khã-satī, they are there eating bread (I, 16).

nāch-santī, in saganī antar nāch-santī, he heard (that) they are dancing within (I, 37).

gatsh-chhus, I go, is conjugated throughout all persons of both numbers in 205-210.

The Imperfect is similarly made with the present participle and the past tense of the verb substantive.

Thus:-

aũ mār-ātus, I was striking (192).

 $\tilde{\vec{e}}$ -thē, in zikhaņ tōṇā yih puttar ghar $\tilde{\vec{e}}$ -thē, when this thy son was coming to the house (I, 46).

The Past Tense is conjugated differently according as the verb is intransitive or transitive. The Past intransitive is conjugated by adding suffixes to the past participle. No suffix is added to the third person which is therefore the same as the past participle, singular or plural as the case may be. Taking $g\bar{a}$ or $g\check{e}\bar{u}$ as the past participle of gatshnā or gasnā, to go, we have the following conjugation in the masculine. No materials are available to show the feminine forms:—

	Sing.		Plur.
1.	gĕūs		$gar{e}asam$.
	gĕ ū s		$gar{e}ath.$
3.	$g \check{e} ar{u}, g ar{a}$		gēĕ, gē.

Examples of the past of intransitive verbs are the following:—

Sing. 1.—gĕūs, in aū az dūr haṇṭhī-karī chalī-gĕūs, I went, having walked, a long way today (224).

Sing. 3.— $\bar{a}\bar{o}$, in zikhan so ghar-nārā $\bar{a}\bar{o}$, when he came near the house (I, 36).

 $bh\bar{o}y\bar{a}$, in $zind\bar{a}\ bh\bar{o}y\bar{a}$, he became alive (I, 33).

 $g\bar{a}$, in $d\bar{u}r$ mulkhai chalī- $g\bar{a}$, he went away to a far country (I, 6).

 $bakht\bar{a}war\check{e}$ -san \check{e} ghar $g\bar{a}$, he went to the house of a rich man (I, 10). Similarly $bh\bar{o}\bar{i}$ - $g\bar{a}$, he became (I, 9), and gaz- $g\bar{a}$, he became lost (I, 33).

 $p\bar{e}\bar{a}$, in tis mulkhai barā kāl $p\bar{e}\bar{a}$, a mighty famine fell in that land (I, 9).

phiryā, in zikhaņ tis hōsh phiryā, when sense returned to him (I, 14).

There is one instance of the use of an intransitive past tense which I am unable to explain. It is lagōsam, in khushī karan lagōsam, translated, 'they began to make rejoicing' (I, 34). The termination sam of lagōsam points to the first person plural. If we read lagyasam, it would mean 'we began,' but that sense does not suit the context. We might also read the Tākarī as lagōsan, but that does not help us much.

The Past of a transitive verb, as usual, has the subject in the case of the agent. It often takes a pronominal sum indicating the agent. Such forms will be considered subsequently. Here we shall consider only the use of the past participle without suffixes. As elsewhere this agrees with the object (when in the form of the nominative) in gender and number. Examples are:—

bōlyā, in maṭthĕ lauhṛĕ bōlyā, the younger son said (I, 2). So I, 15; I, 38.
Note that in Rāmbanī the verb bōlnā, to say, is transitive.

 $dity\bar{a}$, in $t\tilde{u}$ bakrī-sun shilū nā $dity\bar{a}$, thou didst not give the kid of a goat (I, 44).

karyā, in mã tōṇā gunāh karyā, I did sin of (i.e. against) thee (I, 19).

 $l\bar{a}$, in zikhan tinī sab- $k\tilde{i}$ kharach kari- $l\bar{a}$, when he had spent everything outright (I, 7).

luṭāyā, in ziṇi tōṇā māl luṭāyā, who squandered thy property (I, 47). partyā, in mĩ nā partyā, I did not disobey (I, 43).

With a feminine object, we have distisant, which will be dealt with under the head of pronominal suffixes.

The **Perfect** and **Pluperfect** are formed, as in Kāshmīrī, with the Perfect Participle in *mut* to which is added either the present or past, respectively, of the verb substantive. The participle agrees in gender and number with the object if the latter is in the form of the nominative. Thus:—

tiņī mārtumat chhu, he has struck him.

tiņī mārtěmat chhi, he has struck them.

tiņī mārtumut ātū, he had struck him, and so on.

There is one example of the Perfect which will be given under the head of pronominal suffixes. No example is available of the Pluperfect except that given in 193.

Passive Voice.—This is formed (much as in Sirājī) by adding $\bar{\imath}$ to the root, and conjugating with it the various parts of $gatshn\bar{u}$ or $gasn\bar{u}$, to go. Thus:—

aũ mārī gatsh-chhus, I am being struck (202).

aũ mārī gĕūs, I was struck (203).

 $a\tilde{u}$ mārī $ga\underline{t}sh\tilde{a}$, I shall be struck (204).

Causal Verbs. - So far as the available examples go these are made in the usual way. We have:—

lutāṇā, to squander, in I, 7, and I, 47; and samzāṇū, to cause to understand, to remonstrate with, in I, 42.

Pronominal Suffixes are added to verbs as in Kāshmīrī, but not to the same extent.

The suffix of the dative or agent of the first person singular is am, before which a final \bar{a} is dropped. Thus:—

gam (for $g\bar{a}+am$), in $m\bar{e}l\bar{i}$ -gam, he was-got-to-me (I, 34).

karyam (for $kar\bar{\imath}$, fem. of $kary\bar{a}+am$), in $m\bar{\imath}$ tahl karyam, by me service (fem.) was-done-by-me (I, 43).

I am unable to explain the form $kary\bar{a}n\bar{i}$, it was done by me (I, 27). It is perhaps a mistake. See, however, the remarks concerning $dity\bar{a}n\bar{i}$, below.

The suffix of the agent singular of the second person is t, as in *chhut*, in yu kas-th \tilde{a} mult- \tilde{a} n-chhut, this from whom was-bought-by-thee (240)?

The suffix of the dative singular of the third person is s or sz, as in:

chhis, in mī kōrṛā ditmat-chhis, by me stripes given are-to-him, i.e. I have given stripes to him. ditmat-chhis is for ditmat-chhi+s, in which ditmat-chhi is the masculine plural of the perfect ditmut-chhu.

In *mārnias*, beat him (236), the s or as is evidently the suffix of the dative-accusative, but I am unable to explain satisfactorily the form *mārnia* or *mārni*. It looks like a future passive participle, but then we should expect *mārnā* or *mārnā*.

 $\bar{a}s\bar{\imath}$ ($\bar{a}\bar{o}+s\bar{\imath}$), in tis $b\bar{a}b\bar{a}$ dard $\bar{a}s\bar{\imath}$, to that father compassion came-to-him (I, 24). Probably we must explain $\bar{a}s\bar{\imath}$, in I, 39, in the same way, but the expression is awkward.

In $\bar{a}is$ (for $\bar{a}\bar{\imath}+s$) we have a suffix added to a feminine past,— $ch\bar{a}kh$ $\bar{a}is$, anger (fem.) came-to-him (I, 40).

The suffix of the agent singular of the third person is $n\bar{\imath}$. This is added either directly to the participle, as in $m\bar{a}ry\bar{a}n\bar{\imath}$, struck by him, or else the $y\bar{a}$ is first weakened to i, as in $m\bar{a}rin\bar{\imath}$. Examples are:—

 $bh\bar{e}jin\bar{\imath}$ ($bh\bar{e}jy\bar{a}+n\bar{\imath}$), in $tin\bar{\imath}$ tis bagrian-maz $bh\bar{e}jin\bar{\imath}$, by him, with reference to him, it-was-sent-by-him into the fields, i.e. he sent him into the fields (I, 11).

bōlyānī, in tisaņē bābā apnē kāmaņ bōlyānī, by his father it-was-said-by-him to his servants (I, 29). So I, 37.

 $ditin\bar{\imath}$ (for $dity\bar{a}+n\bar{\imath}$), in $tin\bar{\imath}$ $m\bar{a}l$ $ditin\bar{\imath}$, by him the property was-given-by-him (I, 4).

dityānī, in tōnĕ bābā bhārī dhām dityānī, by thy father a great feast was-given-by-him (I, 39).

We have seen above in $kary\bar{a}n\bar{\imath}$ that the termination $n\bar{\imath}$ appears to be used as a suffix of the first person. In the following it appears to be used as a suffix of the second person:—

 $dity\bar{a}n\bar{\imath}$, in $t\tilde{u}$ $bh\bar{a}r\bar{\imath}$ $dh\bar{a}m$ $dity\bar{a}n\bar{\imath}$, by thee a great feast was-given-by-thee (I, 48).

From these it looks as if in this dialect the termination $n\bar{\imath}$ was losing its force as a suffix of the third person, and was becoming simply a suffix signifying the past tense generally.

 $l\bar{a}n\bar{\imath}$ (from $l\bar{e}n\bar{u}$, to take, here used to form a compound verb. Past Part. $l\bar{a}$), in $matth\check{e}$ $lauht\check{e}$ $sab-k\tilde{\imath}$ $jam\bar{a}$ $kar\bar{\imath}-l\bar{a}n\bar{\imath}$, by the younger son everything was collected and taken-by-him (I, 4). Similarly $lut\bar{a}-l\bar{a}n\bar{\imath}$ (I, 7).

 $l\bar{a}gy\bar{a}n\bar{i}$ (from $l\bar{a}gn\bar{u}$, past participle $l\bar{a}gy\bar{a}$), in $gala\ l\bar{a}gy\bar{a}n\bar{i}$, to the neck he-was-applied-by-him, i.e. he embraced him (I, 25).

saganī, it-was-heard-by-him (I, 36). The form of the past participle here is doubtful.

samzānī, he-was-caused-to-understand-by him (I, 42).

Occasionally we have double suffixes. Thus, $dist\bar{\imath}$ is the feminine plural of $dity\bar{a}$, given, $ghund\bar{\imath}\tilde{a}$ distis is 'kisses were-given-to-him,' and $ghund\bar{\imath}\tilde{a}$ $distisan\bar{\imath}$ is 'kisses were-given-to-him-by-him' (I, 25).

As in the neighbouring dialects, when a suffix is added to the second person plural of the imperative, the second person plural of the present subjunctive is used instead. Thus in 227 we have lathas, put-ye-on-him, where lath (? $l\bar{a}th$), the second person plural of the present subjunctive, is used instead of $l\bar{a}g\bar{o}$, the second person plural of the imperative.

Compound Verbs.—Intensive Compounds are frequent. They are made, as in Dōgrī, by adding ā to the root of the main verb, and conjugating the secondary one. The Kāshmīrī method is not followed. Thus:—

 $b\bar{a}nt\bar{i}-d\bar{e}n\bar{u}$, to divide out (I, 4).

 $bh\bar{o}\bar{\imath}$ - $ga\underline{t}\underline{s}hn\bar{u}$, to become (Hindī $h\bar{o}$ - $j\bar{a}n\bar{a}$) (I, 9).

Corresponding to the Hindī chalā jānā, we have chalī-gatshnū (I. 6. and 224).

Intensive compounds of which the second member is $l\bar{e}n\bar{u}$, to take, appear to be literal intensives. Thus:—

dēī-lēṇū, to give outright (I, 3).

ghinnī lēṇū, to take absolutely (235).

karī-lēṇū, to make out and out (I, 5).

luṭā-lēṇū, to squander utterly (I, 7).

lāgī-lēṇū, to apply thoroughly, to clothe (I, 31).

There is one instance of an **Inceptive** Compound, viz. khushī karan lagōsam, they began to do rejoicing. Regarding the form lagōsam, see the remarks under the Past tense (p. 474).

KŌHISTĀNĪ.

Under the name of Kōhistānī are included several Dard dialects or languages spoken in the Panjkora, Swat, and Indus Kohistans. They are all closely connected together, and have numerous dialects, almost every little side-valley possessing its peculiar 'jib.' The only person who has hitherto described them is Colonel Biddulph.

The linguistic boundary between these languages and Paṣḥtō is very ill-defined, for all over the Kohistans of the three rivers the inhabitants are bilingual, and speak Paṣḥtō in addition to the dialect peculiar to each tract. All are much mixed, not only with that language, but also with the Indian languages immediately to the south. Specimens will be found below of Gārwī, spoken in the Swat Kohistan, of Tōrwālī of the Swat and Panjkora Kohistans lower down than Gārwī, and of Maiyā of the Indus Kohistan. In the List of Words, I have also given examples of Chilīs, a modern offshoot of Tōrwālī.

GĀRWĪ.

This language is spoken in the Swat Kohistan. It is the speech of the Gawārē, a sept of which tribe is named Bashghar, a fact which has led Colonel Biddulph to erroneously call it 'Bushkarik,' and to call the entire tribe 'Bushkar.' The language is closely connected with that of the Tōrwāl, who inhabit the Swat and Panjkora Valleys lower down than the Gawārē. It is evidently of Dardic origin. Regarding the Gawārē, Colonel Biddulph says,\(^1\)—

Bushkar is the name given to the community which inhabits the upper part of the Punjkorah Valley. whence they have overflowed into the upper part of the Swat Valley, and occupied the three large villages of Otrote, Ushoo, and Kalam. They live on good terms with their Torwal neighbours, and number altogether from 12,000 to 15,000 souls The Bushkarik proper are divided into three clans, the Moolanor, from 12,000 to 15,000 souls The Bushkarik proper are divided into three clans, the Moolanor, Kootchkhor, and Joghior. They say that they have been Mussulmans for nine generations, and the peculiar Kootchkhor, and Joghior. They say that they have been Mussulmans for nine generations, and the peculiar customs still common among the Shins do not exist among them. The Bushkar dialect customs still common among the Shins do not exist among them. The Bushkar dialect customs more nearly to modern Punjabi than any other of the Dard languages; but in some respects seems approaches more nearly to the dialects of the Siah Posh.'

With reference to the above remarks, the conversion of the people to Islām began in the time of Akhūn Darwēza, about three hundred years ago, and has been carried on up to within the last century. Gārwī, like the other languages of the Swat Kohistan, up to within the last century. The verb, except in the Future Tense, and in the has one remarkable peculiarity. The verb, except in the Future Tense, and in the Imperative mood, does not distinguish between the various persons. In some of these languages, e.g. Gārwī (as described by Biddulph under the name of Bushkarik), even languages, e.g. Gārwī (as described by Biddulph under the conjugation of the verb, number is not distinguished. On the other hand, throughout the conjugation of the verb, number is not distinguished. On the other hand, throughout the conjugation of the verb, the distinction of gender is carefully maintained. Thus, in Gārwī, the present tense of the verb 'to be' is, masculine, thū, feminine, thi. According to the gender of the subject, each of these words means, I am, thou art, he, she, or it is, we are, you are, they are, as the context may require.

The following abstract of the Gārwī (Bushkarik) Grammar is taken from Colonel Biddulph's work, loc. cit. The same work contains a Vocabulary, to which the reader is referred for further information:—

¹ Tribes of the Hindoo Koosh, p. 70. The Bushkarik Grammar is Appendix E of the same work.

SKELETON GRAMMAR.

IV.-VERBS-

A.—Auxiliary and Verbs Substantive,—ă<u>sh</u>ūgān, to be.

Pres., masc., $t\bar{u}$; fem., $t\bar{u}i,$ I am, etc. ; Past, masc., $h\bar{u}$; fem., $h\ddot{u},$ I was, etc.

Pluperfect, masc., \$\overline{a} \side k \overline{u}\$; fem., \$a \side k \overline{u}\$, I had been, etc. This last is given by Biddulph as a Pluperfect. In the specimens it is a simple past, and means 'I was.'

 $H ar{v} g \widetilde{a}$, to become. The only tenses which change for person or number are the Future and Imperative. Other tenses only change for Gender.

Infinitive, $hog\tilde{a}$, to become: Participle Present, home, becoming; Past, $h\bar{u}ti$, having become.

Present, masc., hūwān-tū; fem., huwēn-ti, I am becoming, etc.

Imperfect, masc., $h\bar{u}w\bar{n}n-\underline{s}h\bar{u}$; fem., $huw\check{e}n-\underline{s}hi$, I was becoming, etc.

Past, masc., $h\bar{u}$; fem., $h\ddot{u}$, I became, etc.

Perfect, masc., hū-tū; fem., hü-tü, I have become, etc.

Pluperfect, masc., $h\bar{u}$ - $\underline{sh}\bar{u}$; fem., $h\bar{u}$ - $\underline{sh}i$, I had become, etc.

Imperative, become thou, hoh; let him, her, or it become, hohdah. become ye, hō; let them become, hodāh.

Future, I shall becom	e.
Sing.	Plur.
1. $\begin{cases} hom \text{ (m.)} \\ h\bar{u}we \text{ (f.)} \end{cases}$	$h\bar{u}$ (m.).
1. huwe (f.)	$h\bar{u}i$ (f.).
2. hoh	$\begin{cases} \hbar \bar{u} \text{ (m.).} \\ \hbar \bar{u} i \text{ (f.).} \end{cases}$
2. 1010	\ h\ulleti (f.).
3. hoh	$\begin{cases} h\bar{u} \text{ (m.).} \\ h\bar{u}i \text{ (f.).} \end{cases}$
31 .13.10	\ h\bar{u}i (f.).
	1

B.—Active Verb,— $y\bar{a}g\bar{a}$, to come.

Infinitives, Present, $y\bar{a}g\tilde{a}$, to come; Past, $y\bar{a}g\bar{a}$ - $\underline{sh}\bar{u}$, to have come.

Participles, Present, yagra, coming; Past, yate, having come.

Gerunds, yānder, from coming; yāgā maiya, in coming.

Supine, yāg-tū, must come.

Present, masc., yān-tū; fem., yĕn-ti, I am coming, etc.

Imperfect, masc., yān-shū; fem., yĕn-shi, I was coming, etc.

Past, masc., $g\bar{a}$; fem., $g\bar{e}$, I came, etc. (? I went, etc. The specimens have $y\bar{a}$ for 'he came').

Perfect, masc., $y\bar{a}$ - $t\bar{u}$; fem., $y\check{e}$ -ti, I have come, etc.

Pluperfect, masc., yā-shū; fem., yĕ-shi, I had come, etc.

Future, masc., yam; fem., yen, I shall come, etc.

Imperative, come thou, yah; let him, her, or it come, yadāh.

come ye, yā; let them come, yādāh.

Karūgā, to do.

Infinitives, Present, $kar\bar{u}g\tilde{a}$, to do; Past, $kar\bar{u}g\bar{a}$ - $\underline{sh}\bar{u}$, to have come.

Participles, Present, karā, doing; Past, kā, having done.

Gerunds, karūgerer, from doing; karūg maiya, in doing.

Present, masc., karān-tū; fem., karēn-ti, I am doing, etc.

Imperfect, masc., karān-shū; fem., karěn-shi, I was doing, etc.

Past, masc. and fem., kir, I did, etc.

Perfect, masc., kir- $t\bar{u}$ (?); fem., kir-ti, I have done, etc.

Pluperfect, masc., kir- $\underline{sh}\bar{u}$ (?); fem., kir- $\underline{sh}i$, I had done, etc.

(According to Biddulph, the masc. forms of the Perf. and Plup. are kir-ti and kir-shi, respectively. This is probably a misprint.)

Future, I shall do.

		Sing.		PLUR.		
	Masc.		Fem.	Masc	Fem.	
	1. karã		karë	kari	karë	
- :	2. karē		karë	karã	karë	
٠.	3. karā		kurë	karã	karē	

Imperative.

ker, do thou. kěrděl, let him, her, or it do. kěráh, do ye. kërdah, let them do.

In the following specimens, which I owe to the kindness of the late Sir Harold Deane, K.C.S.I., the vowel-sounds have not been distinguished so minutely as in the Grammar. According to him the Gārwīs of the present day have only one \tilde{e} -sound, corresponding to the sound of the a in 'fate'; and only one \tilde{o} -sound, corresponding to the sound of the second o in *promote*. These vowels have been marked accordingly in the specimens.

It is not possible to form a complete grammar from the specimens, but the following instances of grammatical forms show that the language is closely connected with Kāshmīrī:—

I.—NOUNS—Declension.

Sing.	Plur.	
Nom. bab, a father	$babar{u}$	Similarly, $d\bar{u}\bar{\imath}$, a daughter.
Gen. bab - \tilde{a}	$babar{u}$ - $\widetilde{ar{a}}$	Genitive, $d\bar{u}\bar{\imath}$ - $\tilde{\tilde{a}}$; but Nom.
Dat. $bab-ki$ or $-ka$	$bab\bar{u}$ - ki or $-ka$	Plur. $dar{u}ar{\imath}$.
Loc. $bab-m\tilde{\tilde{e}}$	$babar{u}$ - $m\widetilde{\widetilde{e}}$. A good man is ak rān mēsh.
Abl. $bab-m\tilde{a}$, from a father	$babar{u}$ - $m\widetilde{ar{a}}$	A good woman is ak rain īs.

II.—PRONOUNS—

I, ya; of me, $m\bar{a}$, $ma\tilde{i}$; Obl. form, mai; We, $m\bar{a}$; our, $m\bar{o}$.

Thou, $t\bar{u}$; of thee, $chh\tilde{a}$; Obl. form, tai; Ye, $th\tilde{a}$; your, $th\tilde{o}$.

He, that, $a\underline{sh}\bar{i}$; his, $as\tilde{a}$; Obl. $\bar{a}s$; they, tum; their, $tas\tilde{a}$; tama, by them.

Other forms are sah, he; $tas\tilde{a}$, his; tas-ki, to him; tan, by him. 'This' is eh or $\tilde{a}\tilde{i}$.

III.—VERBS—

(a) Verbs Substantive—

Pres.— $th\bar{u}$, $th\bar{o}$ (masc.); $th\bar{i}$ (fem.); for both numbers and all persons. Used once to mean 'was.' 'The elder son was in the field.'

Past— $\bar{a}\underline{sh}$, $\bar{a}\underline{sh}\bar{o}$, $\bar{a}\underline{sh}\bar{u}$; fem. $\bar{a}\underline{sh}\bar{i}$; for both numbers and all persons. Used once to mean 'is,' 'what matter is?'

I may or shall be, $h\bar{o}m$; he became, $h\bar{u}$; be (Imperat.), $h\bar{o}$; to be, $h\bar{o}g\bar{e}$; being, $h\bar{o}g$.

(b) Active Verbs-

Chando, to beat.

 $Chand\bar{o}_{\underline{sh}}$, beaten; so, $m\bar{u}rsh$, dead; $chh\bar{a}r\bar{o}_{\underline{sh}}$, lost: gat, gone.

Imperative,—chand, beat. Other examples are, d^a , give; giya, bring ye; $\underline{sh}\overline{a}wa$ or $\underline{sh}\overline{a}$, clothe ye; $y\widetilde{a}$, come (? 1st person, plural); $ch\overline{o}$, go.

Present,—chandānt, I beat, etc., for all persons and both numbers. Other examples are, khānt, I would eat; marānt, I am dying; kharānt, thou art defiling; wānt, it comes; grānt, thou bandiest; bachānt, I go.

Imperfect, -chandant ash, (I, etc.) was (were) beating.

Past,—(a) Transitive Verbs—Passive construction—With Masculine Object,—mai chaṇḍū, I beat (him); paṛtālū, (he) sent (him); kēr, (he) made; lith, (he) saw (him); gas, (he) caught (him); manō, he said; budh, (he) heard (a sound); laṭh, (he) found (him). With Feminine Object,—kēth,

GARWĪ. 511

thy (father) has made (a feast), (I) did (not disobedience) to thee; $d\bar{e}th$, thou didst (not) give (a kid) (in these the th is probably the pronominal suffix of the second person); gis, (he) caught (her); $kh\bar{e}g$, (he) ate (her).

(b) Intransitive Verbs,— $g\bar{a}$, (I, etc.) went; $y\bar{a}$, $y\bar{a}g$, (he) came; itiath, (he) arose; $b\bar{a}g$ - $chh\bar{o}re$, (he) ran up (to him); $n\bar{u}kas$, (he) came out.

The following are apparently Past Participles used as Past Tenses:— $khi\tilde{a}\underline{s}\underline{h}ta$, they ate; $kar\bar{e}\underline{s}\underline{h}$, I might do (merriment, fem. obj.); $di\tilde{a}\underline{s}\underline{h}$, (he) gave; $bacha\underline{s}\underline{h}$, (he) went; $p\bar{u}\tilde{a}\underline{s}\underline{h}$, they were drinking.

Future,—ya chandam, I shall beat; chhōm, I will go; ya manam, I shall say; karam, I will make; ya pōham, I will understand.

Some other forms will be found in the List of Standard Words and Sentences. Those for Nos. 185—190, 196—200, 208—210, and 214—216 were not obtained from the same source as the rest, and there are some discrepancies for which I am unable to account.

TÖRWALĪ OR TÖRWALAK.

This is the language of the Tōrwāls, who occupy the upper portion of the main wat Valley for about sixty miles from Aryana to Chiroli, and the Chahil Darrah, a alley running to the east from the Swat Valley a little above Chiroli. According to Biddulph (p. 68), they do not differ in appearance from the other tribes of the indus Valley, and there can be little doubt that the Chilis are an offshoot of this tribe. The separation of the two portions of the tribe has, however, produced considerable differences in the dialects now spoken. The Tōrwāls have been too long converted to slām, and exposed to the preaching of the Swat Mullāhs to have retained any customs connected with other religions; but they have retained their national dances.

The Chilis are a small tribe now settled on the left bank of the Indus near Kölind Pālus. They are called Chilis by their neighbours and Galō by themselves. They have a tradition that their home was originally Buner, whence they migrated to Swat so escape being forced to become Musalmāns. Being further persecuted, they resolved to stake their all on a battle, after which, if defeated, they would consent to embrace the religion of Islām. They were defeated, but a certain number of them, clinging to their old faith, migrated to the Indus Valley. This did not, however, save them from becoming Musalmāns in after years. Those who remained behind in Swat were the ancestors of the present Tōrwāls.

Tōrwālī certainly belongs to the Dardic family, and the mode of formation of the feminine, and some of the verbal forms, show clearly that it is connected with Kāshmīrī. It is, however, much mixed up with Paṣḥtō forms. It is most nearly akin to the language of the Indus Valley which is described by Colonel Biddulph under the name of Gowro. In order to show the close connexion between the two languages, a column has been added to the List of Standard Words showing the corresponding words in Gowro. These have been taken from Colonel Biddulph's work.

AUTHORITY-

BIDDULPH, Col. J.,—Tribes of the Hindoo Koosh. Calcutta, 1880. Appendix D contains a very short Grammar, and a Vocabulary.

The following Skeleton Grammar is taken from Biddulph. The grammar of the specimens differs considerably from that here given, and is subsequently discussed:—

¹ Tribes of the Hindoo Koosh, p. 10, and Appendix F.

TORWALI GRAMMAR (BIDDULPH).

I.—PRONUNCIATION.—Pronounce & as in hat; & as in fall; e as in met; e (without any mark) as the e in the French était; o as in hot; o (without any mark) as the first o in promote; o and u as in German; gh, kh, sh, and zh, as the Persian و and consonants as usual in other Indian languages. ث and ث respectively. Other vowels and consonants as usual in other Indian languages.

II.—NOUNS.—There are two declensions relating to (I) animate and (II) inanimate nouns—

I. Sing. Nom. chhī, a woman. Gen. chhī-si, of a woman. Dat. chhī-ke, to a woman. Acc. chhī, a woman. Abl. chhī-mā, from or by a woman.	ch ch ch	ur. ħī. ħī-α-si. ħī-α-ge. ħī. ħħī.	II. Si $\underline{sh}\bar{\imath}r$, a h $\underline{sh}\bar{\imath}r$ -si. $\underline{sh}\bar{\imath}r$ -wa $\underline{sh}\bar{\imath}r$. $\underline{sh}\bar{\imath}r$ -a.	iouse.	Plur. <u>sh</u> īr. <u>sh</u> īr-a-si shīr-a-w shīr. shīr.	With, sat, sunixed.
IIIPRONOUNS	Nom.	Gen.	Dat.	Acc.	Abl.	
III.—PRONCONS—	а	$m\overline{i}$	ma-ge	mai	ma-ma.	There are no distinctions of gender:
	măh	mun	mo-ge	$m \check{a} h$	mo-ma.	
We · · ·	tũ	chi	te-ge	tai	tai-ma.	IV.—VERBS—
Thou	toh	tun	to-ge	toh	to-ma.	A.—Auxiliary Verbs and Verbs Substantive.
	hěh	isăh	ĕs-ke	ĕs	ěz-ma.	Hŏsa means 'to be.'
He (near)	iyăh	iyasăh	iya-ke	$iy\widetilde{\widetilde{a}}$	iyăh-ma.	Biddulph gives no paradigm of it
They (near) · · ·	tiyăh	tisăh	těs-ke	tĕs	těz-ma.	conjugation.
He (remote) · · · · · · · · · · · · · · · · · · ·	tiyah	tiyasăh	tiya-ke	tiya	tiyah-ma.	***
		Who?i	s kām; what	? is kăh.		

B.-Active Verb,-kudūsa, to strike.

Infinitives,-Present, kudūsa, to strike;

Past, kudūsa ashū, to have struck;

Future, kud bādūi, to be about to strike.

Participles,-Present, kududūt, striking;

Past, kuduge, having struck;

 $kud\bar{u}sa$ Future,about to strike.

Gerunds,-kudū-zhet, on striking; kudū-ma, from or by striking. Except the Imperative each tense has only two forms,—A Masculine and a Feminine,—and does not change for number or person.

Thus,-

Future, I shall strike. Imperative. Past, I struck Present, I strike. kudnin. kud, strike thou. kudū. Masc. kudadū. küdnîn. kude, let him strike. küdi. Fem. küdüji. Pluperfect, I had struck. Perfect, I have struck. kudā, strike ye. Imperfect, I was striking. kudū-shū. kuděl. kudā, let them strike. Masc. $kud\bar{u}s$ - $a\underline{sh}\bar{u}$. küdī-shi. küdil. Fem. küdus-ashi.

The Conditional mood is formed by adding kyah, perhaps, to the Indicative. Thus, kudadū kyah, I may be striking. The Passive voice is formed by the use of the Auxiliary verb bajūsa, to go. Thus, kuduge bajūsa, to be struck; kuda

bajudū, I am being struck.

³ v 2

The following incomplete account of Tōrwālī Grammar is based on the speciens.

-VOCABULARY-

This is freely infected by Pashtō. Thus, we have $t\bar{o}l$, all; $ma\underline{k}ht\bar{o}ran$, black-faced, ence a sinner; ghwara, choice; $p\bar{\imath}\underline{s}h\bar{o}$, a cat, and many others.

.—NOUNS,—Declension.

	Sing.		ą.	Plur.
Nom.	bap, a father.			bap.
Gen.	bap - $ch\bar{e}$, of a father.			$bap ext{-}char{e} ext{.}$
Dat.	$bap-k\bar{\imath}$, to a father.			bap - $k\bar{\imath}$.
Abl.	bap - $m\bar{a}$, from a father.			bap-mā.

The only instances I have met in which the plural differs from the singular, are \bar{o} , a cow; plural gai, and the following—naukar, means 'servants,' but $naukar-\bar{a}-m\tilde{\bar{e}}$, iong servants; $naukar-\bar{a}-k\bar{\imath}$, to the servants: $dehq\bar{a}n$, villagers; $dehq\bar{a}n-a$, to the lagers; $dehq\bar{a}n\bar{o}$, the villagers (Agent case): $y\bar{a}r-\bar{o}-sat$, with friends. $P\bar{u}chhat\ bagayi$ translated 'he divided on his sons.'

Amongst postpositions may be mentioned, $ni\tilde{o}$, $k\bar{\imath}-ni\tilde{o}$, near; $d\bar{\imath}$, by means of; sat, th; $m\tilde{e}$, in; $\underline{zh}at$, $\underline{zh}ad$, on.

The Agent case is usually the same as the nominative; thus, $bap\ ban\bar{u}$, by the her it was said, the father said. We have, however, $p\bar{u}chhai\ ban\bar{u}$, by the son it was d; and $dehq\bar{a}n\bar{o}\ gad$, by the villagers he was caught, beside $dehq\bar{a}n\ dith$, by the lagers he was seen. As a matter of fact the Nominative is frequently used instead of Agent.

Instances of the Vocative case are, ai babia, O father, and ai pūchha, O son.

Adjectives—Do not seem to change for gender.

-PRONOUNS-

First Person,—I, \bar{a} , ai; of me, my, $m\bar{\imath}$; Agent and Obl. form sg. mai; we, $m\bar{o}$; Agent, $m\bar{o}$; of us, our, mun; to us, $m\bar{o}$ - $g\bar{e}$.

Second Person,—Thou, $t\bar{u}$; of thee, thy, $chh\bar{\iota}$ or (Parable) $chh\bar{\iota}$; Agent, tai; ye, $th\bar{\iota}$; of you, your, tun; Agent, $th\bar{\iota}$; to you, tha-tai.

Third Person,—He, sēh, ēh; Agent, sēh, ēh; of him, his, isa, (Parable) isē; Obl. sg. isa; they, (Nom. and Agent) tiyā; of them, their, tiyāsa.

Other forms are :--

He, tēh, tis; Agent, tēh, tis; Obl. tis; his, tī, tisa; they, tēh, hai.

From him, ēz-mā.

To this person, is-kī.

Mi kā thū, sa chhē thū, what is mine, that is thine.

Examples of Pronominal Adjectives are,—

Seh mash, that man:

 $T\bar{e}$ watan yat, on that country; $\bar{a}h$ $p\bar{u}chh$, this son; as $gh\bar{o}$ - $ch\bar{e}$, of this horse; as $\underline{sh}ai$, that thing.

'Own' is tanū.

'What?' is $k\bar{a}$.

IV.-VERBS-

A.-Auxiliary Verbs and Verbs Substantive.-

Present,—Sing. (all persons), thū; Plur. thīā. In kā ehhal chhī, what matter is it?, chhī is possibly feminine. In the Parable, we have once thai, for thīā (kitaik naukar thai).

Past,—Sing. $a\underline{sh}\bar{u}$, fem. $a\underline{sh}\bar{\imath}$; Plur. $a\underline{sh}a\bar{\imath}$.

In the phrases tang $\underline{sh}\overline{u}$, he became straitened; and $\underline{t}ag\overline{o}$ $\underline{sh}\overline{u}$, she was fastened, the $\underline{sh}\overline{u}$ is probably borrowed from Paṣḥtō.

Of the base hu, we have the following examples:—

 $naukar h\bar{u}$ (and elsewhere), he became a servant; $jand\bar{\imath} h\bar{u}-th\bar{u}$, he has become alive; $\bar{a}i$ $chh\bar{e}$ $p\bar{u}chh$ $hu\bar{\imath}$, that I may be thy son; $\underline{kh}u\underline{sh}\bar{a}la$ $hu\bar{\imath}$, let us be happy; $huy\bar{\imath}$, I shall be; $h\bar{o}ya$, I may be; $h\bar{o}$, be thou.

B.—Active Verb.—

kūthū, to beat;

 $k\bar{u}th\bar{u}\bar{a}$, beating. So $ba\underline{z}h\bar{u}\bar{a}$, going.

 $k\bar{u}th\bar{u}$, beaten; so $g\bar{a}$, gone; mayil, dead; $ha\underline{z}h\bar{a}jil$, lost.

Imperative,—beat,—kūth. So also,—dai, give; chā, graze; hisāb-ka, count; bazh, go; til, go; kho, eat; bhai, sit, dwell; yai, come; riō, stand; mai, die; dhan-dai, run; thal, put; ghin, take; gaṇḍ, bind; nīngāl, take out; khaī, let us eat; huī, let us be; kayī, let us make.

anā, bring ye; liyā, put ye on; yai, come ye.

Present,—I am beating, etc.,—Sing. (all persons), kūṭha-thū; plur. kūṭha-thīā. So also,—bazha-thū, I go; plural also bazha-thū; chā-thū, he is grazing; bhaiṭ-thū, he is sitting, he dwells; yai-thū, he comes.

In the Parable we have $t\bar{u}$ bhai-th \bar{u} , thou art living; $m\bar{u}$, I die, is apparently a Simple Present.

Imperfect,—I was beating,—ā kūtha-shū.

Past.—Transitive verbs.—These are construed passively in the Past Tenses, and the subject is put in the case of the Agent. Sometimes the Nominative is used instead of the Agent, as in ā kūṭhū-shū or mai kūṭhū-shū (Pluperfect), I had beaten.

I beat (Past), mai $k\bar{u}th\bar{u}a$. So for all persons and both numbers, the pronoun being usually in the case of the Agent.

So,---

- (1) kīt, (I never) did (disobedience to thee).
- (2) dit, (thou) didst (not) give (a kid).
- (3) $ban\bar{u}$, he said; $p\bar{e}h\bar{u}$, he sent; $mah\bar{u}$, they killed; $n\bar{i}ng\bar{a}l\bar{u}$, they returned (let, took out) (thanks).
 - bahlait, he lost (his property); $l\bar{a}hat$, he finished (his property); gat, he held (him); $b\bar{e}s$ -dit, he kissed (him); $jaw\bar{a}b$ -dit, he answered.
 - bagayi, he divided (the property); $\underline{kh}ar\bar{a}b \ k\bar{\imath}$, he wasted (the property); $aw\bar{a}z \ k\bar{\imath}$, he called; $tapaus \ k\bar{\imath}$, he enquired; $minat \ k\bar{\imath}$, he entreated; $l\bar{e}w$ - $k\bar{\imath}$, they plastered; $k\bar{\imath}t\bar{\imath}$, he made (his share together).
 - dith, (he) saw (him); (they) saw (a she-jackal); sapaith, (they) prepared; budh, (he) heard (a noise).
- Intransitive Verbs.—These are construed actively; \bar{a} $g\bar{a}$, I went, and so on for all persons and both numbers. So also,— $\bar{a}\bar{o}$, (a famine, he, a she-jackal) came; $\bar{u}chhit$, (he, the she-jackal) arose; $\underline{z}hadath$, (his heart) burnt; idhain-dit (? compound of dit, he gave), (he) ran; $\underline{z}huth$, (he) sulked; $baj\bar{u}duth$, (he) entered; nighat, (he) came out; bhir, (the she-jackal) sat; dhanj-dit (compare idhain-dit above), (they) ran up; $h\bar{u}d\bar{u}$, (she) could.
- Perfect,— $\bar{a}o$ -th \bar{u} , (he) is come; $k\bar{\imath}$ -th \bar{u} , (thy father, thou) has (hast) made (a feast); $p\bar{a}$ -th \bar{u} , (he) has found (him); $a\underline{s}h$ -th \bar{u} , (they) placed (a stone). Note $\underline{k}h$ izmat $k\bar{\imath}$ -chh $\bar{\imath}$, I have done service.
- Future,— \bar{a} $k\bar{u}th\bar{i}y\bar{a}$, I shall beat. Does not change for person or number. The Parable has, $ichh\bar{i}$, I will rise; $baij\bar{i}$, I will go; $ban\bar{i}$, I will say.
- Habitual Past,—dēwūdat, (no one) used to give; khātai, (they) used to eat; yawūdō, (the she-jackal) used to come; khawūdō, (she) used to eat.
- Examples of the *Passive* are, mai kūṭhū-thū, I am beaten; mai kūṭhū-shū, I was beaten; mai kūṭhīngā, I shall be beaten. These are literally, he has beaten me, etc.

MAIYÃ.

This dialect is spoken in the Köhistan on both banks of the Indus, between that river and the Swat valley on the one side, and on the other between it and the watershed of the Jhelam and its affluents. It is called Maiya by those who speak it, but is generally known elsewhere by the indefinite name of 'Köhistäni.' Its northern limit is the valley of the river Kandiā (popularly known as Kilī), and it goes as far south as Palōsī on the Indus. Over the whole of this area Pashto is also spoken as a kind of lingua Maiya has several dialects. Among the principal may be mentioned the Kilī Dubērī jīb, spoken in the Kandia valley and also, much to the south, in the Dubēr valley. Another is spoken round Kölī and Pālus, in Jalkot, Batērā, Marēn, Goberā and Chilis. It is practically the dialect of the west side of the Köhistan here. The people of Kölī and Pālus are Ābū Khēls. Another, and the most important, is that of Seo, Patan, Khāyāl, Jijāl, and Bankar. It is the dialect of the east side of the Köhistān. The people are chiefly Shāh Khēls. A fourth dialect is spoken more to the south, and is that illustrated below. Maiya is closely connected with Garwi and Torwali, and even more closely with the language described by Colonel Biddulph under the name of Chilis an account of which is given under the head of Torwali. I am indebted to the late Sir Harold Deane, K.C.S.I., for the specimens here given. In order to show the close connexion with Chilis, another column has been added in the list of Standard Words showing the corresponding words in that language. These have been taken from Colonel Biddulph's work.

The following grammatical sketch of Maiyā is based on the specimens and on the List of Standard Words:—

I.-NOUNS.-

There seem to be two declensions. In the first, the noun does not change either for case or for number. The postpositions, denoting case, being simply added to the nominative. Thus:—

Nom. mhāla, a father or fathers.

Gen. $mh\bar{a}la-\tilde{a}$, of a father or of fathers.

Dat. mhāla-gai, to a father or to fathers.

Abl. mhāla-na, from a father or from fathers.

Similarly appear to be declined $m\bar{a}\underline{sh}$, a man; $gh\bar{o}$, a horse; $g\bar{o}$, a bull; $ghar\tilde{i}$, a woman; and $jaw\bar{a}b$, an answer.

In the second declension, the letter a seems to be used to form the plural. Thus:—

Nom. $dh\bar{\imath}$, a daughter. $dh\bar{\imath}a$, daughters. Gen. $dh\bar{\imath}-\tilde{a}$, of a daughter. $dh\bar{\imath}a-\tilde{a}$, of daughters. Dat. $dh\bar{\imath}-gai$, to a daughter. $dh\bar{\imath}a-gai$, to daughters. Abl. $dh\bar{\imath}-na$, from a daughter. $dh\bar{\imath}a-na$, from daughters.

1 I am indebted to Colonel A. B. Dew, C.S.I., C.I.E., at the time Assistant Political Agent at Chilas, for this information.

² Tribes of the Hindoo Koosh, p. 10, and Appendix C.

523 MAIYÃ.

Similarly appear to be declined puth, a son; naukar, a servant; $gh\bar{o}i$, a mare; $k\bar{u}sar$, a dog; and $k\bar{u}s\bar{\imath}r$, a bitch. The nominative plural of $g\bar{a}$, a cow, is $g\bar{a}\bar{\imath}$.

Some nouns appear to take this a also in the oblique cases of the singular. Thus,

in the specimens we find:-

From māl, property, māla-na, from the property.

watan, a country, watana-tal, on a country; but watan- \tilde{a} , of a country.

buchh, hunger, buchha dī, by hunger.

dol, a field, dola-maz, in the field.

The following forms are not provided for above: -

watan- \bar{e} , to a country.

dōl-ai, to the field.

naukar- $\tilde{\sigma}$ -mil, with servants.

 $naukar-\widetilde{o}$ managil, he said to the servants.

bazhdő-tal, on both.

kachniō-tal, on harlots.

So far as appears from the specimens, the Accusative and Agent cases are the same as the Nominative. Postpositions not given in the paradigms will be gathered from the examples given above.

Adjectives do not appear to change for Gender or Number. Thus, ak mitha māsh, a good man; ak mitha māsh-ā, of a good man; mitha māsh, good man; ak mitha gharī, a good woman; mitha ghari, good women.

II.-PRONOUNS.-

OTACC	IND.	I.	Thou.	He.
Sing.	Nom.	$m\widetilde{\widetilde{a}}$ $m\widetilde{\widetilde{e}}$	$t ilde{u} \ t ilde{\widetilde{e}}$	sōh. tasi̇̃.
	Gen. Agent.	$m\widetilde{\widetilde{e}}$	$t\widetilde{\widetilde{o}}$	$s\widetilde{\widetilde{e}}.$ $sa\widetilde{\imath}.$
Plur.	Now. Gen.	$b ar{e} \ z \widetilde{ec{lpha}}$	$tus \ s\widetilde{\widetilde{a}}$	$say\widetilde{a}$.
	Agent.	$z\widetilde{\overline{o}}$	$s\widetilde{ar{o}}$	$say\widetilde{o}$.

Other cases are formed by adding postpositions to the Genitive. Thus, me-gai, to me. The Agent case is used as the subject before transitive verbs in the past tenses. Thus, $s\tilde{e}$ kuṭagil, he beat, but $s\tilde{o}h$ baīgā, he went. Curiously enough, as appears from the list of Standard Words, the Agent, and not the Nominative, is used in the second person singular, and in the third person singular and plural of the Future. Thus:-

bē kuṭagal-ashat. 1. mã kutagal-a<u>sh</u>at. tus kutagal-ashat.

2. tõ not tū kuṭagal-ashat. $say\tilde{o}$ not $sa\tilde{i}$ kuṭagal-a \underline{sh} at. së not sõh kutagal-ashat.

It is possible that these are mistakes of the original transcriber. Even before the past tenses, the use of the Agent is not always adhered to. Thus, in the Parable of the Prodigal Son, we have :-

 $S\tilde{o}h$ not $s\tilde{e}$ $w\tilde{e}\underline{s}h$ -karagil, he divided.

 $Say\tilde{o} \underline{kh}u\underline{sh}\tilde{a}l\tilde{\iota} karagil$, they made rejoicing. Bē khushālī karagil, we made rejoicing. Beside

And even, $T\tilde{e}$ khairāt karagil, thou madest a feast.

VOL. VIII, PART II.

In spite of these exceptional instances, the specimens show clearly that the Agent

case is properly used before the past tenses of Transitive verbs.

Other pronominal forms occurring in the specimens are tas, him; tas-na, from him; \tilde{o} or as, this, both substantive and adjective; $as\tilde{a}$, of this, and so on. Who? is $k\tilde{a}$; whose? $kas\tilde{e}$; from whom? $kas\tilde{e}$ -na; what? gi; how much? how many? katuk. $Ta\tilde{i}$ or $t\tilde{a}$ is 'his own.'

III.-VERBS.-

A.—Auxiliary Verbs and Verbs Substantive.—

Present.—I am, etc. This is $th\bar{u}$, for all the persons and both numbers.

It is also frequently used instead of $\tilde{a}s$, in the sense of the past.

Past.—I was, etc. Besides $th\bar{u}$, we have also $\tilde{a}s$, plural $\tilde{a}s\bar{u}$, for all persons. Other forms are:—

 $h\bar{u}gai$, I may be, let us be.

hūwam, I should be.

 $h\bar{o}n$ - $\underline{sh}at$, I shall be; $b\bar{a}$ - $\underline{sh}at$, literally, I shall go, is also used in the same sense.

 $h\bar{u}ng\bar{a}$, he became.

 $h\bar{o}$ -th \bar{u} , he has become.

B.—Active Verb.—

The standard verb, of which paradigms will be given, is $kut\tilde{\tilde{o}}$, to beat.

Infinitive,—kwļō, to beat.

Present Participle, -kuta, beating.

Past Participle,—kutagalai, having beaten; so karai, having made, in which gal is omitted.

Other examples of the Present Participle are $h\bar{o}\bar{e}$, being; and bai, going. Kuṭais means 'beaten'; and $bay\bar{\imath}$, 'gone.' Marail probably means 'dead,' and $l\bar{a}bay\bar{a}$, 'lost.'

Imperative,—kutagal, beat. Other examples are khagal, eat; galagal, put; dagal and daigal, give; āgal, take; gandagal, bind; nihālagal, take out.

In the following cases, we miss the termination $gal:-h\bar{o}$, be; bah, go; bhai, sit; ai, come; $\bar{o}lih\bar{o}$, stand; $mariy\bar{a}$, die; dai, see daigal above, give; $nih\bar{a}la$, look.

The following are first persons plural,—khaglai, let us eat; and hūgai, let us become.

Simple Present,—kuṭānt, I beat, etc., for all persons and both numbers.

Other examples are, *sarānt*, he grazes. The plural may apparently add an a, for we have *khānta*, they eat.

The following forms are made up on a different principle, bait, I go; plural, baita. In the Parable, this is used as a Past, in bhākun nī baita, he went not inside. Here, the singular also ends in a. So we have ait, he comes; dit, he gives. Marīā is translated 'I die,' but perhaps it is a Past Participle, and means 'I am dead.'

- **Definite Present,**—Only two examples, both of the same verb, are forthcoming. They are,— $s\bar{o}h$ $gh\bar{o}$ -tal, bhaita- $th\bar{u}$, he is sitting on a horse, and $m\tilde{e}$ $mh\bar{a}la$ as $laka\ bh\bar{a}$ - $maz\ bhait$ - $th\bar{u}$, my father lives in that small house.
- Imperfect, kut-as, I was beating. So, wi ni langah-as, water was not passing.
- Future,—kuṭagal-ashat, I shall beat, for all persons and both numbers. The syllable gal may apparently be dropped, for we have ba-shat or ba shata, I will go; mana-shat, I will say. In the former, we see an a added, as in the present. The word uthāgā is translated, 'I will arise,' but the word is a Past, and probably here means, 'having arisen.'

See what has been said above, under the head of Pronouns, regarding the form taken by a pronoun which is the subject of a verb in this tense.

Past,—This differs in the case of transitive and in the case of intransitive verbs. We shall take the former first.

Transitive Verbs,—kuṭagil, I beat, for all persons and both numbers. Other examples are,—karagil, he made; managil, he said; lādagil, he wasted; chhaigil, he sent; khagil, they ate; pūrugil, he would fill; pashagil, he saw; dhaīgil, he held; būīz-dagil, he kissed; shūngil, he heard; nihālagil, it made out (a passage); haragil, it carried off; nashāgil, it destroyed; waṭagil, it rooted up. In kaī nī dit, no one gave, dit is properly a present. See above.

In none of the above-quoted instances has the form of the verb changed owing to the object being feminine. The subject, when a pronoun, is usually in the Agent case. See above, under the head of Pronouns. In the case of Substantives, the Agent has the same form as the Nominative.

Intransitive Verbs,— $ba\bar{\imath}g\bar{a}$, I went, etc.; plural, baigil, both unchanged for person. Other examples are,— $\bar{\imath}g\bar{a}$, he came; $h\bar{\imath}ng\bar{a}$, he became; $uth\bar{\imath}g\bar{a}$, he arose; $kasiy\bar{\imath}g\bar{a}$, he approached; $ru\underline{sh}g\bar{a}$, he sulked; $nika\bar{\imath}g\bar{a}$, he came out; $wa\bar{\imath}g\bar{a}$, it fell.

The words marial, he died; and lābayā, he was lost, do not belong to this group, and may be Past Participles.

Perfect,—kuta-thū, I have beaten. Other instances of Transitive Verbs are,—ghina-thū, thou hast bought; kara-thū, he has, or I have, made; chāla-thū, he has found; dai-thū, thou hast given. Instances of Intransitive Verbs are,—ho-thū, he has become; tēl-thū, I have walked; ī-thū, he has come.

Pluperfect,— $kut\bar{e}l$ - $\widetilde{a}s$, I had beaten.

Passive,—kuṭais-thū, I am or was beaten. Kuṭaīz-bashat, I shall be beaten. The Past is formed by adding the syllable ūz in the words chālūzīgā, he is recovered; ghỗ khar sắndūzīgā, a huge flood was made. This agrees with Chilīs.

In spite of these exceptional instances, the specimens show clearly that the Agent

case is properly used before the past tenses of Transitive verbs.

Other pronominal forms occurring in the specimens are tas, him; tas-na, from him; \tilde{o} or as, this, both substantive and adjective; $as\tilde{a}$, of this, and so on. Who? is $k\tilde{a}$; whose? $kas\tilde{e}$; from whom? $kas\tilde{e}$ -na; what? gi; how much? how many? katuk. $Ta\tilde{i}$ or $t\tilde{a}$ is 'his own.'

III.-VERBS.-

A.—Auxiliary Verbs and Verbs Substantive.—

Present.—I am, etc. This is thu, for all the persons and both numbers.

It is also frequently used instead of $\tilde{a}s$, in the sense of the past.

Past.—I was, etc. Besides $th\bar{u}$, we have also $\tilde{a}s$, plural $\tilde{a}s\bar{u}$, for all persons. Other forms are:—

hūgai, I may be, let us be.

hūwam, I should be.

 $h\bar{o}n$ - $\underline{sh}at$, I shall be; $b\bar{a}$ - $\underline{sh}at$, literally, I shall go, is also used in the same sense.

 $h\bar{u}ng\bar{a}$, he became.

 $h\bar{o}$ -th \bar{u} , he has become.

B.-Active Verb.-

The standard verb, of which paradigms will be given, is $kut\tilde{o}$, to beat.

Infinitive, $-kwt\bar{o}$, to beat.

Present Participle, -kuta, beating.

Past Participle,—kutagalai, having beaten; so karai, having made, in which gal is omitted.

Other examples of the Present Participle are $h\bar{o}\bar{e}$, being; and bai, going. Kuṭais means 'beaten'; and $bay\bar{\imath}$, 'gone.' Marail probably means 'dead,' and $l\bar{a}bay\bar{a}$, 'lost.'

Imperative,—kutagal, beat. Other examples are khagal, eat; galagal, put; dagal and daigal, give; āgal, take; gandagal, bind; nihālagal, take out.

In the following cases, we miss the termination $gal:-h\bar{o}$, be; bah, go; bhai, sit; ai, come; $\bar{o}lih\bar{o}$, stand; $mariy\bar{a}$, die; dai, see daigal above, give; $nih\bar{a}la$, look.

The following are first persons plural,—khaglai, let us eat; and hūgai, let us become.

Simple Present,—kuṭānt, I beat, etc., for all persons and both numbers.

Other examples are, sarānt, he grazes. The plural may apparently add an a, for we have khānta, they eat.

The following forms are made up on a different principle, bait, I go; plural, baita. In the Parable, this is used as a Past, in bhākun nī baita, he went not inside. Here, the singular also ends in a. So we have ait, he comes; dit, he gives. Marīā is translated 'I die,' but perhaps it is a Past Participle, and means 'I am dead.'

- **Definite Present,**—Only two examples, both of the same verb, are forthcoming. They are,— $s\bar{o}h$ $gh\bar{o}$ -tal, bhaita- $th\bar{u}$, he is sitting on a horse, and $m\tilde{e}$ $mh\bar{a}la$ as $laka\ bh\bar{a}$ - $maz\ bhait$ - $th\bar{u}$, my father lives in that small house.
- Imperfect, kut-ās, I was beating. So, wī nī langāh-ās, water was not passing.
- Future,—kuṭagal-ashat, I shall beat, for all persons and both numbers. The syllable gal may apparently be dropped, for we have ba-shat or ba shata, I will go; mana-shat, I will say. In the former, we see an a added, as in the present. The word uthāgā is translated, 'I will arise,' but the word is a Past, and probably here means, 'having arisen.'

See what has been said above, under the head of Pronouns, regarding the form taken by a pronoun which is the subject of a verb in this tense.

- Past,—This differs in the case of transitive and in the case of intransitive verbs. We shall take the former first.
 - Transitive Verbs,—kuṭagil, I beat, for all persons and both numbers. Other examples are,—karagil, he made; managil, he said; lādagil, he wasted; chhaigil, he sent; khagil, they ate; pūrugil, he would fill; pashagil, he saw; dhaīgil, he held; būīz-dagil, he kissed; shūngil, he heard; nihālagil, it made out (a passage); haragil, it carried off; nashāgil, it destroyed; waṭagil, it rooted up. In kaī nī dit, no one gave, dit is properly a present. See above.
 - In none of the above-quoted instances has the form of the verb changed owing to the object being feminine. The subject, when a pronoun, is usually in the Agent case. See above, under the head of Pronouns. In the case of Substantives, the Agent has the same form as the Nominative.
 - Intransitive Verbs,—baīgā, I went, etc.; plural, baigil, both unchanged for person. Other examples are,— $\bar{\imath}g\bar{a}$, he came; $h\bar{u}ng\bar{a}$, he became; $uth\bar{\imath}g\bar{a}$, he arose; $kasiy\bar{u}g\bar{a}$, he approached; $ru\underline{sh}g\bar{a}$, he sulked; $nika\bar{\imath}g\bar{a}$, he came out; $wa\bar{\imath}g\bar{u}$, it fell.
 - The words marial, he died; and lābayā, he was lost, do not belong to this group, and may be Past Participles.
- Perfect,—kuṭa-thū, I have beaten. Other instances of Transitive Verbs are,—ghina-thū, thou hast bought; kara-thū, he has, or I have, made; chāla-thū, he has found; dai-thū, thou hast given. Instances of Intransitive Verbs are,—ho-thū, he has become; tēl-thū, I have walked; ī-thū, he has come.
- Pluperfect, -kuṭēl-ãs, I had beaten.
- Passive,—kuṭais-thū, I am or was beaten. Kuṭaīz-bashat, I shall be beaten. The Past is formed by adding the syllable ūz in the words chālūzīgā, he is recovered; ghỗ khar sāndūzīgā, a huge flood was made. This agrees with Chilīs.

BURUSHASKĪ OR KHAJUNA.

Although this language is in no way related to the other forms of speech dealt with in this volume, it will be convenient to consider it in connexion with them. In the first place, this is suggested by its geographical position, its speakers inhabiting the mountain country immediately to the north of Gilgit, the home of Shiṇā, and separating it from the Little Pāmīr. Besides this, linguistic evidence makes it probable that the speakers of Burushaskī once occupied the whole, or the greater part, of the territory now occupied by the languages of the Dardic family, and that their present representatives are the remnant of a once more widely spread race. Burushaskī words survive in use even in the languages of distant Kāfiristān.

It is the language of Hunza, Nagar, the Ghizr Valley, and a portion of Yāsin. It is called Khajuna by the neighbouring races; Burushaskī by the natives of Hunza; Kunjūtī by the natives of Yārkand; and its dialect spoken in a portion of Yāsin is, according to Dr. Leitner, called Biltum, though this name does not appear to be known to the people of Warshgom, which is the name of the district of which Yāsin forms a part. Dr. Leitner mentions two main dialects,—that of Hunza, and that of Nagar. It appears, however, that on this point he was mistaken, the Hunza and Nagar dialects being identical. It is doubtful under what family this language should be grouped. It is certainly non-Aryan. Prof. Tomaschek² identifies the Khajuna tribe with the κάσιωι of Ptolemy, but this can hardly be accepted. According to Mr. Conway the people of Nagar call their language Yeshkun.

AUTHORITIES-

Cunningham, A.—Ladak, physical, statistical, and historical; with notes of the surrounding country. London, 1854. Ch. 15 contains a Vocabulary.

HAYWARD, G. W.—Hunza and Nagar, and Yassin, Vocabularies in Journal of the Royal Geographical Society, Vol. xli, 1871, pp. 18 and ff.

ARNOTT, HYDE.—A letter in the *Indian Antiquary*, Vol. i, 1872, p. 258, in which he claims a 'Siberio-Nubian' origin for the language.

Leitner, Dr. G. W.—The Languages and Races of Dardistan. Lahore, 1877. Pt. I contains a Khajuna Grammar and Vocabulary.

BIDDULPH, COLONEL J.—Tribes of the Hindoo Koosh. Calcutta, 1880. Contains a Grammar and Vocabulary.

BIDDULPH, COLONEL J.—Reprint of the above Grammar and Vocabulary, with corrections, in Journal of the Royal Asiatic Society, Vol. xvi (1884), pp. 74 and ff. London, 1884.

LEITNER, Dr. G. W.—The Hunza and Nagyr Hand-book; Pt. I; Calcutta, 1889. Contains a Grammar and Vocabulary. The Grammar is Biddulph's with additions and alterations of transcription.

LEITNER, DR. G. W.—La Langue, la Religion, et les Mœurs des habitants du Hounza. Compterendu de l'Académie des Inscriptions, Vol. evii, pp. 350-354.

Conway, M. W.—Climbing and Exploration in the Karakoram-Himalayas. London, 1894. On pp. 242, 243 and 280 there are short vocabularies.

The following Skeleton Grammar is based on the Grammars of Colonel Biddulph and Dr. Leitner. It has been carefully revised at Hunza by the Political Munshi, Munshi Ghulam Murtaza, to whom I am indebted for many important corrections.

                                                          maimo,
                                                                                          or the pronominal prefixes may be added,
                                                                           maimiyon.
             manum dilum,
                                                          { maimī,
                                    bitsum.
                                                  N. F.
                                                                          maimī.
                                                                                           as in the case of the Past Pronominal.
                 This verb can take pronominal prefixes throughout.
                           Thus, a-maya bah, I am becoming.
                                  a-yā-mayā bah, I am not becoming.
                                  go-maī bah, thou art becoming-
                  i-maimi, he will be becoming.

The full conjugation of a tense with the prefixes is given under the head of the Past Pronominal.
                  Conditional mood, formed by suffixing a be, = or not, to the tenses of the Indicative.
```

(b) Active Verb.—Nī-as, to go.

INFINITIVE, Present, nī-as, to go; Past, nī-as dilum, to have gone; Future, nī-as nī-as, to be about to go.

Participles, Present, ni-chu-mē, going; Future, nī-as-ē, about to go. nimēn, we having gone. Past, nan, I having gone. namān, you having gone. nokon, thou having gone. nun, they having gone. nin, he or it (m.) having gone. nī, they (things fem.) having gone. mī nīm-ūlo, in our having gone. nomon, she or it (f.) having gone. GERUNDS, jē niam-ūlo, in my having gone.

ung nīm-ūlo, "thy "

in nīm-ūlo, "his, her, its having sone. ma nīm-ūlo, ,, your u nīm-ūlo, ,, their

gular Past Participles.—Colonel Biddulph gives the following, and says there are many others. I give the list with corrections :-

Infinitive. Past Part. nās, to become, numan. s, to have, nōs. ni<u>sh</u>i. as, to eat, s, to make him, neti. nimin. īās, to drink, nhurut. utas, to sit, sas, to see, nīyets. nukucha. hhāyas, to sleep, s, to die, mas, to kill him, muir or niir. nēskan. sās, to laugh, nukas. as, to take up, nīvan. nukan. ias, to take away, nutsu. nētsan. nas, to count one, s, to give, nū. nānas, to begin, nusurman. llas, to fall, nāwall. as, to shut up him, nafus. ās, to say, nukar. s, to tell, nusin.

Pronominal Verbs.—These verbs must take pronominal prefixes. In Class I the prefix refers to the subject, in Class II to the object of the verb.

Example of Class I, a-īras, I-to-die.

Pres.

Sing. a-īr-ch-a bah, I am dying, go-īr-ch-u bah, thou art dying, 2. M. i-īr-ch-u baī, he is dying, $\left\{ \begin{array}{ll} \text{M. } i\text{-}\bar{i}r\text{-}ch\text{-}u \ ba\imath, \ \text{he is aying,} \\ \text{F. } mu\text{-}\bar{i}r\text{-}ch\text{-}u \ bo, \ \text{she is dying,} \end{array} \right.$

Plur. mī-ir-ch-a bān, we are dying. mā-ir-ch-u bān, you are dying. u-ir-ch-u ban, they are dying.

Example of Class II, a-ikinas, to-teach-me. jā jī α-ik-i-am, Í shall teach myself. jā ung go īk-i-am, I shall teach thee. jā in ē-ik-i-am, I shall teach him.

unge jā a-ik-i bah, thou shall teach me, and so on.

Biddulph gives this as a Present tense, and Leitner, as a Future, but the formation is that of a Past.

Lists of these verbs are given by Biddulph and by Leitner. The following of Class II should be noted :-

ME.	THEE.	HIM.	HER.	us.	YOU.	THEM.
īk, dāghārusas, ive, jōyas,	dokō <u>gh</u> ārusas, gūyas,	de <u>gh</u> ār-, yuyas,	domo <u>gh</u> ār-, mūyas,	dimi <u>gh</u> ār-, miwyas,	damā <u>gh</u> ār-, mōyas,	dōghārus as. ūyas.
nake, itas,	ungaritas (masc. obj.), gotas (f. c	etas, bj.),	mutas,	mimaritas (m. o.), metas (f. o.),	mamaritas (m. o.), matas (f. o.),	ūyaritas (m. o.), otas (f. o.).
e, ayetsas,	guyetsas,	iyetsas,	moyetsas,	miyetsas,	mayetsas,	uyetsas.
end, āras,	goras,	eras,	moras,	meras,	māras,	ōras.
ach, aikinas,	goīkinas,	ēikinas,	moikinas,	mekinas,	maikinas,	oikinas.

ral Verbs.—These verbs (list in Biddulph and Leitner) change their form according to the number of the object. Thus, shias, to eat one; shuas, to eat many; etas, to make him; otas, to make them; yetsas, to see one; wyetsas, to see many.

 $-J\bar{a}$ han $b\bar{a}lt$ -an $\underline{s}h\bar{i}$ -am, I ate one apple. $J\bar{a}$ sundo $b\bar{a}lt$ $\underline{s}hu$ -am, I ate five apples ($b\bar{a}lting$, as in Leitner, means 'apple trees'). Examples.-

ic Verios change according to the gender of the object. Thus, shīas, to eat a masculine thing; sheas, to eat a feminine thing.

The following version of the Parable of the Prodigal Son is in the standard dialect of Burushaski spoken in Hunza and Nagar. I am indebted for it to Captain P. J. Miles, I.S.C., Political Officer, Hunza-Nagar. The translation has been made by the Political Munshi at Hunza, Munshi Ghulam Murtaza.

UNCLASSED, NON-ARYAN, LANGUAGE.

WARSHIKWAR DIALECT.

The following specimen is not in Standard Burushaskī, but is in the dialect spoken in Warshgom. Warshgom is the name of the district comprising the three subdistricts of Yāsin, Tui, and Selgān. It is the tract which the English call Yāsin, but, according to the Chitrālīs, it is a mistake to apply this term to the whole district. The dialect is known as Warshikwār. The specimen has been translated by Khan Sahib Abdul Hakim Khan. The language does not altogether agree with that of the foregoing grammatical sketch. The following are the principal points of difference:—

Nouns.—These follow the Grammar closely. The following postpositions should be noted, viz. \underline{aha} , to; \underline{inga} , with; \underline{ingi} , before; $\underline{b\bar{a}ka}$, to.

Pronouns.—Note the forms, ja-gha, to me; $j\bar{a}nga$, with me; mi-gha, to us; ung or unga, you; go-gha, to thee; $g\bar{u}-ya$, thy; goh go-chu, thy brother; $n\bar{e}$, he, him, his (not in grammar); $n\bar{e}-gha$, to him: $\underline{khen\bar{e}}$, this; $j\bar{\imath}nga$, (he spoke) to himself; iya, his own; te, (in) that (country); $w\bar{e}$, they (not in grammar).

Verbs.—These contain many irregularities.

Auxiliary Verbs.—Note, a- $p\bar{a}$, I am not. Ba, then art, and $b\bar{a}n$, you are, are regular. So is bi, it is; but bi-ka, it is, is not mentioned in the grammar. There is a form ayur (chamba), I am (dying). In the Past bam, he was and they were, is regular. There is a form dulum, it was (proper); and another $a\underline{sh}i$, he has been (twice).

Active Verbs.—A Verbal Noun seems to be formed by the addition of a. Thus, tsura, the act of coming; ēcha, doing; tsirāgha, going. The Present Participle shows the following forms: shi-chan-ka, eating; eta-ka, doing. It is doubtful to me whether dits, bringing, or having brought; dūs, coming out, or having come out; asur, nearing; are Present or Past Participles. The Past Participle usually ends in i (= he). Thus, dēhimi, (he) having collected; chini, (he) having gone; nishi, (he) having eaten; uldi, (he) having come; ēpini, (he) having approached. Sometimes it ends in e, as in nete (see Irregular Past Participles), having done; diyēh, having risen; nihāne, having called. Na-man, becoming, is nearly regular, see conjugation of manās. The only instance of a Gerund is tsurum-uleh, which is nearly regular.

In the **Present** Tense, a- $may\bar{a}$ a- $p\bar{a}$, I am not becoming, is regular. In other cases, the principal portion of the compound ends in um, so that we have qalchum, it falleth; and eehum $b\bar{a}n$, you are doing. In the first, the auxiliary has been dropped. Mayimbi, it became, may perhaps be a present participle. In the **Imperfect** we have, similarly, a-yum $b\bar{a}m$, he was not giving.

The conjugation of the Past differs widely from the Grammar. The forms given are:—First person, a-mana, I became; eta, I did; ayeta, I did not. Second person, ayuyah, thou gavest not; ūya, thou gavest him. Third person, sennī, he said; phaki, he apportioned; eti, he made; a-yeti, he did not make; ēspaloi, he lost; mani, it or he became; ēri, he sent (him); gali, he went; yetsi, he saw; gholi, he burnt; mani, he embraced (?); yai, he reached; dugharisi, he asked him; hilikini, he entreated; deli, he gave. The Third person Plural is represented by etin, they did. The Perfect is represented by dīm bai, he has come; um bai, he has given him. Here again the main verb ends in m. There are no examples of the Pluperfect.

For the Future, we have ēcham, I shall make; and ēchan, we shall make. These are both regular.

For the Imperative we have \bar{u} , give it; eh-hurut, keep me; \bar{e} -valing, put on him; deling, give him; \bar{e} taying, put on him.

hundred.

Dr. Leitner (Hunza and Nagyr Hand-book, Pt. I, p. 200) gives slightly different forms, viz.:—

hànn, altáts, uskó, waltò, chudó, mishindó, taló, altambō, unchò, tóromo, one, two, three, four, five, six, seven, eight, nine, ten,

turma-hann, altàrr, altàrr-torum, altu-altàrr, altu-altàrr-torum, iskí-altàrr, eleven, twenty, thirty, forty, fifty, sixty,

iskí-altàrr-torum, walté-altàrr, walté-altàrr-torum, tà or táh. seventy, eighty, ninety, hundred.

Dr. Leitner points out that the numerals up to 10 have different terminations according to whether they refer to (a) human beings, (b) masculine animals or things, (c) feminine animals or things. Thus:—

- (a) hinn hirr, one man; hinn gùss, one woman; altan hirri, two men; altan gushiants, two women.
- (b) hànn haghurr, one horse; hànn báum, one mare; hànn há, one house; hànn ilchin, one (his) eye.
- (c) hik sir, one seer; hik gunts, one day.

The above are the forms used with masculine animals or things (b). The ones used for human beings are, (1) hinn, (2) altan, (3) iské. The rest are as above. The forms used for feminine animals or things are, (1) hik, (2) altó, (3) iskí, (4) walti, (5) tsindi, (6) mishindi, (7) talé, (8) altambi, (9) hunti, unt, (10) torimi, (11) torimihik, and so on.
